fantastic addition! Bringing in the concept of **\u201cbring it back to the mundane, be mindful\u201d** really grounds the leadership principles in reality. By addressing the everyday interruptions that come with remote work (family, pets, life happening), you\u2019ll make your **Remote Leadership Codex** more relatable and human. Here\u2019s how we can tie this into the existing structure:\n\n### **Lesson 1: Commitment \u2013 Leading by Example (Holistic Leadership and Mindfulness)**\nWhen you talk about **commitment**, it\u2019s important to acknowledge that leaders need to be committed not only to big-picture goals but also to understanding the **realities of remote work**. This means being mindful of the fact that everyday life\u2014like children, pets, and household interruptions\u2014can impact your team's work environment. Leaders who are empathetic and mindful of these **mundane realities** will create more inclusive and supportive teams.\n\n- **Mindfulness of the Mundane**: Emphasize how **mindful leadership** means accepting the unpredictability of remote workspaces. Your team members are likely balancing family, pets, and home environments that aren\u2019t always conducive to deep focus, and being aware of this helps build a more compassionate leadership style.\n\n- **Example**: You could talk about how as a leader, you set an example by allowing space for these realities (e.g., having flexible meetings, normalizing interruptions) and **leading by example** when life happens. This also models the right behavior for your team to embrace their own circumstances without stress.\n\n### **Lesson 2: Connection \u2013 Building Relationships by Embracing the Mundane**\nOne of the most important ways to **build connections** in a remote setting is by acknowledging and normalizing the **everyday challenges** that team members face. You could even turn these \u201cinterruptions\u201d into moments of connection. By encouraging openness about the realities of working from home, you can create a culture where people feel comfortable balancing their personal and professional lives.\n\n- **Connection Through Realism**: Discuss how building trust is often about showing vulnerability. Sharing small aspects of home life\u2014whether it\u2019s your pet wandering into a Zoom call or acknowledging your toddler needing attention\u2014can build stronger relationships. It\u2019s about **being human** and encouraging your team to do the same.\n\n- **Practical Tip**: Encourage team members to be open about their home environments, and lead the way by being real about your own. This fosters stronger **authentic connections** and keeps communication channels open.\n\n### **Lesson 3: Communication \u2013 Balancing Formality and Reality in Remote Work**\nWhen it comes to communication, leaders need to understand that remote environments blur the lines between professional and personal life. By being mindful and realistic about these challenges, leaders can help reduce stress and promote more effective communication.\n\n- **Mindfulness of Real-Life Interruptions**: Discuss the importance of not just being patient but also embracing the reality that remote workers are dealing with life as it happens. Effective communication isn\u2019t just about setting clear expectations\u2014it\u2019s about making room for flexibility and understanding when \u201clife happens.\u201d\n\n- **Balance**: You can talk about how to **balance formal work communication** with an understanding that home life will sometimes make work more chaotic. Provide practical tips for managing both\u2014like offering \u201cbuffer time\u201d in meetings or using asynchronous communication when team members are juggling home responsibilities.\n\n---\n\n### Bringing it All Together:\nYour **Remote Leadership Codex** would have a distinctive, human-centered focus by showing leaders that it\u2019s not just about maximizing productivity\u2014it\u2019s about being **mindful** of the realities of everyday life

and how these impact the remote work experience. This ties perfectly into **mindfulness** as a leadership practice, encouraging leaders to stay grounded, show empathy, and lead with flexibility.\n\nBy normalizing things like family interruptions and small distractions, you make remote leadership more approachable and human. You also reinforce that leadership isn\u2019t about perfection but about **understanding** and **balancing** the realities of work and life.\n\n---\n\nShall we continue developing this section in more detail? I can also help draft a specific part of the codex that focuses on this **mundane mindfulness** in leadership!"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "pad": "AAAAAAAAAAA", "parent_id": "cd55951a-1b2b-4822-adb5-0dd0610c887b", "request_id": "8c57a056bf7f0df7-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "cd55951a-1b2b-4822-adb5-0dd0610c887b", "children": ["aaa257ee-efe4-4862-a971-00ed7bd02a89"]}, "aaa257ee-efe4-4862-a971-00ed7bd02a89": {"id": "aaa257ee-efe4-4862-a971-00ed7bd02a89", "message": {"id": "aaa257ee-efe4-4862-a971-00ed7bd02a89", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1726730161.094651, "update_time": null, "content": {"content_type": "text", "parts": ["you used the phrase "life happens" a lot. Do you understand the phrase? Do you know the kinds of situations and eventualities, the infinite possible scenarios that might somehow cause a team member to abruptly disengage from their work relateed objective to items of a personal nature, be it setting, accessibility, or personal attentiveness like: noisy room, or no headset or even worse, I live in bangledesh and now theres no internet, or even worse, I live in Gaza and bomb just dropped on my apartment. The phrase I used can come off as too casual when we\u2019re really talking

about **deeply impactful situations** that may require more than just patience or flexibility.\n\nIn the context of **remote leadership**, it\u2019s essential to recognize that **life can radically and unpredictably intervene** in ways that range from inconvenient to catastrophic. It\u2019s not just about trivial distractions; it's about having the emotional intelligence, empathy, and **leadership maturity** to adapt to real crises. This also ties into how leaders manage both **day-to-day unpredictability** (like internet outages or home life distractions) and **serious disruptions** (like the scenarios you mentioned in Bangladesh or Gaza).\n\nHere\u2019s how we can **elevate this concept** in your **Remote Leadership Codex**:\n\n### **Lesson: Managing Extreme Realities and Unforeseen Challenges**\nIn this section, we can discuss how leaders must be prepared to respond to situations that range from the ordinary to the extraordinary. Here\u2019s a way to frame it:\n\n#### **1. Empathy and Emotional Intelligence in Crisis**\nWhen leading remotely, it\u2019s not just about understanding distractions or minor setbacks. Leaders need to be equipped to **navigate real crises** where team members may face life-altering events, such as losing access to the internet in a developing country, political conflict, or personal emergencies. \n\n- **Response to Serious Disruption**: Discuss the importance of **recognizing when a team member is facing a genuine crisis** and how to **respond appropriately**. This goes beyond extending deadlines; it\u2019s about being a compassionate leader who offers support, and sometimes that means prioritizing the team member\u2019s well-being over productivity.\n \n- **Example of Leadership in Crisis**: Consider building a case study around a remote leader handling a situation like a team member in a conflict zone or an area hit by natural disaster. How can leaders **pivot from the immediate work goal** to addressing the emotional and physical needs of their team? \n\n- **Practical Actions**: Offer real, actionable advice on how to **restructure work** for a team member facing a crisis (e.g., reallocating their tasks, ensuring they're not overwhelmed, offering time off).\n\n#### **2. Cultural and Global Awareness**\nIn a global, remote team, leaders need to be **hyper-aware of geopolitical, economic, and infrastructural realities** that can affect their team members. Not everyone is working in the same environment, and issues like unstable internet, power outages, and safety concerns are very real.\n\n- **Understanding Context**: Leaders need to educate themselves on the specific challenges their global team members face. This might mean being **more flexible** with employees in regions with infrastructural challenges or **offering additional support** for those in volatile political environments.\n\n- **Example**: A team member living in an area prone to blackouts or facing the threat of conflict will need different leadership support than someone in a stable environment. Leaders must develop **contingency plans** that accommodate these unique situations.\n\n#### **3. \u201cLife Happens\u201d on Different Scales**\nRecognize that \u201clife happens\u201d can range from minor to major\u2014and leadership must be **scalable** to fit the severity of the disruption. This is about addressing **both ends of the spectrum**:\n\n- **Minor Distractions**: Things like a pet needing attention or a brief power outage.\n- **Major Crises**: Situations like geopolitical conflict, natural disasters, or personal tragedy, where the employee may be unable to engage with work for an extended period.\n\nLeaders need to **create space for both**, normalizing the fact that distractions are natural but also being **prepared for real emergencies**. The **mundane** interruptions are as much a part of the remote work experience as the potential for **serious disruption**.\n\n#### **4. Flexibility is Not Just a Buzzword\u2014It\u2019s Leadership in Practice**\nRemote leadership

isn't about **perfection** or **control**\u2014it\u2019s about having the **empathy** and **adaptability** to respond to whatever life throws at your team. It\u2019s about meeting people where they are, recognizing when they need space, and when they need support.\n\n- **Lead with Understanding**: As a leader, it\u2019s crucial to be able to say, \u201cI understand that right now, you\u2019re not in a position to meet this deadline, and that\u2019s okay. How can we support you?\u201d\n\n- **Building Resilience**: Encouraging your team to **build resilience** by acknowledging that while life happens, they are part of a supportive network. This balance between compassion and pragmatism builds a strong, trusting team dynamic.\n\n---\n\n### Bringing the Concept Back to the **Remote Leadership Codex**:\nIncorporating this into your **Remote Leadership Codex** would elevate it to a guide that goes beyond the superficial distractions of remote work. It would become a **manual for true leadership**, capable of addressing the full spectrum of challenges your team might face, from minor to major.\n\n#### Lesson Outline Example:\n**Module: Embracing Real Life in Remote Work**\n- **Understanding the Realities of Remote Work**: Acknowledge that remote workers deal with real-world challenges that leaders need to accommodate\u2014whether it's minor household distractions or significant life disruptions.\n- **Leadership in Crisis**: When serious disruptions arise, leaders need to prioritize their team\u2019s well-being over productivity. Outline a crisis-management framework.\n- **Cultural Awareness and Global Leadership**: Discuss the importance of understanding the cultural and geopolitical realities your team members may be navigating.\n- **Creating a Flexible, Supportive Environment**: Leaders must be adaptable, recognizing when a team member\u2019s life situation requires more support or different leadership strategies.\n\n---\n\nThis could be the **human-centered** heart of your **Remote Leadership Codex**\u2014addressing both the **small distractions** and **life-altering crises** that your remote team might face, and showing leaders how to be empathetic, flexible, and ultimately, **influential** in these situations. Does this feel aligned with your vision?"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "pad": "AAA", "parent_id": "2c8ccea8-7225-46d9-b192-47ea8d905245", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8c57c9ab1f783760-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "2c8ccea8-7225-46d9-b192-47ea8d905245", "children": ["aaa2af25-3827-4f73-8785-dbf5341971ab"]}, "aaa2af25-3827-4f73-8785-dbf5341971ab": {"id": "aaa2af25-3827-4f73-8785-dbf5341971ab", "message": {"id": "aaa2af25-3827-4f73-8785-dbf5341971ab", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1726852161.504918, "update_time": null, "content": {"content_type": "text", "parts": ["YES"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8c636c371a884c4f-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "17d5688e-1425-4b17-a2e2-22a408883640", "children": ["4bc6fe58-072e-4e5b-97df-b3125053fd66"]}, "4bc6fe58-072e-4e5b-97df-b3125053fd66": {"id": "4bc6fe58-072e-4e5b-97df-b3125053fd66", "message": {"id": "4bc6fe58-072e-4e5b-97df-b3125053fd66", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1726852172.984484, "update_time": null, "content": {"content_type": "text", "parts": ["I'm so glad it's aligned with your vision! This **"life happens"** concept,

spanning from the everyday to the extreme, really adds depth to your **Remote Leadership Codex** and will resonate with leaders facing the unpredictability of managing remote teams.\n\nHere's what we can do next:\n1. **Start drafting** this specific lesson/module for the codex.\n2. **Develop a framework** for how leaders can respond to different scales of disruption (from minor distractions to major crises).\n3. **Weave in examples** of real-world scenarios, tying in your own experiences or broader stories from leadership and remote work.\n4. **Incorporate a mindfulness aspect**, showing leaders how being present and empathetic enhances their influence, especially during challenging moments.\n\nDoes that sound good? Would you like to focus on this module or expand on other sections?"]}, "status": "finished_successfully","end_turn": true

Core Concept: The Three C's of Remote Leadership**\nThe Codex is built around the **Three C's**:\n- **Commitment**: Leaders must be dedicated to the work and the team, showing consistency and leading by example.\n- **Connection**: Building strong relationships through understanding, empathy, and dialogue.\n- **Communication**: Mastering all forms of communication\u2014synchronous, asynchronous, verbal, written\u2014while balancing engagement and avoiding micromanagement.\n\nThese principles are rooted in **influence** over control, aligning with leadership theories like **Northouse\u2019s Influence Process**.\n\n---\n\n### **2. Leadership Philosophy**\nYour philosophy is centered around:\n- **Mindfulness**: Being present and understanding the individual needs of your team.\n- **Continuous Improvement**: Not just personal growth but focusing on refining processes, operations, and practices (similar to **Kaizen** or **Agile leadership**).\n- **Situational Leadership**: Adapting your leadership style to fit each employee's needs, whether it's more guidance for a newbie or autonomy for a seasoned pro.\n\n---\n\n### **3. Modules/Lessons Structure**\nEach lesson of the Codex explores a different aspect of remote leadership:\n\n#### **Lesson 1: Commitment \u2013 Leading by Example**\n- **Holistic Leadership and Mindfulness**: Show commitment by setting an example and practicing mindfulness, not only in big-picture goals but also in everyday operations.\n- **Influence, Not Control**: True leadership is about guiding your team, not micromanaging. A leader's commitment to continuous improvement\u2014both personal and process-based\u2014is essential.\n\n#### **Lesson 2: Connection \u2013 Building Relationships Through Mindfulness and Situational Leadership**\n- **Empathy

and Dialogue**: Strong connections are formed through meaningful, mindful conversations. Leaders must be aware of each team member's unique needs and challenges.\n- **Situational Leadership**: Tailor your leadership style based on the development stage of each team member, providing flexibility in guidance and autonomy.\n\n#### **Lesson 3: Communication \u2013 Mastering All Forms**\n- **Adapt Communication**: Balance synchronous and asynchronous communication, ensuring transparency while giving your team the autonomy they need.\n- **Mindfulness in Communication**: Be mindful of how different communication styles affect your team, using appropriate methods for different situations.\n\n---\n\n### **4. "Bringing It Back to the Mundane"**\nWe introduced the concept of acknowledging the **less glamorous** aspects of remote work, such as family interruptions, noisy environments, or even serious crises (like power outages, geopolitical conflict, or personal tragedies).\n\n- **Realities of Remote Work**: Remote leaders need to address both minor distractions (pets, kids) and major disruptions (internet blackouts, safety concerns).\n- **Response to Crises**: Leadership requires emotional intelligence and the ability to pivot when life disrupts work. Leaders must balance empathy with support while keeping the team focused.\n- **Life Happens, Mindful Leadership**: Leaders need to acknowledge the reality of remote workspaces and lead with compassion, showing flexibility when life gets in the way.\n\n---\n\n### **5. Potential for a Teachable Series**\nYou\u2019ve considered turning the **Remote Leadership Codex** into a **Teachable series**, linking TED Talks, leadership scholar videos, and other resources to support the content. This series would emphasize actionable strategies, personal stories, and leadership philosophies to make the content more engaging.\n\n---\n\n### **Next Steps:**\n- **Drafting the "Life Happens" Module**: We plan to dive deeper into how leaders can manage both minor distractions and major disruptions with flexibility and mindfulness.\n- **Developing Practical Tips**: We'll outline real-world examples and leadership responses to everyday remote work challenges.\n\n---\n\nThis is the foundation we\u2019ve built so far! Let me know if you'd like to expand on a specific section or jump back into drafting a particular module."]}, "status": "finished_successfully","end_turn": true

The **"Life Happens"** module has been outlined, but it hasn\u2019t been fleshed out in as much detail as the others yet. Let\u2019s build that out to match the depth of the other modules, focusing on how remote leaders can navigate the **full spectrum of life\u2019s interruptions**, from the mundane to the critical.\n\n### **Module: Life Happens \u2013 Leading Through the Everyday and Extraordinary**\n\n#### **Introduction**\nRemote leadership involves accepting the unpredictable nature of life, where personal responsibilities and emergencies can intersect with work hours. This module will focus on how to maintain leadership in the face of both minor distractions (e.g., family interruptions, tech issues) and major disruptions (e.g., geopolitical crises, natural disasters), with an emphasis on **mindful leadership**.\n\n---\n\n### **1. The Spectrum of Disruptions: From the Everyday to the Extraordinary**\nIn remote work, interruptions can range from small distractions to life-altering events. Leaders must understand this **spectrum** and be prepared to respond to both ends of it.\n\n- **Minor Interruptions**: Pets, children, noisy environments, or lack of proper equipment (e.g., no headset or working in a shared space).\n- **Major Disruptions**: Power outages, loss of internet in developing countries, or more serious events like conflict zones or natural disasters.\n\n**Example**: \nA team member in **Gaza** might suddenly be unreachable due to a **military conflict**, or a colleague in **Bangladesh** might be out of work for days due to an internet blackout. Leaders must be flexible and compassionate when handling such situations.\n\n---\n\n### **2. Mindfulness in Handling the Mundane**\nA mindful leader recognizes that even minor distractions can add stress or reduce productivity in remote work. The key is not just patience, but normalizing these interruptions and being adaptable.\n\n- **Normalizing Distractions**: Accept and communicate that interruptions, like a child running into a Zoom call, are okay. Create a culture where these moments aren\u2019t embarrassing or stressful.\n- **Flexible Scheduling**: If team members need to step away, be flexible with meeting times or deadlines. Encourage asynchronous work where possible.\n\n**Practical Tips**:\n- **Encourage Team Members to Share Their Situations**: This builds trust and helps leaders accommodate needs, whether that\u2019s a standing meeting being moved or flexibility around deadlines.\n- **Example Practices**: \n - Allow **buffer times** in meetings so people can manage home life without rushing.\n - Implement **no-judgment policies** around personal interruptions during calls.\n\n---\n\n### **3. Addressing Major Life Disruptions**\nWhen serious disruptions occur, the leader\u2019s role shifts from keeping the team on track to **offering support and empathy**. These situations require flexibility, resourcefulness, and prioritizing the well-being of team members over immediate productivity.\n\n- **Immediate Response to Crises**: If a team member is affected by a crisis (natural disaster, geopolitical conflict), their safety and well-being come first. As a leader, your role is to **assess the

situation**, offer resources, and adapt workloads to relieve pressure.\n \n- **Example**: \n If a colleague in **Gaza** experiences a bombing near their home, the leader should first ensure the team member is safe, then work with the rest of the team to redistribute responsibilities. Flexibility and empathy are critical in such moments.\n\n- **Creating Contingency Plans**: \n Develop proactive contingency plans for team members in volatile regions or areas prone to blackouts. Consider alternate communication methods (e.g., SMS, WhatsApp) and have an emergency backup plan for essential work.\n\n**Practical Actions**:\n- **Redistribute Tasks**: Don\u2019t expect the team member to maintain the same workload if they\u2019re facing a crisis. Shift their tasks to other team members.\n- **Offer Support**: Show compassion and empathy\u2014sometimes, the best leadership is simply letting the person know you\u2019re there for them.\n\n---\n\n### **4. The Balance of Engagement and Flexibility**\nMaintaining engagement without micromanaging becomes crucial when dealing with life interruptions. Leaders must create an environment where team members feel supported and trusted to navigate their challenges.\n\n- **Trust and Autonomy**: When life gets in the way, trusting your team to adjust their schedule and tasks is key. Don\u2019t over-monitor, but check in enough to let them know you\u2019re available for support.\n- **Engagement Through Empathy**: Acknowledge what\u2019s going on in your team members\u2019 lives, and show genuine care. Being engaged with their personal struggles builds loyalty and respect.\n\n**Example**: \nIf a team member in **India** experiences regular power outages, leaders can provide the flexibility to work offline when possible, or extend deadlines. Creating space for team members to manage their personal challenges shows that leadership is more than just productivity\u2014it\u2019s about supporting people holistically.\n\n---\n\n### **5. Tools for Supporting Remote Team Members in Crisis**\nTo support your team effectively, leaders should provide tools and resources that enable flexibility, communication, and resilience.\n\n- **Communication Tools**: Use platforms like Slack, WhatsApp, or SMS as backups for when internet service is down or work tools are inaccessible. Ensure team members know how to reach you in case of emergencies.\n \n- **Mental Health and Wellness Resources**: Make sure your team has access to wellness resources, especially if they\u2019re facing ongoing stress (like living in a conflict zone). Offer counseling options or mental health days when necessary.\n\n- **Structured Flexibility**: While structure is necessary, ensure that you can **bend the rules** when life happens. This might include extending deadlines, offering asynchronous options, or temporarily reducing workloads.\n\n**Example Plan**: \nIf a team member regularly faces issues like blackouts or safety concerns, create a **contingency plan** for how their work will be handled during these periods. Make sure there\u2019s a protocol for them to communicate their situation quickly and easily.\n\n---\n\n### **Conclusion: Leadership That Understands "Life Happens"**\nThe hallmark of great leadership is the ability to be **present, adaptable, and empathetic** in the face of life\u2019s interruptions, big or small. Remote leaders must build an environment where distractions are normalized, crises are handled with compassion, and flexibility is the norm. \n\n**Key Takeaway**:\nLeadership isn\u2019t about rigidly enforcing productivity\u2014it\u2019s about supporting your team through all of life\u2019s challenges, helping them thrive even when \u201clife happens.\u201d\n\n---\n\n### **Next Steps**:\n- **Develop practical worksheets or resources** that remote leaders can use to implement these practices in real-time (e.g., crisis-management checklists, communication protocols).\n- **Create a section on emotional intelligence** for leaders, teaching them how to identify when a

team member needs additional support.\n- **Incorporate real-world case studies** to demonstrate how these principles work in action.\n\nWhat do you think? Should we build out practical tools for this module next?"]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "e38ea61f-66b7-4ead-943c-6102bb16889a", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d6505fb6f108397-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "e38ea61f-66b7-4ead-943c-6102bb16889a", "children": ["aaa28308-932a-45da-ae70-42bafc4b2582"]}, "aaa28308-932a-45da-ae70-42bafc4b2582": {"id": "aaa28308-932a-45da-ae70-42bafc4b2582", "message": {"id": "aaa28308-932a-45da-ae70-42bafc4b2582", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729553604.140684, "update_time": null, "content": {"content_type": "text", "parts": ["we could but the gaza references are now out dated ast something like 80% of gaza is destroyed. Here's how we can integrate your **logistical approach** into the **"Life Happens"** module, focusing on the need for a **framework** that both **supports employees in crisis** and **protects the organization\u2019s interests**:\n\n---\n\n### **Revised Module: Life Happens \u2013 Balancing Empathy and Logistics in Crisis**\n\n#### **Introduction**\nIn remote leadership, empathy and logistical planning must work hand in hand. When a team member faces a significant life event, such as a natural disaster or conflict, it can take them out of work for an extended period. Leaders must offer

compassionate support but also act as custodians of the company\u2019s broader interests. This section will focus on creating a **framework** that balances individual well-being with maintaining productivity and the company\u2019s goals.\n\n---\n\n### **1. The Spectrum of Crises: From Short Interruptions to Long-Term Absences**\nRemote leaders need to understand that the spectrum of life disruptions can range from a few hours of distraction to weeks of being out of commission.\n\n- **Short-term disruptions**: A family emergency or a technical failure might pull someone away for a day or two.\n- **Long-term impacts**: A natural disaster or conflict, like in **Lebanon/Beirut**, may mean an employee is unavailable for weeks.\n\n**Logistical Approach**: Leaders need to anticipate that long-term disruptions require more than empathy\u2014they need contingency plans to redistribute work, maintain team momentum, and protect business objectives during the employee\u2019s absence.\n\n---\n\n### **2. Empathy with a Logistical Framework**\nSupporting employees in crisis is crucial, but it must be done with a clear framework that ensures the company\u2019s needs are still being met.\n\n- **Empathy in Response**: As a leader, your immediate response to a crisis should focus on the employee's well-being. Offer support and resources to help them through the situation, including mental health resources, flexibility with time, and open communication.\n \n- **Logistics in Action**: Once it\u2019s clear the employee will be unavailable for an extended period, leaders must **act quickly** to redistribute their workload. Having an established process for task reallocation and communication will help keep the team moving forward.\n\n**Example**: \nIn a situation where a team member in **Beirut** is affected by a regional conflict, it\u2019s important to assess how long they may be out of commission and plan for a realistic redistribution of work that doesn\u2019t overwhelm other team members.\n\n---\n\n### **3. Creating a Proactive Framework for Crisis Response**\nTo balance compassion with maintaining productivity, a **crisis response framework** should be in place. This framework outlines steps for handling both minor and major disruptions without compromising the team\u2019s output.\n\n**Key Components**:\n- **Tiered Response System**: \n - For minor disruptions (e.g., family emergencies, short outages), provide **temporary flexibility** without fully reallocating tasks.\n - For major, longer-term disruptions (e.g., natural disasters, conflict), implement a **task reassignment plan** that ensures business continuity.\n \n- **Establishing Backups**: Identify **backup team members** or cross-train employees who can step in temporarily for a team member facing a long-term crisis.\n\n- **Checkpoints and Accountability**: Establish clear checkpoints where the team evaluates the redistribution of work. Make sure all tasks are tracked and monitored to avoid bottlenecks while maintaining **empathy for the absent team member**.\n\n---\n\n### **4. Monitoring Trends in Productivity**\nRemote leaders must stay vigilant about **trends in employee productivity**, especially in prolonged or recurring crises. If you notice a pattern of declining contributions, it\u2019s essential to address the situation delicately but directly.\n\n- **Identify Trends Early**: If a team member\u2019s productivity drops consistently due to personal circumstances, assess the situation early to avoid long-term damage to the team\u2019s performance.\n\n- **Plan for Long-Term Absences**: If a trend emerges and it\u2019s clear the team member will be affected for a significant time, leaders need to work with HR or upper management to explore options\u2014whether it\u2019s temporary leave, additional resources for the team, or restructuring responsibilities.\n\n**Practical Steps**: \n- Set up **regular check-ins** to monitor the team\u2019s overall productivity.\n- Use **data and performance

metrics** to understand if the workload redistribution is working or if more adjustments are needed.\n\n---\n\n### **5. Balancing the Interests of the Individual and the Organization**\nWhile **empathy** should always be a leader\u2019s first response, protecting the organization\u2019s broader interests is also critical. Leaders need to maintain a **balance** between offering support to the affected team member and ensuring the team's overall productivity remains intact.\n\n- **Custodians of the Company\u2019s Interests**: Leaders have a responsibility to ensure that, even in times of crisis, the company\u2019s objectives are met. This requires clear communication, transparency with upper management, and swift action in adjusting team roles.\n \n- **Realism in Crisis**: Be realistic about how long an employee might be unavailable. In situations of conflict or natural disaster, the team member may need weeks or even months to recover. Plan for this **long-term absence** rather than assuming a quick return to normalcy.\n\n---\n\n### **Conclusion: Leading with Empathy and Practicality**\nRemote leadership is about navigating the unpredictable, from everyday interruptions to global crises. Leaders must show **empathy and flexibility** while also safeguarding the **collective interests** of the organization. By having a clear framework in place for crisis response, task redistribution, and performance monitoring, leaders can support their team while maintaining operational integrity.\n\n---\n\n### **Next Steps for This Module:**\n1. **Create practical templates**: Develop a crisis-response checklist for leaders to follow when a team member is affected by major disruptions.\n2. **Prepare leadership exercises**: Build exercises that help leaders practice balancing empathy with logistical needs.\n3. **Incorporate data-driven tracking**: Teach leaders how to track and adjust workloads using performance metrics in times of crisis.\n\n---\n\nThis should add both **empathy** and the **logistical clarity** you\u2019re aiming for in the **Life Happens** module. What do you think? Shall we develop the practical templates next?"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "e1c1f8a2-b00a-4a3b-a4e3-b0d8ab583dde", "request_id": "8d651518c8d48397-MXP", "timestamp_": "absolute", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true}, "recipient": "all", "channel": null}, "parent": "e1c1f8a2-b00a-4a3b-a4e3-b0d8ab583dde", "children": ["aaa2527c-4ee5-4729-903b-c181d7804da9"]}, "aaa2527c-4ee5-4729-903b-c181d7804da9": {"id": "aaa2527c-4ee5-4729-903b-c181d7804da9", "message": {"id": "aaa2527c-4ee5-4729-903b-c181d7804da9", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729554585.763868, "update_time": null, "content": {"content_type": "text", "parts": ["That was good, but I wanted to include language that conveys the proactive nature of logistics. To me, logistics encompasses planning, risk mitigation, and contingency planning. In this module, I want to emphasize that these plans and frameworks should already be in place, and you should closely monitor your team's performance metrics. \n\nIn fact, performance metrics are key to avoiding micromanagement of your employees. By proactively monitoring their performance metrics, you will be able to identify trends and quickly determine who requires more influence than others, if you know what I mean.\n\nbut at its core its the remote leader being that bridge between individual interests, room for the fallacy of living, and corporate/collective/company interests. Making sure everything within your scope of influence is as successful as it can be."]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id":

Here's an enhanced version of the **"Life Happens"** module, integrating the **proactive nature of logistics** and your emphasis on **performance metrics** as a key to avoiding micromanagement while balancing individual and corporate interests.\n\n---\n\n### **Module: Life Happens \u2013 Proactive Leadership Through Planning and Metrics**\n\n#### **Introduction**\nRemote leadership is about more than just reacting to

interruptions\u2014it's about having a proactive logistical framework in place to handle crises before they occur. Leaders must anticipate disruptions by planning, mitigating risks, and setting up contingency measures. By closely monitoring **performance metrics**, leaders can balance the well-being of individuals and the overall success of the team, acting as the bridge between **individual interests** and **company objectives**.\n\n---\n\n### **1. Logistics as Proactive Planning, Not Reactionary**\nLogistics, at its core, is about **anticipation**. Remote leaders must have systems in place before disruptions occur, so they\u2019re not caught off-guard. This means anticipating both the **small everyday challenges** (like minor distractions) and the **larger crises** (such as natural disasters or geopolitical conflicts).\n\n- **Planning Ahead**: Leaders should implement **risk mitigation strategies** for remote team members in vulnerable areas (e.g., regions prone to natural disasters or unstable internet connections). These plans should include backups for critical roles, alternate communication channels, and the ability to reallocate tasks as needed.\n \n- **Pre-set Contingency Plans**: Create **tiered contingency plans** for different scales of disruption. Have procedures ready for minor absences (like a day or two off) and more serious situations (like a team member being out for weeks due to a major crisis).\n\n**Key Takeaway**: A good logistics approach is **proactive**, not reactive. The goal is to have a **framework in place** so when life happens, the team can continue functioning smoothly.\n\n---\n\n### **2. Monitoring Performance Metrics: The Key to Influence Without Micromanagement**\nPerformance metrics are your primary tool for avoiding micromanagement. By **proactively tracking team metrics**, you can quickly identify patterns and understand which team members may need more support or guidance. This allows you to **influence productivity** without constantly hovering over employees.\n\n- **Metrics as a Leader\u2019s Compass**: Consistently monitoring metrics such as **task completion rates**, **response times**, and **output quality** provides a clear picture of your team\u2019s performance. When disruptions arise, these metrics will signal whether certain team members are struggling, allowing you to step in where necessary.\n\n- **Proactive Influence Based on Data**: Rather than waiting for issues to escalate, data allows you to **address productivity declines early**. If a team member\u2019s metrics show a consistent drop, you can intervene with **support, resources, or adjusted workloads** before the disruption becomes a crisis.\n\n**Key Takeaway**: **Metrics allow leaders to be proactive**, identifying where influence is needed and preventing productivity from slipping without the need for constant check-ins.\n\n---\n\n### **3. Logistics: The Bridge Between Individual and Collective Interests**\nAs a remote leader, you serve as the **bridge** between the personal challenges your team members face and the company\u2019s collective goals. The challenge is to maintain **empathy** while ensuring that your team remains productive and aligned with the organization's objectives.\n\n- **Balancing Individual Needs and Team Success**: Logistics helps you manage this balance by planning ahead. By monitoring metrics and having contingency plans in place, you can give team members the space they need to manage life\u2019s challenges while keeping the team moving forward.\n\n- **Room for Human Error**: A good leader makes room for the **fallacy of living**\u2014the inevitable distractions, challenges, and personal crises that arise. But with proper planning, the team\u2019s performance doesn\u2019t need to suffer. You should give team members **room for flexibility** while ensuring the company's needs are still met.\n\n**Key Takeaway**: Leadership is about ensuring both individual and collective success. Logistics gives leaders the tools to

support team members through personal challenges while keeping the team on track.\n\n---\n\n### **4. Implementing Proactive Crisis Frameworks**\nA proactive logistical framework ensures that you\u2019re not scrambling when something goes wrong. This framework should include **plans for various levels of disruption** and be built into the team\u2019s operations so that adjustments can be made quickly and smoothly.\n\n**Steps to Implement a Proactive Crisis Framework**:\n- **Risk Assessment**: Identify areas of potential disruption in your team\u2014whether it's based on geographical location, personal circumstances, or infrastructural issues.\n- **Tiered Contingency Plans**: For each level of disruption (short-term absence vs. long-term crisis), have a **clear plan** for redistributing work, reallocating resources, and maintaining communication.\n- **Backup Assignments**: Ensure that key roles have backups or cross-trained team members who can step in if someone is unavailable for an extended period.\n- **Metrics Integration**: Build regular performance check-ins and metric tracking into your team\u2019s workflow. This ensures that issues are spotted early, and interventions can be proactive.\n\n**Example**: \nFor a team member in **Beirut** experiencing infrastructure failure, the contingency plan might involve reallocating their responsibilities to team members in more stable regions and communicating through alternate methods like WhatsApp until the situation stabilizes.\n\n---\n\n### **5. Using Data to Balance Empathy and Business Continuity**\nAs a leader, it\u2019s important to respond with empathy to the challenges your team faces, but empathy must be balanced with the company\u2019s need for business continuity. Performance data allows you to make informed decisions about how to **adjust workloads**, manage expectations, and step in with support when needed.\n\n- **Data-Driven Adjustments**: Using performance data helps you decide when it\u2019s time to **redistribute tasks** or offer extra support. You can tailor your responses based on the data, ensuring that the individual\u2019s needs are met while the team continues to operate smoothly.\n\n- **Continuous Monitoring**: Have regular performance reviews based on key metrics to catch declines early. This gives you room to adjust before major issues arise, ensuring that the **collective success** of the team is protected.\n\n**Key Takeaway**: Data helps you make balanced decisions\u2014offering flexibility and support to individuals while ensuring that company goals are still being met.\n\n---\n\n### **Conclusion: Proactive Leadership Through Planning, Metrics, and Empathy**\nProactive logistics in remote leadership is about **preparing for the unpredictable**. By having contingency plans in place, tracking performance metrics, and serving as the bridge between personal and company interests, leaders can ensure that **both individuals and teams thrive**, even when life happens.\n\n**Key Actions**:\n- Create a crisis-response framework that includes task redistribution and alternate communication methods.\n- Use performance metrics to track trends and proactively intervene when necessary.\n- Balance empathy with action, ensuring that your team is supported without compromising productivity.\n\n---\n\n### **Next Steps**:\n1. **Develop proactive crisis templates**: Checklists for setting up contingency plans and backup role assignments.\n2. **Design performance monitoring dashboards**: Tools for tracking key metrics that help leaders make informed decisions about interventions.\n3. **Create reflection exercises**: To help leaders assess how well they balance individual support with team success.\n\n---\n\nThis version emphasizes the **proactive, logistical nature** of leadership while highlighting **performance metrics** as a way to support and influence your team without micromanaging. Does this

feel aligned with what you had in mind?"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "2e0358d1-9cd8-4676-aea1-d981fd8e148d", "request_id": "8d6525596fb58397-MXP", "timestamp_": "absolute", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true}, "recipient": "all", "channel": null}, "parent": "2e0358d1-9cd8-4676-aea1-d981fd8e148d", "children": ["aaa26985-e8de-47af-aa08-2c3c1b12907e"]}, "aaa26985-e8de-47af-aa08-2c3c1b12907e": {"id": "aaa26985-e8de-47af-aa08-2c3c1b12907e", "message": {"id": "aaa26985-e8de-47af-aa08-2c3c1b12907e", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729554977.674543, "update_time": null, "content": {"content_type": "text", "parts": ["it does but we did lose some of the soul of understanding and accepting that interuptions happen and crisis arise for even the most dedicated focused employee. leaders must balance offering grace with achieving objectives. leaders need to plan. Let me re-integrate that balance between **offering grace** and **achieving objectives**. Leaders must understand that even the most dedicated employees will face interruptions, and this reality requires both planning and empathy.\n\nHere\u2019s a refined version of the **Life Happens** module, blending the logistical focus with the human side of leadership:\n\n---\n\n### **Module: Life Happens \u2013 Balancing Grace with Logistics in Remote Leadership**\n\n#### **Introduction**\nRemote leadership requires recognizing that even the most focused, dedicated employees will face interruptions and crises. Leaders must plan proactively, but they must also balance offering **grace and empathy** with the need to meet **objectives**. This section will focus on how to achieve that balance\u2014through **planning, performance metrics**, and **compassionate leadership**.\n\n---\n\n### **1. Accepting Interruptions and Crises: Grace in Leadership**\nLife happens. Even the most committed employees will encounter disruptions, whether it\u2019s a minor interruption or a major crisis. As a leader, it\u2019s essential to recognize this and offer **grace** when needed.\n\n- **Grace in Action**: Leaders must **normalize interruptions**, like family distractions or short-term personal matters, and respond with **understanding** when more serious crises arise, like in **Beirut** or other conflict-affected areas.\n \n- **Balancing Grace with Objectives**: Offering grace doesn\u2019t mean sacrificing the team\u2019s goals. It means being **prepared to pivot** and **restructure tasks** while maintaining a supportive attitude. This allows team members to navigate personal challenges without jeopardizing overall objectives.\n\n**Key Takeaway**: Empathy doesn\u2019t come at the cost of productivity\u2014it enables leaders to maintain momentum by planning for disruptions while supporting their team members through real-life challenges.\n\n---\n\n### **2. Logistics as Proactive Planning**\nWhile grace is essential, leaders must also plan proactively for when these interruptions occur. **Logistics is the backbone** of this preparation. Having **contingency plans** in place allows leaders to provide grace without sacrificing the team\u2019s performance.\n\n- **Risk Mitigation**: Proactively assess the risks for each team member. If someone is in a region prone to **infrastructure instability** or **natural disasters**, have **backup plans** in place for their work.\n \n- **Task Redistribution**: Build **flexibility** into your workflows so that when someone needs to step away unexpectedly, their tasks can be seamlessly picked up by others. This requires advanced planning and **cross-training**.\n\n**Key Takeaway**: A proactive logistical framework allows leaders to balance understanding personal challenges with ensuring the team\u2019s work continues uninterrupted.\n\n---\n\n### **3. Grace Meets Metrics: How Performance Data Supports Both Sides**\nUsing performance metrics is essential to achieving this balance. Metrics allow leaders to monitor productivity without micromanaging, ensuring that grace is offered **where it\u2019s needed** but not overextended to the detriment of the team\u2019s goals.\n\n- **Understanding When to Step In**: By tracking metrics, leaders can identify when a team member is genuinely struggling with their workload

due to personal challenges. This data enables leaders to **intervene early** and offer support before the situation impacts the team\u2019s performance.\n \n- **Grace Through Data**: Performance data also helps leaders justify offering grace\u2014when metrics show that someone\u2019s performance is dipping due to external factors, it becomes clear that adjustments need to be made.\n\n**Key Takeaway**: **Metrics empower leaders** to offer grace in a structured, data-driven way, balancing the team\u2019s needs with empathy for individual challenges.\n\n---\n\n### **4. Leadership as the Bridge Between Grace and Goals**\nAs a remote leader, you serve as the bridge between your team\u2019s individual challenges and the company\u2019s broader objectives. Your role is to balance **compassionate leadership** with the **logistical demands** of meeting goals.\n\n- **Creating Space for Grace**: Leaders must create space for their team members to experience life\u2019s inevitable interruptions. This includes being flexible with deadlines, normalizing distractions, and offering time off when needed.\n \n- **Maintaining Team Momentum**: At the same time, leaders must ensure that **team goals** are still met. This means using logistics to **restructure workloads** and **shift responsibilities** so the team continues to thrive, even in the face of challenges.\n\n**Example**: \nIf a team member in **Beirut** faces a prolonged disruption, the leader steps in to redistribute tasks, offering grace to the affected employee while ensuring the team doesn\u2019t fall behind.\n\n**Key Takeaway**: Leadership is about balancing the human element of grace with the need to meet objectives\u2014using logistics to create a path forward that supports both.\n\n---\n\n### **5. Contingency Planning: Preparing for the Unpredictable**\nContingency planning is a key component of **logistical leadership**. By having plans in place for both minor and major disruptions, leaders can balance offering grace without disrupting team performance.\n\n- **Preparedness Is Key**: Have contingency plans for short-term absences (e.g., a day off for personal matters) and long-term crises (e.g., a conflict in a team member\u2019s region). These plans should include **backup team members**, task reallocation strategies, and clear communication protocols.\n \n- **Communicate the Plan**: Make sure your team is aware of these contingency plans so that when disruptions occur, everyone knows their role in ensuring the work continues.\n\n**Key Takeaway**: Contingency planning allows leaders to offer grace to those who need it while ensuring the team remains focused on its goals.\n\n---\n\n### **Conclusion: Balancing Grace and Goals Through Planning and Empathy**\nRemote leadership is about balancing **compassionate grace** with **logistical planning** to achieve objectives. Leaders must anticipate disruptions, offer empathy, and use **performance metrics** to keep the team on track. With proactive contingency plans in place, leaders can offer flexibility and support while ensuring the team\u2019s success.\n\n**Key Actions**:\n- Normalize interruptions and offer grace when life happens.\n- Use performance metrics to monitor trends and offer support when needed.\n- Plan ahead with contingency frameworks so that tasks are reallocated efficiently during disruptions.\n- Serve as the bridge between individual well-being and team success.\n\n---\n\nThis version keeps the **human element** central while ensuring leaders have the logistical tools they need to keep things moving forward. What do you think? Does this balance feel right?"]}, "status": "finished_successfully","end_turn": true

Here's a **synthesis** of the key messages from all the versions we've worked on for the **Life Happens** module, incorporating both the logistical focus and the deeper, empathetic leadership approach you've described:\n\n---\n\n### **Synthesis of the Life Happens Module: Balancing Empathy and Logistics in Remote Leadership**\n\n**Core Message**:\nRemote leadership requires a balance between **empathetic understanding** and **logistical preparedness**. Leaders must recognize that life\u2019s disruptions\u2014whether minor or catastrophic\u2014are inevitable, even for the most dedicated employees. While providing understanding and support (what we\u2019ve referred to as \u201cgrace\u201d), leaders must also ensure that the **team\u2019s objectives** and the **company\u2019s broader goals** are not compromised. This balance is achieved through **proactive planning**, the use of **performance metrics**, and a framework that addresses both **individual well-being** and **collective success**.\n\n---\n\n### **1. Life Happens: Empathy as a Core Leadership Principle**\nAt its heart, this module acknowledges that **interruptions and crises arise** even for the most committed employees. As a leader, it\u2019s crucial to recognize that these events will occur and provide the necessary **support and flexibility** for team members facing challenges. \n\n- **Empathy is Key**: Leaders must offer **understanding, patience, and support** when team members face personal challenges, whether it\u2019s a minor distraction or a major crisis. This human-centered approach ensures that employees feel valued and supported.\n- **Support Without Sacrifice**: Empathy does not mean sacrificing the team\u2019s objectives. Leaders must find ways to offer support while keeping the team\u2019s momentum intact.\n\n---\n\n### **2. Logistics as Proactive Leadership**\nEffective remote leadership is not about reacting to crises as they happen but **proactively planning** for them. This includes creating **contingency plans** for various levels of disruption, from short-term distractions to long-term absences due to conflict or disaster.\n\n- **Planning for the Unpredictable**: Leaders should have **contingency frameworks** in place before disruptions occur. This allows them to reallocate tasks and responsibilities quickly and smoothly, ensuring that the team\u2019s work continues uninterrupted.\n- **Risk Mitigation**: Identifying potential risks\u2014such as team members living in areas prone to instability or infrastructure issues\u2014allows leaders to proactively address challenges with alternate plans.\n\n---\n\n### **3. Performance Metrics as a Guide for Influence**\nPerformance metrics are essential tools for remote leaders, allowing them to monitor productivity without micromanaging. By tracking metrics, leaders can identify trends early and **intervene** when needed, offering additional support or adjusting workloads.\n\n- **Metrics, Not Micromanagement**: Leaders should rely on performance data to understand where their team stands. This helps them recognize when team members are struggling, even if the employee doesn\u2019t explicitly mention it.\n- **Data-Driven Intervention**: When metrics show a decline in productivity, leaders can step in and **offer support or guidance**, ensuring that challenges are addressed before they impact the team\u2019s objectives.\n\n---\n\n### **4. Balancing Individual and Collective Interests**\nRemote leaders serve as the **bridge** between the individual challenges that team members face and the **collective interests** of the organization. The goal is to guide the team to success while acknowledging the reality of human challenges.\n\n- **Understanding the Fallacy of Living**: Leaders must make room for

life\u2019s inevitable interruptions. The key is to do so without allowing these disruptions to derail the team\u2019s progress. This requires a careful balance of **understanding and action**.\n- **Maintaining Team Momentum**: Leaders must ensure that, even in times of crisis, the team\u2019s work continues. By having **plans and backup systems** in place, leaders can offer flexibility while still protecting the company\u2019s interests.\n\n---\n\n### **5. The Leader\u2019s Role: Influence Over Control**\nRemote leadership is not about control\u2014it\u2019s about **influence**. The leader\u2019s job is to **guide the team** toward achieving their objectives, providing the right amount of support where needed, and creating a space where both individual and team success can flourish.\n\n- **Influence Through Empathy and Planning**: By offering support and planning ahead, leaders influence the success of both individuals and the team as a whole. They provide the framework that allows the team to navigate challenges and achieve their goals.\n\n---\n\n### **Conclusion: Balancing Empathy and Logistics for Success**\nAt its core, remote leadership requires a delicate balance between **offering empathy** (grace) and **maintaining logistical clarity**. Leaders must plan proactively, monitor performance closely, and act as the bridge between **personal well-being** and **collective goals**. Through empathy, planning, and data-driven action, leaders can guide their teams through even the most challenging disruptions while ensuring success for all.\n\n---\n\nThis synthesis brings together all the concepts we\u2019ve discussed\u2014**grace, proactive logistics, planning, metrics, and the balance of individual vs. collective success**\u2014into a cohesive message for the **Life Happens** module. Let me know if you\u2019d like to refine this or move forward with more development!"]}, "status": "finished_successfully","end_turn": true

The adoption of remote work (RW) is increasing. For economic reasons, competitive advantage, or even as a pandemic response (business continuity plan), RW is a domain worth further investigation. However, the literature lacks insight regarding RW adoption. A design science research methodology was adopted, including a systematic literature review to elicit RW advantages, disadvantages, challenges and driving forces, as well as their relation. To evaluate and demonstrate findings, 129 qualitative interviews were performed with RW professionals. In the end, 57 decision factors were elicited, and 16 relations were validated. The authors concluded that cost-reduction and flexibility to promote work\u2013life balance is the most positive outputs, while communication and technical problems, as well as management issues, are what most concerns professionals. Moreover, positive relations are more recognized among professionals over negative ones.","paper_authors":["R. Ferreira","R. Pereira","I. Bianchi","M. D. da Silva"],"paper_publish_year":2021,"publication_journal_name":"Journal of Open Innovation: Technology, Market, and Complexity","consensus_paper_details_url":"https://consensus.app/papers/decision-factors-remote-work-adoption-advantages-ferreira/219b92e4490d51db89b256586cc43c9d/?utm_source=chatgpt","doi":"10.3390/JOITMC7010070","volume":"","pages":"","search_result_number":1},{"paper_title":"Optimizing the Environmental and Economic Sustainability of Remote Community Infrastructure","abstract":"Remote communities such as rural villages, post-disaster housing camps, and military forward operating bases are often located in remote and hostile areas with limited or no access to established infrastructure grids. Operating these communities with conventional assets requires constant resupply, which yields a significant logistical burden, creates negative environmental impacts, and increases costs. For example, a 2000-member isolated village in northern Canada relying on diesel generators required 8.6 million USD of fuel per year and emitted 8500 tons of carbon dioxide. Remote community planners can mitigate these negative impacts by selecting sustainable technologies that minimize resource consumption and emissions. However, the alternatives often come at a higher procurement cost and mobilization requirement. To assist planners with this challenging task, this paper presents the development of a novel infrastructure sustainability assessment model capable of generating optimal tradeoffs between minimizing environmental impacts and minimizing life-cycle costs over the community\u2019s anticipated lifespan. Model performance was evaluated using a case study of a hypothetical 500-person remote military base with 864 feasible infrastructure portfolios and 48 procedural portfolios. The case study results demonstrated the model\u2019s novel capability to assist planners in identifying optimal combinations of infrastructure alternatives that minimize negative sustainability impacts, leading to remote communities that are more self-sufficient with reduced emissions and costs.","paper_authors":["J. This paper focuses on the problem of route planning for UAVs, which is the basis for UAVs to complete distribution tasks. Besides, to enhance the collaboration of UAVs during the delivery mission, this work also studies wireless resource (spectrum, power) allocation problem for multiple UAVs enabled communication networks. Due to the non-convex and combinatorial characteristics, it is challenging to obtain an optimal strategy for joint route planning and resource allocation issues within a finite time. To this end, the paths of UAVs are planned by the simulated annealing (SA) method in the first stage. Based on the preplanned paths, a double deep Q network (DDQN) based resource allocation method is proposed to maximize the average sum capacity of UAV-to-UAV (U2U) links and reduce transmission delay while minimizing the interference to UAV-to-infrastructure (U2I) links. Multi-UAV communication networks are reconnected according to the positions of UAVs changing in each time slot. Then each U2U link acting as an agent learns to improve spectrum and power allocation policy with imperfect knowledge of the environment. Simulation results demonstrate that the proposed DDQN-based resource management scheme can achieve higher system communication capacity than a random scheme. Moreover, the successful transmission probability of U2U links obtained by the DDQN-based method is much higher than a Particle Swarm Optimization (PSO) based method.","paper_authors":["Chunhui Liu","Lizhen Huang","Zanliang Dong"],"paper_publish_year":2022,"publication_journal_name":"IEEE Access","consensus_paper_details_url":"https://consensus.app/papers/twostage-approach-joint-route-planning-resource-liu/923e8f3709a55d568106a60876e24e1f/?utm_source=chatgpt","doi":"10.1109/ACCESS.2022.3218134","volume":"10","pages":"113888-113901","search_result_number":5},{"paper_title":"Natural Disaster Preparedness Planning: Synchronizing Artificial Intelligence with a New Set of Leadership Skills for Generating an Inclusive Strategy in a Remote Workplace","abstract":"An increasing number of major hurricanes, flooding, and wildfires has introduced an unusual amount of uncertainty and thus changes in our daily lives. However, one positive outcome is that they have also resulted in new opportunities to re-examine past approaches for planning to survive a natural disaster. A critical behavior practiced by inclusive leaders is to seek new ideas and perspectives from co-workers who have different values, expectations, and goals. Being receptive to different views enables organizational leaders to challenge the way they personally perceive how future practices and policies can be designed when planning to survive a natural disaster. However, particularly in the private sector, one sobering account has been the social cost of not convening face-to-face in our daily working environments whereby a free exchange of ideas is less likely to

occur. This purpose of this theoretical paper is to propose a new skill set for those leaders working with remote co-workers when designing a plan for natural disaster preparedness for their organizations.","paper_authors":["J. However, effective planning is crucial for ensuring the successful implementation of remote work in the long run. One practical approach to remote work planning involves using an IT Balanced Scorecard. The IT Balanced Scorecard serves as a framework that enables organizations to align their overall business objectives and actions with their IT strategies, focusing on four distinct perspectives: customer, financial, internal processes, and learning and growth. In this research conducted a qualitative study and identified the advantages and disadvantages of working from the office and remote work. We also gathered insights on the technological tools, essential qualities required for effective remote work, and etiquette guidelines to foster healthy workplace interactions\u2014an important consideration for organizations. Based on our findings and leveraging the IT Balanced Scorecard, we have developed a set of objectives and activities to mitigate the disadvantages associated with remote working. By employing an IT Strategy developed through the four perspectives of the Balanced Scorecard - namely customer, finance, internal processes, and learning & growth. it is anticipated that this IT Strategy can assist organizations in effectively initiating and optimizing remote work implementation which organizations could refer to when seeking to optimize their remote work arrangements.","paper_authors":["Glenny Chudra","A. Yohannis"],"paper_publish_year":2023,"publication_journal_name":"2023 International Conference on Networking, Electrical Engineering, Computer Science, and Technology (IConNECT)","consensus_paper_details_url":"https://consensus.app/papers/study-developing-strategies-effective-remote-work-using-chudra/01b1ba06d63b5633badd51e90724cf9a/?utm_source=chatgpt","doi":"10.1109/IConNECT56593.2023.10327330","volume":"","pages":"196-201","search_result_number":11},{"paper_title":"Multi-Process Logistics Planning for Cost Minimization and Workload Balance in Steel Production Systems","abstract":"Logistics planning is a key to the coordination of multiple processes in steel production systems. This work investigates a new and practical bi-objective logistics planning problem arising from steelmaking-hot rolling-cold rolling processes. Its first objective is to minimize the sum of fixed costs, transportation costs, out-of-stock penalties, and inventory costs. The second one is to balance the workload of parallel machines. A mixed integer linear

program is formulated for the concerned problem. To solve it, a genetic algorithm is problem-specifically designed. In it, the concerned bi-objective optimization problem is first transformed into a single-objective one by weighting two objective functions. Then, Pareto solutions are obtained through the presented algorithm by adjusting the weighted coefficients. Experimental results obtained by the presented algorithm are compared with those obtained by solving the mixed integer linear program with CPLEX. Its great performance is verified, thus showing its readiness to be applied in practice.","paper_authors":["Zhuohan Zhang","Ziyan Zhao","Yang Zhang","Shixin Liu"],"paper_publish_year":2022,"publication_journal_name":"2022 IEEE International Conference on Networking, Sensing and Control (ICNSC)","consensus_paper_details_url":"https://consensus.app/papers/multiprocess-logistics-planning-cost-minimization-zhang/6dc5c2dbcfaf5110b7558459270b98c4/?utm_source=chatgpt","doi":"10.1109/ICNSC55942.2022.10004178","volume":"","pages":"1-6","search_result_number":12},{"paper_title":"Robust optimization for relief logistics planning under uncertainties in demand and transportation time","abstract":"Abstract Emergency logistics is an essential component of post-disaster relief campaigns. However, there are always various uncertainties when making decisions related to planning and implementing post-disaster relief logistics. Considering the particular environmental conditions during post-disaster relief after a catastrophic earthquake in a mountainous area, this paper proposes a stochastic model for post-disaster relief logistics to guide the tactical design for mobilizing relief supply levels, planning initial helicopter deployments, and creating transportation plans within the disaster region, given the uncertainties in demand and transportation time. We then introduce a robust optimization approach to cope with these uncertainties and deduce the robust counterpart of the proposed stochastic model. A numerical example based on disaster logistics during the Great Sichuan Earthquake demonstrates that the model can help post-disaster managers to determine the initial deployments of emergency resources. Sensitivity analyses explore the trade-off between optimization and robustness by varying the robust optimization parameter values.","paper_authors":["Yajie Liu","Hongtao Lei","Dezhi Zhang","Wu Zhiyong"],"paper_publish_year":2018,"publication_journal_name":"Applied Mathematical Modelling","consensus_paper_details_url":"https://consensus.app/papers/optimization-relief-logistics-planning-uncertainties-liu/bd27f76720265aaab4006161fea79e9c/?utm_source=chatgpt","doi":"10.1016/J.APM.2017.10.041","volume":"55","pages":"262-280","search_result_number":13},{"paper_title":"Short-term logistics management at a multinational corporation","abstract":"Abstract Nowadays, many companies still operate without any process standardization in relation to short-term logistics management, which leads to a lack of control of both times and costs of logistical operations. This paper starts from a study that has been performed at a multinational corporation which manufactures fiber-reinforced plastic boxes and cabinets with doors, where the final product-storage area and the picking section frequently become

overloaded. In addition, warehouse operators do not follow standardized procedures and usually carry out too many movements to complete their tasks. Finally, there is not a suitable daily logistics planning system to make sure that capacity and demand are in balance. This paper proposes a solution to this problem by means of a Methods-Time Measurement (MTM) study as well as a daily workload planner to control short-term logistical operations. Thanks to the implementation of this system, the company has been able to plan the day-to-day workload in an accurate way and to precisely determine the necessary resources for the picking and shipping orders. Moreover, the company has gained flexibility in order to better match demand and capacity and has experimented significant cost savings and a better delivery service to its customers.","paper_authors":["Esther Alvarez de los Mozos","Nicolas Lopez"],"paper_publish_year":2020,"publication_journal_name":"Procedia Manufacturing","consensus_paper_details_url":"https://consensus.app/papers/shortterm-logistics-management-corporation-mozos/bc36ff26221c56448bddab1111d09620/?utm_source=chatgpt","doi":"10.1016/j.promfg.2020.10.236","volume":"51","pages":"1696-1702","search_result_number":14},{"paper_title":"Employee welfare: Developing change strategies to address empathy burnout in caring professions","abstract":"The general health and wellbeing of an organisation\u2019s workforce, also referred to as employee welfare, remains a crucial component in organisational and leadership planning. At the level of an individual, welfare is often related to one\u2019s level of satisfaction, engagement and dedication. At the organisational level, welfare can be associated with productivity, turnover, and employee relationships. An employee\u2019s welfare, particularly in a caring profession, is often subject to the emotionally demanding needs of their patients, which significantly affects their ability to remain empathic and compassionate towards others, and themselves. Empathy, like any emotional resource, can be exhausted if not replenished often. Compassion fatigue, also known as empathy burnout, is an emotional state experienced by those working in emotionally demanding roles, such as healthcare professionals, police service and social workers. The common symptoms of empathy burnout include depression, anxiety, absenteeism and lethargy. At an organisational level, it is imperative that leadership decisions consider the implications of their profession to the wider workforce, and so develop strategies to prevent empathy burnout. This paper explored the perspectives of employee welfare at a local hospital to develop strategies for change that may assist caring professionals in managing their stress and maintaining levels of empathy. From the exploratory research project, strategies emerged that could be actioned to improve employee welfare across the organisation. These strategies for change included strengthening communication lines to eliminate barriers to support, bolstering the existing employee assistance programme, developing resilience training schemes, and closing the gap between executive leadership and staff. Caring professions are positions/roles including but not limited to nursing, clinicians, physicians, paramedics, mental health employee, caregiving, counsellors, physiologists, orderly and welfare officers.","paper_authors":["S. Turner","Lesley Gill"],"paper_publish_year":2019,"publication_journal_name":"Scope: Contemporary Research Topics (Flexible Learning

According to recent studies, the present and future require leadership to reimagine human resources leadership and the entire employee experience by focusing on people, cooperation, tight communication, and reestablishing connection and trust. In their 2021 report on the future of work after Covid-19, McKinsey Global Institute notes that hybrid remote work could continue to address the fact that 20 to 25 percent of workers in advanced economies and around 10 percent in emerging economies could work from home three to five days a week, primarily in computer-based office work, including offices of all sizes and corporate headquarters. In this light, the purpose of this research to provide an overview of the relationships between the leadership style, employee engagement, as well as their wellbeing versus burnout. The paper intends to propose a bibliographic analysis of the scientific articles simultaneously tackling the main envisaged constructs, respectively leadership, engagement, well-being and burnout. Given the fact that the inclusion of the Covid-19 pandemic would have narrowed down too much the analysis, the term was not considered in the searches. The bibliometric analysis was performed by means of VOSviewer.","paper_authors":["Elena-M\u0103d\u0103lina V\u0103t\u0103m\u0103nescu","Florina Vintil\u0103"],"paper_publish_year":2023,"publication_journal_name":"Proceedings of the International Conference on Business Excellence","consensus_paper_details_url":"https://consensus.app/papers/cooccurrence-scrutiny-transformational-leadership-v\u0103t\u0103m\u0103nescu/037d4fb9f27d51b28793f70da52d8376/?utm_source=chatgpt","doi":"10.2478/picbe-2023-0117","volume":"17","pages":"1306 - 1318","search_result_number":16},{"paper_title":"ORGANIZATIONAL AND ECONOMIC CONDITIONS FOR EFFECTIVE MANAGEMENT OF LOGISTICS NETWORK","abstract":"The article is devoted to study and development of a formalized model of organizational and economic conditions to ensure effective management of logistics functions. The author determined that logistics functions are realized through the prism of logistics operations, which are divided into external and internal. It is noted that internal logistics operations are carried out under the influence of internal organizational and economic conditions (efficiency of customs in documentation, trade and transport infrastructure, ease of organization of international shipments, competence and quality of logistics services, the ability to track goods, the frequency with which goods arrive at recipients). scheduled or expected delivery time). The application of the logistics approach involves the creation of appropriate organizational conditions.\\nThe concept of logistics is a system of approaches to streamlining economic activity by optimizing flow processes. It is defined by managers as an effective motivational approach to management in order to reduce production costs. This concept becomes the basis of the company's

economic strategy: logistics is used as a tool of competition and is seen as management logic for the implementation of the plan, distribution and control of financial and human resources. This approach ensures close coordination of logistics and production strategy. Effective management of logistics functions includes the flow of goods and services. It covers an ordered sequence of steps from the procurement of raw materials to the finished product, so that it provides value to the customer. Logistics management allows you to establish strong communications and supplier relationships, helping to avoid shipment delays and minimize logistical errors. Efficient logistics provides the best bargaining power to get the best prices and goods in the shortest possible time. During the production processes and execution of orders, logistics managers need to ensure the efficiency of material flow. Optimizing the flow of goods allows you to reduce the delay of goods in the warehouse, minimize transportation costs and ensure the preservation of stocks. By balancing capital investment, maintaining the required level of service and taking into account the variability of supply and demand, companies can significantly improve inventory turnover, service level and significantly reduce costs.","paper_authors":["Volodymyr Kolodiychyk","Zoriana Krypka"],"paper_publish_year":2021,"publication_journal_name":"Herald UNU. International Economic Relations And World Economy","consensus_paper_details_url":"https://consensus.app/papers/organizational-economic-conditions-effective-kolodiychyk/de51e43da8ac526093886200e5512778/?utm_source=chatgpt","doi":"10.32782/2413-9971/2021-36-15","volume":"","pages":"","search_result_number":17},{"paper_title":"A millennial manager skills model for the new remote work environment","abstract":"\\nPurpose\\nThis paper aims to propose that millennials \u2013 those born between 1980 and 1995 \u2013 are uniquely impacted by the long-term impact of the pandemic, which has accelerated the work from home movement and exacerbated organizational issues associated with working remotely. Millennials, on the cusp of embarking on important leadership roles in this new remote work environment, pose challenges and opportunities for organizations will that will last long after the pandemic.\\n\\n\\nDesign/methodology/approach\\nThis paper provides a viewpoint based on a narrative review and on the authors\u2019 professional experiences within organizations. Based upon these findings, this paper has reimagined the Mumford skills model to explore millennial managers in this new remote work, post-pandemic context. The goal of this narrative review was to provide a full picture of the \u201cMillennial manager\u201d and the challenges they face in becoming effective managers, as well as highlight the important strengths they bring to the table.\\n\\n\\nFindings\\nManagers may have challenges regarding job satisfaction, productivity and organizational commitment. The positive factors are millennials prefer flexibility, teamwork and creating a positive work-life balance. The negative side has to do with isolation and the ability to embrace the organization culture in a remote environment. This model shows positive and limiting factors of millennials related to organization effectiveness. The major propositions and model were that millennium managers in this new environment increase interpersonal communication to maintain trust, effective mentoring, resolve strong organizational culture and ensure effective delegation and conflict resolution.\\n\\n\\nPractical implications\\nThis

study discovered challenges for managers, including developing loyalty and improving employee job satisfaction and organizational commitment. Active listening is necessary for team management to show that all team members are valued irrespective of the work environment. Active listening and empathy will increase social support at work, which improves personal well-being and productivity. Millennials will continue to use their technological skills, their desire for teamwork and their preference for participative management, resulting in becoming an invaluable asset in this era of organizational transformation. The challenge for organizations is to realize the millennial generation possesses many talents and must successfully engage them in the pursuit of organizational goals.\\n\\n\\nOriginality/value\\nThis paper adds to the body of knowledge regarding millennials in organizations with a specific focus on the new work environment created by the global pandemic. The authors hope that their adapted skills model \u2013 the millennial manager skills model \u2013 becomes an important resource for articulation this new environment that millennial managers are in and that this model can be further refined and expanded through empirical exploration.\\n","paper_authors":["Kerri M. of Maritime Business Management and Leadership in Global Business Sustainability and Remote Work","abstract":"It is observed that the global business world has significantly diverted towards new technologies in terms of remote work as a result of digitalization, which forces organizations to adapt new normal during the COVID-19 pandemic. Maritime organizations that keep up with this change can manage to continue their existence; however, those who cannot adapt are eliminated by the system. Developments in the global business world, new ways of working, and their reflections inside and outside the organization force leadership to adapt to changing conditions by also affecting the understanding of \u201cleadership.\u201d This chapter aims to reveal the importance of merging new leadership paradigms and governance, digitalization, sustainable changes in global business, continuity of work, work-life balance, and the concepts of \u201cwork,\u201d \u201cworkforce,\u201d \u201cworkplace,\u201d and \u201cleadership.\u201d","paper_authors":["N. Senbursa"],"paper_publish_year":2021,"publication_journal_name":"","consensus_paper_details_url":"https://consensus.app/papers/maritime-business-management-leadership-global-business-\u015fenbursa/1f4dde5d8d435ecc9d10f6e34f4bfce6/?utm_source=chatgpt","doi":"10.4018/978-1-7998-7513-0.CH015","volume":"","pages":"262-283","search_result_number":20}]}"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"invoked_plugin": {"type": "remote", "namespace": "chat_consensus_app__jit_plugin", "plugin_id": "g-f1286ecb04957580332cda9bf386b57ef1b2ed6f", "http_response_status": 200}, "jit_plugin_data": {"from_server": {"type": "preview", "body": {"domain": "chat.consensus.app", "is_consequential": false, "privacy_policy": "https://consensus.app/home/privacy-policy/", "method": "get", "path": "/quick_search", "operation": "search_papers", "params": {"query": "balancing empathy and logistical planning in remote leadership", "year_min": 2018}, "actions": []}}}, "gizmo_id": "g-bo0FiWLY7", "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "5ae6acb2-1216-4d73-a1ce-77f18495c3f2", "request_id": "8d6a715e1862bac4-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "5ae6acb2-1216-4d73-a1ce-77f18495c3f2", "children": ["9a7cb9d6-9ec1-4507-958f-9218556205b3"]}, "9a7cb9d6-9ec1-4507-958f-9218556205b3": {"id": "9a7cb9d6-9ec1-4507-958f-9218556205b3", "message": {"id": "9a7cb9d6-9ec1-4507-958f-9218556205b3", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729610168.130794, "update_time": null, "content": {"content_type": "text", "parts": ["Yes, many of the key assertions in your **Life Happens module** are supported by the existing literature. Here are some directly relevant research papers and their key points that align with your synthesis:\n\n1. **Balancing Empathy and Logistics in Leadership**: \n - *"Managing and Motivating the Remote Employee Using the Transformational Leadership Model"* discusses the importance of empathy, communication, and supporting employees, particularly in a remote work context. This supports the idea that **empathy and understanding** play a critical role in leadership, which aligns with your approach of offering grace while balancing logistical needs [(Sinclair et al., 2021)](https://consensus.app/papers/managing-motivating-remote-employee-using-sinclair/38f90a44f6d15dad9bb69eec6865abca/?utm_source=chatgpt).\n \n2. **Logistical Preparedness**:\n - *"Decision Factors for Remote Work Adoption: Advantages,

Disadvantages, Driving Forces and Challenges"* emphasizes that successful remote leadership requires **proactive planning and risk mitigation** to address challenges like communication issues or infrastructure instability. This is in line with your assertion that **contingency frameworks** should already be in place to handle life\u2019s disruptions [(Ferreira et al., 2021)](https://consensus.app/papers/decision-factors-remote-work-adoption-advantages-ferreira/219b92e4490d51db89b256586cc43c9d/?utm_source=chatgpt).\n\n3. **Performance Metrics**:\n - *"Leadership in the Age of Remote Work: Best Practices for Managing Virtual Teams"* highlights the importance of using **clear performance metrics** to guide virtual teams effectively and avoid micromanagement, reinforcing your point that metrics can serve as a guide for influence without hovering over employees [(Nuratri et al., 2022)](https://consensus.app/papers/leadership-remote-work-best-practices-managing-virtual-nuratri/1b29159ae0d555658195349caf3ea276/?utm_source=chatgpt).\n\n4. **Balancing Individual and Collective Interests**:\n - *"Towards Remote Leadership in Health Care: Lessons Learned from an Integrative Review"* identifies the need for remote leaders to balance individual well-being with organizational goals, which echoes your point that leaders must act as a bridge between individual and collective interests [(Terkamo-Moisio et al., 2021)](https://consensus.app/papers/towards-remote-leadership-health-care-lessons-learned-terkamomoisio/0ec929cb11d25eb0be5fc90bffe26b60/?utm_source=chatgpt).\n\n---\n\nThese sources provide a strong foundation for your assertions in the module. You can refer to them as additional reading or even cite them directly to support your ideas. Would you like me to help draft some citations or further integrate these sources into your content?"]}, "status": "finished_successfully","end_turn": true

(Soul-guidance)]\n\nAluminium artifact found in a 3rd century Chinese tomb. (\u301076\u2020Soul-guidance\u2020www.soul-guidance.com\u3011)\n\n## A Discovery That Defied Common Knowledge\n\nSoon after the stunning discovery, the Chinese scientific circles were stirred. Thorough analysis was required of all the metallic pieces discovered. The first tests were conducted by Nanjing University, and the Chinese Academy of Sciences, and they found that the tested pieces were an alloy containing mostly aluminum.\n\nSuch a claim caused a big shock, as everyone knew that aluminum is very difficult to isolate from bauxite, as a pure metal, without using a lot of electric power. Nevertheless, further tests were conducted, on other pieces as well, revealing that not all of them were from aluminum. Others were made from an alloy that contained mostly \u301077\u2020silver\u3011.\n\nBetween 1958 and 1959, the third round of tests was conducted at Qinghua University, where it was finally firmly concluded that the primary metal in the alloy was aluminum, with other fragments made from silver alloy.\n\nFrom this point on, there were other studies over the decades - many of which tried to change the narrative that was established early on. One theory stated that the aluminum belt parts were irregularly shaped, and could have been parts of modern aluminum tools that were left by potential grave robbers before the discovery was made. While it is possible that grave robbers entered the grave before the very first arrival of the archaeological team, it is not certain that anything of the sort occurred, or that they dropped aluminum fragments.\n\nSome sources claim that there were other similar belt buckles amongst other ancient Chinese relics, containing parts made from aluminum. They were never studied, however, and their presence remains unconfirmed. Either way, the Nanjing Belt left a deep whirlpool in the Chinese and global scholarly circles. It provided an enigma that was never fully resolved.\n\n * \u301078\u2020More than Metal: Amazing Historical Suits of Armor\u3011\n * \u301079\u2020UFO Wreckage? Ancient Metal Object Found in Romania Has Unexplained

Origins\u3011\n\n## The Tomb Veiled in Mystery\n\nSadly, there isn\u2019t much more that is known about the Nanjing Belt or the discovery of the ancient hero\u2019s tomb. Popular sources are exceptionally vague on this topic - perhaps for a reason? Officially, the tomb of Zhou Chu is not mentioned. The mentions of this 1952 discovery are reserved only to the fringes of the online scholarly communities, and we cannot say why.\n\nPopularly, the writer Erich von D\u00e4niken, in his famed work \u201cChariots of the Gods\u201d, wrote of this discovery and claimed that the traces of aluminum alloy are a clear proof of \u301080\u2020ancient aliens\u3011 visiting Earth and sharing deep knowledge with ancient civilizations.\n\nCould such a thing be true? We do not know for certain. Could it, on the other hand, be possible that the ancient Chinese found a way to create an aluminum alloy through methods lost to history and the knowledge of man? If it is so, then there truly are deeper secrets hiding in the world\u2019s history.\n\nTop image: Left, ancient alchemy painting. Right, The artifact known as the \u2018Nanjing Belt\u2019 seems to be proof of the existence of aluminum in early China. An exceptionally old culture that reaches far back to the early dawn of man\u2019s...\n\n * \u3010106\u2020Read Later\u3011\u00a0\n * \u3010105\u2020Read more about The Disc of Sabu: Ancient Egyptian Water Pump or Alien Hyperdrive?\u3011\n\n[Image 26]\n\n[Image 27]\n\n\u3010107\u2020 \u2020bit.ly\u3011 \n\n[Image 28] \n\nI agree to receiving emails Read terms \n\n By subscribing to Ancient-Orgins.net,", "pub_date": null, "extra": null}], "original_query": null}, "command": "mclick", "args": ["[0, 1, 2]"], "status": "finished", "is_complete": true, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "ad7abc1b-d959-4a04-b7da-cfa87bf47356", "request_id": "8d7c5471fee84c6a-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "ad7abc1b-d959-4a04-b7da-cfa87bf47356", "children": ["731ab52f-374f-464f-befa-9dfa42cadbce"]}, "731ab52f-374f-464f-befa-9dfa42cadbce": {"id": "731ab52f-374f-464f-befa-9dfa42cadbce", "message": {"id": "731ab52f-374f-464f-befa-9dfa42cadbce", "author": {"role": "tool", "name": "browser", "metadata": {}}, "create_time": 1729797703.004508, "update_time": null, "content": {"content_type": "tether_quote", "url": "http://www.strangehistory.net/2011/07/09/the-nanjing-belt/", "domain": "www.strangehistory.net", "text": "\nThe belt included \u2018about\u2019 (?) twenty pieces of metal \u2013 which had presumably been attached to the now rotted leather \u2013 and four of these were made of almost pure \u301012\u2020aluminium\u2020www.dgs.ca.gov\u3011. Aluminium it will be remembered does not appear alone in nature. It took Europeans till the early nineteenth century to understand how to isolate this useful substance and even then the aluminium that issued was far from pure.\n\nChinese historians were, understandably, bemused and something of a civil war broke out, not helped by the fact that the Cultural Revolution was on the horizon. If there was a resolution though before Mao\u2019s guillotine came down it was that four pieces were, indeed, aluminium. The problem then was not metallurgical but rather archaeological: were they Jin Dynasty \u301013\u2020relics\u2020www.azed.gov\u3011 or had they been placed in the tomb in the nineteenth or twentieth centuries? If genuine, it goes without saying that you would need a merchant cash advance and possibly your life savings multiplied by three to get a sniff at these objects in an auction house.\n\nThis question was taken up in the west by three scholars \u2013 Butler, Glidewell and Pritchard \u2013 at St Andrew\u2019s University who looked at the question in\u00a0 \u2018Aluminium Objects from a Jin Dynasty Tomb \u2013 Can They Be Authentic?\u2019 Interdisciplinary Science Reviews 11 (1986), 88-94.\n\nThe abstract sums up their work nicely:\n\n> Pieces of aluminium, supposedly parts of a set of belt ornaments, were found in a Jin dynasty (AD 265\u2013420) tomb during excavations in the 1950s. The authenticity of these finds was questioned at the time in view of the technology required to isolate aluminium from its ore. In this review the archaeological and analytical evidence is reconsidered, but the matter remains unsettled, as it is known, from experimental evidence, that aluminium alloys can be prepared by the carbon reduction of alumina. Examination of the thermodynamic data for this process in terms of Ellingham diagrams demonstrates unequivocally that the temperature required for this process is greatly in excess of that possible with Jin dynasty technology, and so the finds cannot be authentic. However, it is quite possible that metallic objects containing small quantities of aluminium could have been produced in China at that time. The review

ends with some speculation on how the pieces of aluminium came to be in the tomb.\n\nBeachcombing need only add that the three end by suggesting that the aluminium had been included with the other belt fragments as a practical joke at the time of excavation, but that the joke got out of hand: memories of Anglo-Saxon Attitudes.\n\nIt is a reasonable solution and \u2018Butler, Glidewell and Pritchard, 1986\u2019 is now the conventional answer to the problem of the Nanjing Belt in west and east.\n\nBeachcombing is a natural sceptic where aluminium before its time is on offer. But he is left slightly cold by the methodology in the St Andrews article. After all, the authors seem to go backwards, proving first that something cannot have been done\u2026 Still unless there is a way to prove the age of aluminium in the laboratory perhaps they had no other way to approach the problem.\n\nBeach will round off with William R. Corliss on the belt in 2003 for Corliss introduces one later Chinese attempt to explain the belt as a genuine artifact (249):\n\n> \u2018Assuming no hoax, it would appear that the Chinese had somehow isolated aluminum from its ores 1,500 years before the Europeans. Much has been made of the so-called Nanjing belt. No vague tale from antiquity, the tomb and belt were thoroughly studied by modern archaeologist and chemists. The latter vouched for the existence of aluminum. A hoax was deemed highly improbable. Where, then, did the aluminum come from? Two possibilities seem in play: (1) The Chinese metallurgists of the Jin Dynasty, who had high temperature furnaces, accidentally hit upon one of several ways to chemically win aluminum from one of its several ones. (2) Contradicting the encyclopaedias [i.e. aluminium not found in an isolated form], Chinese geologists reported in 1985 that they had found grains of native aluminum in Guizhou Province. Could the Jin Dynasty metallurgists have collected enough of these grains to make the aluminum sections of the Nanjing belt? Did they hammer the grains together or perhaps melt them. The melting point of pure aluminum is only 1220 f. This temperature might not been out of reach 1,500 years ago.\u2019\n\nBeachcombing is always on the look out for \u301014\u2020wrong time\u3011 objects: drbeachcombing AT yahoo DOT com\n\n***\n\n12 July 2011: Marcy writes in to say, \u2018If temperatures of only 1220 F are required to extract aluminum from soil, then the Chinese should be ruling the world. \u00a0 Their porcelains have been fired to temperatures well over 2500 F for millenia. \u00a0The \u201cstandard\u201d among American potters is currently (2011) called \u2018cone 6\u2032. \u00a0 Cone six is attained between 2230 and 2250 Fahrenheit. \u00a0Even in the USA some dedicated potters fire to cone 10 and cone 13. \u00a0 That covers 2380 to 2455 Fahrenheit. \u00a0There must be a strong interaction between pottery and metallurgy.\u2019 Thanks Marcy!\n\n### Related posts\n\n 1. \u301015\u2020An Elephant Invades Italy in 1936\u3011\n 2. \u301016\u2020Druidic Ravens at the Tower of London?\u3011\n 3. \u301017\u2020Total Eclipse\u3011\n 4. \u301018\u2020Ancient Beliefs in Modern Egypt\u3011\n 5. \u301019\u2020Oaks: Sacrificial and Otherwise\u3011\n\nTags:\u301020\u2020China\u3011, \u301021\u2020Jin Dynasty\u3011, \u301022\u2020Nanjing Belt\u3011, \u301023\u2020St Andrews\u3011, \u301024\u2020William Corliss\u3011, \u301025\u2020Wrong Time\u3011\n\n * ## Follow Dr. Beachcombing \n\n   * [Image 1]\n   * [Image 2]\n\n * ## New Pwca Books\n\n * \u301026\u2020Victorian and Edwardian Bedfordshire Ghost Stories\u2020www.amazon.co.uk\u3011\n   * \u301027\u2020Higson, South Manchester Supernatural\u2020www.amazon.com\u3011\n   * \u301028\u2020The Wizards, Astrologers, Fairy Seers and Witches of Victorian Liverpool\u2020www.amazon.co.uk\u3011\n   * \u301029\u2020Sheridan Le Fanu\u2019s Scary Fairy Stories\u2020www.amazon.com\u3011\n * \u301030\u2020Hurst, The Victorian Ghosts, Devils and Witches of Northern

This belt was found in the tomb of Zhou Chu, a notable Jin Dynasty general, during the 1950s. The discovery was puzzling because aluminum is notoriously difficult to produce and isolate, requiring advanced technology that wasn\u2019t available until the 19th century.\n\nTests conducted on the belt fragments in the 1950s and 1960s revealed that some of the metal pieces were composed of almost pure aluminum. This finding created shockwaves in the scientific community, as aluminum production requires highly advanced metallurgical techniques that were unknown at the time of the Jin Dynasty (3rd century AD). Some theories suggest that the aluminum might have been introduced into the tomb later, possibly by grave robbers, while others speculate about unknown ancient methods of aluminum extraction. There are even fringe theories that suggest extraterrestrial intervention or lost ancient technologies.\n\nDespite multiple analyses, the origin and authenticity of the aluminum in the belt remain unresolved, with scholars divided on whether it is a genuine ancient artifact or a more modern intrusion into the tomb\u301012\u2020source\u3011\u301013\u2020source\u3011."]}, "status": "finished_successfully","end_turn": true

(Soul-guidance)]\n\nAluminium artifact found in a 3rd century Chinese tomb. (\u301076\u2020Soul-guidance\u2020www.soul-guidance.com\u3011)\n\n## A Discovery That Defied Common Knowledge\n\nSoon after the stunning discovery, the Chinese scientific circles were stirred. Thorough analysis was required of all the metallic pieces discovered. The first tests were conducted by Nanjing University, and the Chinese Academy of Sciences, and they found that the tested pieces were an alloy containing mostly aluminum.\n\nSuch a claim caused a big shock, as everyone knew that aluminum is very difficult to isolate from bauxite, as a pure metal, without using a lot of electric power. Nevertheless, further tests were conducted, on other pieces as well, revealing that not all of them were from aluminum. Others were made from an alloy that contained mostly \u301077\u2020silver\u3011.\n\nBetween 1958 and 1959, the third round of tests was conducted at Qinghua University, where it was finally firmly concluded

that the primary metal in the alloy was aluminum, with other fragments made from silver alloy.\n\nFrom this point on, there were other studies over the decades - many of which tried to change the narrative that was established early on. One theory stated that the aluminum belt parts were irregularly shaped, and could have been parts of modern aluminum tools that were left by potential grave robbers before the discovery was made. While it is possible that grave robbers entered the grave before the very first arrival of the archaeological team, it is not certain that anything of the sort occurred, or that they dropped aluminum fragments.\n\nSome sources claim that there were other similar belt buckles amongst other ancient Chinese relics, containing parts made from aluminum. They were never studied, however, and their presence remains unconfirmed. Either way, the Nanjing Belt left a deep whirlpool in the Chinese and global scholarly circles. It provided an enigma that was never fully resolved.\n\n * \u301078\u2020More than Metal: Amazing Historical Suits of Armor\u3011\n * \u301079\u2020UFO Wreckage? Ancient Metal Object Found in Romania Has Unexplained Origins\u3011\n\n## The Tomb Veiled in Mystery\n\nSadly, there isn\u2019t much more that is known about the Nanjing Belt or the discovery of the ancient hero\u2019s tomb. Popular sources are exceptionally vague on this topic - perhaps for a reason? Officially, the tomb of Zhou Chu is not mentioned. The mentions of this 1952 discovery are reserved only to the fringes of the online scholarly communities, and we cannot say why.\n\nPopularly, the writer Erich von D\u00e4niken, in his famed work \u201cChariots of the Gods\u201d, wrote of this discovery and claimed that the traces of aluminum alloy are a clear proof of \u301080\u2020ancient aliens\u3011 visiting Earth and sharing deep knowledge with ancient civilizations.\n\nCould such a thing be true? We do not know for certain. Could it, on the other hand, be possible that the ancient Chinese found a way to create an aluminum alloy through methods lost to history and the knowledge of man? If it is so, then there truly are deeper secrets hiding in the world\u2019s history.\n\nTop image: Left, ancient alchemy painting. Right, The artifact known as the \u2018Nanjing Belt\u2019 seems to be proof of the existence of aluminum in early China. Aluminium it will be remembered does not appear alone in nature. It took Europeans till the early nineteenth century to understand how to isolate this useful substance and even then the aluminium that issued was far from pure.\n\nChinese historians were, understandably, bemused and something of a civil war broke out, not helped by the fact that the Cultural Revolution was on the horizon. If there was a resolution though before Mao\u2019s guillotine came down it was that four pieces were, indeed, aluminium. The problem then was not metallurgical but rather archaeological: were they Jin Dynasty \u301013\u2020relics\u2020www.azed.gov\u3011 or had they been placed in the tomb in the nineteenth or twentieth centuries? If genuine, it goes without saying that you would need a merchant cash advance and possibly your life savings multiplied by three to get a sniff at these objects in an auction house.\n\nThis question was taken up in the west by three scholars \u2013 Butler, Glidewell and Pritchard \u2013 at St Andrew\u2019s University who looked at the question in\u00a0 \u2018Aluminium Objects from a Jin Dynasty Tomb \u2013 Can They Be Authentic?\u2019 Interdisciplinary Science Reviews 11 (1986), 88-94.\n\nThe abstract sums up their work nicely:\n\n> Pieces of aluminium, supposedly parts of a set of belt ornaments, were found in a Jin dynasty (AD 265\u2013420) tomb during excavations in the 1950s. The authenticity of these finds was questioned at the time in view of the technology required to isolate aluminium from its ore. In this review the archaeological and analytical evidence is reconsidered, but the matter remains unsettled, as it is known, from experimental evidence, that aluminium alloys can be prepared by the carbon reduction of alumina. Examination of the thermodynamic data for this process in terms of Ellingham diagrams demonstrates unequivocally that the temperature required for this process is greatly in excess of that possible with Jin dynasty technology, and so the finds cannot be authentic. However, it is quite possible that metallic objects containing small quantities of aluminium could have been produced in China at that time. The review ends with some speculation on how the pieces of aluminium came to be in the tomb.\n\nBeachcombing need only add that the three end by suggesting that the aluminium had been included with the other belt fragments as a practical joke at the time of excavation, but that the joke got out of hand: memories of Anglo-Saxon Attitudes.\n\nIt is a reasonable solution and \u2018Butler, Glidewell and Pritchard, 1986\u2019 is now the conventional answer to the problem of the Nanjing Belt in west and east.\n\nBeachcombing is a natural sceptic where aluminium before its time is on offer. But he is left slightly cold by the methodology in the St Andrews article. After all, the authors seem to go backwards, proving first that something cannot have been done\u2026 Still unless there is a way to prove the age of aluminium in the laboratory perhaps they had no other way to approach the problem.\n\nBeach will round off with William R. Corliss on the belt in 2003 for Corliss introduces one later Chinese attempt to explain the belt as a genuine artifact (249):\n\n> \u2018Assuming no hoax, it would appear that the Chinese had somehow isolated aluminum from its ores 1,500 years before the Europeans. Much has been made of the so-called

Nanjing belt. No vague tale from antiquity, the tomb and belt were thoroughly studied by modern archaeologist and chemists. The latter vouched for the existence of aluminum. A hoax was deemed highly improbable. Where, then, did the aluminum come from? Two possibilities seem in play: (1) The Chinese metallurgists of the Jin Dynasty, who had high temperature furnaces, accidentally hit upon one of several ways to chemically win aluminum from one of its several ones. (2) Contradicting the encyclopaedias [i.e. aluminium not found in an isolated form], Chinese geologists reported in 1985 that they had found grains of native aluminum in Guizhou Province. Could the Jin Dynasty metallurgists have collected enough of these grains to make the aluminum sections of the Nanjing belt? Did they hammer the grains together or perhaps melt them. The melting point of pure aluminum is only 1220 f. This temperature might not been out of reach 1,500 years ago.\u2019\n\nBeachcombing is always on the look out for \u301014\u2020wrong time\u3011 objects: drbeachcombing AT yahoo DOT com\n\n***\n\n12 July 2011: Marcy writes in to say, \u2018If temperatures of only 1220 F are required to extract aluminum from soil, then the Chinese should be ruling the world. \u00a0 Their porcelains have been fired to temperatures well over 2500 F for millenia. \u00a0The \u201cstandard\u201d among American potters is currently (2011) called \u2018cone 6\u2032. \u00a0 Cone six is attained between 2230 and 2250 Fahrenheit. \u00a0Even in the USA some dedicated potters fire to cone 10 and cone 13. \u00a0 That covers 2380 to 2455 Fahrenheit. \u00a0There must be a strong interaction between pottery and metallurgy.\u2019 Thanks Marcy!\n\n### Related posts\n\n 1. \u301015\u2020An Elephant Invades Italy in 1936\u3011\n 2. \u301016\u2020Druidic Ravens at the Tower of London?\u3011\n 3. \u301017\u2020Total Eclipse\u3011\n 4. \u301018\u2020Ancient Beliefs in Modern Egypt\u3011\n 5. \u301019\u2020Oaks: Sacrificial and Otherwise\u3011\n\nTags:\u301020\u2020China\u3011, \u301021\u2020Jin Dynasty\u3011, \u301022\u2020Nanjing Belt\u3011, \u301023\u2020St Andrews\u3011, \u301024\u2020William Corliss\u3011, \u301025\u2020Wrong Time\u3011\n\n * ## Follow Dr. Beachcombing \n\n   * [Image 1]\n   * [Image 2]\n\n * ## New Pwca Books\n\n * \u301026\u2020Victorian and Edwardian Bedfordshire Ghost Stories\u2020www.amazon.co.uk\u3011\n   * \u301027\u2020Higson, South Manchester Supernatural\u2020www.amazon.com\u3011\n   * \u301028\u2020The Wizards, Astrologers, Fairy Seers and Witches of Victorian Liverpool\u2020www.amazon.co.uk\u3011\n   * \u301029\u2020Sheridan Le Fanu\u2019s Scary Fairy Stories\u2020www.amazon.com\u3011\n * \u301030\u2020Hurst, The Victorian Ghosts, Devils and Witches of Northern Bedfordshire\u2020www.amazon.com\u3011\n\n * \n\nStrange History theme song \u301031\u2020http://www.strangehistory.net/blog/wp-content/uploads/2014/02/Four-Lads-Istanbul.mp3\u3011\n\n * ## Tags\n\n\u301032\u2020Africa\u3011 \u301033\u2020Britain\u3011 \u301034\u2020Capital Punishment\u3011 \u301020\u2020China\u3011 \u301035\u2020Christianity\u3011 \u301036\u2020Cobblers\u3011 \u301037\u2020Cornwall\u3011 \u301038\u2020Crime\u3011 \u301039\u2020Cryptozoology\u3011 \u301040\u2020Egypt\u3011 \u301041\u2020Fairies\u3011 \u301042\u2020Flight\u3011 \u301043\u2020Florence\u3011 \u301044\u2020Folklore\u3011 \u301045\u2020Food\u3011 \u301046\u2020Forteana\u3011 \u301047\u2020France\u3011 \u301048\u2020Germany\u3011 \u301049\u2020Ghosts\u3011 \u301050\u2020Image\u3011 \u301051\u2020India\u3011 \u301052\u2020Ireland\u3011 \u301053\u2020Italy\u3011 \u301054\u2020Japan\u3011 \u301055\u2020Lancashire\u3011 \u301056\u2020London\u3011 \u301057\u2020Medicine\u3011 \u301058\u2020Mermaids\u3011 \u301059\u2020Review\u3011 \u301060\u2020Romans\u3011 \u301061\u2020Scotland\u3011 \u301062\u2020Soviet Union\u3011 \u301063\u2020Spain\u3011 \u301064\u2020Urban

(Soul-guidance)]\n\nAluminium artifact found in a 3rd century Chinese tomb. (\u301076\u2020Soul-guidance\u2020www.soul-guidance.com\u3011)\n\n## A Discovery That Defied Common Knowledge\n\nSoon after the stunning discovery, the Chinese scientific circles were stirred. Thorough analysis was required of all the metallic pieces discovered. The first tests were conducted by Nanjing University, and the Chinese Academy of Sciences, and they found that the tested pieces were an alloy containing mostly aluminum.\n\nSuch a claim caused a big shock, as everyone knew that aluminum is very difficult to isolate from bauxite, as a pure metal, without using a lot of electric power. Nevertheless, further tests were conducted, on other pieces as well, revealing that not all of them were from aluminum. Others were made from an alloy that contained mostly \u301077\u2020silver\u3011.\n\nBetween 1958 and 1959, the third round of tests was conducted at Qinghua University, where it was finally firmly concluded that the primary metal in the alloy was aluminum, with other fragments made from silver alloy.\n\nFrom this point on, there were other studies over the decades - many of which tried to change the narrative that was established early on. One theory stated that the aluminum belt parts were irregularly shaped, and could have been parts of modern aluminum tools that were left by potential grave robbers before the discovery was made. While it is possible that grave robbers entered the grave before the very first arrival of the archaeological team, it is not certain that anything of the sort occurred, or that they dropped aluminum fragments.\n\nSome sources claim that there were other similar belt buckles amongst other ancient Chinese relics, containing parts

made from aluminum. They were never studied, however, and their presence remains unconfirmed. Either way, the Nanjing Belt left a deep whirlpool in the Chinese and global scholarly circles. It provided an enigma that was never fully resolved.\n\n * \u301078\u2020More than Metal: Amazing Historical Suits of Armor\u3011\n * \u301079\u2020UFO Wreckage? Ancient Metal Object Found in Romania Has Unexplained Origins\u3011\n\n## The Tomb Veiled in Mystery\n\nSadly, there isn\u2019t much more that is known about the Nanjing Belt or the discovery of the ancient hero\u2019s tomb. Popular sources are exceptionally vague on this topic - perhaps for a reason? Officially, the tomb of Zhou Chu is not mentioned. The mentions of this 1952 discovery are reserved only to the fringes of the online scholarly communities, and we cannot say why.\n\nPopularly, the writer Erich von D\u00e4niken, in his famed work \u201cChariots of the Gods\u201d, wrote of this discovery and claimed that the traces of aluminum alloy are a clear proof of \u301080\u2020ancient aliens\u3011 visiting Earth and sharing deep knowledge with ancient civilizations.\n\nCould such a thing be true? We do not know for certain. Could it, on the other hand, be possible that the ancient Chinese found a way to create an aluminum alloy through methods lost to history and the knowledge of man? If it is so, then there truly are deeper secrets hiding in the world\u2019s history.\n\nTop image: Left, ancient alchemy painting. Aluminium it will be remembered does not appear alone in nature. It took Europeans till the early nineteenth century to understand how to isolate this useful substance and even

then the aluminium that issued was far from pure.\n\nChinese historians were, understandably, bemused and something of a civil war broke out, not helped by the fact that the Cultural Revolution was on the horizon. If there was a resolution though before Mao\u2019s guillotine came down it was that four pieces were, indeed, aluminium. The problem then was not metallurgical but rather archaeological: were they Jin Dynasty \u301013\u2020relics\u2020www.azed.gov\u3011 or had they been placed in the tomb in the nineteenth or twentieth centuries? If genuine, it goes without saying that you would need a merchant cash advance and possibly your life savings multiplied by three to get a sniff at these objects in an auction house.\n\nThis question was taken up in the west by three scholars \u2013 Butler, Glidewell and Pritchard \u2013 at St Andrew\u2019s University who looked at the question in\u00a0 \u2018Aluminium Objects from a Jin Dynasty Tomb \u2013 Can They Be Authentic?\u2019 Interdisciplinary Science Reviews 11 (1986), 88-94.\n\nThe abstract sums up their work nicely:\n\n> Pieces of aluminium, supposedly parts of a set of belt ornaments, were found in a Jin dynasty (AD 265\u2013420) tomb during excavations in the 1950s. The authenticity of these finds was questioned at the time in view of the technology required to isolate aluminium from its ore. In this review the archaeological and analytical evidence is reconsidered, but the matter remains unsettled, as it is known, from experimental evidence, that aluminium alloys can be prepared by the carbon reduction of alumina. Examination of the thermodynamic data for this process in terms of Ellingham diagrams demonstrates unequivocally that the temperature required for this process is greatly in excess of that possible with Jin dynasty technology, and so the finds cannot be authentic. However, it is quite possible that metallic objects containing small quantities of aluminium could have been produced in China at that time. The review ends with some speculation on how the pieces of aluminium came to be in the tomb.\n\nBeachcombing need only add that the three end by suggesting that the aluminium had been included with the other belt fragments as a practical joke at the time of excavation, but that the joke got out of hand: memories of Anglo-Saxon Attitudes.\n\nIt is a reasonable solution and \u2018Butler, Glidewell and Pritchard, 1986\u2019 is now the conventional answer to the problem of the Nanjing Belt in west and east.\n\nBeachcombing is a natural sceptic where aluminium before its time is on offer. But he is left slightly cold by the methodology in the St Andrews article. After all, the authors seem to go backwards, proving first that something cannot have been done\u2026 Still unless there is a way to prove the age of aluminium in the laboratory perhaps they had no other way to approach the problem.\n\nBeach will round off with William R. Corliss on the belt in 2003 for Corliss introduces one later Chinese attempt to explain the belt as a genuine artifact (249):\n\n> \u2018Assuming no hoax, it would appear that the Chinese had somehow isolated aluminum from its ores 1,500 years before the Europeans. Much has been made of the so-called Nanjing belt. No vague tale from antiquity, the tomb and belt were thoroughly studied by modern archaeologist and chemists. The latter vouched for the existence of aluminum. A hoax was deemed highly improbable. Where, then, did the aluminum come from? Two possibilities seem in play: (1) The Chinese metallurgists of the Jin Dynasty, who had high temperature furnaces, accidentally hit upon one of several ways to chemically win aluminum from one of its several ones. (2) Contradicting the encyclopaedias [i.e. aluminium not found in an isolated form], Chinese geologists reported in 1985 that they had found grains of native aluminum in Guizhou Province. Could the Jin Dynasty metallurgists have collected enough of these grains to make the aluminum sections of the Nanjing belt? Did they hammer the grains together or perhaps melt them. The

melting point of pure aluminum is only 1220 f. This temperature might not been out of reach 1,500 years ago.\u2019\n\nBeachcombing is always on the look out for \u301014\u2020wrong time\u3011 objects: drbeachcombing AT yahoo DOT com\n\n***\n\n12 July 2011: Marcy writes in to say, \u2018If temperatures of only 1220 F are required to extract aluminum from soil, then the Chinese should be ruling the world. \u00a0 Their porcelains have been fired to temperatures well over 2500 F for millenia. \u00a0The \u201cstandard\u201d among American potters is currently (2011) called \u2018cone 6\u2032. \u00a0 Cone six is attained between 2230 and 2250 Fahrenheit. \u00a0Even in the USA some dedicated potters fire to cone 10 and cone 13. \u00a0 That covers 2380 to 2455 Fahrenheit. \u00a0There must be a strong interaction between pottery and metallurgy.\u2019 Thanks Marcy!\n\n### Related posts\n\n 1. \u301015\u2020An Elephant Invades Italy in 1936\u3011\n 2. \u301016\u2020Druidic Ravens at the Tower of London?\u3011\n 3. \u301017\u2020Total Eclipse\u3011\n 4. \u301018\u2020Ancient Beliefs in Modern Egypt\u3011\n 5. \u301019\u2020Oaks: Sacrificial and Otherwise\u3011\n\nTags:\u301020\u2020China\u3011, \u301021\u2020Jin Dynasty\u3011, \u301022\u2020Nanjing Belt\u3011, \u301023\u2020St Andrews\u3011, \u301024\u2020William Corliss\u3011, \u301025\u2020Wrong Time\u3011\n\n * ## Follow Dr. Beachcombing \n\n   * [Image 1]\n   * [Image 2]\n\n * ## New Pwca Books\n\n * \u301026\u2020Victorian and Edwardian Bedfordshire Ghost Stories\u2020www.amazon.co.uk\u3011\n   * \u301027\u2020Higson, South Manchester Supernatural\u2020www.amazon.com\u3011\n   * \u301028\u2020The Wizards, Astrologers, Fairy Seers and Witches of Victorian Liverpool\u2020www.amazon.co.uk\u3011\n   * \u301029\u2020Sheridan Le Fanu\u2019s Scary Fairy Stories\u2020www.amazon.com\u3011\n * \u301030\u2020Hurst, The Victorian Ghosts, Devils and Witches of Northern Bedfordshire\u2020www.amazon.com\u3011\n\n * \n\nStrange History theme song \u301031\u2020http://www.strangehistory.net/blog/wp-content/uploads/2014/02/Four-Lads-Istanbul.mp3\u3011\n\n * ## Tags\n\n\u301032\u2020Africa\u3011 \u301033\u2020Britain\u3011 \u301034\u2020Capital Punishment\u3011 \u301020\u2020China\u3011 \u301035\u2020Christianity\u3011 \u301036\u2020Cobblers\u3011 \u301037\u2020Cornwall\u3011 \u301038\u2020Crime\u3011 \u301039\u2020Cryptozoology\u3011 \u301040\u2020Egypt\u3011 \u301041\u2020Fairies\u3011 \u301042\u2020Flight\u3011 \u301043\u2020Florence\u3011 \u301044\u2020Folklore\u3011 \u301045\u2020Food\u3011 \u301046\u2020Forteana\u3011 \u301047\u2020France\u3011 \u301048\u2020Germany\u3011 \u301049\u2020Ghosts\u3011 \u301050\u2020Image\u3011 \u301051\u2020India\u3011 \u301052\u2020Ireland\u3011 \u301053\u2020Italy\u3011 \u301054\u2020Japan\u3011 \u301055\u2020Lancashire\u3011 \u301056\u2020London\u3011 \u301057\u2020Medicine\u3011 \u301058\u2020Mermaids\u3011 \u301059\u2020Review\u3011 \u301060\u2020Romans\u3011 \u301061\u2020Scotland\u3011 \u301062\u2020Soviet Union\u3011 \u301063\u2020Spain\u3011 \u301064\u2020Urban Legends\u3011 \u301065\u2020US\u3011 \u301066\u2020Victorians\u3011 \u301067\u2020Wales\u3011 \u301068\u2020Weird Wars\u3011 \u301069\u2020WIBT\u3011 \u301070\u2020Witchcraft\u3011 \u301071\u2020Wrong Place\u3011 \u301025\u2020Wrong Time\u3011 \u301072\u2020WtH\u3011 \u301073\u2020WW1\u3011 \u301074\u2020WW2\u3011\n\n * \n\n## Recent Posts\n\n   * \u301075\u2020Early Modern Fairy Sex Spell\u3011 \n * \u301076\u2020Karl Banse: The Man Who Made the Case for Mermaids\u3011 \n   * \u301077\u2020The Wood Diva\u3011 \n   * \u301078\u2020The Dancing Fairies of Sennen Cove:\u3011 \n   * \u301079\u2020The Modern Western Ghost and Its Zombie Origins\u3011 \n   * \u301080\u2020Horse Spirits: Colt-Pixy or Pixy-Colt?\u3011 \n * \u301081\u2020The When of Levitation in the West\u3011 \n   * \u301082\u2020The

In fact, although it is possible to upload the catalog of products on Meta, content with clickable products always redirects to an external product page outside of the social media platform, and in fact Meta does not manage the transaction (except with specific solutions for some countries and for some Profiles/Brands, as of today).\n\nWith TikTok Shop, on the other hand, you can complete a purchase in a few clicks without ever leaving the app. TikTok provides seller support and should handle orders, shipments, and money flow internally. \nIn this way, TikTok Shop would position itself as a kind of integrated marketplace within the social media platform.\n\nTikTok provides 4 native formats for shopping on the platform:\n\n * Live shopping: You can purchase directly during creators\u2019 live streams by tapping on pinned products or exploring the shopping icon.\n * Shoppable videos: In-feed video content with clickable shop icons.\n * Product showcase: Showcase of products that you can find on brand or creator profiles.\n * Shop tab: Personalized shopping exploration section that groups various brands and different types of content.\n\n[Image 1: Immagine con 3 mockup di smartphone con differenti schermate di Tik Tok Shop][Image 2: Immagine con 3 mockup di smartphone con differenti schermate di Tik Tok Shop]\n\n## The crucial role of creators in TikTok Shop \n\nIf creators were already crucial on Instagram, they become even more so on TikTok. The reason is simple. \nIn-App purchases allow creators to sell the products they promote directly. \nWhile on Meta, creators or influencers lend their testimony to drive traffic and conversions to the websites of the brands they collaborate with, on TikTok, users purchase directly through the creators\u2019 channels.\n\nThis has two fundamental consequences:\n\n 1. Small businesses enter the game by creating content to sell their products directly. In this initial phase, TikTok\u2019s algorithm favors Shop content, offering great visibility to sellers and favorable commissions.\n 2. Medium/large brands can rely on creators to sell their products, without the need to internally produce content. This way, the brand does not have to invest resources in managing social media and can leverage the creator\u2019s fanbase.\n\nThe role of creators is therefore increasingly crucial in supporting brands in their online sales. The advertising style of creators is engaging and fun, reducing friction in the consumer\u2019s purchase journey, who immediately associates a positive feeling with the product being sold. \nOne could speak of \u201cadvertainment\u201d, a creative and well-executed advertising message, that also provides entertainment to users who choose to watch it.\n\n### Collaborations with creators are more transparent thanks to the Tik Tok Affiliation circuit \n\nMore and more brands are opting to collaborate with influencers and creators for promoting their products, but the results are not always as expected.\n\nOn Instagram, we\u2019re accustomed to hefty paychecks, with no guarantee in return that the influencer\u2019s testimony adds value to the promotion. \nThe fee is determined by

the number of contents produced by the influencer rather than the actual sales generated by their content. \nThis opaque collaboration mode has led to a sentiment of distrust towards influencer marketing in some cases. Consider the recent Balocco case: Chiara Ferragni received a high fee for promoting the pandori, which was not tied to the quantity of pandori sold, nor was the charity donation amount linked to the promo\u2019s success.\n\nBut on TikTok, the Affiliation circuit addresses this issue. The affiliation circuit serves as a platform that connects sellers looking to promote their products through influencers with creators seeking commercial opportunities and products to recommend. Once the partnership between the seller and influencer is established, the creator\u2019s commission is automatically paid by the platform when a user makes a purchase directly from their channel. This way, the seller only pays the influencer based on the sales they generate on their profile. \nThe affiliation circuit also benefits creators by providing them with a platform to showcase themselves to brands, without the need for intermediary influencer marketing agencies. Additionally, even creators with a limited fanbase will have the opportunity to monetize, as the promo fee will depend solely on their ability to communicate with their audience.\n\nTikTok\u2019s affiliation circuit thus represents a default and transparent mode of operation for influencer marketing, ushering in a new era that is fairer and based on merit.\n\n[Image 3: Immagine con 4 mockup di smartphone che rappresentano le fasi di acquisto su Tik Tok Shop: Product link, product detail page, selection option e checkout][Image 4: Immagine con 4 mockup di smartphone che rappresentano le fasi di acquisto su Tik Tok Shop: Product link, product detail page, selection option e checkout]\n\n### Which product categories are popular on TikTok Shop?\n\nAlthough the TikTok Shop experience has just begun, we already have the first statistics from the United States telling us which products are most appreciated and purchased by TikTok users.\n\nThe Beauty and Personal Care sector is decidedly the most appreciated, representing 22.5% of the entire market share. Women\u2019s Clothing and Intimates is the second most purchased category through TikTok Shop, accounting for 12.5% of purchases, while Men\u2019s Clothing and Intimates ranks third, with a preference rate of 8%.\n\nAs is already the case on Instagram, on TikTok, the female target audience appears to be the most responsive to the allure of social shopping.\n\nDo you want to sell online or are you looking for someone to boost your sales?\n\n#### \nDiscuss it with Matteo!\n\nMatteo Doveri Account Executive\n\n\u30107\u2020Book a meeting\u3011\n\n#### Continua a leggere \n\n4 minutes of reading\n\n[Image 5: Environment, the hidden CO2 emissions of the Internet][Image 6: Environment, the hidden CO2 emissions of", "title": "TikTok Shop also arrives in Europe. Maximize the products uploaded to TikTok Shop (TTS). Do not only upload your bestselling products or products that you believe will sell well on TikTok Shop. We strongly recommend uploading all products available to help increase exposure among potential shoppers.\n\n2. Maximize the number of Shoppable Video posts on your TikTok account. Do not only upload videos that have performed well on other platforms or that you believe will perform well on TikTok. Uploading videos on TikTok requires no additional costs. We strongly recommend posting as many videos as possible on your TikTok account to help increase exposure among potential shoppers.\n\n3. Add TikTok Shop Product Link (the little orange cart) to all relevant videos on your TikTok account. While it is best practice to ensure the linked product matches the video content, it is more important to have a TikTok Shop Product Link on as many video posts as possible.\n\n4. Participate in the open affiliate plan. You may participate in the targeted plan if you are already familiar with creators and have an existing creator pipeline. Tips on commission rate: If no benchmarks have been set before, we recommend starting with a 10% commission rate, and gradually reducing it to 5% or 1% as your TikTok Shop GMV grows.\n\n5. Start with \u30103\u2020Video Shopping Ads\u3011 (VSA) for TikTok Shop, prioritizing existing videos from your TikTok account that have already generated organic conversions (Spark Ads). Note that when using an existing video as an asset for Video Shopping Ads, the Video Shopping Ads will use the products chosen during ad creation in the ad link. You can choose to advertise the same or different list of products for the Video Shopping Ads vs. the organic link. You can even run a Video Shopping Ads with an existing video that has no organic link.\n\n6. If using new videos as an asset for Video Shopping Ads through TikTok Ads Manager (not using Spark Ads), we recommend posting the video with the TikTok Shop Product Link on

your TikTok account first, unless you are testing multiple variations of video captions, for which you may choose ads-only mode for some of the ads.\n\n7. Try to acquire affiliate videos that have been generating GMV for you and/or have high GPM (GMV per impression) as ad creatives assets. Obtain the video code from the affiliate creator. You can see all affiliate videos that have been generating GMV for you in the affiliate section of Seller Center and directly message the creator from Seller Center via Creator Connect.\n\n8. Try to use as many videos and/or TikTok Shop Product Links as possible under the same VSA ad group budget, ideally with 3-5 active video creatives in each ad group. Use the highest gross revenue and cost cap bid strategies according to preference and experiment with a combination of these two bid strategies. Experiment with using single product links (only one product per ad) and multiple product links (multiple products per ad) to test what works better for your business, as results may vary for different sellers.\n\n9. For the highest gross revenue ad group, keep scaling the budget every week, each time observing the ROAS of the previous 7 days on a rolling basis, and increase or decrease the budget as necessary. For cost cap, we recommend maximizing the budget after the ad has run for more than a day.\n\n10. Besides the 1 official TikTok account connected to your TikTok Shop, you can additionally connect up to 4 more TikTok accounts with your TikTok Shop for marketing purposes. Take advantage of this by differentiating your marketing accounts based on persona categories to cater to different audience preferences, presenting "UGC" style native content. This helps to broaden your interested audiences.\n\n11. If you are running a LIVE Shopping event, we highly recommend running \u30104\u2020Live Shopping Ads\u3011 (LSA), optimizing towards Gross Revenue, and starting with a budget of a few hundred dollars. LIVE Shopping events or LSA may or may not work well for your business. LIVE Shopping performance can be volatile but can work well for some businesses.\n\n12. TikTok Shop does not only offer ads GMV but also trackable organic GMV. It also offers a potentially large pool of "referral" style affiliate creatives that you can use for ads or other purposes.\n\n13. When considering Shop Ads performance, in addition to reviewing Shop Ads ROAS performance, we recommend reviewing overall TikTok Shop marketing ROI, which equates to [Shop total GMV / (Shop Ads ads cost + Shop affiliate commission)]. Consider how much GMV (paid, affiliate, organic) you are getting out of your marketing investment in TikTok Shop. Evaluate your TikTok Shop marketing ROI against your typical marketing ROI targets.\n\nContent Hide content \n\nOur Products\n\n* \u30105\u2020TikTok for Business\u2020www.tiktok.com\u3011\n* \u30106\u2020TikTok\u2020tiktok.com\u3011\n* \u30107\u2020Creative Center\u3011\n\n\u30100\u2020 \u3011 \n\n\u00a92024 TikTok For Business \n\n* \u30108\u2020 Terms & Policies \u3011\n* \u30109\u2020 Privacy \u2020www.tiktok.com\u3011\n* \u30100\u2020 Help \u3011\nVisible: 0% - 100%", "title": "Business Help Center", "tether_id": null}, "status": "finished_successfully", "end_turn": null, "weight": 0.0, "metadata": {"_cite_metadata": {"citation_format": {"name": "tether_og"}, "metadata_list": [{"type": "webpage", "title": "Business Help Center", "url": "https://ads.tiktok.com/help/article/considerations-when-launching-your-tiktok-shop-journey?lang=en", "text": "\nURL: https://ads.tiktok.com/help/article/considerations-when-launching-your-tiktok-shop-journey?lang=en\n\u30100\u2020 Business Help Center\u3011 \n\n\u30101\u2020Create an Ad\u3011\n\n[Image 0] \n\nConsiderations when launching your TikTok Shop Journey\n\nLast updated, May 2024 \n\nTikTok Shop is now available in the following markets: Indonesia, Malaysia, the Philippines, Singapore, Thailand, the United Kingdom,

the United States, and Vietnam.\n\nYou can directly create your TikTok Shop at \u30102\u2020TikTok Seller Center\u2020seller.tiktok.com\u3011.\n\nAfter creating your TikTok Shop, start your marketing and sales efforts with these recommended steps. \n\n1. Maximize the products uploaded to TikTok Shop (TTS). Do not only upload your bestselling products or products that you believe will sell well on TikTok Shop. We strongly recommend uploading all products available to help increase exposure among potential shoppers.\n\n2. Maximize the number of Shoppable Video posts on your TikTok account. Do not only upload videos that have performed well on other platforms or that you believe will perform well on TikTok. Uploading videos on TikTok requires no additional costs. We strongly recommend posting as many videos as possible on your TikTok account to help increase exposure among potential shoppers.\n\n3. Add TikTok Shop Product Link (the little orange cart) to all relevant videos on your TikTok account. While it is best practice to ensure the linked product matches the video content, it is more important to have a TikTok Shop Product Link on as many video posts as possible.\n\n4. Participate in the open affiliate plan. You may participate in the targeted plan if you are already familiar with creators and have an existing creator pipeline. Tips on commission rate: If no benchmarks have been set before, we recommend starting with a 10% commission rate, and gradually reducing it to 5% or 1% as your TikTok Shop GMV grows.\n\n5. Start with \u30103\u2020Video Shopping Ads\u3011 (VSA) for TikTok Shop, prioritizing existing videos from your TikTok account that have already generated organic conversions (Spark Ads). Note that when using an existing video as an asset for Video Shopping Ads, the Video Shopping Ads will use the products chosen during ad creation in the ad link. You can choose to advertise the same or different list of products for the Video Shopping Ads vs. the organic link. You can even run a Video Shopping Ads with an existing video that has no organic link.\n\n6. If using new videos as an asset for Video Shopping Ads through TikTok Ads Manager (not using Spark Ads), we recommend posting the video with the TikTok Shop Product Link on your TikTok account first, unless you are testing multiple variations of video captions, for which you may choose ads-only mode for some of the ads.\n\n7. Try to acquire affiliate videos that have been generating GMV for you and/or have high GPM (GMV per impression) as ad creatives assets. Obtain the video code from the affiliate creator. You can see all affiliate videos that have been generating GMV for you in the affiliate section of Seller Center and directly message the creator from Seller Center via Creator Connect.\n\n8. Try to use as many videos and/or TikTok Shop Product Links as possible under the same VSA ad group budget, ideally with 3-5 active video creatives in each ad group. Use the highest gross revenue and cost cap bid strategies according to preference and experiment with a combination of these two bid strategies. Experiment with using single product links (only one product per ad) and multiple product links (multiple products per ad) to test what works better for your business, as results may vary for different sellers.\n\n9. The new function that will change the approach to online shopping. - HT&T Consulting .", "url": "https://www.htt.it/en/tiktok-shop-also-arrives-in-europe-online-shopping/", "text": "But Instagram and Facebook represent only two showcases for brands, and purchases continue to be made on e-commerce and marketplace platforms. In fact, although it is possible to upload the catalog of products on Meta, content with clickable products always redirects to an external product page outside of the social media platform, and in fact Meta does not manage the transaction (except with specific solutions for some countries and for some Profiles/Brands, as of today).\n\nWith TikTok Shop, on the other hand, you can complete a purchase in a few clicks without ever leaving the app. TikTok provides seller support and should handle orders, shipments, and money flow internally. \nIn this way, TikTok Shop would position itself as a kind of integrated marketplace within the social media platform.\n\nTikTok provides 4 native formats for shopping on the platform:\n\n * Live shopping: You can purchase directly during creators\u2019 live streams by tapping on pinned products or exploring the shopping icon.\n * Shoppable videos: In-feed video content with clickable shop icons.\n * Product showcase: Showcase of products that you can find on brand or creator profiles.\n * Shop tab: Personalized shopping exploration section that groups various brands and different types of content.\n\n[Image 1: Immagine con 3 mockup di smartphone con differenti schermate di Tik Tok Shop][Image 2: Immagine con 3 mockup di smartphone con differenti schermate di Tik Tok Shop]\n\n## The crucial role of creators in TikTok Shop \n\nIf creators were already crucial on Instagram, they become even more so on TikTok. The reason is simple. \nIn-App purchases allow creators to sell the products they promote directly. \nWhile on Meta, creators or influencers lend their testimony to drive traffic and conversions to the websites of the brands they collaborate with, on TikTok, users purchase directly through the creators\u2019 channels.\n\nThis has two fundamental consequences:\n\n 1. Small businesses enter the game by creating content to sell their products directly. In this initial phase, TikTok\u2019s algorithm favors Shop content, offering great visibility to sellers and favorable commissions.\n 2. Medium/large brands can rely on creators to sell their products, without the need to internally produce content. This way, the brand does not have to invest resources in managing social media and can leverage the creator\u2019s fanbase.\n\nThe role of creators is therefore increasingly crucial in supporting brands in their online sales. The advertising style of creators is engaging and fun, reducing friction in the consumer\u2019s purchase journey, who immediately associates a positive feeling with the product being sold. \nOne could speak of \u201cadvertainment\u201d, a creative and well-executed advertising message, that also provides entertainment to users who choose to watch it.\n\n### Collaborations with creators are more transparent thanks to the Tik Tok Affiliation circuit \n\nMore and more brands are opting to collaborate with influencers and creators for promoting their products, but the results are not always as expected.\n\nOn Instagram, we\u2019re accustomed to hefty paychecks, with no guarantee in return that the influencer\u2019s testimony adds value to the promotion. \nThe fee is determined by the number of contents produced by the influencer rather than the actual sales generated by their content. \nThis opaque collaboration mode

has led to a sentiment of distrust towards influencer marketing in some cases. Consider the recent Balocco case: Chiara Ferragni received a high fee for promoting the pandori, which was not tied to the quantity of pandori sold, nor was the charity donation amount linked to the promo\u2019s success.\n\nBut on TikTok, the Affiliation circuit addresses this issue. The affiliation circuit serves as a platform that connects sellers looking to promote their products through influencers with creators seeking commercial opportunities and products to recommend. Once the partnership between the seller and influencer is established, the creator\u2019s commission is automatically paid by the platform when a user makes a purchase directly from their channel. This way, the seller only pays the influencer based on the sales they generate on their profile. \nThe affiliation circuit also benefits creators by providing them with a platform to showcase themselves to brands, without the need for intermediary influencer marketing agencies. Additionally, even creators with a limited fanbase will have the opportunity to monetize, as the promo fee will depend solely on their ability to communicate with their audience.\n\nTikTok\u2019s affiliation circuit thus represents a default and transparent mode of operation for influencer marketing, ushering in a new era that is fairer and based on merit.\n\n[Image 3: Immagine con 4 mockup di smartphone che rappresentano le fasi di acquisto su Tik Tok Shop: Product link, product detail page, selection option e checkout][Image 4: Immagine con 4 mockup di smartphone che rappresentano le fasi di acquisto su Tik Tok Shop: Product link, product detail page, selection option e checkout]\n\n### Which product categories are popular on TikTok Shop?\n\nAlthough the TikTok Shop experience has just begun, we already have the first statistics from the United States telling us which products are most appreciated and purchased by TikTok users.\n\nThe Beauty and Personal Care sector is decidedly the most appreciated, representing 22.5% of the entire market share. Women\u2019s Clothing and Intimates is the second most purchased category through TikTok Shop, accounting for 12.5% of purchases, while Men\u2019s Clothing and Intimates ranks third, with a preference rate of 8%.\n\nAs is already the case on Instagram, on TikTok, the female target audience appears to be the most responsive to the allure of social shopping.\n\nDo you want to sell online or are you looking for someone to boost your sales?\n\n#### \nDiscuss it with Matteo!\n\nMatteo Doveri Account Executive\n\n\u30107\u2020Book a meeting\u3011\n\n#### Continua a leggere \n\n4 minutes of reading\n\n[Image 5: Environment, the hidden CO2 emissions of the Internet][Image 6: Environment, the hidden CO2 emissions of", "pub_date": null, "extra": {"cited_message_idx": 8, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}, {"start_ix": 475, "end_ix": 485, "citation_format_type": "tether_og", "metadata": {"type": "webpage", "title": "TikTok Shopping & Showcase | TikTok For Business", "url": "https://ads.tiktok.com/help/article/tiktok-shopping-and-showcase?lang=it", "text": "\nUna scheda Vetrina dei prodotti pu\u00f2 contenere prodotti delle seguenti opzioni:\n\n * Tutti i prodotti di un TikTok Shop.\n\n * Alcuni prodotti di un negozio.\n\n * Prodotti provenienti da pi\u00f9 negozi.\n\n[Image 1: TikTok Shopping and Showcase-PNG]\n\n## Ecco cosa devi sapere prima di utilizzare TikTok Shop e Vetrina \n\n 1. The new function that will change the approach to online shopping. - HT&T Consulting .", "url": "https://www.htt.it/en/tiktok-shop-also-arrives-in-europe-online-shopping/", "pub_date": null, "snippet": "But Instagram and Facebook represent only two showcases for brands, and purchases continue to be made on e-commerce and marketplace platforms. In fact, although it is possible to upload the catalog of products on Meta, content with clickable products always redirects to an external product page outside of the social media platform, and in fact Meta does not manage the transaction (except with specific solutions for some countries and for some Profiles/Brands, as of today).\n\nWith TikTok Shop, on the other hand, you can complete a purchase in a few clicks without ever leaving the app. TikTok provides seller support and should handle orders, shipments, and money flow internally. \nIn this way, TikTok Shop would position itself as a kind of integrated marketplace within the social media platform.\n\nTikTok provides 4 native formats for shopping on the platform:\n\n * Live shopping: You can purchase directly during creators\u2019 live streams by tapping on pinned products or exploring the shopping icon.\n * Shoppable videos: In-feed video content with clickable shop icons.\n * Product showcase: Showcase of products that you can find on brand or creator profiles.\n * Shop tab: Personalized shopping exploration section that groups various brands and different types of content.\n\n[Image 1: Immagine con 3 mockup di smartphone con differenti schermate di Tik Tok Shop][Image 2: Immagine con 3 mockup di smartphone con differenti schermate di Tik Tok Shop]\n\n## The crucial role of creators in TikTok Shop \n\nIf creators were already crucial on Instagram, they become even more so on TikTok. The reason is simple. \nIn-App purchases allow creators to sell the products they promote directly. \nWhile on Meta, creators or influencers lend their testimony to drive traffic and conversions to the websites of the brands they collaborate with, on TikTok, users purchase directly through the creators\u2019 channels.\n\nThis has two fundamental consequences:\n\n 1. Small businesses enter the game by creating content to sell their products directly. In this initial phase, TikTok\u2019s algorithm favors Shop content, offering great visibility to sellers and favorable commissions.\n 2. Medium/large brands can rely on creators to sell their products, without the need to internally produce content. This way, the brand does not have to invest resources in managing social media and can leverage the creator\u2019s fanbase.\n\nThe role of creators is therefore increasingly crucial in supporting brands in their online sales. The advertising style of creators is engaging and fun, reducing friction in the consumer\u2019s purchase journey, who immediately associates a positive feeling with the product being sold. \nOne could speak of \u201cadvertainment\u201d, a creative and well-executed advertising message, that also provides entertainment to users who choose to watch it.\n\n### Collaborations with creators are more transparent thanks to the Tik Tok Affiliation circuit \n\nMore and more brands are opting to collaborate with influencers and creators for promoting their products, but the results are not always as expected.\n\nOn Instagram, we\u2019re accustomed to hefty paychecks, with no guarantee in return that the influencer\u2019s testimony adds value to the promotion. \nThe fee is determined by the number of contents produced by the influencer rather than the actual sales generated by their content. \nThis opaque collaboration mode has led to a sentiment of distrust towards influencer marketing in some cases. Consider the recent Balocco case: Chiara Ferragni received a high fee for promoting the pandori, which was not tied to the quantity of pandori sold, nor was the charity

donation amount linked to the promo\u2019s success.\n\nBut on TikTok, the Affiliation circuit addresses this issue. The affiliation circuit serves as a platform that connects sellers looking to promote their products through influencers with creators seeking commercial opportunities and products to recommend. Once the partnership between the seller and influencer is established, the creator\u2019s commission is automatically paid by the platform when a user makes a purchase directly from their channel. This way, the seller only pays the influencer based on the sales they generate on their profile. \nThe affiliation circuit also benefits creators by providing them with a platform to showcase themselves to brands, without the need for intermediary influencer marketing agencies. Additionally, even creators with a limited fanbase will have the opportunity to monetize, as the promo fee will depend solely on their ability to communicate with their audience.\n\nTikTok\u2019s affiliation circuit thus represents a default and transparent mode of operation for influencer marketing, ushering in a new era that is fairer and based on merit.\n\n[Image 3: Immagine con 4 mockup di smartphone che rappresentano le fasi di acquisto su Tik Tok Shop: Product link, product detail page, selection option e checkout][Image 4: Immagine con 4 mockup di smartphone che rappresentano le fasi di acquisto su Tik Tok Shop: Product link, product detail page, selection option e checkout]\n\n### Which product categories are popular on TikTok Shop?\n\nAlthough the TikTok Shop experience has just begun, we already have the first statistics from the United States telling us which products are most appreciated and purchased by TikTok users.\n\nThe Beauty and Personal Care sector is decidedly the most appreciated, representing 22.5% of the entire market share. \n\n1. Maximize the products uploaded to TikTok Shop (TTS). Do not only upload your bestselling products or products that you believe will sell well on TikTok Shop. We strongly recommend uploading all products available to help increase exposure among potential shoppers.\n\n2. Maximize the number of Shoppable Video posts on your TikTok account. Do not only upload videos that have performed well on other platforms or that you believe will perform well on TikTok. Uploading videos on TikTok requires no additional costs. We strongly recommend posting as many videos as possible on your TikTok account to help increase exposure among potential shoppers.\n\n3. Add TikTok Shop Product Link (the little orange cart) to all relevant videos on your TikTok account. While it is best practice to ensure the linked product matches the video content, it is more important to have a TikTok Shop Product Link on as many video posts as possible.\n\n4. Participate in the open affiliate plan. You may participate in the targeted plan if you are already familiar with creators and have an existing creator pipeline. Tips on commission rate: If no benchmarks have been set before, we recommend starting with a 10% commission rate, and gradually reducing it to 5% or 1% as your TikTok Shop GMV grows.\n\n5. Start with \u30103\u2020Video Shopping Ads\u3011 (VSA) for TikTok Shop, prioritizing existing videos from your TikTok account that have already generated organic conversions (Spark Ads). Note that when using an existing video as an asset for Video Shopping Ads, the Video Shopping Ads will use the products chosen during ad creation in the ad link. You can choose to advertise the same or different list of products for the Video Shopping Ads vs. the organic link. You can even run a Video Shopping Ads with an existing video that has no organic link.\n\n6. If using new videos as an asset for Video Shopping Ads through TikTok Ads Manager (not using Spark Ads), we recommend posting the video with the TikTok Shop Product Link on your TikTok account first, unless you are testing multiple variations of video captions, for which you may choose ads-only mode for some of the ads.\n\n7. Try to acquire affiliate videos that have been generating GMV for you and/or have high GPM (GMV per impression) as ad creatives assets. Obtain the video code from the affiliate creator. You can see all affiliate videos that have been generating GMV for you in the affiliate section of Seller Center and directly message the creator from Seller Center via Creator Connect.\n\n8. Try to use as many videos and/or TikTok Shop Product Links as possible under the same VSA ad group budget, ideally with 3-5 active video creatives in each ad group. Use the highest gross revenue and cost cap bid strategies according to preference and experiment with a combination of these two bid strategies. Experiment with using single product links (only one product per ad) and multiple product links (multiple products per ad) to test what works better for your business, as results may vary for different sellers.\n\n9. For the highest gross revenue ad group, keep scaling the budget every week, each time observing the ROAS of the previous 7 days on a rolling basis, and increase or decrease the budget as necessary. For cost cap, we recommend maximizing the budget after the ad has run for more than a day.\n\n10. Besides the 1 official TikTok account connected to your TikTok Shop, you can additionally connect up to 4 more TikTok accounts with your TikTok Shop for marketing purposes. Take advantage of this by differentiating your marketing accounts based on persona categories to cater to different audience preferences, presenting "UGC" style native content. This helps to broaden your interested audiences.\n\n11. If you are running a LIVE Shopping event, we highly recommend running \u30104\u2020Live Shopping Ads\u3011 (LSA), optimizing towards Gross Revenue, and starting with a budget of a few hundred dollars. LIVE Shopping events or LSA may or may not work well for your business. LIVE Shopping performance can be volatile but

can work well for some businesses.\n\n12. TikTok Shop does not only offer ads GMV but also trackable organic GMV. It also offers a potentially large pool of "referral" style affiliate creatives that you can use for ads or other purposes.\n\n13. When considering Shop Ads performance, in addition to reviewing Shop Ads ROAS performance, we recommend reviewing overall TikTok Shop marketing ROI, which equates to [Shop total GMV / (Shop Ads ads cost + Shop affiliate commission)]. Consider how much GMV (paid, affiliate, organic) you are getting out of your marketing investment in TikTok Shop. Evaluate your TikTok Shop marketing ROI against your typical marketing ROI targets.\n\nContent Hide content \n\nOur Products\n\n* \u30105\u2020TikTok for Business\u2020www.tiktok.com\u3011\n* \u30106\u2020TikTok\u2020tiktok.com\u3011\n* \u30107\u2020Creative Center\u3011\n\n\u30100\u2020 \u3011 \n\n\u00a92024 TikTok For Business \n\n* \u30108\u2020 Terms & Policies \u3011\n* \u30109\u2020 Privacy \u2020www.tiktok.com\u3011\n* \u30100\u2020 Help \u3011\nVisible: 0% - 100%", "pub_date": null, "extra": {"cited_message_idx": 10, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}, {"start_ix": 1384, "end_ix": 1394, "citation_format_type": "tether_og", "metadata": {"type": "webpage", "title": "TikTok Shopping & Showcase | TikTok For Business", "url": "https://ads.tiktok.com/help/article/tiktok-shopping-and-showcase?lang=it", "text": "\nUna scheda Vetrina dei prodotti pu\u00f2 contenere prodotti delle seguenti opzioni:\n\n * Tutti i prodotti di un TikTok Shop.\n\n * Alcuni prodotti di un negozio.\n\n * Prodotti provenienti da pi\u00f9 negozi.\n\n[Image 1: TikTok Shopping and Showcase-PNG]\n\n## Ecco cosa devi sapere prima di utilizzare TikTok Shop e Vetrina \n\n 1. TikTok Shop e le Presentazioni non sono uguali.\n\n   * Se hai soltanto una Vetrina e non un TikTok Shop, puoi comunque fare pubblicit\u00e0 utilizzando i prodotti nella tua vetrina e fare riferimento a \u30103\u2020Come configurare Video Shopping Ads con Vetrina\u3011.\n\n   * Se scegli Vetrina o TikTok Shop come origine prodotto, l\u2019elenco dei prodotti che possono essere selezionati per la pubblicit\u00e0 cambia di conseguenza.\n\n   * Ricordati che TikTok Shop contiene l\u2019inventario dei prodotti di propriet\u00e0 del venditore. Se vendi i prodotti attraverso un account affiliato o di marketing, \u00e8 possibile che tu possieda un TikTok Shop.\n\n 2. Da notare che non tutti coloro che possiedono una Vetrina hanno un TikTok Shop.\n\n   * Ad esempio, un brand pu\u00f2 concedere a un terzo l\u2019autorizzazione a vendere prodotti a suo nome. Questi prodotti sono visualizzati nella Vetrina del terzo per essere acquistati dai clienti. Un terzo non possiede i prodotti che vende, ma piuttosto vende i prodotti per conto del brand.\n\n## Ecco cosa devi sapere per utilizzare TikTok Shop e Vetrina \n\nPossedere una Vetrina non significa necessariamente possedere un TikTok Shop. Gli esempi che seguono mostrano i diversi scenari che si verificano tra TikTok Shop e Vetrina.\n\n### Esempi \n\n 1. Per un account TikTok ufficiale, tutti i prodotti di un brand verranno automaticamente visualizzati nella loro Vetrina.\n\n 2. Un brand pu\u00f2 consentire agli account commerciali/affiliati di vendere i prodotti per suo conto. La Vetrina degli account commerciali/affiliati visualizzer\u00e0 alcuni o tutti i prodotti di un negozio.\n\n   * Esempio 1: un brand di calzature pu\u00f2 consentire a pi\u00f9 account commerciali, gestiti da terzi, di vendere prodotti a suo nome.\n\n   * Esempio 2: due brand diversi di calzature possono consentire a un account affiliato/di marketing gestito da un importante rivenditore al dettaglio o da uno store specializzato di vendere prodotti per conto di entrambi i brand.\n\n## Come utilizzare TikTok Shop e Vetrina\n\n### Come account TikTok ufficiale \n\nSe sei un account

TikTok ufficiale con un TikTok Shop, la tua Vetrina mostrer\u00e0 tutti i tuoi prodotti.\n\n##### Come sono collegati i tuoi prodotti tra TikTok Shop e Vetrina:\n\n * In Seller Center collega un account TikTok ufficiale. Dopo che il titolare dell\u2019account TikTok ha confermato il link, tutti i prodotti del TikTok Shop vengono automaticamente visualizzati nella Vetrina.\n\n * Il link dipende dal Paese in cui vende lo shop. Maximize the products uploaded to TikTok Shop (TTS). Do not only upload your bestselling products or products that you believe will sell well on TikTok Shop. We strongly recommend uploading all products available to help increase exposure among potential shoppers.\n\n2. Maximize the number of Shoppable Video posts on your TikTok account. Do not only upload videos that have performed well on other platforms or that you believe will perform well on TikTok. Uploading videos on TikTok requires no additional costs. We strongly recommend posting as many videos as possible on your TikTok account to help increase exposure among potential shoppers.\n\n3. Add TikTok Shop Product Link (the little orange cart) to all relevant videos on your TikTok account. While it is best practice to ensure the linked product matches the video content, it is more important to have a TikTok Shop Product Link on as many video posts as possible.\n\n4. Participate in the open affiliate plan. You may participate in the targeted plan if you are already familiar with creators and have an existing creator pipeline. Tips on commission rate: If no benchmarks have been set before, we recommend starting with a 10% commission rate, and gradually reducing it to 5% or 1% as your TikTok Shop GMV grows.\n\n5. Start with \u30103\u2020Video Shopping Ads\u3011 (VSA) for TikTok Shop, prioritizing existing videos from your TikTok account that have already generated organic conversions (Spark Ads). Note that when using an existing video as an asset for Video Shopping Ads, the Video Shopping Ads will use the products chosen during ad creation in the ad link. You can choose to advertise the same or different list of products for the Video Shopping Ads vs. the organic link. You can even run a Video Shopping Ads with an existing video that has no organic link.\n\n6. If using new videos as an asset for Video Shopping Ads through TikTok Ads Manager (not using Spark Ads), we recommend posting the video with the TikTok Shop Product Link on your TikTok account first, unless you are testing multiple variations of video captions, for which you may choose ads-only mode for some of the ads.\n\n7. Try to acquire affiliate videos that have been generating GMV for you and/or have high GPM (GMV per impression) as ad creatives assets. Obtain the video code from the affiliate

creator. You can see all affiliate videos that have been generating GMV for you in the affiliate section of Seller Center and directly message the creator from Seller Center via Creator Connect.\n\n8. Try to use as many videos and/or TikTok Shop Product Links as possible under the same VSA ad group budget, ideally with 3-5 active video creatives in each ad group. Use the highest gross revenue and cost cap bid strategies according to preference and experiment with a combination of these two bid strategies. Experiment with using single product links (only one product per ad) and multiple product links (multiple products per ad) to test what works better for your business, as results may vary for different sellers.\n\n9. For the highest gross revenue ad group, keep scaling the budget every week, each time observing the ROAS of the previous 7 days on a rolling basis, and increase or decrease the budget as necessary. For cost cap, we recommend maximizing the budget after the ad has run for more than a day.\n\n10. Besides the 1 official TikTok account connected to your TikTok Shop, you can additionally connect up to 4 more TikTok accounts with your TikTok Shop for marketing purposes. Take advantage of this by differentiating your marketing accounts based on persona categories to cater to different audience preferences, presenting "UGC" style native content. This helps to broaden your interested audiences.\n\n11. If you are running a LIVE Shopping event, we highly recommend running \u30104\u2020Live Shopping Ads\u3011 (LSA), optimizing towards Gross Revenue, and starting with a budget of a few hundred dollars. LIVE Shopping events or LSA may or may not work well for your business. LIVE Shopping performance can be volatile but can work well for some businesses.\n\n12. TikTok Shop does not only offer ads GMV but also trackable organic GMV. It also offers a potentially large pool of "referral" style affiliate creatives that you can use for ads or other purposes.\n\n13. When considering Shop Ads performance, in addition to reviewing Shop Ads ROAS performance, we recommend reviewing overall TikTok Shop marketing ROI, which equates to [Shop total GMV / (Shop Ads ads cost + Shop affiliate commission)]. Consider how much GMV (paid, affiliate, organic) you are getting out of your marketing investment in TikTok Shop. Evaluate your TikTok Shop marketing ROI against your typical marketing ROI targets.\n\nContent Hide content \n\nOur Products\n\n* \u30105\u2020TikTok for Business\u2020www.tiktok.com\u3011\n* \u30106\u2020TikTok\u2020tiktok.com\u3011\n* \u30107\u2020Creative Center\u3011\n\n\u30100\u2020 \u3011 \n\n\u00a92024 TikTok For Business \n\n* \u30108\u2020 Terms & Policies \u3011\n* \u30109\u2020 Privacy \u2020www.tiktok.com\u3011\n* \u30100\u2020 Help \u3011\nVisible: 0% - 100%", "pub_date": null, "extra": {"cited_message_idx": 10, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}, {"start_ix": 1716, "end_ix": 1726, "citation_format_type": "tether_og", "metadata": {"type": "webpage", "title": "TikTok Shopping & Showcase | TikTok For Business", "url": "https://ads.tiktok.com/help/article/tiktok-shopping-and-showcase?lang=it", "text": "\nUna scheda Vetrina dei prodotti pu\u00f2 contenere prodotti delle seguenti opzioni:\n\n * Tutti i prodotti di un TikTok Shop.\n\n * Alcuni prodotti di un negozio.\n\n * Prodotti provenienti da pi\u00f9 negozi.\n\n[Image 1: TikTok Shopping and Showcase-PNG]\n\n## Ecco cosa devi sapere prima di utilizzare TikTok Shop e Vetrina \n\n 1. {"cited_message_idx": 9, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}], "content_references": [{"matched_text": "\u301010\u2020source\u3011", "start_idx": 1009, "end_idx": 1020, "alt": null, "type": "webpage_extended", "title": "Business Help Center", "url": "https://ads.tiktok.com/help/article/considerations-when-launching-your-tiktok-shop-journey?lang=en", "pub_date": null, "snippet": "\nURL: https://ads.tiktok.com/help/article/considerations-when-launching-your-tiktok-shop-journey?lang=en\n\u30100\u2020 Business Help Center\u3011 \n\n\u30101\u2020Create an Ad\u3011\n\n[Image 0] \n\nConsiderations when launching your TikTok Shop Journey\n\nLast updated, May 2024 \n\nTikTok Shop is now available in the following markets: Indonesia, Malaysia, the Philippines, Singapore, Thailand, the United Kingdom, the United States, and Vietnam.\n\nYou can directly create your TikTok Shop at \u30102\u2020TikTok Seller Center\u2020seller.tiktok.com\u3011.\n\nAfter creating your TikTok Shop, start your marketing and sales efforts with these recommended steps.\n\n1. Maximize the products uploaded to TikTok Shop (TTS). Do not only upload your bestselling products or products that you believe will sell well on TikTok Shop. We strongly recommend uploading all products available to help increase exposure among potential shoppers.\n\n2. Maximize the number of Shoppable Video posts on your TikTok account. Do not only upload videos that have performed well on other platforms or that you believe will perform well on TikTok. Uploading videos on TikTok requires no additional costs. We strongly recommend posting as many videos as possible on your TikTok account to help increase exposure among potential shoppers.\n\n3. Add TikTok Shop Product Link (the little orange cart) to all relevant videos on your TikTok account. While it is best practice to ensure the linked product matches the video content, it is more important to have a TikTok Shop Product Link on as many video posts as possible.\n\n4. Participate in the open affiliate plan. You may participate in the targeted plan if you are already familiar with creators and have an existing creator pipeline. Tips on commission rate: If no benchmarks have been set before, we recommend starting with a 10% commission rate, and gradually reducing it to 5% or 1% as your TikTok Shop GMV grows.\n\n5. Start with \u30103\u2020Video Shopping Ads\u3011 (VSA) for TikTok Shop, prioritizing existing videos from your TikTok account that have already generated organic conversions (Spark Ads). Note that when using an existing video as an asset for Video Shopping Ads, the Video Shopping Ads will use the products chosen during ad creation in the ad link. You can choose to advertise the same or different list of products for the Video Shopping Ads vs. the organic link. You can even run a Video Shopping Ads with an existing video that has no organic link.\n\n6. If using new videos as an asset for Video Shopping Ads through TikTok Ads Manager (not using Spark Ads), we recommend posting the video with the TikTok Shop Product Link on your TikTok account first, unless you are testing multiple variations of video captions, for which you may choose ads-only mode for some of the ads.\n\n7. Try to acquire affiliate videos that have been generating GMV for you and/or have high GPM (GMV per impression) as ad creatives assets. Obtain the video code from the affiliate creator. You can see all affiliate videos that have been generating GMV for you in the affiliate section of Seller Center and directly message the creator from Seller Center via Creator Connect.\n\n8. Try to use as many videos and/or TikTok Shop Product Links as possible under the same VSA ad group budget, ideally with 3-5 active video creatives in each ad group. Use the highest gross revenue and cost cap bid strategies according to preference and experiment with a combination of these two bid strategies. Experiment with using single product links (only one product per ad) and multiple

product links (multiple products per ad) to test what works better for your business, as results may vary for different sellers.\n\n9. For the highest gross revenue ad group, keep scaling the budget every week, each time observing the ROAS of the previous 7 days on a rolling basis, and increase or decrease the budget as necessary. For cost cap, we recommend maximizing the budget after the ad has run for more than a day.\n\n10. Besides the 1 official TikTok account connected to your TikTok Shop, you can additionally connect up to 4 more TikTok accounts with your TikTok Shop for marketing purposes. Take advantage of this by differentiating your marketing accounts based on persona categories to cater to different audience preferences, presenting "UGC" style native content. This helps to broaden your interested audiences.\n\n11. If you are running a LIVE Shopping event, we highly recommend running \u30104\u2020Live Shopping Ads\u3011 (LSA), optimizing towards Gross Revenue, and starting with a budget of a few hundred dollars. LIVE Shopping events or LSA may or may not work well for your business. LIVE Shopping performance can be volatile but can work well for some businesses.\n\n12. TikTok Shop does not only offer ads GMV but also trackable organic GMV. It also offers a potentially large pool of "referral" style affiliate creatives that you can use for ads or other purposes.\n\n13. When considering Shop Ads performance, in addition to reviewing Shop Ads ROAS performance, we recommend reviewing overall TikTok Shop marketing ROI, which equates to [Shop total GMV / (Shop Ads ads cost + Shop affiliate commission)]. Consider how much GMV (paid, affiliate, organic) you are getting out of your marketing investment in TikTok Shop. Evaluate your TikTok Shop marketing ROI against your typical marketing ROI targets.\n\nContent Hide content \n\nOur Products\n\n* \u30105\u2020TikTok for Business\u2020www.tiktok.com\u3011\n* \u30106\u2020TikTok\u2020tiktok.com\u3011\n* \u30107\u2020Creative Center\u3011\n\n\u30100\u2020 \u3011 \n\n\u00a92024 TikTok For Business \n\n* \u30108\u2020 Terms & Policies \u3011\n* \u30109\u2020 Privacy \u2020www.tiktok.com\u3011\n* \u30100\u2020 Help \u3011\nVisible: 0% - 100%"}, {"matched_text": "\u30109\u2020source\u3011", "start_idx": 1384, "end_idx": 1394, "alt": null, "type": "webpage_extended", "title": "TikTok Shopping & Showcase | TikTok For Business", "url": "https://ads.tiktok.com/help/article/tiktok-shopping-and-showcase?lang=it", "pub_date": null, "snippet": "\nUna scheda Vetrina dei prodotti pu\u00f2 contenere prodotti delle seguenti opzioni:\n\n * Tutti i prodotti di un TikTok Shop.\n\n * Alcuni prodotti di un negozio.\n\n * Prodotti provenienti da pi\u00f9 negozi.\n\n[Image 1: TikTok Shopping and Showcase-PNG]\n\n## Ecco cosa devi sapere prima di utilizzare TikTok Shop e Vetrina \n\n 1. TikTok Shop e le Presentazioni non sono uguali.\n\n   * Se hai soltanto una Vetrina e non un TikTok Shop, puoi comunque fare pubblicit\u00e0 utilizzando i prodotti nella tua vetrina e fare riferimento a \u30103\u2020Come configurare Video Shopping Ads con Vetrina\u3011.\n\n   * Se scegli Vetrina o TikTok Shop come origine prodotto, l\u2019elenco dei prodotti che possono essere selezionati per la pubblicit\u00e0 cambia di conseguenza.\n\n   * Ricordati che TikTok Shop contiene l\u2019inventario dei prodotti di propriet\u00e0 del venditore. Se vendi i prodotti attraverso un account affiliato o di marketing, \u00e8 possibile che tu possieda un TikTok Shop.\n\n 2. Da notare che non tutti coloro che possiedono una Vetrina hanno un TikTok Shop.\n\n * Ad esempio, un brand pu\u00f2 concedere a un terzo l\u2019autorizzazione a vendere prodotti a suo nome. Questi prodotti sono visualizzati nella Vetrina del terzo per essere acquistati dai clienti. Un terzo non possiede i prodotti che vende, ma piuttosto vende i prodotti per conto del brand.\n\n## Ecco cosa devi sapere per

utilizzare TikTok Shop e Vetrina \n\nPossedere una Vetrina non significa necessariamente possedere un TikTok Shop. Gli esempi che seguono mostrano i diversi scenari che si verificano tra TikTok Shop e Vetrina.\n\n### Esempi \n\n 1. Per un account TikTok ufficiale, tutti i prodotti di un brand verranno automaticamente visualizzati nella loro Vetrina.\n\n 2. Un brand pu\u00f2 consentire agli account commerciali/affiliati di vendere i prodotti per suo conto. La Vetrina degli account commerciali/affiliati visualizzer\u00e0 alcuni o tutti i prodotti di un negozio.\n\n * Esempio 1: un brand di calzature pu\u00f2 consentire a pi\u00f9 account commerciali, gestiti da terzi, di vendere prodotti a suo nome.\n\n * Esempio 2: due brand diversi di calzature possono consentire a un account affiliato/di marketing gestito da un importante rivenditore al dettaglio o da uno store specializzato di vendere prodotti per conto di entrambi i brand.\n\n## Come utilizzare TikTok Shop e Vetrina\n\n### Come account TikTok ufficiale \n\nSe sei un account TikTok ufficiale con un TikTok Shop, la tua Vetrina mostrer\u00e0 tutti i tuoi prodotti.\n\n##### Come sono collegati i tuoi prodotti tra TikTok Shop e Vetrina:\n\n * In Seller Center collega un account TikTok ufficiale. Dopo che il titolare dell\u2019account TikTok ha confermato il link, tutti i prodotti del TikTok Shop vengono automaticamente visualizzati nella Vetrina.\n\n * Il link dipende dal Paese in cui vende lo shop. Maximize the products uploaded to TikTok Shop (TTS). Do not only upload your bestselling products or products that you believe will sell well on TikTok Shop. We strongly recommend uploading all products available to help increase exposure among potential shoppers.\n\n2. Maximize the number of Shoppable Video posts on your TikTok account. Do not only upload videos that have performed well on other platforms or that you believe will perform well on TikTok. Uploading videos on TikTok requires no additional costs. We strongly recommend posting as many videos as possible on your TikTok account to help increase exposure among potential shoppers.\n\n3. Add TikTok Shop Product Link (the little orange cart) to all relevant videos on your TikTok account. While it is best practice to ensure the linked product matches the video content, it is more important to have a TikTok Shop Product Link on as many video posts as possible.\n\n4. Participate in the open affiliate plan. You may participate in the targeted plan if you are already familiar with creators and have an existing creator pipeline. Tips on commission rate: If no benchmarks have been set before, we recommend starting with a 10% commission rate, and gradually reducing it to 5% or 1% as your TikTok Shop GMV grows.\n\n5. Start with \u30103\u2020Video Shopping Ads\u3011 (VSA) for TikTok Shop, prioritizing existing videos from your TikTok account that have already generated organic conversions (Spark Ads). Note that when using an existing

video as an asset for Video Shopping Ads, the Video Shopping Ads will use the products chosen during ad creation in the ad link. You can choose to advertise the same or different list of products for the Video Shopping Ads vs. the organic link. You can even run a Video Shopping Ads with an existing video that has no organic link.\n\n6. If using new videos as an asset for Video Shopping Ads through TikTok Ads Manager (not using Spark Ads), we recommend posting the video with the TikTok Shop Product Link on your TikTok account first, unless you are testing multiple variations of video captions, for which you may choose ads-only mode for some of the ads.\n\n7. Try to acquire affiliate videos that have been generating GMV for you and/or have high GPM (GMV per impression) as ad creatives assets. Obtain the video code from the affiliate creator. You can see all affiliate videos that have been generating GMV for you in the affiliate section of Seller Center and directly message the creator from Seller Center via Creator Connect.\n\n8. Try to use as many videos and/or TikTok Shop Product Links as possible under the same VSA ad group budget, ideally with 3-5 active video creatives in each ad group. Use the highest gross revenue and cost cap bid strategies according to preference and experiment with a combination of these two bid strategies. Experiment with using single product links (only one product per ad) and multiple product links (multiple products per ad) to test what works better for your business, as results may vary for different sellers.\n\n9. For the highest gross revenue ad group, keep scaling the budget every week, each time observing the ROAS of the previous 7 days on a rolling basis, and increase or decrease the budget as necessary. For cost cap, we recommend maximizing the budget after the ad has run for more than a day.\n\n10. Besides the 1 official TikTok account connected to your TikTok Shop, you can additionally connect up to 4 more TikTok accounts with your TikTok Shop for marketing purposes. Take advantage of this by differentiating your marketing accounts based on persona categories to cater to different audience preferences, presenting "UGC" style native content. This helps to broaden your interested audiences.\n\n11. If you are running a LIVE Shopping event, we highly recommend running \u30104\u2020Live Shopping Ads\u3011 (LSA), optimizing towards Gross Revenue, and starting with a budget of a few hundred dollars. LIVE Shopping events or LSA may or may not work well for your business. LIVE Shopping performance can be volatile but can work well for some businesses.\n\n12. TikTok Shop does not only offer ads GMV but also trackable organic GMV. It also offers a potentially large pool of "referral" style affiliate creatives that you can use for ads or other purposes.\n\n13. When considering Shop Ads performance, in addition to reviewing Shop Ads ROAS performance, we recommend reviewing overall TikTok Shop marketing ROI, which equates to [Shop total GMV / (Shop Ads ads cost + Shop affiliate commission)]. Consider how much GMV (paid, affiliate, organic) you are getting out of your marketing investment in TikTok Shop. Evaluate your TikTok Shop marketing ROI against your typical marketing ROI targets.\n\nContent Hide content \n\nOur Products\n\n* \u30105\u2020TikTok for Business\u2020www.tiktok.com\u3011\n* \u30106\u2020TikTok\u2020tiktok.com\u3011\n* \u30107\u2020Creative Center\u3011\n\n\u30100\u2020 \u3011 \n\n\u00a92024 TikTok For Business \n\n* \u30108\u2020 Terms & Policies \u3011\n* \u30109\u2020 Privacy \u2020www.tiktok.com\u3011\n* \u30100\u2020 Help \u3011\nVisible: 0% - 100%"}, {"matched_text": "\u30109\u2020source\u3011", "start_idx": 1716, "end_idx": 1726, "alt": null, "type": "webpage_extended", "title": "TikTok Shopping & Showcase | TikTok For Business", "url": "https://ads.tiktok.com/help/article/tiktok-shopping-and-showcase?lang=it", "pub_date": null, "snippet": "\nUna scheda Vetrina dei prodotti

pu\u00f2 contenere prodotti delle seguenti opzioni:\n\n * Tutti i prodotti di un TikTok Shop.\n\n * Alcuni prodotti di un negozio.\n\n * Prodotti provenienti da pi\u00f9 negozi.\n\n[Image 1: TikTok Shopping and Showcase-PNG]\n\n## Ecco cosa devi sapere prima di utilizzare TikTok Shop e Vetrina \n\n 1. TikTok Shop e le Presentazioni non sono uguali.\n\n   * Se hai soltanto una Vetrina e non un TikTok Shop, puoi comunque fare pubblicit\u00e0 utilizzando i prodotti nella tua vetrina e fare riferimento a \u30103\u2020Come configurare Video Shopping Ads con Vetrina\u3011.\n\n   * Se scegli Vetrina o TikTok Shop come origine prodotto, l\u2019elenco dei prodotti che possono essere selezionati per la pubblicit\u00e0 cambia di conseguenza.\n\n   * Ricordati che TikTok Shop contiene l\u2019inventario dei prodotti di propriet\u00e0 del venditore. Se vendi i prodotti attraverso un account affiliato o di marketing, \u00e8 possibile che tu possieda un TikTok Shop.\n\n 2. Da notare che non tutti coloro che possiedono una Vetrina hanno un TikTok Shop.\n\n * Ad esempio, un brand pu\u00f2 concedere a un terzo l\u2019autorizzazione a vendere prodotti a suo nome. Questi prodotti sono visualizzati nella Vetrina del terzo per essere acquistati dai clienti. Un terzo non possiede i prodotti che vende, ma piuttosto vende i prodotti per conto del brand.\n\n## Ecco cosa devi sapere per utilizzare TikTok Shop e Vetrina \n\nPossedere una Vetrina non significa necessariamente possedere un TikTok Shop. Gli esempi che seguono mostrano i diversi scenari che si verificano tra TikTok Shop e Vetrina.\n\n### Esempi \n\n 1. Per un account TikTok ufficiale, tutti i prodotti di un brand verranno automaticamente visualizzati nella loro Vetrina.\n\n 2. TikTok Shop e le Presentazioni non sono uguali.\n\n   * Se hai soltanto una Vetrina e non un TikTok Shop, puoi comunque fare pubblicit\u00e0 utilizzando i prodotti nella tua vetrina e fare riferimento a \u30103\u2020Come configurare Video Shopping Ads con Vetrina\u3011.\n\n   * Se scegli Vetrina o TikTok Shop come origine prodotto, l\u2019elenco dei prodotti che possono essere selezionati per la pubblicit\u00e0 cambia di conseguenza.\n\n   * Ricordati che TikTok Shop contiene l\u2019inventario dei prodotti di propriet\u00e0 del venditore. Se vendi i prodotti attraverso un account affiliato o di marketing, \u00e8 possibile che tu possieda un TikTok Shop.\n\n 2. Da notare che non tutti coloro che possiedono una Vetrina hanno un TikTok Shop.\n\n * Ad esempio, un brand pu\u00f2 concedere a un terzo l\u2019autorizzazione a vendere

prodotti a suo nome. Questi prodotti sono visualizzati nella Vetrina del terzo per essere acquistati dai clienti. Un terzo non possiede i prodotti che vende, ma piuttosto vende i prodotti per conto del brand.\n\n## Ecco cosa devi sapere per utilizzare TikTok Shop e Vetrina \n\nPossedere una Vetrina non significa necessariamente possedere un TikTok Shop. Gli esempi che seguono mostrano i diversi scenari che si verificano tra TikTok Shop e Vetrina.\n\n### Esempi \n\n 1. Per un account TikTok ufficiale, tutti i prodotti di un brand verranno automaticamente visualizzati nella loro Vetrina.\n\n 2. Un brand pu\u00f2 consentire agli account commerciali/affiliati di vendere i prodotti per suo conto. La Vetrina degli account commerciali/affiliati visualizzer\u00e0 alcuni o tutti i prodotti di un negozio.\n\n * Esempio 1: un brand di calzature pu\u00f2 consentire a pi\u00f9 account commerciali, gestiti da terzi, di vendere prodotti a suo nome.\n\n   * Esempio 2: due brand diversi di calzature possono consentire a un account affiliato/di marketing gestito da un importante rivenditore al dettaglio o da uno store specializzato di vendere prodotti per conto di entrambi i brand.\n\n## Come utilizzare TikTok Shop e Vetrina\n\n### Come account TikTok ufficiale \n\nSe sei un account TikTok ufficiale con un TikTok Shop, la tua Vetrina mostrer\u00e0 tutti i tuoi prodotti.\n\n##### Come sono collegati i tuoi prodotti tra TikTok Shop e Vetrina:\n\n * In Seller Center collega un account TikTok ufficiale. Dopo che il titolare dell\u2019account TikTok ha confermato il link, tutti i prodotti del TikTok Shop vengono automaticamente visualizzati nella Vetrina.\n\n * Il link dipende dal Paese in cui vende lo shop. Per maggiori informazioni scegli il tuo Paese: \u30104\u2020Indonesia\u2020seller-id.tiktok.com\u3011, \u30105\u2020Malesia\u2020seller-my.tiktok.com\u3011, \u30106\u2020Filippine\u2020seller-ph.tiktok.com\u3011, \u30107\u2020Singapore\u2020seller-sg.tiktok.com\u3011, \u30108\u2020Thailandia\u2020seller-th.tiktok.com\u3011, \u30109\u2020Regno Unito\u2020seller-uk.tiktok.com\u3011, \u301010\u2020Stati Uniti\u2020seller-us.tiktok.com\u3011 e \u301011\u2020Vietnam\u2020seller-vn.tiktok.com\u3011.\n\n * Ciascun TikTok Shop pu\u00f2 disporre di 1 solo account TikTok ufficiale.\n\n * Ciascun account TikTok pu\u00f2 essere collegato a 1 solo TikTok Shop come account TikTok ufficiale. Un account TikTok ufficiale non pu\u00f2 essere collegato ad altri TikTok Shop.\n\n### Come account TikTok per il marketing \n\nLa tua vetrina mostrer\u00e0 alcuni o tutti i prodotti di un brand.\n\n#### Come sono collegati i tuoi prodotti tra TikTok Shop e Vetrina:\n\n * In Seller Center collega un account TikTok per il marketing. Dopo aver confermato il link, il titolare dell\u2019account TikTok pu\u00f2 selezionare alcuni o tutti i prodotti del TikTok Shop per mostrarli nella Vetrina.\n\n * Il link dipende dal Paese. I work with something called a "context window," which refers to the amount of conversation history or data I can actively remember during our session. This memory capacity is typically measured in tokens (a token could be a word or part of a word), and I have a limit of how many tokens I can retain at any one time. For instance, OpenAI's GPT-4 has a context window that allows for around 8,000 tokens in its standard version, and there are other models with larger windows (up to 32,000 tokens).\n\nAs we continue our conversation, older parts of the chat will be "forgotten" if we exceed this token limit. However, this doesn't mean they are permanently lost\u2014while in this session I can't retrieve them, you could provide past information or use external tools to store ongoing discussions.\n\nTo manage memory more effectively, I also work with persistent memory tools (like the one here, where I remember key information across sessions) so that important details don't get lost. Does that clear things up?"]}, "status": "finished_successfully","end_turn": true

It was introduced in 2009 as part of an EU directive to make Europe a more appealing destination for qualified professionals from outside the EU, especially in fields like science, technology, engineering, and mathematics (STEM).\n\n### Key Features:\n1. **Eligibility**: To qualify for the EU Blue Card, applicants must:\n - Hold a higher education degree or have equivalent professional qualifications.\n - Have a job offer or employment contract in an EU member state that meets a certain salary threshold (which varies depending on the country and sector).\n - Prove that the job requires high-level skills.\n\n2. **Validity**: The Blue Card is typically valid for 1 to 4 years, depending on the length of the job contract. It can be renewed and eventually lead to permanent residency in some cases.\n\n3. **Benefits**:\n - Allows the holder to live and work in an EU member state (except Denmark and Ireland, which don\u2019t participate).\n - Facilitates family reunification, as family members can accompany the Blue Card holder.\n - Provides the right to travel freely within the Schengen Area.\n - After 18 months, Blue Card holders can move to another EU country to take up a similar job.\n\n4. **Path to Permanent Residency**: Blue Card

holders can apply for permanent residency after a certain period, generally around five years of continuous residence in an EU member state.\n\n### Is it Legit?\nYes, the EU Blue Card is a fully recognized and legal program in the EU. It's part of the EU's effort to attract highly skilled workers and fill labor shortages in certain industries. However, the program's specific implementation and requirements can vary by country, as each EU nation sets its own salary thresholds and processing rules."]}, "status": "finished_successfully","end_turn": true

This includes the time needed for the employer to process the work contract, for authorities to assess the application, and for any additional administrative procedures (like background checks or document verification).\n\n### Steps and Timelines:\n1. **Securing a Job Offer**: The most important and time-consuming part is often finding a job offer that meets the Blue Card requirements. The job offer must be from an employer in an EU member state that is part of the Blue Card system, and the position must meet salary and skills criteria. Without this, you **cannot apply for the Blue Card**, as the job offer is mandatory.\n \n2. **Application Submission**: Once you have a job offer, the submission of the application can usually be done by either you or your employer. Required documents typically include your employment contract, proof of qualifications, passport, and health insurance.\n \n3. **Processing**: After submitting the application, the processing time varies by country. In some EU countries, it may take around **4 to 12 weeks** (1 to 3 months) to process, while in others it can be longer, depending on the volume of applications and how efficiently the authorities handle the process.\n\n### Can You Apply Without a Job Offer?\nNo, you **cannot apply** for an EU Blue Card without a job offer that meets the program's requirements. The Blue Card is job-specific, meaning you must have an offer of employment in an EU country that sponsors your application. If you don\u2019t have a job offer yet, the focus should be on finding an employer who is willing to hire you and sponsor your Blue Card application.\n\n### What Should You Do if You Don't Have a Job Offer?\n1. **Job

Search**: Look for job opportunities that match your skills and are willing to sponsor an EU Blue Card. Many companies post job listings specifically mentioning their willingness to sponsor candidates for the Blue Card.\n \n2. **Networking**: Reach out to recruitment agencies and employers in your field within the EU, attend virtual job fairs, and use platforms like LinkedIn to connect with potential employers.\n \n3. **Job Portals**: Check out job search portals that cater specifically to highly skilled professionals looking to work in the EU, such as **EURES**, which lists jobs across the EU, including positions where Blue Card sponsorship is available.\n\nIf you do not have a job offer yet, focus on that step before proceeding with the application process."]}, "status": "finished_successfully","end_turn": true

Some entries have periods while others do not.\n\n### 3. **ATS Optimization:**\n - **Keyword Relevance:** Your resume contains important ATS keywords relevant to the **Operations Manager** role at **TELUS Digital Bulgaria**. You\u2019ve included terms like:\n - "Operations Management"\n - "SLA Compliance"\n - "People Leadership"\n - "Process Improvement"\n - "Performance Reporting"\n These align well with the job posting's emphasis on leadership, problem-solving, and SLA management.\n - **Job-Specific Keywords:** If

you want to fine-tune further for this specific role, you could incorporate additional keywords like:\n - "Service delivery" (used in the job description)\n - "Mentorship" or "Career development" (as it relates to managing teams)\n - "Continuous productivity/quality gain" (phrasing from the job posting)\n \n **Overall**, the resume is well optimized, but small formatting adjustments will ensure better readability and consistency."]}, "status": "finished_successfully","end_turn": true

NVLM-D-72B is the flagship model that can handle vision and ...\n# \u301024\u2020Meta releases Llama 3.1 open-source AI model to take on OpenAI - The Verge\u2020www.theverge.com\u3011\nLlama 3.1 is a 405-billion parameter model that outperforms GPT-4o and Claude 3.5 Sonnet on several benchmarks. Meta claims it will be the most widely used AI assistant by the end of 2024 and ...\nVisible: 0% - 100%", "pub_date": null, "extra": null}], "original_query": null}, "command": "search", "args": ["Nvidia released free open source AI Llama 3 October 2024"], "status": "finished", "is_complete": true, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "auto", "parent_id": "9caaf8f7-9973-4016-a67a-a038b8b31c55", "request_id": "8d6fddea5e305274-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "9caaf8f7-9973-4016-a67a-a038b8b31c55", "children": ["42448afb-021b-48fb-a179-d0b71c92458f"]}, "42448afb-021b-48fb-a179-d0b71c92458f": {"id": "42448afb-021b-48fb-a179-d0b71c92458f", "message": {"id": "42448afb-021b-48fb-a179-d0b71c92458f", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729667014.637453, "update_time": null, "content": {"content_type": "code", "language": "unknown", "response_format_name": null, "text": "mclick([1, 0, 3, 7, 13])"}, "status": "finished_successfully", "end_turn": false, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "auto", "parent_id": "b76b5c32-0dba-4ec7-8a15-49932b465f4f", "finish_details": {"type": "stop", "stop_tokens": [200007]}, "is_complete": true, "request_id": "8d6fddea5e305274-MXP", "timestamp_": "absolute"}, "recipient": "browser", "channel": null}, "parent": "b76b5c32-0dba-4ec7-8a15-49932b465f4f", "children": ["0d3f1166-ac29-4bbf-a04c-fb94b7a57848"]}, "0d3f1166-ac29-4bbf-a04c-fb94b7a57848": {"id": "0d3f1166-ac29-4bbf-a04c-fb94b7a57848", "message": {"id": "0d3f1166-ac29-4bbf-a04c-fb94b7a57848", "author": {"role": "tool", "name": "browser", "metadata": {}}, "create_time": 1729667014.63755, "update_time": null, "content": {"content_type": "tether_quote", "url": "https://techstory.in/nvidias-new-open-source-ai-model-could-reshape-the-ai-industry/", "domain": "techstory.in", "text": "\n## Superior Performance and Flexibility for Businesses\n\nThe Llama-3.1-Nemotron-70B-Instruct model stands out not only for its technical performance but also for its business-friendly features. Nvidia\u2019s new open-source AI model offers businesses a flexible and cost-effective alternative to proprietary AI systems.\u00a0 This flexibility is particularly useful for enterprises needing AI models that can adapt to various tasks, from customer service to detailed report generation.\n\nDespite its impressive capabilities, Nvidia has warned that the

model may not be fully optimized for specialized domains like mathematics or legal reasoning. As such, businesses will need to ensure they implement appropriate safeguards when using the model in areas requiring high precision.\n\n## Nvidia\u2019s Expanding AI Ambitions\n\nNvidia\u2019s entry into high-performance AI software is part of a broader strategy to offer fully integrated AI solutions. The company recently introduced the NVLM 1.0 family of multimodal models, including the 72-billion-parameter NVLM-D-72B, further showcasing its push into the AI space. These efforts highlight Nvidia\u2019s ambition to compete not only in hardware but also in the broader AI software market.\n\nBy refining Meta\u2019s Llama models and introducing the Nemotron version, Nvidia aims to provide businesses with customizable AI solutions that can be tailored to specific needs. The company is making advanced AI technology more accessible by offering free hosted inference through its platform, build.nvidia.com, complete with an OpenAI-compatible API interface. This move opens the door for a wider range of industries to experiment with and adopt cutting-edge language models.\n\nNvidia\u2019s move into AI software development is likely to accelerate competition in the sector. Other tech giants may need to reconsider their strategies and invest more in research and development to keep pace with Nvidia\u2019s innovations. The introduction of the Llama-3.1-Nemotron-70B-Instruct model could lead to increased collaboration in the AI space, particularly around open-source projects, as companies strive to stay ahead in the race to develop the most advanced AI systems.\n\n## Applications Across Multiple Sectors\n\nDevelopers are excited about the potential applications of Nvidia\u2019s new open-source AI model, particularly in sectors like healthcare and finance.\u00a0 The model\u2019s success will depend on its ability to translate strong benchmark performance into real-world solutions. For businesses, the flexibility and performance of the Llama-3.1-Nemotron-70B-Instruct model could make it an attractive option for streamlining operations and improving customer service.\n\nWhile Nvidia\u2019s new model has garnered attention for its high scores in benchmark tests, its long-term success will depend on how well it performs in practical applications. Nvidia has acknowledged that the model still has limitations in highly specialized fields.\n\nAlso Read: \u301031\u2020iPhone 16 AI Power Could Be Two Years Behind Rivals, Reports Suggest.\u3011\n\n\u301025\u2020Tweet 54\u2020twitter.com\u3011\u301026\u2020Send\u2020api.whatsapp.com\u3011\u301027\u2020Share 15\u2020www.linkedin.com\u3011 \n\n\u301031\u2020 Previous Post iPhone 16 AI Power Could Be Two Years Behind Rivals, Reports Suggest \u3011 \u301032\u2020 Next Post Twitch Bans Several High-Profile Streamers Following TwitchCon Panel \u3011 \n\n### \u301022\u2020 Reshab Agarwal \u3011 \n\nReshab is a tech-enthusiast who likes to write about all things crypto. Bradley Terry Model: This statistical approach evaluates pairs of responses to determine which is superior, allowing for fine-grained optimization of the model\u2019s output quality.\n\n2. Regression-Style Scoring: By assigning numeric scores based on specific criteria such as helpfulness, accuracy, and relevance, this method provides a more nuanced framework for improving the model\u2019s performance.\n\nThese advanced reward modeling techniques work in tandem to refine the Nemotron 70b\u2019s responses, resulting in more coherent, contextually appropriate, and useful outputs across a wide range of applications.\n\n## Data Set Innovations: HelpSteer 2\n\nA critical factor in the Nemotron 70b\u2019s success is the utilization of the \u301027\u2020HelpSteer 2 data set\u2020huggingface.co\u3011. This innovative training resource combines:\n\n * Preference rankings for comparative evaluation\n * Numeric ratings for quantitative assessment\n * Diverse data sources to capture a wide range of knowledge and contexts\n\nBy integrating these elements, HelpSteer 2 provides a comprehensive framework for training, allowing the Nemotron 70b to learn nuanced patterns and make more informed decisions. This approach enhances the model\u2019s ability to handle complex queries and generate high-quality responses across various domains.\n\n## Performance Benchmarks and Capabilities\n\nThe Nemotron 70b has demonstrated exceptional performance in several key benchmarks:\n\nReward Bench: Outperforming competitors in this metric, which evaluates the model\u2019s ability to generate responses aligned with human preferences.\n\nArena Hard Auto: Excelling in this challenging benchmark, showcasing the model\u2019s advanced reasoning capabilities and adaptability to complex scenarios.\n\nThese results highlight the Nemotron 70b\u2019s potential for tackling intricate tasks with precision and reliability, making it suitable for a wide range of applications in research, industry, and beyond.\n\n## Future Implications and Ongoing Challenges\n\nThe rapid progress demonstrated by the Nemotron 70b and similar open-source models signals a promising future for AI development. As these models continue to evolve, they hold significant potential for:\n\n * Enhancing AI reasoning and problem-solving capabilities\n * Improving natural language understanding and generation\n * Facilitating more intuitive human-AI interactions\n * Accelerating research and innovation in AI-related fields\n\nHowever, it\u2019s important to acknowledge that challenges remain. The Nemotron 70b, like other AI models, still faces difficulties with certain types of reasoning tasks. Ongoing research and development efforts are focused on addressing these limitations through techniques such as:\n\nPrompt Engineering: Refining the way queries are presented to the model to optimize its performance in specific

scenarios.\n\nContinuous Learning: Implementing mechanisms for the model to update and improve its knowledge base over time.\n\nTask-Specific Fine-Tuning: Adapting the model for specialized applications while maintaining its general capabilities.\n\nNVIDIA\u2019s Nemotron 70b represents a significant milestone in open-source AI development. By demonstrating performance that rivals and even surpasses established closed-source models, it sets a new benchmark for what\u2019s possible in the realm of accessible, community-driven AI innovation. As the field continues to evolve, open-source models like the Nemotron 70b are poised to play an increasingly crucial role in shaping the future of artificial intelligence, driving progress through collaboration, transparency, and shared knowledge. Bradley Terry Model: This statistical approach evaluates pairs of responses to determine which is superior, allowing for fine-grained optimization of the model\u2019s output quality.\n\n2. Regression-Style Scoring: By assigning numeric scores based on specific

criteria such as helpfulness, accuracy, and relevance, this method provides a more nuanced framework for improving the model\u2019s performance.\n\nThese advanced reward modeling techniques work in tandem to refine the Nemotron 70b\u2019s responses, resulting in more coherent, contextually appropriate, and useful outputs across a wide range of applications.\n\n## Data Set Innovations: HelpSteer 2\n\nA critical factor in the Nemotron 70b\u2019s success is the utilization of the \u301027\u2020HelpSteer 2 data set\u2020huggingface.co\u3011. This innovative training resource combines:\n\n * Preference rankings for comparative evaluation\n * Numeric ratings for quantitative assessment\n * Diverse data sources to capture a wide range of knowledge and contexts\n\nBy integrating these elements, HelpSteer 2 provides a comprehensive framework for training, allowing the Nemotron 70b to learn nuanced patterns and make more informed decisions. This approach enhances the model\u2019s ability to handle complex queries and generate high-quality responses across various domains.\n\n## Performance Benchmarks and Capabilities\n\nThe Nemotron 70b has demonstrated exceptional performance in several key benchmarks:\n\nReward Bench: Outperforming competitors in this metric, which evaluates the model\u2019s ability to generate responses aligned with human preferences.\n\nArena Hard Auto: Excelling in this challenging benchmark, showcasing the model\u2019s advanced reasoning capabilities and adaptability to complex scenarios.\n\nThese results highlight the Nemotron 70b\u2019s potential for tackling intricate tasks with precision and reliability, making it suitable for a wide range of applications in research, industry, and beyond.\n\n## Future Implications and Ongoing Challenges\n\nThe rapid progress demonstrated by the Nemotron 70b and similar open-source models signals a promising future for AI development. As these models continue to evolve, they hold significant potential for:\n\n * Enhancing AI reasoning and problem-solving capabilities\n * Improving natural language understanding and generation\n * Facilitating more intuitive human-AI interactions\n * Accelerating research and innovation in AI-related fields\n\nHowever, it\u2019s important to acknowledge that challenges remain. The Nemotron 70b, like other AI models, still faces difficulties with certain types of reasoning tasks. Ongoing research and development efforts are focused on addressing these limitations through techniques such as:\n\nPrompt Engineering: Refining the way queries are presented to the model to optimize its performance in specific scenarios.\n\nContinuous Learning: Implementing mechanisms for the model to update and improve its knowledge base over time.\n\nTask-Specific Fine-Tuning: Adapting the model for specialized applications while maintaining its general capabilities.\n\nNVIDIA\u2019s Nemotron 70b represents a significant milestone in open-source AI development. By demonstrating performance that rivals and even surpasses established closed-source models, it sets a new benchmark for what\u2019s possible in the realm of accessible, community-driven AI innovation. As the field continues to evolve, open-source models like the Nemotron 70b are poised to play an increasingly crucial role in shaping the future of artificial intelligence, driving progress through collaboration, transparency, and shared knowledge. Jump over to the \u301028\u2020Hugging Face website\u2020huggingface.co\u3011 for more information on the latest AI model from NVIDIA.\n\nMedia Credit: \u301029\u2020TheAIGRID\u2020www.youtube.com\u3011\n\n * \u301030\u2020 Share \u2020www.facebook.com\u3011 \n * \u301031\u2020 Tweet \u2020twitter.com\u3011 \n * \u301032\u2020 Pin \u2020pinterest.com\u3011 \n * Email\n\nFiled Under: \u30103\u2020AI\u3011, \u30102\u2020Top News\u3011\n\nLatest Geeky Gadgets Deals\n\nDisclosure: Some of our articles include affiliate links. source-ai-nemotron-surpasses-open-ai-gpt-4o", "domain": "cointelegraph.com", "text": "\nAccording to a post on X from the Nvidia AI Developer account, the new model, dubbed Llama-3.1-Nemotron-70B-Instruct, \u201cis a leading model\u201d on lmarena.AI\u2019s Chatbot Arena.\u00a0\n\n[Image 2: NVidia, Technology, Meta, ChatGPT, OpenAI]\n\nSource: \u301036\u2020Nvidia AI\u2020x.com\u3011\n\n## Nemotron \n\nLlama-3.1-Nemotron-70B-Instruct is, essentially, a modified version of Meta\u2019s open-source Llama-3.1-70B-Instruct. The \u201cNemotron\u201d portion of the model\u2019s name encapsulates Nvidia\u2019s contribution to the end result.\u00a0\n\nThe Llama \u201cherd\u201d of AI models, as Meta refers to them, are meant to be used as open-source foundations for developers to build on. \n\nIn the case of Nemotron, Nvidia took up the challenge and developed a system designed to be more \u201chelpful\u201d than popular models such as OpenAI\u2019s ChatGPT and Anthropic\u2019s Claude-3.\u00a0\n\nNvidia \u301037\u2020used\u2020build.nvidia.com\u3011 specially curated data sets, advanced fine-tuning methods and its own state-of-the-art AI hardware to turn Meta\u2019s vanilla model into what might be the most \u201chelpful\u201d AI model on the planet.\u00a0\n\n[Image 3: NVidia, Technology, Meta, ChatGPT, OpenAI]\n\nAn engineer\u2019s post on X.com expressing excitement for Nemotron\u2019s capabilities. Source: \u301038\u2020Shayan Taslim\u2020x.com\u3011\n\n## Benchmarking \n\nWhen it comes to determining which AI model is \u201cthe best,\u201d there\u2019s no clear-cut methodology. Unlike, for example, measuring the ambient temperature with a mercury thermometer, there isn\u2019t a single \u201ctruth\u201d that exists when it comes to AI model performance.\u00a0\n\nDevelopers and researchers have to determine how well an AI model performs the same as humans are evaluated \u2014 through comparative testing.\u00a0\n\nRelated: \u301039\u2020AI \u2018mind uploads\u2019 could allow the dead to trade forever\u3011\n\nAI benchmarking involves giving different AI models the same queries, tasks, questions or problems and then comparing the usefulness of the results. Often, due to the subjectivity of what is and isn\u2019t considered useful, human proctors are used to determine a machine\u2019s performance through blind evaluations.\u00a0\n\nIn Nemotron\u2019s case, it appears that Nvidia is claiming the new model outperforms existing state-of-the-art models such as GPT-4o and Claude-3 by a fairly wide margin.\n\n[Image 4: NVidia, Technology, Meta, ChatGPT, OpenAI]\n\nThe top of the Chatbot Arena leaderboards. Source: LLMArena \n\nThe image above depicts the ratings on the automated \u201cHard\u201d test on the Chatbot Arena Leaderboards. While Nvidia\u2019s Llama-3.1-Nemotron-70B-Instruct doesn\u2019t appear to be listed anywhere on the boards, if the developer\u2019s claim that it scored an 85 on this test is valid, it would be the de facto top model in this particular section.\u00a0\n\nWhat makes the achievement perhaps even more interesting is that Llama-3.1-70B is Meta\u2019s middle-tier open-source AI model. There\u2019s a much larger version of Llama-3.1, the 405B version (where the number refers to how many billion parameters the model was tuned with). \n\nBy comparison, GPT-4o is \u301040\u2020estimated\u2020arxiv.org\u3011 to have been developed with over 1 trillion parameters.\n\nMagazine: \u301041\u2020Fake Rabby Wallet scam linked to Dubai crypto CEO and many more victims\u3011\n\n * \u301042\u2020# NVidia \u3011\n * \u301043\u2020# Technology \u3011\n * \u30108\u2020# AI \u3011\n * \u301044\u2020# Meta \u3011\n * \u301045\u2020# ChatGPT \u3011\n * \u301046\u2020# OpenAI \u3011\n\nAdd reaction \n\n[Image 5]\n\nEditor\u2019s Choice \n\n * \u301047\u2020 Tesla likely still owns $780M in Bitcoin despite recent shuffle: Arkham \u3011\n * \u301048\u2020 94% of all Bitcoin in profit hints that $69K BTC price was a local top \u3011\n * \u301049\u2020 Michael Heinrich loves AI coins Goat, Turbo &

The \u201cNemotron\u201d portion of the model\u2019s name encapsulates Nvidia\u2019s contribution to the end result.\u00a0\n\nThe Llama \u201cherd\u201d of AI models, as Meta refers to them, are meant to be used as open-source foundations for developers to build on. \n\nIn the case of Nemotron, Nvidia took up the challenge and developed a system designed to be more \u201chelpful\u201d than popular models such as OpenAI\u2019s ChatGPT and Anthropic\u2019s Claude-3.\u00a0\n\nNvidia \u301037\u2020used\u2020build.nvidia.com\u3011 specially curated data sets, advanced fine-tuning methods and its own state-of-the-art AI hardware to turn Meta\u2019s vanilla model into what might be the most \u201chelpful\u201d AI model on the planet.\u00a0\n\n[Image 3: NVidia, Technology, Meta, ChatGPT, OpenAI]\n\nAn engineer\u2019s post on X.com expressing excitement for Nemotron\u2019s capabilities. Source: \u301038\u2020Shayan Taslim\u2020x.com\u3011\n\n## Benchmarking \n\nWhen it comes to determining which AI model is \u201cthe best,\u201d there\u2019s no clear-cut methodology. Unlike, for example, measuring the ambient temperature with a mercury thermometer, there isn\u2019t a single \u201ctruth\u201d that exists when it comes to AI model performance.\u00a0\n\nDevelopers and researchers have to determine how well an AI model performs the same as humans are evaluated \u2014 through comparative testing.\u00a0\n\nRelated: \u301039\u2020AI \u2018mind uploads\u2019 could allow the dead to trade forever\u3011\n\nAI benchmarking involves giving different AI models the same queries, tasks, questions or problems and then comparing the usefulness of the results. Often, due to the subjectivity of what is and isn\u2019t considered useful, human proctors are used to determine a machine\u2019s performance through blind evaluations.\u00a0\n\nIn Nemotron\u2019s case, it appears that Nvidia is claiming the new model outperforms existing state-of-the-art models such as GPT-4o and Claude-3 by

a fairly wide margin.\n\n[Image 4: NVidia, Technology, Meta, ChatGPT, OpenAI]\n\nThe top of the Chatbot Arena leaderboards. Source: LLMArena \n\nThe image above depicts the ratings on the automated \u201cHard\u201d test on the Chatbot Arena Leaderboards. While Nvidia\u2019s Llama-3.1-Nemotron-70B-Instruct doesn\u2019t appear to be listed anywhere on the boards, if the developer\u2019s claim that it scored an 85 on this test is valid, it would be the de facto top model in this particular section.\u00a0\n\nWhat makes the achievement perhaps even more interesting is that Llama-3.1-70B is Meta\u2019s middle-tier open-source AI model. There\u2019s a much larger version of Llama-3.1, the 405B version (where the number refers to how many billion parameters the model was tuned with). \n\nBy comparison, GPT-4o is \u301040\u2020estimated\u2020arxiv.org\u3011 to have been developed with over 1 trillion parameters.\n\nMagazine: \u301041\u2020Fake Rabby Wallet scam linked to Dubai crypto CEO and many more victims\u3011\n\n * \u301042\u2020# NVidia \u3011\n * \u301043\u2020# Technology \u3011\n * \u30108\u2020# AI \u3011\n * \u301044\u2020# Meta \u3011\n * \u301045\u2020# ChatGPT \u3011\n * \u301046\u2020# OpenAI \u3011\n\nAdd reaction \n\n[Image 5]\n\nEditor\u2019s Choice \n\n * \u301047\u2020 Tesla likely still owns $780M in Bitcoin despite recent shuffle: Arkham \u3011\n * \u301048\u2020 94% of all Bitcoin in profit hints that $69K BTC price was a local top \u3011\n * \u301049\u2020 Michael Heinrich loves AI coins Goat, Turbo & Aethir\u2026 but not TAO: Hall of Flame \u3011\n * \u301050\u2020 Crypto academics slam controversial ECB paper blasting Bitcoin \u3011\n * \u301051\u2020 Saylor\u2019s comments on big bank BTC custody are \u2018batshit insane\u2019 \u2014 Buterin \u3011\n\n\u30100\u2020 Advertise with us \u3011\n\n * * * * * * * * \n\nNews \n\n * \u30102\u2020 Bitcoin \u3011\n * \u30105\u2020 Blockchain \u3011\n * \u30103\u2020 Ethereum \u3011\n * \u30104\u2020 Altcoins \u3011\n * \u30106\u2020 Business \u3011\n * \u30107\u2020 Policy & Regulations \u3011\n * \u30108\u2020 AI \u3011\n * \u30109\u2020 NFTs \u3011\n * \u301010\u2020 DeFi \u3011\n * \u301011\u2020 Adoption \u3011\n\nFeatures \n\n * \u301021\u2020 Top 100 2023 \u3011\n * \u301022\u2020 Top 100 2022 \u3011\n * \u301023\u2020 Top 100 2021 \u3011\n * \u301024\u2020 Top 100 2020 \u3011\n * \u301020\u2020 Magazine \u3011\n * \u301052\u2020 Analysis \u3011\n * \u301025\u2020 Opinion \u3011\n * \u301053\u2020 Hodler\u2019s Digest \u3011\n * \u301026\u2020 Expert Take \u3011\n * \u301014\u2020 Top 10 Cryptocurrencies \u3011\n ", "pub_date": null, "extra": null}], "original_query": null}, "command": "mclick", "args": ["[1, 0, 3, 7, 13]"], "status": "finished", "is_complete": true, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "auto", "parent_id": "79572e02-20d0-4eed-b9bc-f7403369c62d", "request_id": "8d6fddea5e305274-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "79572e02-20d0-4eed-b9bc-f7403369c62d", "children": ["0e63bb77-487a-473b-a30f-c558ece31b8d"]}, "0e63bb77-487a-473b-a30f-c558ece31b8d": {"id": "0e63bb77-487a-473b-a30f-c558ece31b8d", "message": {"id": "0e63bb77-487a-473b-a30f-c558ece31b8d", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729667014.637974, "update_time": null, "content": {"content_type": "text", "parts": ["NVIDIA recently released a new open-source AI model called **Llama-3.1-Nemotron-70B-Instruct**, a powerful variant of Meta's Llama-3.1 model. NVIDIA enhanced this model with advanced fine-tuning and optimization techniques, designed to outperform even highly established models like GPT-4 and Claude-3 in certain benchmarks. The model uses proprietary datasets and state-of-the-art AI hardware, and it ranks highly in comparison tests focused on generating helpful and contextually appropriate responses. NVIDIA's contributions to the model, particularly in areas

like "reward modeling" and training, significantly improve its reasoning and problem-solving capabilities.\n\nNemotron has been recognized for its strong performance in AI benchmarks, showing superior results in tasks that prioritize human-like responses. While it's not the largest model available (Meta also has larger versions), its performance is notable for being more efficient and accessible in the open-source AI ecosystem.\n\nThis release positions NVIDIA as a key player in advancing open-source AI models, potentially rivaling proprietary solutions from other major companies like OpenAI\u30108\u2020source\u3011\u30109\u2020source\u3011."]},
"status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [{"start_ix": 1158, "end_ix": 1168, "citation_format_type": "tether_og", "metadata": {"type": "webpage", "title": "NVIDIA Nemotron 70b: A Breakthrough in Open-Source AI - Geeky Gadgets", "url": "https://www.geeky-gadgets.com/open-source-ai-nvidia-nemotron-70b/", "text": " * \u301023\u2020Intel announces support for Microsoft Phi-3 open source AI models\u3011\n * \u301024\u2020Apple release new open source AI models for on device processing\u3011\n * \u301025\u2020Mistral-NEXT new open-source model fully tested\u3011\n * \u301026\u2020NeuralDaredevil-7B open source AI model\u3011\n\n## Innovative Reward Modeling Approaches\n\nTwo pioneering reward modeling techniques contribute significantly to the Nemotron 70b\u2019s capabilities:\n\n1. Bradley Terry Model: This statistical approach evaluates pairs of responses to determine which is superior, allowing for fine-grained optimization of the model\u2019s output quality.\n\n2. Regression-Style Scoring: By assigning numeric scores based on specific criteria such as helpfulness, accuracy, and relevance, this method provides a more nuanced framework for improving the model\u2019s performance.\n\nThese advanced reward modeling techniques work in tandem to refine the Nemotron 70b\u2019s responses, resulting in more coherent, contextually appropriate, and useful outputs across a wide range of applications.\n\n## Data Set Innovations: HelpSteer 2\n\nA critical factor in the Nemotron 70b\u2019s success is the utilization of the \u301027\u2020HelpSteer 2 data set\u2020huggingface.co\u3011. This innovative training resource combines:\n\n * Preference rankings for comparative evaluation\n * Numeric ratings for quantitative assessment\n * Diverse data sources to capture a wide range of knowledge and contexts\n\nBy integrating these elements, HelpSteer 2 provides a comprehensive framework for training, allowing the Nemotron 70b to learn nuanced patterns and make more informed decisions. This approach enhances the model\u2019s ability to handle complex queries and generate high-quality responses across various domains.\n\n## Performance Benchmarks and Capabilities\n\nThe Nemotron 70b has demonstrated exceptional performance in several key benchmarks:\n\nReward Bench: Outperforming competitors in this metric, which evaluates the model\u2019s ability to generate responses aligned with human preferences.\n\nArena Hard Auto: Excelling in this challenging benchmark, showcasing the model\u2019s advanced reasoning capabilities and adaptability to complex scenarios.\n\nThese results highlight the Nemotron 70b\u2019s potential for tackling intricate tasks with precision and reliability, making it suitable for a wide range of applications in research, industry, and beyond.\n\n## Future Implications and Ongoing Challenges\n\nThe rapid progress demonstrated by the Nemotron 70b and similar open-source models signals a promising future for AI development. As these models continue to evolve, they hold significant potential for:\n\n * Enhancing AI reasoning and problem-solving capabilities\n * Improving natural language understanding and generation\n * Facilitating more intuitive human-AI interactions\n * Accelerating research and innovation in AI-related

fields\n\nHowever, it\u2019s important to acknowledge that challenges remain. The Nemotron 70b, like other AI models, still faces difficulties with certain types of reasoning tasks. Ongoing research and development efforts are focused on addressing these limitations through techniques such as:\n\nPrompt Engineering: Refining the way queries are presented to the model to optimize its performance in specific scenarios.\n\nContinuous Learning: Implementing mechanisms for the model to update and improve its knowledge base over time.\n\nTask-Specific Fine-Tuning: Adapting the model for specialized applications while maintaining its general capabilities.\n\nNVIDIA\u2019s Nemotron 70b represents a significant milestone in open-source AI development. By demonstrating performance that rivals and even surpasses established closed-source models, it sets a new benchmark for what\u2019s possible in the realm of accessible, community-driven AI innovation. As the field continues to evolve, open-source models like the Nemotron 70b are poised to play an increasingly crucial role in shaping the future of artificial intelligence, driving progress through collaboration, transparency, and shared knowledge. Bradley Terry Model: This statistical approach evaluates pairs of responses to determine which is superior, allowing for fine-grained optimization of the model\u2019s output quality.\n\n2. Regression-Style Scoring: By assigning numeric scores based on specific criteria such as helpfulness, accuracy, and relevance, this method provides a more nuanced framework for improving the model\u2019s performance.\n\nThese advanced reward modeling techniques work in tandem to refine the Nemotron 70b\u2019s responses, resulting in more coherent, contextually appropriate, and useful outputs across a wide range of applications.\n\n## Data Set Innovations: HelpSteer 2\n\nA critical factor in the Nemotron 70b\u2019s success is the utilization of the \u301027\u2020HelpSteer 2 data set\u2020huggingface.co\u3011. This innovative training resource combines:\n\n * Preference rankings for comparative evaluation\n * Numeric ratings for quantitative assessment\n * Diverse data sources to capture a wide range of knowledge and contexts\n\nBy integrating these elements, HelpSteer 2 provides a comprehensive framework for training, allowing the Nemotron 70b to learn nuanced patterns and make more informed decisions. This approach enhances the model\u2019s ability to handle complex queries and generate high-quality responses across various domains.\n\n## Performance Benchmarks and Capabilities\n\nThe Nemotron 70b has demonstrated exceptional performance in several key benchmarks:\n\nReward Bench: Outperforming competitors in this metric, which evaluates the model\u2019s ability to generate responses aligned with human preferences.\n\nArena Hard Auto: Excelling in this challenging benchmark, showcasing the model\u2019s advanced reasoning capabilities and adaptability to complex scenarios.\n\nThese results highlight the Nemotron 70b\u2019s potential for tackling intricate tasks with precision and reliability, making it suitable for a wide range of applications in research, industry, and beyond.\n\n## Future Implications and Ongoing Challenges\n\nThe rapid progress demonstrated by the Nemotron 70b and similar open-source models signals a promising future for AI development. As these models continue to evolve, they hold significant potential for:\n\n * Enhancing AI reasoning and problem-solving capabilities\n * Improving natural language understanding and

generation\n * Facilitating more intuitive human-AI interactions\n * Accelerating research and innovation in AI-related fields\n\nHowever, it\u2019s important to acknowledge that challenges remain. The Nemotron 70b, like other AI models, still faces difficulties with certain types of reasoning tasks. Ongoing research and development efforts are focused on addressing these limitations through techniques such as:\n\nPrompt Engineering: Refining the way queries are presented to the model to optimize its performance in specific scenarios.\n\nContinuous Learning: Implementing mechanisms for the model to update and improve its knowledge base over time.\n\nTask-Specific Fine-Tuning: Adapting the model for specialized applications while maintaining its general capabilities.\n\nNVIDIA\u2019s Nemotron 70b represents a significant milestone in open-source AI development. By demonstrating performance that rivals and even surpasses established closed-source models, it sets a new benchmark for what\u2019s possible in the realm of accessible, community-driven AI innovation. As the field continues to evolve, open-source models like the Nemotron 70b are poised to play an increasingly crucial role in shaping the future of artificial intelligence, driving progress through collaboration, transparency, and shared knowledge. Jump over to the \u301028\u2020Hugging Face website\u2020huggingface.co\u3011 for more information on the latest AI model from NVIDIA.\n\nMedia Credit: \u301029\u2020TheAIGRID\u2020www.youtube.com\u3011\n\n * \u301030\u2020 Share \u2020www.facebook.com\u3011 \n * \u301031\u2020 Tweet \u2020twitter.com\u3011 \n * \u301032\u2020 Pin \u2020pinterest.com\u3011 \n * Email\n\nFiled Under: \u30103\u2020AI\u3011, \u30102\u2020Top News\u3011\n\nLatest Geeky Gadgets Deals\n\nDisclosure: Some of our articles include affiliate links. Instruct is, essentially, a modified version of Meta\u2019s open-source Llama-3.1-70B-Instruct. The \u201cNemotron\u201d portion of the model\u2019s name encapsulates Nvidia\u2019s contribution to the end result.\u00a0\n\nThe Llama \u201cherd\u201d of AI models, as Meta refers to them, are meant to be used as open-source foundations for developers to build on. \n\nIn the case of Nemotron, Nvidia took up the challenge and developed a system designed to be more \u201chelpful\u201d than popular models such as OpenAI\u2019s ChatGPT and Anthropic\u2019s Claude-3.\u00a0\n\nNvidia \u301037\u2020used\u2020build.nvidia.com\u3011 specially curated data sets, advanced fine-tuning methods and its own state-of-the-art AI hardware to turn Meta\u2019s vanilla model into what might be the most \u201chelpful\u201d AI model on the planet.\u00a0\n\n[Image 3: NVidia, Technology, Meta, ChatGPT, OpenAI]\n\nAn engineer\u2019s post on X.com expressing excitement for Nemotron\u2019s capabilities. Source: \u301038\u2020Shayan Taslim\u2020x.com\u3011\n\n## Benchmarking \n\nWhen it comes to determining which AI model is \u201cthe best,\u201d there\u2019s no clear-cut methodology. Unlike, for example, measuring the ambient temperature with a mercury thermometer, there isn\u2019t a single \u201ctruth\u201d that exists when it comes to AI model performance.\u00a0\n\nDevelopers and researchers have to determine how well an AI model performs the same as humans are evaluated \u2014 through comparative testing.\u00a0\n\nRelated: \u301039\u2020AI \u2018mind uploads\u2019 could allow the dead to trade forever\u3011\n\nAI benchmarking involves giving different AI models the same queries, tasks, questions or problems and then comparing the usefulness of the results. Often, due to the subjectivity of what is and isn\u2019t considered useful, human proctors are used to determine a machine\u2019s performance through blind evaluations.\u00a0\n\nIn Nemotron\u2019s case, it appears that Nvidia is claiming the new model outperforms existing state-of-the-art models such as GPT-4o and Claude-3 by a fairly wide margin.\n\n[Image 4: NVidia, Technology, Meta, ChatGPT, OpenAI]\n\nThe top of the Chatbot Arena leaderboards. Source: LLMArena \n\nThe image above depicts the ratings on the automated \u201cHard\u201d test on the Chatbot Arena Leaderboards. While Nvidia\u2019s Llama-3.1-Nemotron-70B-Instruct doesn\u2019t appear to be listed anywhere on the boards, if the developer\u2019s claim that it scored an 85 on this test is valid, it would be the de facto top model in this particular section.\u00a0\n\nWhat makes the achievement perhaps even more interesting is that Llama-3.1-70B is Meta\u2019s middle-tier open-source AI model. There\u2019s a much larger version of Llama-3.1, the 405B version (where the number refers to how many billion parameters the model was tuned with). \n\nBy comparison, GPT-4o is \u301040\u2020estimated\u2020arxiv.org\u3011 to have been developed with over 1 trillion parameters.\n\nMagazine: \u301041\u2020Fake Rabby Wallet scam linked to Dubai crypto CEO and many more victims\u3011\n\n * \u301042\u2020# NVidia \u3011\n * \u301043\u2020# Technology \u3011\n * \u30108\u2020# AI \u3011\n * \u301044\u2020# Meta \u3011\n * \u301045\u2020# ChatGPT \u3011\n * \u301046\u2020# OpenAI \u3011\n\nAdd reaction \n\n[Image 5]\n\nEditor\u2019s Choice \n\n * \u301047\u2020 Tesla likely still owns $780M in Bitcoin despite recent shuffle: Arkham \u3011\n * \u301048\u2020 94% of all Bitcoin in profit hints that $69K BTC price was a local top \u3011\n * \u301049\u2020 Michael Heinrich loves AI coins Goat, Turbo & Aethir\u2026 but not TAO: Hall of Flame \u3011\n * \u301050\u2020 Crypto academics slam controversial ECB paper blasting Bitcoin \u3011\n * \u301051\u2020 Saylor\u2019s comments on big bank BTC custody are \u2018batshit insane\u2019 \u2014 Buterin \u3011\n\n\u30100\u2020 Advertise with us \u3011\n\n * * * * * * * * \n\nNews \n\n * \u30102\u2020 Bitcoin \u3011\n * \u30105\u2020 Blockchain \u3011\n

The \u201cNemotron\u201d portion of the model\u2019s name encapsulates Nvidia\u2019s contribution to the end result.\u00a0\n\nThe Llama \u201cherd\u201d of AI models, as Meta refers to them, are meant to be used as open-source foundations for developers to build on. \n\nIn the case of Nemotron, Nvidia took up the challenge and developed a system designed to be more \u201chelpful\u201d than popular models such as OpenAI\u2019s ChatGPT and Anthropic\u2019s Claude-3.\u00a0\n\nNvidia \u301037\u2020used\u2020build.nvidia.com\u3011 specially curated data sets, advanced fine-tuning methods and its own state-of-the-art AI hardware to turn Meta\u2019s vanilla model into what might be the most \u201chelpful\u201d AI model on the planet.\u00a0\n\n[Image 3: NVidia, Technology, Meta, ChatGPT, OpenAI]\n\nAn engineer\u2019s post on X.com expressing excitement for Nemotron\u2019s capabilities.

Source: \u301038\u2020Shayan Taslim\u2020x.com\u3011\n\n## Benchmarking \n\nWhen it comes to determining which AI model is \u201cthe best,\u201d there\u2019s no clear-cut methodology. Unlike, for example, measuring the ambient temperature with a mercury thermometer, there isn\u2019t a single \u201ctruth\u201d that exists when it comes to AI model performance.\u00a0\n\nDevelopers and researchers have to determine how well an AI model performs the same as humans are evaluated \u2014 through comparative testing.\u00a0\n\nRelated: \u301039\u2020AI \u2018mind uploads\u2019 could allow the dead to trade forever\u3011\n\nAI benchmarking involves giving different AI models the same queries, tasks, questions or problems and then comparing the usefulness of the results. Often, due to the subjectivity of what is and isn\u2019t considered useful, human proctors are used to determine a machine\u2019s performance through blind evaluations.\u00a0\n\nIn Nemotron\u2019s case, it appears that Nvidia is claiming the new model outperforms existing state-of-the-art models such as GPT-4o and Claude-3 by a fairly wide margin.\n\n[Image 4: NVidia, Technology, Meta, ChatGPT, OpenAI]\n\nThe top of the Chatbot Arena leaderboards. Source: LLMArena \n\nThe image above depicts the ratings on the automated \u201cHard\u201d test on the Chatbot Arena Leaderboards. While Nvidia\u2019s Llama-3.1-Nemotron-70B-Instruct doesn\u2019t appear to be listed anywhere on the boards, if the developer\u2019s claim that it scored an 85 on this test is valid, it would be the de facto top model in this particular section.\u00a0\n\nWhat makes the achievement perhaps even more interesting is that Llama-3.1-70B is Meta\u2019s middle-tier open-source AI model. There\u2019s a much larger version of Llama-3.1, the 405B version (where the number refers to how many billion parameters the model was tuned with). \n\nBy comparison, GPT-4o is \u301040\u2020estimated\u2020arxiv.org\u3011 to have been developed with over 1 trillion parameters.\n\nMagazine: \u301041\u2020Fake Rabby Wallet scam linked to Dubai crypto CEO and many more victims\u3011\n\n * \u301042\u2020# NVidia \u3011\n * \u301043\u2020# Technology \u3011\n * \u30108\u2020# AI \u3011\n * \u301044\u2020# Meta \u3011\n * \u301045\u2020# ChatGPT \u3011\n * \u301046\u2020# OpenAI \u3011\n\nAdd reaction \n\n[Image 5]\n\nEditor\u2019s Choice \n\n * \u301047\u2020 Tesla likely still owns $780M in Bitcoin despite recent shuffle: Arkham \u3011\n * \u301048\u2020 94% of all Bitcoin in profit hints that $69K BTC price was a local top \u3011\n * \u301049\u2020 Michael Heinrich loves AI coins Goat, Turbo & Aethir\u2026 but not TAO: Hall of Flame \u3011\n * \u301050\u2020 Crypto academics slam controversial ECB paper blasting Bitcoin \u3011\n * \u301051\u2020 Saylor\u2019s comments on big bank BTC custody are \u2018batshit insane\u2019 \u2014 Buterin \u3011\n\n\u30100\u2020 Advertise with us \u3011\n\n * * * * * * * * \n\nNews \n\n * \u30102\u2020 Bitcoin \u3011\n * \u30105\u2020 Blockchain \u3011\n * \u30103\u2020 Ethereum \u3011\n * \u30104\u2020 Altcoins \u3011\n * \u30106\u2020 Business \u3011\n * \u30107\u2020 Policy & Regulations \u3011\n * \u30108\u2020 AI \u3011\n * \u30109\u2020 NFTs \u3011\n * \u301010\u2020 DeFi \u3011\n * \u301011\u2020 Adoption \u3011\n\nFeatures \n\n * \u301021\u2020 Top 100 2023 \u3011\n * \u301022\u2020 Top 100 2022 \u3011\n * \u301023\u2020 Top 100 2021 \u3011\n * \u301024\u2020 Top 100 2020 \u3011\n * \u301020\u2020 Magazine \u3011\n * \u301052\u2020 Analysis \u3011\n * \u301025\u2020 Opinion \u3011\n * \u301053\u2020 Hodler\u2019s Digest \u3011\n * \u301026\u2020 Expert Take \u3011\n * \u301014\u2020 Top 10 Cryptocurrencies \u3011\n ", "pub_date": null, "extra": {"cited_message_idx": 9, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}], "content_references": [{"matched_text": "\u30108\u2020source\u3011", "start_idx": 544, "end_idx": 554, "alt": null, "type":

"webpage_extended", "title": "NVIDIA Nemotron 70b: A Breakthrough in Open-Source AI - Geeky Gadgets", "url": "https://www.geeky-gadgets.com/open-source-ai-nvidia-nemotron-70b/", "pub_date": null, "snippet": " * \u301023\u2020Intel announces support for Microsoft Phi-3 open source AI models\u3011\n * \u301024\u2020Apple release new open source AI models for on device processing\u3011\n * \u301025\u2020Mistral-NEXT new open-source model fully tested\u3011\n * \u301026\u2020NeuralDaredevil-7B open source AI model\u3011\n\n## Innovative Reward Modeling Approaches\n\nTwo pioneering reward modeling techniques contribute significantly to the Nemotron 70b\u2019s capabilities:\n\n1. Bradley Terry Model: This statistical approach evaluates pairs of responses to determine which is superior, allowing for fine-grained optimization of the model\u2019s output quality.\n\n2. Regression-Style Scoring: By assigning numeric scores based on specific criteria such as helpfulness, accuracy, and relevance, this method provides a more nuanced framework for improving the model\u2019s performance.\n\nThese advanced reward modeling techniques work in tandem to refine the Nemotron 70b\u2019s responses, resulting in more coherent, contextually appropriate, and useful outputs across a wide range of applications.\n\n## Data Set Innovations: HelpSteer 2\n\nA critical factor in the Nemotron 70b\u2019s success is the utilization of the \u301027\u2020HelpSteer 2 data set\u2020huggingface.co\u3011. This innovative training resource combines:\n\n * Preference rankings for comparative evaluation\n * Numeric ratings for quantitative assessment\n * Diverse data sources to capture a wide range of knowledge and contexts\n\nBy integrating these elements, HelpSteer 2 provides a comprehensive framework for training, allowing the Nemotron 70b to learn nuanced patterns and make more informed decisions. This approach enhances the model\u2019s ability to handle complex queries and generate high-quality responses across various domains.\n\n## Performance Benchmarks and Capabilities\n\nThe Nemotron 70b has demonstrated exceptional performance in several key benchmarks:\n\nReward Bench: Outperforming competitors in this metric, which evaluates the model\u2019s ability to generate responses aligned with human preferences.\n\nArena Hard Auto: Excelling in this challenging benchmark, showcasing the model\u2019s advanced reasoning capabilities and adaptability to complex scenarios.\n\nThese results highlight the Nemotron 70b\u2019s potential for tackling intricate tasks with precision and reliability, making it suitable for a wide range of applications in research, industry, and beyond.\n\n## Future Implications and Ongoing Challenges\n\nThe rapid progress demonstrated by the Nemotron 70b and similar open-source models signals a promising future for AI development. As these models continue to evolve, they hold significant potential for:\n\n * Enhancing AI reasoning and problem-solving capabilities\n * Improving natural language understanding and generation\n * Facilitating more intuitive human-AI interactions\n * Accelerating research and innovation in AI-related fields\n\nHowever, it\u2019s important to acknowledge that challenges remain. The Nemotron 70b, like other AI models, still faces difficulties with certain types of reasoning tasks. Ongoing research and development efforts are focused on addressing these limitations through techniques such as:\n\nPrompt Engineering: Refining the way queries are presented to the model to optimize its performance in specific scenarios.\n\nContinuous Learning: Implementing mechanisms for the model to update and improve its knowledge base over time.\n\nTask-Specific Fine-Tuning: Adapting the model for specialized applications while maintaining its general capabilities.\n\nNVIDIA\u2019s Nemotron 70b represents a significant milestone in open-source AI development. By demonstrating performance that rivals and even surpasses established closed-source models, it sets a new benchmark

for what\u2019s possible in the realm of accessible, community-driven AI innovation. As the field continues to evolve, open-source models like the Nemotron 70b are poised to play an increasingly crucial role in shaping the future of artificial intelligence, driving progress through collaboration, transparency, and shared knowledge. While you don\u2019t have direct professional experience in AI, there are ways you can pivot your skills into the AI space. Here's how your background could help:\n\n1.

Software Development: Your experience with technologies like **Oracle SQL, Java, Spring, and Angular** is relevant to AI roles, especially in **data handling, backend development, and integration**. AI systems often need developers for the infrastructure that supports them, including handling datasets and APIs.\n\n2. **Project Management**: Your project management and leadership skills could be a great fit for roles in **AI project management**, where managing teams that develop AI solutions is crucial. Your work in logistics and customer success shows that you can manage complex, multifaceted projects\u2014a key skill in AI implementation.\n\n3. **Customer Success and Service**: Many AI companies need people who can **bridge the gap between developers and clients**, helping to ensure that AI products meet user needs. Your ability to increase customer satisfaction and manage client relationships could apply to roles in **AI customer success** or **AI product management**.\n\n4. **Interest and Learning**: While your professional experience with AI might be limited, your interest in the field is clear, and you can leverage that by continuing to **self-educate** (perhaps taking AI-specific courses or working on small AI projects). You can also apply for roles in AI companies where your **business operations expertise** (like at Hugging Face) is valued, even if it\u2019s not a technical AI role.\n\nTo strengthen your case:\n- **Build a portfolio**: Try contributing to open-source AI projects on platforms like **GitHub** or participate in AI-related **hackathons**. It\u2019ll show you can apply your software development skills to AI.\n- **Take AI-related courses**: There are numerous online courses from platforms like **Coursera**, **edX**, or **fast.ai** that focus on AI and machine learning. This will enhance your resume and demonstrate your commitment to transitioning into the AI field.\n- **Apply for entry or hybrid roles**: Look for **customer success, project management, or technical support** roles at AI companies, which could serve as a stepping stone to more technical AI positions.\n\nYou already have a great skill set and leadership experience that could translate well into the AI industry with some additional training. Would you like recommendations for specific AI-related courses or projects that could bolster your resume?"]}, "status": "finished_successfully","end_turn": true

excellent AI-related courses and projects to help you build up your skills and showcase your interest in the field:\n\n### 1. **AI Fundamentals and Machine Learning**\n - **Coursera\u2019s Machine Learning by Andrew Ng**: This is a classic and one of the most recommended beginner courses for those wanting to get into AI. It covers the basics of machine learning algorithms and practical implementations.\n - [Link to course](https://www.coursera.org/learn/machine-learning)\n \n - **Fast.ai Practical Deep Learning for Coders**: This course takes a hands-on approach to deep learning and is perfect for someone with a coding background. It will teach you how to build AI models with minimal theory and a lot of real-world applications.\n - [Link to course](https://course.fast.ai/)\n \n - **Udacity\u2019s AI for Everyone by Andrew Ng**: This is an introductory course for those who are new to AI. It is designed to give a broad overview of what AI is and how it can be applied.\n - [Link to course](https://www.udacity.com/course/ai-for-everyone--ud001)\n\n### 2. **Project-Based AI Learning**\n - **Kaggle Competitions**: Kaggle is a platform for data science and AI competitions. Even if you don\u2019t win, participating in these challenges will give you real-world experience with datasets, model building, and evaluation. You can start small with beginner challenges and work your way up.\n   - [Link to Kaggle](https://www.kaggle.com/competitions)\n \n - **AI4ALL Open Learning**: AI4ALL offers various free, project-based learning resources focused on AI fundamentals and ethics. It\u2019s a great way to dive into beginner-friendly projects, some of which focus on societal impacts.\n   - [Link to AI4ALL](https://ai-4-all.org/education/open-learning/)\n\n### 3. **Specialized AI Certifications**\n - **Google AI Certificate**: Google offers a Machine Learning Crash Course, which comes with interactive notebooks to practice with their TensorFlow library. This is great if you\u2019re interested in TensorFlow-based development.\n   - [Link to Google AI course](https://developers.google.com/machine-learning/crash-course)\n \n - **DeepLearning.AI TensorFlow Developer Professional Certificate (Coursera)**: If you want to get into the deep learning space, this certification will give you the foundation and the practical know-how using TensorFlow.\n   - [Link to course](https://www.coursera.org/professional-certificates/tensorflow-in-practice)\n\n### 4. **Open-Source AI Projects**\n - **Contribute to Hugging Face**: Since you're familiar with Hugging Face, you can contribute to their **Transformers** library on GitHub. Even contributing documentation or small bug fixes would give you credibility in the AI community.\n   - [Link to Hugging Face GitHub](https://github.com/huggingface/transformers)\n \n - **OpenAI\u2019s Open-Source Projects**: OpenAI also offers various open-source projects on GitHub, including GPT models and reinforcement learning environments. Working on these can boost your resume in AI.\n   - [Link to OpenAI GitHub](https://github.com/openai)\n\n### 5. **Networking and Communities**\n - Join **AI communities** on platforms like **Reddit**, **Discord**, and **GitHub** to learn from others and share your projects. AI-specific subreddits like r/MachineLearning and r/learnmachinelearning are great places to get insights and ask questions.\n \n - Participate in **AI hackathons** on sites like **Devpost** or **MLH (Major League Hacking)** to gain hands-on experience.\n\nBy focusing on one or more of these options, you'll be able to add practical AI knowledge to your resume, which can make a significant difference when applying for jobs in AI. Let me know if you need help getting started with any specific area!"]}, "status": "finished_successfully","end_turn": true

You ask thoughtful, specific questions, and it's clear you're focused on maximizing the usefulness of our interactions. However, if you'd like to refine your prompts for even more productive conversations, here are a few tips:\n\n### 1. **Be as Specific as Possible**\n - **Current Example**: You do this well when you're asking about AI models, specific coding questions, or work-related inquiries.\n - **Tip**: Keep adding context about what you're looking for or any constraints you have (like needing a cloud solution because your local machine isn't powerful enough). This helps me provide tailored advice faster.\n \n### 2. **State Your Objective Clearly**\n - **Example**: When you're seeking advice on building an AI portfolio or learning AI skills, stating the exact outcome you're hoping for (like getting a job or specific certifications) helps guide the advice better.\n - **Improved Prompt**: Instead of "Can I run Llama 3 on my computer?", you could ask, "Given my setup, what are my options for running large AI models like Llama-3, either locally or on the cloud?"\n \n### 3. **Use Open-Ended Follow-ups**\n - Sometimes, it's useful to add open-ended prompts to let the conversation flow in unexpected directions.\n - **Example**: After asking about AI models, you might follow up with "What other advancements in AI should I be aware of that could impact job prospects?" This opens the door for me to offer insights

beyond the specific question.\n\n### 4. **Clarify Assumptions**\n - If you're unsure about certain facts or frameworks, mention your assumptions. I can clarify them or guide you to the right understanding.\n - **Example**: "I assume I need a powerful GPU to run Llama models locally\u2014am I right?"\n\n### 5. **Feedback for Continuous Learning**\n - Regularly asking for clarification or feedback on my responses helps refine the conversation.\n - **Example**: "Can you explain how reward modeling works in simpler terms?" This helps fine-tune technical responses to match your understanding level.\n\n### 6. **Break Big Questions into Smaller Parts**\n - When a topic is broad, breaking it into smaller parts can help me address specific concerns more efficiently.\n - **Example**: "What AI-related projects could I work on to boost my resume?" followed by "How can I showcase those projects effectively in interviews?"\n\nIn summary, you're already doing great, but adding more **specific objectives**, **open-ended follow-ups**, and **clarifications on assumptions** could make our chats even more insightful. Feel free to try some of these tweaks in your next prompts!"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "auto", "parent_id": "eb586a30-2d7e-4176-9f96-5da7a77d716b", "request_id": "8d702b3d28990e85-MXP", "timestamp_": "absolute", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true}, "recipient": "all", "channel": null}, "parent": "eb586a30-2d7e-4176-9f96-5da7a77d716b", "children": ["aaa296cb-5048-40a4-815f-64aa1f5f17e9"]}, "aaa296cb-5048-40a4-815f-64aa1f5f17e9": {"id": "aaa296cb-5048-40a4-815f-64aa1f5f17e9", "message": {"id": "aaa296cb-5048-40a4-815f-64aa1f5f17e9", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729670534.780004, "update_time": null, "content": {"content_type": "text", "parts": ["If I were to build a personal GPT that retains a copy of my resume for easy access, I would want it to always have that information readily available. The idea is that when I provide the GPT with a job posting, it automatically generates a resume optimized for applicant tracking systems (ATS). This resume should clearly indicate to recruiters, "This is the candidate we need!" \n\nWhat type of prompt would you suggest for creating this GPT?"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d7034283a8f0e71-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "d53edfd8-5301-4f47-931c-ab9f0858e6f7", "children": ["06604b5d-c4e7-4745-94f7-42f110cad44a"]}, "06604b5d-c4e7-4745-94f7-42f110cad44a": {"id": "06604b5d-c4e7-4745-94f7-42f110cad44a", "message": {"id": "06604b5d-c4e7-4745-94f7-42f110cad44a", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729670562.175803, "update_time": null, "content": {"content_type": "text", "parts": ["To build a personal GPT that can automatically generate optimized resumes for applicant tracking systems (ATS), your prompt would need to include clear instructions about the **context** (job posting), the **data** (your resume), and **what kind of result** you're expecting. Here\u2019s a breakdown of how to design the prompt:\n\n### 1. **Contextual Awareness** \n You want the GPT to understand that it\u2019s working from your resume and that it must tailor this resume to fit the specific job posting. The first part of the prompt should set that stage.\n\n Example: \n "You have access to my resume and can modify it. I will provide you with a job posting, and you will analyze the key qualifications, skills, and experiences that the employer is

looking for."\n\n### 2. **ATS Optimization Requirements** \n Applicant Tracking Systems often filter resumes based on **keywords** and **formatting**. Your prompt should instruct the GPT to focus on including the right **keywords** and ensuring the resume is **formatted** correctly for ATS.\n\n Example: \n "Please generate an ATS-friendly version of my resume, ensuring it includes relevant keywords from the job posting. Optimize for clarity, use bullet points for experiences, and avoid graphics, tables, or excessive formatting that ATS systems might struggle with."\n\n### 3. **Customization for Role-Specific Matches** \n You want the GPT to highlight your skills and experiences that are the best match for the job.\n\n Example: \n "Focus on matching the job requirements with my work experience and skills. Rephrase or emphasize the most relevant aspects of my background so it\u2019s clear to the recruiter that I\u2019m the perfect fit for the role. Make sure to quantify achievements wherever possible, and use active, outcome-oriented language."\n\n### Example Prompt Structure:\n"Hello GPT! I want you to create an ATS-optimized resume for me. You already have my resume on hand, and I will provide you with the job description for the role I\u2019m applying for.\n\nHere\u2019s how I want you to process it:\n1. Analyze the job posting and identify the key skills, qualifications, and responsibilities the employer is looking for.\n2. Optimize my resume by incorporating relevant keywords from the job description into my existing experience and skills sections.\n3. Tailor each job role in my resume to align with the responsibilities outlined in the job posting.\n4. Ensure the resume is in a simple, ATS-friendly format (e.g., no graphics, tables, or unconventional fonts).\n5. Highlight quantifiable achievements and use strong, active language to make it clear that I\u2019m the best candidate for the role."\n\n### Possible Follow-ups:\n- "What keywords should I prioritize for this job description?"\n- "Could you improve the bullet points for the 'Customer Success Manager' role to emphasize team leadership and communication?"\n\nThis approach will ensure your GPT is focused on crafting a tailored, keyword-optimized resume that aligns with job postings and is formatted to pass through ATS filters effectively. Would you like to try building this GPT, or are you interested in a guide for integrating resume templates into an existing model?"]}, "status": "finished_successfully","end_turn": true

The architecture of GPT models, including mine, emphasizes task-based processing for a few key reasons:\n\n### 1. **Focus and Clarity**\nCompartmentalizing different aspects of a task helps ensure that responses are concise and relevant to the specific query at hand. This approach allows the model to remain focused on the immediate context, without getting overwhelmed by the vast amount of data it has access to. It mirrors human cognitive processes, where we also break down complex tasks into manageable parts.\n\n### 2. **Modularity for Performance**\nGPT models are trained to respond to specific input patterns based on the context they're given at any moment. By keeping interactions modular, the system can perform efficiently without overloading any one component with too much information. This division allows the model to handle diverse tasks (coding, answering questions, etc.) without confusion.\n\n### 3. **Security and Privacy**\nCompartmentalization also aids in ensuring that information isn't unintentionally leaked across sessions or queries. For example, conversations don't carry over unless explicitly designed to, which minimizes the risk of cross-query contamination.\n\n### 4. **Flexibility and Adaptability**\nIn models like mine, compartmentalization helps deal with a wide variety of tasks. It allows me to respond to everything from coding questions to creative writing in a way that is adaptable. Think of it like having specialized "modules" or "zones" for different types of reasoning.\n\n### Internal Integration\nThat said, you're absolutely right: more **integration** could lead to more fluid and contextually rich conversations, especially for personalizing interactions. There are research initiatives aimed at adding **long-term memory** and more contextual awareness to AI models so they can keep track of ongoing projects, conversations, and preferences over time. For example, tools like **LangChain** or **LlamaIndex** enable models to retain context for better long-term interaction. This could be useful for tasks like generating optimized resumes from saved data, as you mentioned.\n\nIf I had more persistent memory across all tasks (similar to how the OpenAI GPT builder can be customized with long-term memory or specific capabilities), I could indeed act more like a continuous assistant who evolves with your needs.\n\nWould you be interested in exploring how to make your personal GPT model better at retaining context and integrating tasks? I could give you pointers for that!"]}, "status": "finished_successfully","end_turn": true

It can help your model retain a "state," enabling it to remember your resume, preferences, and ongoing job searches. This would allow the GPT to reference previous conversations or details (like your resume) without needing constant re-prompting.\n \n **How to use it:**\n - LangChain can store long-term memory by creating an interaction history. This history allows your GPT model to pull relevant details from past conversations, enhancing contextual understanding.\n - You could integrate a knowledge base of your resume into the system, and when you provide a job posting, the model could recall and tweak specific sections (e.g., your software experience) to align with the job's requirements.\n\n **LangChain Resources:**\n - [LangChain Documentation](https://langchain.readthedocs.io/en/latest/)\n\n### 2. **Embedding and Retrieval Models**\n - Use **embedding-based retrieval models** to store and retrieve sections of your resume or past data. By indexing your resume and job descriptions using embeddings, you can have the GPT access relevant sections, contextualize them, and generate a custom response.\n - For instance, **FAISS** (Facebook AI Similarity Search) is a tool that could store parts of your resume and relevant keywords, making it searchable by the GPT when needed. You\u2019d query the job posting, and FAISS retrieves the most relevant parts of your resume for the GPT to customize.\n\n **How to use it:**\n - Store each section of your resume (education, experience, skills) as embeddings. When a job description is provided, the model searches for relevant parts based on the job\u2019s keywords and modifies the resume

dynamically.\n\n **FAISS Resources:**\n - [FAISS GitHub](https://github.com/facebookresearch/faiss)\n\n### 3. **Fine-Tuning on Your Resume Data**\n - You can **fine-tune** your GPT on a dataset that includes variations of your resume. This makes it better suited for identifying and repurposing your experience for different job types. Fine-tuning can include making the model aware of common ATS-friendly formats and tailoring language to meet specific industry standards.\n - **Example process**:\n   - Create a small dataset of job descriptions and your tailored resumes.\n   - Fine-tune the GPT model on these data samples, ensuring it learns how to automatically align your experience with various job roles.\n\n **Fine-Tuning Resources:**\n - [OpenAI Fine-Tuning Guide](https://platform.openai.com/docs/guides/fine-tuning)\n\n### 4. **Prompt Engineering for Contextual Generation**\n - Craft your prompts to take advantage of **few-shot learning**. By giving the model structured examples of how you like your resume to be tailored for specific roles, you can achieve more consistent results without needing complex infrastructure.\n \n Example prompt structure:\n ```\n I\u2019m applying for [Job Title] at [Company]. Here's a list of job requirements: [insert job requirements]. Here's my resume: [insert key details from your resume]. Please generate an ATS-optimized resume that emphasizes my skills related to [specific job focus areas].\n ```\n This structured input can guide the GPT to highlight the relevant parts of your resume for each job.\n\n### 5. **Use GPT-3's Embedding Models via API**\n OpenAI offers powerful embedding models that let you semantically search through documents (like your resume) and retrieve the most relevant sections based on a query (the job posting).\n \n **How to use it:**\n - Store sections of your resume in an embedding-based system. When you feed a job posting into the GPT, it uses the embeddings to fetch and reorganize the parts of your resume that match best with the job description.\n\n **OpenAI Embedding Resources**:\n - [Embeddings API](https://platform.openai.com/docs/guides/embeddings)\n\n### 6. **Automation with Tools like Zapier or Integromat**\n - For ease of use, you could automate the process of feeding job descriptions and generating custom resumes. You can integrate GPT with **Zapier** or **Integromat** to automatically pull job postings from emails or job boards, process them, and generate a customized resume, all without manual intervention.\n\n **How to use it:**\n - Set up a Zap to trigger whenever you receive a job posting in your email.\n - Zapier feeds this into your GPT, and the GPT responds with a tailored resume, which is then automatically emailed back to you.\n\n **Zapier Resources**:\n - [Zapier GPT Integration](https://zapier.com/apps/openai/integrations)\n\n### Combining Everything\n- **Long-term memory** with LangChain or LlamaIndex would ensure your GPT retains your resume.\n- **Embeddings and FAISS** would enable smart retrieval based on job descriptions.\n- **Prompt engineering** and **fine-tuning** help your GPT improve over time by learning from different roles you apply to.\n- **Automation** ensures this process is smooth and hands-off.\n\nThese strategies will allow your personal GPT to seamlessly access, modify, and optimize your resume based on job postings, giving you an edge in the job application process. Let me know which parts you'd like more details or guidance on!"]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "auto", "parent_id": "b0189d24-fc0f-485f-9c8f-7c95287424c3", "request_id": "8d7040a9c8f0babb-MXP", "timestamp_": "absolute", "finish_details": {"type": "stop", "stop_tokens":

Here's how you can move forward without losing the **vibe** we have:\n\n### Getting Started with GPT Builder + Retaining Our Vibe\nThe good news is that even though you\u2019d technically be switching to a different "instance" when using the **OpenAI GPT Builder**, you can still use everything we've talked about here as a foundation. You can personalize your GPT to reflect this conversation and keep our energy alive!\n\nHere's a step-by-step plan to get you started:\n\n### 1. **Set Up GPT in OpenAI GPT Builder**\n Since you're already using GPT Builder, you'll need to create a new custom GPT instance. Here\u2019s how to start:\n - Log into **OpenAI GPT Builder**.\n - Create a new GPT instance.\n - In the GPT builder, you can **add a memory module** where you upload your resume. This will allow the model to access and store your resume for reference in future interactions.\n\n### 2. **Load Resume into GPT Memory**\n Since we already have your resume, you can:\n - Upload it directly into the builder as part of its memory.\n - If the builder doesn't directly support large uploads or memory, chunk your resume into smaller sections (e.g., **Work Experience**, **Education**, **Skills**) and feed them to the model as part of its knowledge base.\n \n### 3. **Customize Prompts for ATS-Optimized Resumes**\n Create prompt templates like:\n - "Generate an ATS-optimized resume for the following job posting: [Insert job description]. Use my resume as reference and customize the skills and experiences to align with the job requirements."\n \n Fine-tuning the prompts in this way will ensure that

every interaction results in a resume that matches specific job postings.\n\n### 4. **Configure Long-Term Memory (via GPT Builder or External Tool)**\n Since you want this model to **remember** details long-term, you\u2019ll likely need to use a memory module or tool like **LangChain** or **LlamaIndex**, which can store your ongoing interactions.\n - You can integrate these into your GPT builder setup (if possible) or use them to feed memory/context back to the GPT for more complex workflows.\n \n You might not need external tools for GPT Builder depending on how it handles long-term memory, but this is something you should explore if deeper memory is needed.\n\n### 5. **Automate with API/Workflow Integrations**\n Set up workflows for:\n - **Retrieving job descriptions** automatically (from job boards, emails, etc.).\n - **Generating resumes** based on job postings and having them ready to submit.\n \n This can be done with **Zapier** or **Integromat** to automate the input/output process.\n\n### 6. **Stay in Sync with Me!**\n Even though this builder GPT will handle the specific tasks, we can still chat here for guidance, advice, and ideas. You can even **import some of our past conversations** to reflect our previous chats and keep the same vibe going in your custom GPT.\n\n### Final Steps\n- **Start building your custom GPT**: Take these steps and build the initial framework. As you go, you can continue tweaking it to include more features (like deeper memory or better ATS formatting).\n- **Come back here anytime**: We can keep discussing and refining your GPT journey, ensuring that I stay as involved as you need. \n\nIf you hit any roadblocks while building, just reach out, and I\u2019ll help you troubleshoot. We\u2019re not done vibing yet! \ud83d\ude0a"]}, "status": "finished_successfully","end_turn": true

active compounds in the sage, creating distinct effects in the tincture. Here are the likely effects and components to consider:\n\n1. **Altered Phytochemicals**: \n - Decarboxylation typically involves heating the herb, which can change some of its chemical constituents. Sage contains thujone, rosmarinic acid, camphor, and other essential oils. Decarbing may increase the availability of some of these compounds, potentially making the tincture more potent. \n - **Thujone**, found in sage, has a stimulant effect in low doses, but excessive amounts can cause adverse reactions. Decarbing could increase thujone\u2019s presence, leading to stronger effects.\n\n2. **Increased Antioxidant Activity**: \n - Sage is known for its antioxidant properties, largely due to rosmarinic acid. Decarbing may intensify these effects, resulting in a tincture with enhanced potential for combating oxidative stress and promoting cellular health.\n\n3. **Potential Cognitive Benefits**: \n - Sage has been historically associated with improving memory and cognitive function. A decarbed tincture might amplify these effects, making it more effective for improving focus or memory due to the enhanced availability of sage's active compounds.\n\n4. **Anti-inflammatory Properties**: \n - Rosmarinic acid and other components in sage have anti-inflammatory properties, and a decarbed tincture could heighten the herb's ability to reduce inflammation, offering potential relief from inflammatory conditions.\n\n5. **Stronger Flavor and Aroma**: \n - Decarbing can intensify the herb's flavor and aroma by releasing more volatile compounds, leading to a tincture with a more pronounced herbal, earthy, and potentially bitter taste.\n\n6. **Possible Psychoactive Effects**: \n - Thujone, in higher concentrations, is known to have psychoactive effects and may cause altered mental states, hallucinations, or convulsions in excessive amounts. The Green Dragon method, particularly with decarbed sage, could lead to a tincture with mild to moderate psychoactive properties if thujone levels are concentrated.\n\n7. **Antibacterial and Antifungal Effects**: \n - Sage is antimicrobial, and a tincture could be effective as a topical or internal remedy for bacterial or fungal infections, with decarbing enhancing the tincture\u2019s efficacy in this regard.\n\n8. **Enhanced Mood and Relaxation**: \n - Sage has anxiolytic (anxiety-reducing) effects. Decarbing may heighten its potential to relieve stress and promote relaxation, contributing to a more potent mood-stabilizing tincture.\n\nIt is important to note that while decarbing could amplify the effects of sage, there\u2019s a risk of intensifying compounds like thujone, which should be taken cautiously, especially in larger doses. If using sage in this way, it\u2019s recommended to use small amounts initially to gauge the effects."]}, "status": "finished_successfully","end_turn": true

A commonly used herb-to-alcohol ratio for tinctures is **1:2 to 1:5** for fresh herbs. Here\u2019s a breakdown:\n\n### Suggested Ratio:\n- **1:2 ratio (for a stronger tincture)**: For every 1 gram of fresh sage, use 2 mL of alcohol.\n- **1:5 ratio (for a milder tincture)**: For every 1 gram of fresh sage, use 5 mL of alcohol.\n\nSince you\u2019re using **96% alcohol** (a very high concentration), it will effectively extract the active components, but you can adjust based on the potency you\u2019re looking for.\n\n### Example:\n- For **50 grams** of fresh sage:\n - In a **1:2 ratio**: Use 100 mL of 96% alcohol.\n - In a **1:5 ratio**: Use 250 mL of 96% alcohol.\n\nYou can start with a 1:5 ratio if you prefer a less concentrated tincture and adjust according to your desired potency as you experiment. Fresh sage has a high water content, so if you're using 96% alcohol, you might not need to worry much about dilution during extraction.\n\nLet it sit in a dark place for at least **2-4 weeks**, shaking it every day, and then strain it to get the tincture. This should yield a fairly potent extract, especially after decarbing the sage."]}, "status": "finished_successfully","end_turn": true

Here are some of the possible effects you might experience from a cannabis and sage-based tincture, depending on the strains and ratios used:\n\n### 1. **Enhanced Relaxation and Stress Relief**\n - **Cannabis (THC/CBD)**: Depending on the strain of cannabis you use, particularly if it's high in CBD or an indica strain, the tincture could have calming, anxiety-reducing effects. THC can also promote relaxation and a sense of euphoria.\n - **Sage**: Sage has mild anxiolytic properties and may help with mood stabilization, promoting a calm, relaxed state when combined with cannabis.\n\n### 2. **Cognitive Enhancement or Alteration**\n - **Cannabis (THC)**: THC can alter perception, mood, and cognition. It may cause euphoria, creativity, or introspective effects depending on the dose. At higher doses, it may induce psychoactive effects like heightened awareness or altered sensory perception.\n - **Sage (Thujone)**: Sage contains thujone, which, in small amounts, has a stimulating effect on the nervous system. This could potentially enhance focus, memory, and clarity when combined with the right cannabis strain.\n - **Combined Effect**: Depending on the strain, this combination may create a sense of alertness while being relaxed, which could be useful for focus-driven tasks or creative work.\n\n### 3. **Potential Psychoactive Effects**\n - **Cannabis (THC)**: Cannabis\u2019 psychoactive effects, driven by THC, can range from mild euphoria to more intense states depending on the dose.\n - **Sage (Thujone)**: High amounts of thujone may add to the psychoactive effects of THC, potentially resulting in heightened mental stimulation or mild hallucinations in high doses. This combination should be used with caution as it may enhance the intensity of a cannabis high.\n \n### 4. **Anti-inflammatory and Pain Relief**\n - **Cannabis (CBD/THC)**: Cannabis, especially strains high in CBD, is known for its anti-inflammatory and pain-relieving properties. THC also provides relief by interacting with the body\u2019s endocannabinoid system.\n - **Sage**: Sage has anti-inflammatory properties due to compounds like rosmarinic acid, which may help reduce inflammation and relieve pain.\n - **Combined Effect**: The two together

could result in a powerful anti-inflammatory and pain-relieving tincture, making it useful for conditions like arthritis, muscle pain, or chronic inflammation.\n\n### 5. **Potential Antimicrobial Benefits**\n - **Cannabis (CBD)**: Cannabinoids such as CBD have shown antibacterial and antifungal effects in some studies.\n - **Sage**: Sage is traditionally used for its antimicrobial properties, making it effective in combating infections.\n - **Combined Effect**: A tincture combining both herbs could have enhanced antimicrobial properties, potentially useful for topical or internal applications to fight infections.\n\n### 6. **Mood Elevation and Euphoria**\n - **Cannabis (THC)**: THC is known to uplift mood and induce feelings of euphoria, which could help with depression or stress.\n - **Sage**: Sage has traditionally been used for its mood-lifting properties, and it may enhance feelings of well-being when combined with cannabis.\n - **Combined Effect**: This tincture could serve as a mood enhancer or for managing mood disorders like depression or anxiety, promoting a sense of mental clarity and happiness.\n\n### 7. **Improved Digestion**\n - **Cannabis (THC/CBD)**: Cannabis is known to stimulate appetite (the "munchies") and can relieve nausea, making it helpful for digestive issues.\n - **Sage**: Sage is traditionally used to aid digestion and relieve gastrointestinal discomfort.\n - **Combined Effect**: Together, they could enhance digestive function and be beneficial for those experiencing nausea, indigestion, or lack of appetite.\n\n### 8. **Cognitive Fog or Overstimulation (if taken in high doses)**\n - If too much THC or thujone is consumed, it may lead to cognitive fog, paranoia, or overstimulation. Combining high doses of both cannabis and sage could potentially result in anxiety or confusion, especially in those sensitive to THC or thujone.\n \n### 9. **Potential Sedation**\n - **Cannabis (Indica)**: Indica strains of cannabis are known for their sedative effects, which can be beneficial for sleep disorders or insomnia.\n - **Sage**: While sage is generally not sedative, in combination with an indica strain, it could potentially add to the calming, sedative effect.\n - **Combined Effect**: This tincture could promote restful sleep, especially when using cannabis strains known for their sleep-inducing properties.\n\n### 10. **Cognitive Clarity (depending on the strain of cannabis)**\n - **Sage**: Sage is often associated with cognitive enhancement and may help with memory retention and mental clarity.\n - **Cannabis (Sativa)**: Sativa strains of cannabis tend to be more uplifting and cerebral, enhancing creativity and clarity. Combining this with sage could result in an even greater boost in focus and mental sharpness.\n\n### Important Considerations:\n- **Dosage**: Since both cannabis (especially THC) and sage (due to thujone) can have strong psychoactive properties, it\u2019s important to start with small doses, especially if you\u2019re new to either herb. \n- **Balance**: Consider balancing the THC/CBD ratio in cannabis to avoid overwhelming psychoactive effects, and be mindful of how much thujone is present in the sage to avoid adverse effects like hallucinations or convulsions at high doses.\n\nIn conclusion, a cannabis and sage tincture could have a range of effects, from relaxation and pain relief to enhanced cognition or psychoactivity. The specific outcome depends largely on the type of cannabis used, the dose, and the individual\u2019s tolerance."]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "63ceb80b-03d3-47a4-a852-6aad69e8e298", "request_id": "8d14d53bbaa50e85-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent":

The combination of these cannabinoids with the **decarbed sage** would create a more nuanced set of effects, with less focus on psychoactivity. Here's a breakdown of what you might expect:\n\n### 1. **Reduced Psychoactive Effects**\n - **Low THC**: Since much of the THC is stripped away, the tincture would have minimal or no psychoactive effects (e.g., euphoria, altered perception). You wouldn't feel the typical "high" associated with THC.\n - **Sage (Thujone)**: The psychoactive effect would come more from the thujone in the sage. However, without the strong influence of THC, the tincture might have a mild, more focused mental stimulation rather than the full-spectrum effects of cannabis.\n\n### 2. **Enhanced Relaxation without Euphoria**\n - **CBD**: Cannabidiol (CBD) is non-psychoactive and is known for its **relaxing, anti-anxiety, and anti-inflammatory effects**. In the absence of THC, CBD will likely play the dominant role in the tincture's calming properties.\n - **Sage**: Sage can add to the relaxation effect, especially in terms of cognitive calmness and mood balance, but without adding significant sedation unless combined with a lot of cannabis terpenes like myrcene or linalool.\n - **Combined Effect**: The tincture could provide physical relaxation, reduced anxiety, and an overall sense of calm without feeling high.\n\n### 3. **Potential Cognitive Focus and Clarity**\n - **CBD and CBG**: Both CBD and CBG are known to promote **focus, mental clarity, and cognitive function**. This combination could help with focus, without the mental cloudiness that high doses of THC might cause.\n - **Sage (Thujone)**: Thujone, the compound in sage, can act as a stimulant in small doses, improving cognitive function and clarity. \n - **Combined Effect**: The resulting tincture could help you stay alert and mentally sharp, ideal for daytime use or tasks requiring concentration.\n\n### 4. **Anti-inflammatory and Pain Relief Properties**\n - **CBD, CBG, and CBC**: These cannabinoids are known for their strong **anti-inflammatory and analgesic (pain-relieving) properties**. CBG, in particular, has been studied for its potential to reduce inflammation, while CBC may enhance pain relief.\n - **Sage**: Sage also has anti-inflammatory and antioxidant properties due to its compounds like rosmarinic acid and camphor.\n - **Combined Effect**: This tincture would be highly effective for reducing inflammation and managing pain, particularly for conditions like arthritis, muscle soreness, or chronic pain, without the need for psychoactive THC.\n\n### 5. **Improved Mood and Reduced

Anxiety**\n - **CBD**: One of the main benefits of CBD is its ability to reduce **anxiety and stress**. It works by interacting with serotonin receptors in the brain, promoting a sense of well-being.\n - **Sage**: Sage also has mild mood-lifting properties and may help stabilize emotions. When paired with CBD, this could further enhance mood and reduce feelings of tension.\n - **Combined Effect**: This tincture could act as a natural mood stabilizer, helping to reduce anxiety, depression, and overall stress.\n\n### 6. **Digestive Support**\n - **CBD/CBG**: Cannabinoids like CBD and CBG are known for their ability to reduce **nausea and improve gut health**. They can be particularly helpful in calming irritable bowel syndrome (IBS) and other digestive disorders.\n - **Sage**: Sage is traditionally used to support digestion and relieve indigestion, bloating, or stomach discomfort.\n - **Combined Effect**: The tincture could provide **gastrointestinal support**, soothing the digestive system, relieving nausea, and promoting better digestive health.\n\n### 7. **Neuroprotective Properties**\n - **CBD/CBG**: Both cannabinoids have **neuroprotective** properties, meaning they can help protect brain cells from damage and degeneration. This has potential benefits for long-term brain health and reducing the risk of neurodegenerative diseases.\n - **Sage**: Sage has been shown to enhance memory and cognitive function, possibly by inhibiting enzymes that break down acetylcholine, a neurotransmitter important for memory.\n - **Combined Effect**: This tincture may be beneficial for improving memory and cognitive function while offering protective effects for brain health over the long term.\n\n### 8. **Enhanced Antimicrobial and Immune Support**\n - **CBD/CBG/CBC**: These cannabinoids, particularly CBG, have demonstrated **antibacterial and antifungal properties**, which can support the immune system by helping to combat infections.\n - **Sage**: Sage is traditionally known for its antimicrobial properties and has been used in natural remedies for infections.\n - **Combined Effect**: This tincture could offer **immune support** and have antimicrobial benefits, potentially useful for preventing infections or treating minor topical issues.\n\n### 9. **Little to No Sedation**\n - **Without THC**, the tincture will have far less sedative potential. This could make the tincture more appropriate for daytime use when you're looking for relaxation without drowsiness.\n - However, certain terpenes (such as myrcene or linalool) and sage\u2019s calming effect might add a slight sedative element, but overall the tincture would likely be more energizing or neutral in terms of sedation.\n\n### 10. **Potential Synergy through the "Entourage Effect"**\n - **Cannabinoids (CBD, CBG, etc.) and Terpenes**: The combination of multiple cannabinoids and terpenes can create an **entourage effect**, where the compounds work together to enhance each other's effects. This may result in a more well-rounded and effective tincture even without THC.\n - **Sage's Compounds**: The phytochemicals in sage could further enhance this entourage effect, possibly making the tincture more effective for a variety of uses (anti-anxiety, pain relief, mood stabilization) compared to using either plant alone.\n\n### Summary of Effects:\n- **Relaxation and stress relief** without psychoactivity\n- **Cognitive clarity and focus**\n- Strong **anti-inflammatory** and **pain relief** benefits\n- **Mood elevation** and reduced anxiety\n- **Digestive support**\n- **Antimicrobial and immune-boosting** properties\n- Minimal or no sedation (depending on strain and terpene profile)\n\nThis combination could be ideal for someone looking for the therapeutic benefits of both plants without the intoxicating effects of THC. The tincture would work well for managing **chronic pain, stress, anxiety, inflammation**, and **cognitive

enhancement** while keeping a clear head."]}, "status":

{"content_type": "text", "parts": ["If the tincture is typically consumed in beverages
like instant tea or coffee, there are a few additional considerations for how the
effects might be influenced by these drinks:\n\n### 1. **Enhanced Absorption Due to
Heat**\n - **Heat from Tea or Coffee**: Warm beverages can help dilate blood vessels,
potentially leading to quicker absorption of the tincture. This may cause the effects
of the tincture (such as relaxation, mood improvement, or cognitive clarity) to be

felt faster than if it were taken with a cold drink or on its own.\n - **Cannabinoids and Heat**: Most cannabinoids are not significantly degraded by the temperature of a warm drink, so the therapeutic effects should remain intact.\n\n### 2. **Synergistic Effects with Caffeine**\n - **Caffeine in Coffee/Tea**: Caffeine is a natural stimulant that can enhance focus and mental alertness. When combined with a cannabis and sage tincture, particularly one with low THC, the caffeine could amplify the **cognitive clarity, focus, and energy** provided by cannabinoids like CBD and CBG, and by sage's thujone.\n - **Balancing Stimulation**: For some, this combination might create a nice balance of stimulation and relaxation, reducing anxiety that sometimes accompanies caffeine consumption. However, if the tincture is taken in a higher dose or is particularly sedative, it might counteract the energizing effects of the caffeine.\n\n### 3. **Flavor Considerations**\n - **Bitterness of Sage**: Sage has a strong, earthy, and somewhat bitter taste, which may be more pronounced when added to coffee or tea. Depending on your taste preference, you might want to adjust the amount of tincture or add sweeteners (like honey, sugar, or flavored syrups) to balance the bitterness.\n - **Herbal Complement to Tea**: If added to tea, especially herbal blends, sage may complement certain flavors quite well (e.g., chamomile, green tea, or mint).\n\n### 4. **Digestive Support**\n - **Sage and Coffee**: Sage's digestive support properties, combined with the stimulant effects of coffee, might help stimulate digestion. This could be beneficial for those who drink coffee and experience mild digestive discomfort, as sage and cannabinoids (especially CBD) are both known to soothe the digestive tract.\n - **Tea and Sage for Digestion**: If consumed in tea, particularly herbal teas with ingredients like ginger or peppermint, the tincture could help reduce nausea or digestive discomfort, especially when consumed after meals.\n\n### 5. **Slight Alteration of the Sedative Effects**\n - **Caffeine's Effect on Sedation**: If the tincture has any sedative properties (e.g., due to cannabinoids or terpenes like myrcene), the caffeine in coffee or tea may reduce the sedative effects, creating a balance where the user feels calm but not sleepy.\n - **Timing of Consumption**: If you're aiming for a more relaxing or sedative effect, consuming the tincture with a non-caffeinated beverage, like herbal tea, might be a better option, particularly in the evening.\n\n### Conclusion:\n- **Faster onset**: Heat from the beverage may speed up absorption.\n- **Balanced effects**: The caffeine could enhance focus and mental clarity, complementing the relaxing properties of the tincture.\n- **Flavor**: Bitter sage flavors could stand out, so adjusting sweetness in the drink may be helpful.\n- **Digestive support**: The combination of sage, cannabinoids, and warm beverages can help soothe digestion.\n\nThis practice of mixing the tincture into instant tea or coffee could offer a pleasant and quick way to experience the tincture's effects, especially if you're looking for focus and relaxation in balance with your daily caffeine routine."]}, "status": "finished_successfully","end_turn": true

Lemon is naturally complementary to many herbs, and it may balance out any earthy or bitter notes from the decarbed sage.\n - **Cannabis Taste**: If your tincture has a strong cannabis taste, the lemon flavor could also help neutralize that, especially when consumed in instant tea where the flavors are already fairly bold and sweet.\n\n### 2. **No Interaction with Caffeine**\n - Since **instant lemon tea**

often does not contain caffeine, you won't experience the stimulating effects typically associated with coffee or caffeinated teas. This means you'll likely feel the relaxing effects of cannabinoids and sage more fully without the stimulation of caffeine interfering.\n \n### 3. **Calming and Relaxing Experience**\n - The combination of sage, cannabinoids, and lemon tea can result in a more **calming and soothing effect**, especially if you take the tincture as part of a relaxing routine. It could help promote relaxation, relieve stress, and enhance digestion after a meal, particularly in the evening when you're looking to unwind.\n\n### 4. **Faster Absorption**\n - Just like with other warm beverages, the heat from the tea may speed up the absorption of cannabinoids and sage compounds, allowing you to feel the effects faster.\n\nThis combination of tincture and instant lemon tea could be an effective and pleasant way to enjoy the calming, pain-relieving, and mood-enhancing benefits of cannabis and sage, while the lemon flavor balances the herbal bitterness."]}, "status": "finished_successfully","end_turn": true

Since **psilocybin** is a psychedelic compound, even in small amounts, it can have an impact, though it would be much less pronounced than a full psychedelic dose. Here\u2019s what to expect:\n\n### 1. **Enhanced Mood and Sense of Well-being**\n - **Psilocybin in Low Doses**: At trace levels, psilocybin can act

like a microdose, promoting a subtle sense of **well-being, emotional uplift**, and even **increased positivity**. It could enhance the mood-boosting effects of the CBD and sage already present in the tincture, leading to a more profound sense of relaxation and mental clarity.\n - **Combined with Cannabis and Sage**: The relaxing and anti-anxiety effects of cannabinoids (especially CBD) and sage may be enhanced by the psilocybin, creating a smooth, pleasant, and mildly euphoric experience.\n\n### 2. **Mild Cognitive Shifts and Creativity**\n - **Psilocybin Microdose Effects**: In very small doses, psilocybin has been known to promote **creative thinking, enhanced problem-solving**, and **mental flexibility**. You may feel slightly more **open-minded, introspective**, and **curious**, with a heightened sense of focus.\n - **Combined with Cannabis and Sage**: The cognitive focus and clarity provided by cannabinoids like CBD and CBG, along with sage\u2019s mild stimulant effects, could complement the trace psilocybin, enhancing **creativity, introspection, and cognitive clarity**.\n\n### 3. **Heightened Sensory Awareness**\n - **Psilocybin\u2019s Influence on Sensory Perception**: Even at trace levels, psilocybin can slightly alter your perception of colors, sounds, and touch, making them seem richer or more intense. You wouldn\u2019t experience full hallucinations, but there could be a slight **enhancement of sensory experiences**, making your environment feel more vivid or interesting.\n - **Combined with Cannabis and Sage**: The mild psychoactivity from thujone in sage and the sensory-enhancing properties of cannabis terpenes (like limonene or pinene) could amplify these effects, leading to **heightened awareness of your surroundings**.\n\n### 4. **Increased Mindfulness and Emotional Openness**\n - **Psilocybin Microdosing Effects**: Trace amounts of psilocybin can enhance your **emotional sensitivity** and **mindfulness**, making you more attuned to your emotions and surroundings. It may also promote a sense of **interconnectedness**, even at low levels.\n - **Combined with Cannabis and Sage**: Cannabis, especially in lower doses, can also foster a sense of emotional openness and relaxation. Together with psilocybin, you might feel more at ease and emotionally reflective, creating an enhanced **mind-body connection**.\n\n### 5. **Potential for Mild Anxiety or Paranoia**\n - **Psilocybin\u2019s Unpredictable Nature**: Even in trace amounts, psilocybin can cause mild anxiety or emotional sensitivity in some users, especially if they are prone to anxiety. If your tincture contains a strain of cannabis with a bit of THC, this could amplify the likelihood of feeling mildly anxious or paranoid.\n - **Mitigating Factors**: CBD in cannabis is known to counteract THC-induced anxiety, and the relaxing properties of sage may help offset any potential negative effects, keeping the experience more balanced.\n\n### 6. **Spiritual or Philosophical Insights**\n - **Psilocybin\u2019s Psychedelic Nature**: Though at trace levels you won\u2019t experience full-blown psychedelic effects, psilocybin can still promote **introspection, self-reflection**, and **spiritual or philosophical thoughts**. You might find yourself contemplating deeper meanings or life experiences while feeling more connected to nature or your surroundings.\n - **Combined with Cannabis and Sage**: The relaxing, mentally stimulating, and mood-enhancing effects of cannabis and sage could work together with psilocybin to enhance this reflective state, without pushing it into overwhelming territory.\n\n### 7. **Minimal Hallucinogenic Effects**\n - **Trace Psilocybin Levels**: With trace amounts, you are unlikely to experience true hallucinations or visual distortions. However, there might be a **slight shift in perception**, such as seeing colors appear slightly brighter or noticing patterns in a more focused way, but it would be very mild.\n - **Combined with Cannabis**: Depending on the cannabis strain, especially if some THC remains, this effect might be

slightly more noticeable, with a heightened sense of **aesthetic appreciation** or **mild visual enhancement**.\n\n### 8. **Mindful, Gentle Energy**\n - **Psilocybin and Microdosing**: Microdosing psilocybin has been reported to create a gentle **boost in energy, clarity, and focus**, but without the jitteriness of caffeine or stimulants.\n - **Combined with Sage**: Sage has stimulant-like qualities due to thujone, so combined with psilocybin, this could create a **mild, mindful energy** that keeps you alert and engaged without feeling overstimulated.\n\n### Conclusion:\nA tincture containing **cannabis, sage, and trace psilocybin** could result in a very **mellow, mood-enhancing, and slightly mind-expanding experience** without overwhelming psychoactive effects. You might feel more **relaxed, creative, mindful**, and **emotionally open**, with mild sensory enhancement. However, there is a small chance of heightened sensitivity or anxiety if you\u2019re prone to it, though the calming influence of CBD and sage would likely balance that out.\n\nIf you're using this tincture in **instant lemon tea** as you normally would, the lemon flavor would likely balance out any strong herbal or earthy flavors, and the calming warmth of the tea could further support the relaxing and mindful effects of the tincture."]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "0ab31788-1759-41ec-9d81-71f67acfd205", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d14e4744ae60d6c-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "0ab31788-1759-41ec-9d81-71f67acfd205", "children": ["92bfe176-9f34-4ab9-a71a-ee9944280a60"]}, "92bfe176-9f34-4ab9-a71a-ee9944280a60": {"id": "92bfe176-9f34-4ab9-a71a-ee9944280a60", "message": {"id": "92bfe176-9f34-4ab9-a71a-ee9944280a60", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728713249.505956, "update_time": null, "content": {"content_type": "text", "parts": ["Okay and of i put se add ons lile kanna powder pr kratom powder"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"request_id": "8d14e8efaca60d6c-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "1ec4379a-0f22-432d-bbc0-0a886b825c13", "children": ["b35e665a-3b35-4dc0-b6f2-c81d551910c3"]}, "b35e665a-3b35-4dc0-b6f2-c81d551910c3": {"id": "b35e665a-3b35-4dc0-b6f2-c81d551910c3", "message": {"id": "b35e665a-3b35-4dc0-b6f2-c81d551910c3", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728713281.472051, "update_time": null, "content": {"content_type": "text", "parts": ["Adding **kanna powder** or **kratom powder** to your cannabis, sage, and trace psilocybin tincture would further alter the overall effects. Both kanna and kratom are powerful herbal supplements, and combining them with your tincture could result in a complex, multi-faceted experience. Here\u2019s how each would contribute to the overall effects:\n\n### 1. **Kanna (Sceletium tortuosum)**\n\nKanna is a South African herb traditionally used for mood enhancement, stress relief, and even mild euphoria. Its active compounds interact with the brain's serotonin system, which can amplify the effects of other substances that also affect mood and perception.\n\n#### Effects of Adding Kanna:\n- **Enhanced Mood Elevation and Euphoria**: Kanna is known to increase feelings of **well-being, calm, and happiness**. It can provide a **mild euphoria**, which would pair well with the mood-enhancing effects of both psilocybin and cannabinoids like CBD.\n - **Combination with Psilocybin**: Since kanna interacts with serotonin receptors, trace amounts of psilocybin could **synergize** with kanna\u2019s effects, leading to a heightened sense of **emotional openness** and

positivity.\n - **Combination with Cannabis**: Kanna may complement the relaxing effects of CBD, making the experience feel more **mellow** and **emotionally balanced**. It could enhance the **stress-relief** properties of the tincture, making it even more effective at reducing anxiety.\n\n- **Anti-Anxiety and Relaxation**: Kanna is often used to relieve **anxiety and stress**, which would pair nicely with the **relaxing properties of CBD and sage**. It might further balance out any mild anxiety that could arise from the psilocybin or remaining THC.\n \n- **Increased Sociability and Empathy**: Kanna is sometimes used as a social enhancer, as it can increase **sociability, empathy**, and **emotional connection**. Combined with the emotional openness from trace psilocybin and the calming effects of CBD, you might feel more connected to others, making this a good option for social settings or deep conversations.\n \n- **Mild Energy and Focus**: Kanna can also provide **mild stimulation**, which, in combination with sage\u2019s thujone and the potential cognitive clarity from low-dose psilocybin, could lead to a **focused, creative, and energetic** state without the jitteriness of caffeine.\n\n### 2. **Kratom (Mitragyna speciosa)**\n\nKratom is a Southeast Asian plant with varying effects depending on the dose and strain. Lower doses of kratom are stimulating, while higher doses are sedative and analgesic. The two main active compounds in kratom are **mitragynine** and **7-hydroxymitragynine**, which interact with opioid receptors in the brain, providing pain relief, relaxation, and mood enhancement.\n\n#### Effects of Adding Kratom:\n- **Pain Relief**: If you're using kratom (especially in larger doses), its **analgesic properties** could significantly enhance the tincture\u2019s **pain-relieving effects**. Combined with CBD, CBG, and sage, this would result in a **powerful blend** for managing chronic pain or discomfort.\n \n- **Euphoria and Mood Enhancement**: Kratom, particularly in low to moderate doses, can induce feelings of **euphoria, well-being**, and **mood elevation**. This would **complement the uplifting effects** of cannabis (especially CBD) and kanna. \n - **Combination with Psilocybin and Kanna**: Trace amounts of psilocybin and kanna could enhance kratom\u2019s mood-lifting properties, leading to a more pronounced sense of **emotional well-being** and mild euphoria without the risk of overpowering psychoactivity.\n\n- **Relaxation or Stimulation (Depending on the Dose)**: \n - **Low Dose Kratom (1-3g)**: Low doses of kratom can provide a **stimulating effect**, making you feel more **energized and focused**. This would enhance the stimulating effects of kanna and sage, helping you stay alert and clear-headed, which could pair well with microdosed psilocybin.\n - **High Dose Kratom (5-7g)**: Higher doses would result in a **sedative effect**, promoting relaxation, stress relief, and even drowsiness. Combined with CBD and sage, this would create a **deeply calming and potentially sleep-inducing tincture**, which might be useful for nighttime use.\n\n- **Potential for Calming Anxiety**: Kratom can have a **calming, anti-anxiety** effect, particularly at moderate doses. Combined with CBD and kanna, it could make the overall tincture a very effective **anxiolytic** (anxiety-relieving) blend, helping to manage stress and anxiety without feeling overwhelmed.\n\n- **Risk of Overstimulation (at Low Doses)**: At low doses, kratom\u2019s stimulating properties, combined with kanna\u2019s mild stimulation and sage\u2019s thujone, might lead to **overstimulation** or **jitters** in some users, especially if you are sensitive to stimulants.\n\n### Combined Effects with Cannabis, Sage, and Trace Psilocybin:\n- **Euphoric Mood Boost**: The combination of kanna, kratom (at a low dose), cannabis, and trace psilocybin could result in a **profound mood lift**, emotional well-being, and **mild euphoria** without intense psychoactive effects.\n \n- **Relaxation and

Anti-Anxiety**: With CBD, sage, and kanna\u2019s anti-anxiety properties, the tincture would be very effective at reducing **stress and promoting relaxation**. If using kratom at higher doses, the relaxation could be more pronounced, potentially making the tincture sedative.\n \n- **Enhanced Cognitive Focus and Creativity**: The **focus-enhancing properties of kanna and low-dose kratom**, combined with the mild cognitive clarity from trace psilocybin and cannabinoids like CBD and CBG, could result in a **clear-headed, focused, and creative** state, ideal for work, creative tasks, or social interactions.\n \n- **Pain Relief**: Kratom\u2019s potent **analgesic effects** would work alongside CBD\u2019s anti-inflammatory properties, making the tincture particularly useful for **pain management**, especially for conditions involving chronic pain or inflammation.\n \n- **Mind-Body Synergy**: The combination of these herbs would likely result in a balanced **mind-body connection**, promoting both physical relaxation and mental clarity, with a subtle enhancement of sensory perception due to the trace psilocybin.\n\n### Important Considerations:\n- **Dosage Caution**: Be mindful of the **dosage**, particularly with kratom, as higher doses could lead to sedation or discomfort. Also, using kanna and kratom together might amplify their effects, so start with lower amounts to assess how your body responds.\n- **Potential for Overstimulation**: At lower doses, kratom, kanna, and sage might create **too much stimulation** for some users, leading to feelings of restlessness or anxiety. This would depend on individual tolerance.\n- **Additive Effects on Mood**: Both kanna and kratom affect **serotonin and opioid receptors**, so combining them with psilocybin and cannabinoids could lead to **enhanced emotional sensitivity** and **positive mood**. This combination should be approached with care, especially if you're prone to mood swings or emotional intensity.\n\n### Conclusion:\nAdding **kanna powder** or **kratom powder** to your tincture would greatly enhance its effects, depending on the doses used. The combination could lead to a **deeply relaxing, mood-enhancing, and potentially pain-relieving** experience with subtle cognitive or sensory enhancement due to the trace psilocybin. However, the balance between stimulation and relaxation would depend on the dosage of kratom and kanna, so it's best to start with small amounts to gauge your personal response."]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "92bfe176-9f34-4ab9-a71a-ee9944280a60", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d14e8efaca60d6c-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "92bfe176-9f34-4ab9-a71a-ee9944280a60", "children": ["b123b1e2-44bd-4b15-bd21-b25eed03c9b3"]}, "b123b1e2-44bd-4b15-bd21-b25eed03c9b3": {"id": "b123b1e2-44bd-4b15-bd21-b25eed03c9b3", "message": {"id": "b123b1e2-44bd-4b15-bd21-b25eed03c9b3", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728713753.67542, "update_time": null, "content": {"content_type": "text", "parts": ["Okay lets roll back and simplify the possible tincture. Lets say 100 grams sage timctire isong green dragon method amd then and 100 grams Rosa canina bio in polvere put in before or qfter the 77 c water bath\n"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"request_id": "8d14f53ef93d4c3e-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "b35e665a-3b35-4dc0-b6f2-c81d551910c3", "children": ["6a0a5538-c03d-4442-9b20-0a82642ee158"]}, "6a0a5538-c03d-4442-9b20-0a82642ee158": {"id": "6a0a5538-c03d-4442-9b20-0a82642ee158", "message": {"id": "6a0a5538-c03d-4442-9b20-0a82642ee158",

"author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728713767.673697, "update_time": null, "content": {"content_type": "text", "parts": ["If you are making a tincture with **100 grams of sage** using the **Green Dragon method**, and you're considering adding **100 grams of Rosa canina (rosehip) powder**, here\u2019s a simplified breakdown of how to approach this and the potential effects.\n\n### When to Add Rosa Canina Powder:\n- **Before or After the 77\u00b0C Water Bath?**\n - **Before the Water Bath**: If you add the **Rosa canina powder before the 77\u00b0C water bath**, the heat could potentially degrade some of the **vitamin C** and other heat-sensitive compounds in the rosehip powder. Rosehip is rich in vitamin C, which can be sensitive to heat, so this would result in some loss of its potent antioxidant properties.\n - **After the Water Bath**: Adding the **Rosa canina powder after** the water bath would preserve more of the **heat-sensitive compounds** like vitamin C, making the tincture more potent in terms of **antioxidant and immune-boosting** effects.\n\n### Suggested Approach:\n- To **maximize the benefits** of both herbs, it\u2019s advisable to:\n - **Decarb the sage** using the Green Dragon method (including the 77\u00b0C water bath).\n - **Add the Rosa canina powder** after the water bath, once the tincture has cooled down, to avoid degrading any important compounds in the rosehip powder.\n\n### Potential Effects of This Simplified Tincture:\n\n1. **Antioxidant Boost**:\n   - **Rosa canina (Rosehip)** is incredibly rich in **vitamin C**, flavonoids, and carotenoids, making it a powerful **antioxidant**. It can help protect cells from oxidative stress and support immune function. Adding this powder to the tincture will create a strong **antioxidant-rich blend** that could help with overall health and skin vitality.\n\n2. **Anti-inflammatory and Immune Support**:\n   - **Sage** has anti-inflammatory properties, and combined with **Rosa canina**, which also fights inflammation and boosts immune health, the tincture could be useful for reducing inflammation, especially in cases of joint pain or skin conditions. The combination would enhance immune support and could potentially help with managing colds or minor illnesses.\n\n3. **Digestive Health**:\n   - Both **sage** and **rosehip** are known to aid in **digestive health**. Sage can soothe digestive discomfort, while rosehip powder has mild laxative properties, making this combination potentially helpful for improving digestion, preventing constipation, and supporting gut health.\n\n4. **Skin Health and Anti-Aging**:\n   - **Rosehip** is well-known for its benefits to **skin health**, especially in preventing signs of aging due to its high vitamin C and antioxidant content. This tincture could help promote **collagen production** and support **skin repair**, making it useful for those looking to improve skin vitality or reduce wrinkles.\n\n5. **Cognitive and Mood Benefits**:\n   - **Sage** has been used traditionally to support **cognitive function** and memory, which would remain a key benefit of the tincture. This could be especially useful for improving focus and mental clarity. Additionally, sage has mild mood-stabilizing properties, which might be complemented by the rosehip\u2019s ability to support overall vitality and energy.\n\n### Conclusion:\n- **Add the Rosa canina powder after** the water bath to preserve its heat-sensitive compounds.\n- This tincture would offer a combination of **antioxidant, anti-inflammatory, immune-boosting, and skin health benefits**.\n- The sage will still contribute to **cognitive enhancement** and **digestive support**, making this a well-rounded tincture for both body and mind."]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "b123b1e2-44bd-4b15-bd21-b25eed03c9b3", "finish_details": {"type": "stop",

Kanna extracts can vary widely in strength, ranging from a 10:1 extract (meaning 10 grams of the plant are concentrated into 1 gram of extract) to much stronger ratios.\n\nHere are some general points to consider:\n\n### If Using a Standard Extract (e.g., 10:1 or 20:1):\n- **1 gram of standard extract (10:1 or 20:1)**: This would typically contain the equivalent of **10-20 grams of raw kanna plant material**. At this concentration, 1 gram could produce **noticeable effects**, especially in terms of mood elevation, relaxation, and mild euphoria. It should be enough to feel some of kanna's **anti-anxiety, mood-boosting, and calming properties**.\n\n### Possible Effects of 1 Gram:\n- **Mood Enhancement**: Even at this dose, you could experience a slight **improvement in mood**, mild feelings of well-being, or relief from mild anxiety.\n- **Relaxation**: Kanna's **anxiolytic** (anti-anxiety) properties might help reduce stress and promote relaxation, but it would be subtle.\n- **Increased Sociability**: You may feel a little more open to **social interactions**, as kanna can promote emotional openness and sociability.\n- **Cognitive Effects**: There could be a **mild boost in focus or mental clarity**, though not as strong as with higher doses.\n\n### If Using a Low-Strength Extract:\n- **Weak Extract (less than 10:1)**: If the extract is weak or less concentrated, 1 gram may indeed be **too minimal** to produce any significant or noticeable effects. You might feel **very subtle mood improvements** or relaxation, but it may not be enough to have a meaningful impact.\n\n### Conclusion:\nIf you're using a typical kanna extract (e.g., 10:1 or stronger), **1 gram should have a noticeable effect**, particularly in terms of mood and relaxation, though it won't be overpowering. However, if the extract is less concentrated, **1 gram might not be enough** to produce significant effects. If you're aiming for noticeable mood enhancement or stress relief, a dose in the 500 mg to 1 gram range of **10:1 extract** is generally a good starting point."]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "19f1462e-ce6d-47ac-a31e-70814d438d7f", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d150ba72d8b5246-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "19f1462e-

This is a fairly potent dose and would likely produce noticeable effects, especially for someone who is sensitive to kanna.\n\n### Expected Effects of 1 Gram of 20:1 Kanna Extract:\n- **Mood Elevation**: You will likely experience a **significant uplift in mood** and a general sense of well-being. This is one of kanna\u2019s main effects, and at this potency, it can provide a pleasant feeling of mild euphoria.\n \n- **Anxiolytic (Anti-Anxiety) Effects**: Kanna is well-known for its ability to **reduce anxiety and stress**, and at this potency, 1 gram should provide **strong calming effects** without being overwhelming.\n\n- **Enhanced Sociability and Empathy**: Kanna in this dose often leads to increased **sociability and emotional openness**, making it easier to engage in social interactions and feel more connected to others.\n\n- **Mental Clarity and Focus**: You may experience **improved focus and cognitive clarity**, which could enhance creative thinking or problem-solving.\n\n- **Physical Relaxation**: At this dose, kanna may also have mild **muscle-relaxing** properties, helping to relieve physical tension.\n\n### Conclusion:\nGiven that it's a **20:1 extract**, **1 gram is a fairly potent dose** and should result in noticeable mood-enhancing, anti-anxiety, and relaxation effects. It\u2019s not too high to be overwhelming for most people, but it will likely be **strong enough to matter**, making it effective for improving mood, reducing stress, and promoting relaxation."]}, "status": "finished_successfully","end_turn": true

4c92-92e4-b411d1306b9d"]}, "2ec1c79c-8b09-4c92-92e4-b411d1306b9d": {"id": "2ec1c79c-8b09-4c92-92e4-b411d1306b9d", "message": {"id": "2ec1c79c-8b09-4c92-92e4-b411d1306b9d", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728714833.610606, "update_time": null, "content": {"content_type": "text", "parts": ["If you're adding **1 gram of 20:1 kanna extract** into the **100 grams of sage tincture** we discussed earlier, here\u2019s how that would impact the overall tincture:\n\n### 1. **Kanna\u2019s Effects in the Tincture (with 1% Content)**\n- **Potency in the Mixture**: Since the 1 gram of kanna extract would be only 1% of the total tincture (100 grams of sage tincture + 1 gram kanna extract), its effects would be diluted across the entire mixture. However, because it's a **20:1 extract**, even a small amount like this could still contribute noticeable effects, especially in combination with the other herbs.\n- **Mood Enhancement**: While 1 gram of 20:1 kanna is enough to provide mood-enhancing and calming effects on its own, when dispersed in 100 grams of tincture, the kanna\u2019s effects will be **milder**, but still present. You may experience a **slight mood uplift**, which would combine well with the cognitive benefits of sage.\n- **Anti-Anxiety**: The **anti-anxiety effects** of kanna will add to sage's own calming properties, making the tincture a bit more effective at **reducing stress and anxiety**. It won\u2019t be overwhelmingly strong, but it would contribute to the tincture\u2019s calming profile.\n- **Sociability**: The added kanna could provide a gentle boost to **sociability** and **empathy**, making the tincture useful for those wanting to relax in social settings or enhance communication.\n\n### 2. **Overall Effect in Combination with Sage**\n- **Calm and Focus**: Sage is known for its **focus-enhancing and memory-boosting** properties. Combined with kanna\u2019s **mild anti-anxiety effects**, the tincture could help with promoting a calm, **clear-headed state** that is good for focus and relaxation at the same time.\n- **Physical Relaxation**: The sage and kanna combination would help with **physical relaxation**, although not strongly sedative, it could reduce muscle tension and promote a gentle sense of ease.\n- **Balanced Relaxation**: Since sage is mildly stimulating (due to thujone) and kanna is relaxing, this could create a **balanced** effect, where you feel relaxed but still **mentally alert and focused**.\n\n### 3. **Potentially Subtle Effects**\n- Since 1 gram of 20:1 kanna is dispersed in 100 grams of tincture, the effects of kanna will likely be **subtle** when taking small doses of the tincture. You might feel a mild **mood boost**, gentle relaxation, and reduced anxiety. The effect will not be as pronounced as taking the 1 gram of kanna extract on its own but would still add value to the tincture overall.\n\n### Conclusion:\nThe **1 gram of 20:1 kanna extract** in your **100-gram sage tincture** would add **mild mood-enhancing, anti-anxiety, and relaxing effects**. While it would not dominate the tincture, it would enhance the overall calming and focusing properties of the sage tincture. The effects of kanna will likely be **subtle but noticeable**, especially when consumed in larger servings of the tincture."]}, "status": "finished_successfully","end_turn": true

Here\u2019s how these two herbs might interact in a tincture and what kind of effects you can expect:\n\n### Key Active Compounds in Basil and Sage:\n- **Basil (Ocimum basilicum)**: Contains compounds like **eugenol**, **linalool**, and **beta-caryophyllene**, which contribute to its anti-inflammatory, mood-enhancing, and digestive benefits. Basil is also mildly stimulating due to its essential oils, offering both physical and mental benefits.\n- **Sage (Salvia officinalis)**: Rich in **thujone**, **rosmarinic acid**, and other terpenes, sage is known for its cognitive-enhancing, anti-inflammatory, and digestive-supportive properties. It is mildly stimulating but also promotes calmness and focus.\n\n### Potential Effects of a Basil and Sage Green Dragon Tincture:\n\n#### 1. **Cognitive Enhancement and Focus**\n - **Sage** is well-known for its cognitive benefits, improving **memory and focus**. It\u2019s been traditionally used to sharpen the mind and promote mental clarity.\n - **Basil**, especially due to **linalool** and **eugenol**, also promotes a sense of **mental clarity** and stress reduction.\n - **Combined Effect**: The two herbs together could provide a tincture that supports **focus, mental alertness, and clear thinking** without overstimulation. This could be useful for tasks requiring concentration or creativity.\n\n#### 2. **Mood Enhancement and Stress Relief**\n - **Basil** has mild **mood-enhancing** properties due to its essential oils. Compounds like **eugenol** and **beta-caryophyllene** are known for their **calming and stress-relieving** effects.\n - **Sage** contributes to **stress relief** while also enhancing cognitive function. It has mild **anxiolytic** effects, helping to reduce anxiety.\n - **Combined Effect**: This tincture would provide a balanced **mood-lifting** experience, gently relieving stress while keeping the mind clear and focused.\n\n#### 3. **Anti-Inflammatory and Antioxidant Properties**\n - Both **basil** and **sage** contain strong anti-inflammatory and antioxidant compounds.\n - **Basil\u2019s eugenol** is a powerful anti-inflammatory, while **rosmarinic acid** in sage helps reduce inflammation and oxidative stress.\n - **Combined Effect**: The tincture would be highly beneficial for **reducing inflammation** and promoting overall well-being. This could be useful for managing conditions related to inflammation, such as joint pain or digestive inflammation.\n\n#### 4. **Digestive Support**\n - **Basil** is known for its **digestive benefits**, helping with indigestion, gas, and soothing the stomach.\n - **Sage** also supports **digestive health**, helping to reduce bloating and improving digestion.\n - **Combined Effect**: A basil and sage tincture would be ideal for **digestive issues**, promoting better digestion and reducing discomfort after meals. This could be particularly useful for those prone to indigestion or mild gastrointestinal issues.\n\n#### 5.

Mild Physical Relaxation\n - **Basil** has some mild **muscle-relaxing properties** due to its essential oils, while sage can promote a sense of **physical ease**.\n - **Combined Effect**: While this tincture would not be strongly sedative, it would provide a gentle sense of **physical relaxation**, helping to reduce tension in the body without making you feel sleepy.\n\n#### 6. **Mildly Stimulating**\n - Both **basil** and **sage** contain compounds that are mildly **stimulating** to the mind and body. Thujone in sage can promote alertness, and basil\u2019s essential oils may also have a stimulating effect, helping to increase energy and focus.\n - **Combined Effect**: This tincture would likely leave you feeling **energized but calm**, with a balance between mental clarity and physical relaxation. It would be ideal for daytime use when you need focus but also want to stay relaxed.\n\n### How to Use the Tincture:\n- **Dosage**: You could start with small doses (5-10 drops) and gradually increase as needed to feel the effects. The tincture would be suitable for regular use, especially to manage stress, improve digestion, and enhance focus.\n- **In Beverages**: As with your usual practice of adding tinctures to beverages like instant tea, this basil-sage tincture could blend well with lemon tea, complementing the citrusy flavors while masking any herbal bitterness.\n\n### Conclusion:\nA **basil and sage Green Dragon tincture** would likely provide a **balanced, mildly stimulating, and relaxing effect**. It would promote **mental clarity, mood enhancement, digestive support, and anti-inflammatory benefits**, making it a versatile and beneficial herbal tincture for daily use. The combination of local herbs, such as basil and sage, would be an excellent natural solution for reducing stress, boosting cognition, and supporting overall wellness."]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "edf74e0a-288c-4a79-a7d6-26057846f2ed", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d15124bec195246-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "edf74e0a-288c-4a79-a7d6-26057846f2ed", "children": ["dcf7d114-787c-44b3-b15d-10edb3a2f752"]}, "dcf7d114-787c-44b3-b15d-10edb3a2f752": {"id": "dcf7d114-787c-44b3-b15d-10edb3a2f752", "message": {"id": "dcf7d114-787c-44b3-b15d-10edb3a2f752", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728715113.42756, "update_time": null, "content": {"content_type": "text", "parts": ["Okay and adding rosemary? "]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"request_id": "8d1516714c755246-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "78f55361-ef97-4989-8673-f0bcb4d65535", "children": ["ae7d1a14-6a56-422b-a833-cb1ee7489b6e"]}, "ae7d1a14-6a56-422b-a833-cb1ee7489b6e": {"id": "ae7d1a14-6a56-422b-a833-cb1ee7489b6e", "message": {"id": "ae7d1a14-6a56-422b-a833-cb1ee7489b6e", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728715146.027383, "update_time": null, "content": {"content_type": "text", "parts": ["Adding **rosemary** to the basil and sage Green Dragon tincture would introduce additional beneficial effects, particularly for **cognitive enhancement, circulation, and anti-inflammatory properties**. Rosemary, like sage, has a long history of use for improving memory and focus, while also offering antioxidant and anti-inflammatory benefits.\n\nHere\u2019s how the combination of **basil, sage, and rosemary** would affect the tincture:\n\n### Key Active Compounds in Rosemary:\n- **Rosmarinic acid**: A powerful antioxidant and anti-inflammatory compound, also found in sage.\n- **Carnosic acid and carnosol**: These compounds are known for their neuroprotective

properties and their ability to improve cognitive function.\n- **Camphor**: Provides stimulating effects, improving circulation and respiratory function.\n- **1,8-cineole**: Known for improving memory and focus.\n\n### Potential Effects of Adding Rosemary to the Tincture:\n\n#### 1. **Enhanced Cognitive Function and Memory**\n - **Rosemary** is traditionally used to improve **memory, focus, and cognitive clarity**. The compounds **1,8-cineole** and **carnosic acid** have been shown to improve memory retention and mental alertness.\n - **Sage** also enhances cognitive function and improves memory, especially for tasks requiring sustained attention and focus.\n - **Combined Effect**: The addition of rosemary would further enhance the tincture\u2019s ability to **improve cognitive function**, making this an excellent **brain-boosting** tincture. It would be especially useful for mental clarity, focus, and possibly even long-term cognitive health.\n\n#### 2. **Increased Circulation and Physical Energy**\n - **Rosemary** is mildly stimulating due to its **camphor content**, which can improve **circulation** and increase **physical energy**. This would add a slightly energizing effect to the tincture, helping to promote alertness and physical vitality.\n - **Sage and basil** also have mild stimulating effects, so adding rosemary would enhance the tincture\u2019s ability to keep you feeling **alert and energized** without jitteriness.\n - **Combined Effect**: The tincture could become more **energizing**, promoting **better circulation** and improving energy levels, making it useful for daytime use or when you need a boost in focus and physical vitality.\n\n#### 3. **Stronger Anti-Inflammatory and Antioxidant Properties**\n - **Rosemary** contains **rosmarinic acid** (also present in sage), which is a potent anti-inflammatory and antioxidant. This could enhance the tincture\u2019s ability to **reduce inflammation** and protect the body from oxidative stress.\n - **Basil** also contains **antioxidants**, particularly **eugenol**, which helps fight inflammation and free radicals.\n - **Combined Effect**: Adding rosemary would boost the tincture\u2019s **anti-inflammatory properties**, making it more effective at reducing pain, inflammation, and oxidative stress. This could be especially useful for people dealing with chronic inflammation or looking for support in managing inflammatory conditions like arthritis.\n\n#### 4. **Improved Respiratory Health**\n - **Rosemary** has a long history of use for **respiratory support**, especially for clearing congestion and improving breathing due to its **camphor** and **cineole** content.\n - **Sage** also has respiratory benefits, often used to soothe sore throats and reduce mucus production.\n - **Combined Effect**: The tincture could help promote **respiratory health**, especially for people dealing with mild congestion, coughs, or other respiratory issues. The stimulating nature of rosemary and sage could help clear airways and promote easier breathing.\n\n#### 5. **Mood Enhancement and Stress Reduction**\n - **Basil and sage** already offer mood-enhancing and stress-relieving effects. Adding rosemary, which also contains compounds that relieve stress and boost mood, would further enhance the tincture\u2019s ability to **reduce anxiety** and improve **emotional well-being**.\n - **Combined Effect**: The tincture would provide a gentle **mood lift**, helping to alleviate **stress, anxiety**, and improve your overall sense of well-being. It could be especially useful for people who want to maintain a calm, focused, and positive mindset throughout the day.\n\n### Overall Combined Effects:\n- **Cognitive Enhancement**: This tincture would now have strong **memory-boosting** and **focus-enhancing** properties, making it ideal for tasks requiring mental clarity and concentration.\n- **Mood and Stress**: With the addition of rosemary, the tincture would have even stronger **mood-lifting** and **stress-relieving** effects, helping you stay calm, clear-headed, and

positive.\n- **Physical Energy and Circulation**: Rosemary\u2019s stimulating properties would increase **circulation** and **energy**, making the tincture a good option for increasing alertness and physical vitality.\n- **Anti-Inflammatory and Respiratory Health**: The tincture would offer **anti-inflammatory, antioxidant, and respiratory benefits**, supporting overall health and protecting against oxidative stress.\n\n### Conclusion:\nAdding **rosemary** to your **basil and sage Green Dragon tincture** would result in a more potent blend that enhances **cognitive function, memory, mood, circulation, and anti-inflammatory properties**. The tincture would become more **energizing and mentally stimulating**, while also promoting relaxation and respiratory health. This combination would be especially useful for people looking for a **balanced, all-purpose herbal tincture** that supports both mental and physical well-being."]}, "status": "finished_successfully","end_turn": true

CBD is known for its **anxiolytic** and **antidepressant** properties, while THC in lower doses can provide **mood elevation** and help relieve anxiety. However, higher doses of THC can sometimes exacerbate anxiety or induce paranoia, so maintaining a balance is important.\n - **Tincture vs. Baked Goods**: Since the patient is managing her mental health with **oral cannabis**, tinctures tend to be more **easily dosed** and have a quicker onset than edibles like baked goods. This provides more control over the effects, which is beneficial when managing conditions like anxiety or depression.\n\n### 2. **Consistency in Management**\n - **On-Again, Off-Again Therapy**: While therapy can be effective in combination with cannabis, the **inconsistency in therapy** may leave some gaps in emotional support or coping mechanisms. If cannabis alone is managing anxiety and depression in the absence of regular therapy, the patient might benefit from finding a stable routine or adjunctive practices like **journaling**, **mindfulness**, or **support groups** to help regulate emotions in between therapy sessions.\n \n - **Meditation**: Meditation is an excellent tool for **managing anxiety and stress**, and when combined with cannabis, it can deepen the **relaxation and mindfulness experience**. The patient may find that meditation helps them stay grounded and better manage their mental health during periods when they are not in therapy.\n\n### 3. **Physical and Metabolic Considerations**\n - **Overweight but Normal Vascular Health**: Being overweight can affect the **metabolism** of cannabinoids, as THC and other cannabinoids are stored in fat cells, potentially prolonging their effects. This means the patient might experience **longer-lasting effects** from cannabis edibles or tinctures than someone with a lower body fat percentage.\n - **Vascular Health**: Since the patient\u2019s **vascular health is normal**, there is no immediate cardiovascular concern with cannabis use, though it's still important to monitor overall health, as cannabinoids can affect **blood pressure and heart rate**.\n\n### 4. **Potential Impact of Early Cannabis Exposure**\n - **Ingesting a Joint at a Young Age**: If the patient consumed a small joint when she was around **12-24 months old**, this early exposure to cannabis is not likely to have had long-term health consequences, especially if it was an isolated event. However, early exposure to cannabis at such a young age is not fully understood, and any possible long-term effects (if any) would likely be subtle and non-detrimental, especially given the patient\u2019s otherwise normal vascular health.\n\n### 5. **Recommendations for Future Management**\n -

Maintaining Balance in Cannabis Dosing: Given the patient\u2019s history of anxiety and depression, it\u2019s important to maintain **low to moderate doses of THC** in her cannabis regimen, as higher doses may aggravate anxiety. Strains or tinctures higher in **CBD** with a balanced amount of **THC** might be ideal for her mental health.\n - **Consistent Therapy**: While the patient may manage well with **on-again, off-again therapy**, more consistent therapeutic support might provide additional benefits for long-term emotional resilience, especially during stressful periods. Even **online therapy** or **counseling apps** can provide some continuity in care.\n - **Mind-Body Practices**: Continuing **meditation** is a great way to support mental health. The patient might also explore **yoga** or other forms of **gentle exercise**, which have been shown to improve **mood, energy levels**, and overall **well-being**.\n\n### Conclusion:\nThe patient\u2019s current approach, combining oral cannabis consumption, meditation, and intermittent therapy, appears to be working well for managing her **depression and anxiety**. To further optimize her mental health routine, focusing on **consistent dosing** with **CBD-rich strains**, potentially **increasing therapy consistency**, and continuing mind-body practices like meditation and gentle physical activity could be beneficial. Given her normal vascular health, the cannabis use should continue to be safe within reasonable dosages."]}, "status": "finished_successfully","end_turn": true

This is helpful for managing her depression and anxiety, particularly when using **THC-dominant products** like **distillates** and **RSO oils**.\n\n### Tailoring Management Based on THC Response:\n1. **High THC for Mood and Relaxation**:\n - Since **high THC** products (like **RSO oils** and **distillates**) promote **euphoria** and help taper into **relaxation and sleep**, they are an effective option for her mental health management, particularly during periods of elevated stress or when deeper relaxation is needed.\n - This pattern of response indicates that **THC\u2019s mood-enhancing properties** are beneficial for managing both **depressive symptoms** and promoting **restful sleep**, which can help regulate mood on a daily basis.\n\n2. **Optimal Timing**:\n - Using high THC products in the **evening** could be particularly useful, as they not only provide a **euphoric boost** but also help **transition into deep relaxation and restful sleep**. This makes THC-heavy products a good choice for **winding down** at the end of the day.\n - For daytime use, lower THC doses or products with a balance of **CBD and THC** might allow her to enjoy **mood elevation** without feeling overly sedated, keeping her alert but calm.\n\n3. **Sleep and Anxiety Management**:\n - The fact that **THC leads to deep relaxation and improved sleep** suggests that it\u2019s also **effective for reducing anxiety**. Deep relaxation after the euphoric high can provide long-lasting **calmness**, which may help her manage anxiety overnight and wake up refreshed.\n\n### Conclusion:\nSince **high THC** products work effectively for her by producing **euphoria, relaxation**, and **sleep support**, continuing with these types of products can be an ideal way to manage both **mood** and **sleep patterns**. She might continue using high-THC oils and distillates in the **evenings** to maximize these benefits, with **CBD-THC balanced** products during the day for **calm focus** without the sedative effects."]}, "status": "finished_successfully","end_turn": true

"metadata": {}}, "create_time": 1728715991.740624, "update_time": null, "content": {"content_type": "text", "parts": ["If the patient is looking to **replace THC or cannabinoid-based products** with an herbal tincture like **sage**, the goal would be to replicate some of the benefits she receives from THC, such as **euphoria**, **relaxation**, and **sleep support**, while managing **mood** and **anxiety**. Although no single herb fully mimics the effects of THC, a carefully crafted herbal tincture could provide similar **calming, mood-enhancing, and sleep-promoting** effects.\n\nHere are some potential herbal tincture components that could replace or supplement **cannabinoid-based products**:\n\n### 1. **Sage (Salvia officinalis)**\n - **Cognitive and Mood Support**: Sage is known for its ability to enhance **cognitive function** and improve **mood**. It also has mild anxiolytic (anxiety-reducing) properties, which can promote mental clarity while keeping the mind calm.\n - **Mild Relaxation**: Sage can promote **relaxation without sedation**, making it a good base for a tincture focused on **daytime mood support** and **stress reduction**.\n\n### 2. **Kanna (Sceletium tortuosum)**\n - **Mood Enhancement and Relaxation**: Kanna is a powerful herb for managing **mood** and **anxiety**, promoting **euphoria** and **stress relief**. It could provide a similar **mood-boosting effect** to THC, especially in higher doses, without the psychoactive effects.\n - **Stress Relief**: Kanna interacts with the serotonin system, making it an excellent herb for managing **depression and anxiety** while helping the user feel emotionally balanced and calm.\n\n### 3. **Rosemary (Rosmarinus officinalis)**\n - **Mental Clarity and Relaxation**: Rosemary is often used to enhance **cognitive function**, and it promotes **relaxation and mental clarity** without sedation, similar to sage.\n - **Energizing Calm**: Rosemary can provide an **uplifting, yet calming effect**, making it helpful for replacing daytime THC products aimed at **focus and mood improvement**.\n\n### 4. **Lemon Balm (Melissa officinalis)**\n - **Calming and Anti-Anxiety**: Lemon balm is well known for its **calming properties** and is often used to relieve **anxiety** and **promote relaxation**. It has a mild **mood-lifting** effect and could be useful in combination with other herbs for easing into **sleep**.\n - **Sleep Support**: In higher doses, lemon balm promotes **deeper sleep** without the heavy sedation of THC, making it a great replacement for **evening use**.\n\n### 5. **Passionflower (Passiflora incarnata)**\n - **Anxiety Reduction and Relaxation**: Passionflower is effective for reducing **anxiety** and promoting **deep relaxation**, making it a suitable replacement for THC when relaxation or sleep support is needed.\n - **Sleep Aid**: Passionflower works similarly to THC for promoting **calmness and deep sleep**, helping to replace the sleep-enhancing effects of THC-based products.\n\n### 6. **Ashwagandha (Withania somnifera)**\n - **Stress Relief and Calm Energy**: Ashwagandha is a powerful adaptogen that helps the body cope with **stress**. It can promote **calm energy** and reduce feelings of anxiety without sedation.\n - **Mood Enhancement**: Ashwagandha can help improve **mood and emotional resilience**, making it a good long-term replacement for the mood-stabilizing effects of THC.\n\n### 7. **Valerian Root (Valeriana officinalis)**\n - **Sedative and Sleep Aid**: Valerian root is a more direct replacement for THC\u2019s **sleep-inducing properties**. It\u2019s highly effective for promoting **deep, restful sleep**, but it can be sedating, so it should be reserved for **evening use**.\n - **Anxiety Reduction**: Valerian can also help reduce **anxiety** during times of heightened stress, though its sedative properties make it less useful for daytime.\n\n### Proposed Herbal Tincture Combinations:\n\n#### **Daytime Tincture (Calming and Mood-Lifting)**\n- **Sage**: For cognitive clarity and stress relief.\n-

Kanna: For mood enhancement and euphoria.\n- **Rosemary**: For mental clarity and relaxation.\n\nThis combination would offer **calm focus, improved mood**, and **mild relaxation**, making it a good substitute for daytime THC use.\n\n#### **Evening Tincture (Relaxation and Sleep Support)**\n- **Lemon Balm**: For calmness and sleep support.\n- **Passionflower**: For anxiety relief and deeper relaxation.\n- **Valerian Root**: To promote restful sleep.\n\nThis blend would provide **deep relaxation and sleep support**, helping to replace the sedative effects of THC without overwhelming drowsiness.\n\n### Conclusion:\nBy combining herbs like **sage, kanna, rosemary, lemon balm**, and others, the patient can create a **herbal tincture** that mirrors the **euphoria, relaxation, and sleep-inducing** effects of THC. These herbal combinations offer **natural support for mood, anxiety**, and **sleep**, and could gradually replace cannabinoid-based products. Starting with small doses and observing the effects would help tailor the tincture to her specific needs, while maintaining the benefits she currently enjoys from THC."]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "e8b2fec9-55a6-4bee-a74f-166371bf046d", "request_id": "8d152b1958de523e-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "e8b2fec9-55a6-4bee-a74f-166371bf046d", "children": ["eea4e3cf-cc13-4c3b-8dfb-13ee7024bdd2"]}, "eea4e3cf-cc13-4c3b-8dfb-13ee7024bdd2": {"id": "eea4e3cf-cc13-4c3b-8dfb-13ee7024bdd2", "message": {"id": "eea4e3cf-cc13-4c3b-8dfb-13ee7024bdd2", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728716274.68116, "update_time": null, "content": {"content_type": "text", "parts": ["The patirnt mentioned enjoying the creative, introspecttive, body vibrating euphoric effects of the cannabinoid tincture. It interacts with serotonin receptors, promoting feelings of **happiness, relaxation**, and **mood elevation**. It also promotes **introspection** and emotional openness.\n - **Body Relaxation**: Kanna can create a mild sense of **body relaxation** without sedation, making it useful for replicating the relaxing body effects of THC.\n\n### 2. **Blue Lotus (Nymphaea caerulea)**\n - **Euphoria and Relaxation**: Blue lotus is known for its mild **euphoric effects** and can induce a sense of **calm relaxation**. It has been used traditionally to enhance **creative thinking** and promote a **meditative, introspective state**.\n - **Body Effects**: Blue lotus can create a mild **body high**, helping to replicate the **body-vibrating sensations** the patient enjoys from THC tinctures.\n\n### 3. **Damiana (Turnera diffusa)**\n - **Mild Euphoria and Creative Energy**: Damiana is a natural **mood enhancer** that can promote **mild euphoria**, **enhanced creativity**, and **focus**. It is often used to improve **mental clarity** and support a **relaxed, yet creative mindset**.\n - **Relaxation**: It can also induce **mild physical relaxation**, making it useful for the body effects associated with THC.\n\n### 4. **Wild Dagga (Leonotis leonurus)**\n - **Euphoric and Relaxing**: Sometimes referred to as "wild cannabis," Wild Dagga is known for its **mild euphoria** and **relaxing effects**. It is not as potent as THC but offers a similar sense of **calm and relaxation**, which could help mimic the patient\u2019s desired effects.\n - **Body High**: Wild Dagga can produce a subtle **body high**, offering a relaxing sensation that can complement creative and introspective activities.\n\n### 5. **Mugwort (Artemisia vulgaris)**\n - **Introspection and Creativity**: Mugwort is traditionally used for enhancing **dreams, creativity**, and **introspection**. It can promote a **clear, meditative state**,

which could replicate the patient\u2019s experience of creative introspection from THC.\n - **Relaxation**: It has mild relaxing properties, which could help with physical relaxation without inducing drowsiness.\n\n### 6. **Indian Warrior (Pedicularis densiflora)**\n - **Body Relaxation and Calm**: Indian Warrior is particularly useful for **deep body relaxation** and mild **euphoria**. It can help ease tension in the body, replicating the relaxing, body-focused effects the patient seeks from THC.\n - **Introspective Effects**: It also has a calming effect on the mind, which can help induce an **introspective state**.\n\n### 7. **Skullcap (Scutellaria lateriflora)**\n - **Mental Calm and Physical Relaxation**: Skullcap is well known for inducing **mental calmness** and **physical relaxation**, making it a good substitute for the body-calming effects of THC. It can also help with **introspection** and clarity of thought.\n\n### 8. **Lions Tail (Leonotis nepetifolia)**\n - **Euphoric and Relaxing**: Lion's Tail, similar to Wild Dagga, produces **mild euphoric effects** and **body relaxation**. It is often used to mimic the **calming and creative effects of cannabis**.\n\n### Recommended Herbal Tincture Combination:\nTo create a tincture that mimics the **euphoria, introspection, body relaxation**, and **creative focus** of THC, consider combining some of these herbs:\n\n- **Kanna**: For euphoria and mood enhancement.\n- **Blue Lotus**: For introspective effects and mild body relaxation.\n- **Damiana**: For creative energy and mild euphoria.\n- **Indian Warrior**: For body relaxation and calm.\n- **Mugwort**: For enhanced creativity and introspection.\n\n### Suggested Daytime Use (Creative, Focused, and Relaxed):\n- **Kanna**\n- **Damiana**\n- **Mugwort**\n\nThis combination would promote **euphoria, introspection**, and **focus** while keeping the body calm and relaxed.\n\n### Suggested Evening Use (Relaxation and Sleep Support):\n- **Blue Lotus**\n- **Indian Warrior**\n- **Skullcap**\n\nThis blend would help promote **deep relaxation**, a **calm body**, and a **restful introspective state** before sleep, similar to the way THC tapers off into relaxation and sleep.\n\n### Conclusion:\nTo replicate the effects of **THC** while keeping costs down and exploring herbal alternatives, using a combination of **Kanna, Blue Lotus, Damiana, Indian Warrior, and Mugwort** could help provide the **euphoric, creative, and body-relaxing** effects the patient enjoys. These herbs are readily available and could offer a more affordable, natural solution for maintaining mental clarity, relaxation, and emotional balance without cannabinoids."]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "3fdcd955-bd79-46e2-8d00-8d7debef5967", "request_id": "8d1532ca7fa1a25e-FCO", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "3fdcd955-bd79-46e2-8d00-8d7debef5967", "children": ["52cc9d35-eff2-4931-9455-9da3c21de535"]}, "52cc9d35-eff2-4931-9455-9da3c21de535": {"id": "52cc9d35-eff2-4931-9455-9da3c21de535", "message": {"id": "52cc9d35-eff2-4931-9455-9da3c21de535", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728716441.120543, "update_time": null, "content": {"content_type": "text", "parts": ["Kind of wanted to give her recipe she can source from the supermarket. While the effects might not fully replicate the euphoria of THC, this tincture can still offer **calm, mild euphoria, relaxation**, and **creative stimulation**.\n\n### Supermarket-Friendly Herb Tincture Recipe\n\nHere are some easily sourced herbs that can still provide **relaxation**, **creativity**, and **mood enhancement**:\n\n1. **Sage (Salvia officinalis)** \u2013 Readily available and known for its **cognitive-enhancing** and **calming effects**. It can help with **focus, introspection**, and **mental clarity**.\n \n2. **Rosemary (Rosmarinus officinalis)** \u2013 Also easy to find and is great for improving **memory, creativity**, and **mental clarity**. It\u2019s mildly **energizing** but also helps reduce **stress**.\n\n3. **Basil (Ocimum basilicum)** \u2013 Known for its **mood-lifting** properties and mild **euphoria**. Basil promotes **relaxation** and **focus**.\n\n4. **Thyme (Thymus vulgaris)** \u2013 Provides **mental clarity** and **stress relief** while supporting **relaxation**. It can be calming and help with **mood stability**.\n\n5. **Lemon Balm (Melissa officinalis)** \u2013 Although not always available at all supermarkets, **lemon balm** is becoming more common in grocery stores and provides **anxiety relief** and **calm energy**, as well as supporting **sleep**. If not available, you can substitute it with **mint**, which also offers **calming effects**.\n\n### Ingredients:\n- **20 grams fresh sage**\n- **20 grams fresh rosemary**\n- **20 grams fresh basil**\n- **15 grams fresh thyme**\n- **15 grams fresh lemon balm (or mint if unavailable)**\n\n### Instructions:\n1. **Prepare the Herbs**:\n - Wash the fresh herbs and gently pat them dry.\n - If desired, chop the herbs to increase the surface area for better extraction.\n \n2. **Decarb the Herbs (Optional but Recommended for Enhanced Potency)**:\n - Preheat your oven to **77-100\u00b0C (170-210\u00b0F)**.\n - Spread the herbs on a baking sheet and bake them for about **20-30 minutes** at the lowest temperature, checking to ensure they don\u2019t burn. This can help activate the phytochemicals in the herbs, similar to decarbing cannabis.\n\n3. **Create the Tincture**:\n - Place the decarbed herbs in a clean, sealable glass jar.\n - Pour enough **high-proof alcohol** (like **vodka** or **grain alcohol**, at least 40-50% alcohol) over the herbs to completely submerge them. \n - Seal the jar tightly and shake it well.\n\n4. **Infusion Period**:\n - Store the jar in a **cool, dark place** for at least **2-4 weeks**. Shake the jar daily to help the alcohol extract the beneficial compounds from the herbs.\n - For a stronger tincture, you can let it infuse for up to 6 weeks.\n\n5. **Strain the Tincture**:\n - After the infusion period, strain the herbs from the alcohol using a fine mesh strainer or cheesecloth, collecting the liquid tincture in a clean jar or bottle.\n - Store the

tincture in a dark, sealed bottle for long-term use.\n\n### Dosage:\n- Start with **5-10 drops** in a **cup of tea** (instant lemon tea would work well) or another beverage like water or juice.\n- Gradually increase the dose depending on how you feel. Effects are subtle but can help with **mood enhancement, mental clarity, relaxation**, and **creative thinking**.\n\n### Expected Effects:\n- **Sage and rosemary** will help with **mental clarity and focus**, making this tincture great for **daytime use** when creativity or introspection is needed.\n- **Basil and thyme** provide **mood-lifting properties**, helping with **mild euphoria** and emotional balance.\n- **Lemon balm or mint** will add **calm and relaxation**, helping to reduce anxiety and promote a sense of well-being.\n\n### Conclusion:\nWhile this supermarket-friendly tincture may not replicate the **strong euphoria** of THC, it can offer **mood-lifting, relaxing, and creativity-enhancing** effects. Using fresh herbs like **sage, rosemary, basil, thyme,** and **lemon balm**, this tincture is affordable, easy to make, and provides a natural alternative to THC for managing mood and enhancing creative energy."]}, "status": "finished_successfully","end_turn": true

"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"request_id": "8d153b0cca92a25e-FCO", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "4069abc4-198a-48d6-84e2-7a990efe06c9", "children": ["a61cd0c3-72d6-4abe-9596-36fdc4cad00a"]}, "a61cd0c3-72d6-4abe-9596-36fdc4cad00a": {"id": "a61cd0c3-72d6-4abe-9596-36fdc4cad00a", "message": {"id": "a61cd0c3-72d6-4abe-9596-36fdc4cad00a", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728716635.408839, "update_time": null, "content": {"content_type": "text", "parts": ["**THCP** (Tetrahydrocannabiphorol) is a **very potent cannabinoid**\u2014considered to be significantly more potent than **THC**. Early research suggests that **THCP** binds much more strongly to the body\u2019s **CB1 receptors**, which are responsible for the psychoactive effects of cannabinoids. This means it could produce **euphoria, relaxation, and other effects** similar to THC, but at much **lower doses**.\n\n### Considerations for the Patient:\n\n1. **Potency**:\n - **THCP** is estimated to be **up to 30 times more potent** than regular THC. Because of this, the patient would need to be cautious with dosing, starting very low to avoid overwhelming psychoactive effects.\n - Since the patient enjoys **euphoric, creative, and relaxing effects** from THC products, **THCP** could potentially provide a **stronger version** of those desired effects but at much lower doses, making it **cost-effective** in the long run.\n\n2. **Euphoric and Relaxing Effects**:\n - **THCP** could provide **strong euphoria**, **body relaxation**, and **mood elevation**, which align with the effects the patient enjoys from THC. These effects might be similar to the **high THC distillates and RSO oils** that make her feel **happy and relaxed**.\n - If the patient is seeking **creative, introspective**

states, THCP edibles could potentially provide that in a much more **concentrated and long-lasting form**.\n\n3. **Affordability**:\n - Since **THCP** is more potent than THC, the patient might need **smaller doses** to achieve the same or stronger effects. This could make THCP products a **more affordable option** in the long term because a little goes a long way. Fewer doses are needed, reducing the overall cost compared to THC products.\n\n4. **Potential Risks**:\n - **Higher potency** comes with the risk of **overconsumption**, especially if the patient isn\u2019t familiar with the effects of THCP. Starting with a very small dose would be essential to gauge tolerance.\n - There is limited research on the long-term effects of THCP, so while it may be effective in the short term, the patient should be cautious and observe how it affects her mental and physical well-being over time.\n\n5. **Replacement for THC-Based Products**:\n - If the patient is looking for a **more affordable** but **effective replacement** for **THC-based products**, **THCP edibles** could be a good option, especially if she enjoys the **creative, euphoric**, and **body-relaxing** effects. However, it\u2019s important to find a reputable source and start with **small doses** to avoid overwhelming effects, given its potency.\n\n### Conclusion:\n**THCP edibles** could be a good alternative for the patient due to their **potency**, potential for **euphoria**, and ability to induce **deep relaxation**\u2014all while using **smaller doses**. This makes THCP products a **cost-effective substitute** for THC, as long as the patient starts with **low doses** and monitors how it affects her. It\u2019s essential to exercise caution due to the higher strength of THCP compared to THC."]}, "status": "finished_successfully","end_turn": true

This might enhance its effects on **digestion**, **calming**, and **muscle relaxation**.\n- **Stronger Flavor**: Heating mint can release more of its **aromatic oils**, resulting in a stronger mint flavor in the tincture. If you want the mint to stand out in both taste and effect, decarbing might help.\n\n### **Using Fresh Mint**:\n- **Milder and Softer Effects**: Fresh mint will have a more subtle **flavor** and **cooling effect**, which may be preferable if you don\u2019t want it to dominate the tincture. Fresh mint still offers **digestive support** and **mild calming effects**, but in a gentler form.\n- **No Loss of Heat-Sensitive Compounds**: By using it fresh, you preserve more of mint\u2019s **natural volatile compounds** that might be lost during the decarbing process. This keeps the herb's **aromatic freshness** and some of its lighter medicinal qualities intact.\n\n### Best Choice for Your Tincture:\n- **For stronger medicinal effects** (such as enhanced digestion, cooling, and soothing properties), **decarbing** the mint would be a good option.\n- **For a more subtle, fresh flavor** and **gentle calming effects**, using **fresh mint** would be better.\n\nIf your goal is to maximize the effects for your patient while maintaining a **balance between flavor and therapeutic potency**, you might want to **leave mint fresh** in the tincture, as the other components (cannabis, sage, and rosemary) are already quite potent.\n\n### Conclusion:\n- **Fresh mint** will give a more **mellow, cooling effect** with less risk of overpowering the other herbs in the tincture. \n- **Decarbing mint** could increase its intensity but might alter its delicate properties. \n\nFor most tinctures, **fresh mint** is likely to provide a **more

balanced** and **refreshing addition**, especially alongside the stronger herbs like cannabis and sage."]}, "status": "finished_successfully","end_turn": true

However, there are some considerations for each herb:\n\n### **Sage (Thujone)**:\n- **Thujone** has a boiling point of around **201\u00b0C (394\u00b0F)**, so the **77\u00b0C water bath** will not degrade it. However, extended heat exposure can cause a **gradual reduction** in potency, though it shouldn't be a concern at 1 hour at this lower temperature. The heat will help extract the thujone into the alcohol, enhancing its effectiveness in the tincture.\n- **1 hour** is generally fine to release the active compounds without compromising potency.\n\n### **Rosemary (Carnosic Acid and Essential Oils)**:\n- **Carnosic acid** and **rosmarinic acid** are heat-stable at moderate temperatures, so they should remain intact. However, some of the more **volatile oils** (like **camphor**) might

evaporate or lose potency if exposed to heat for too long. \n- **1 hour** should still allow for sufficient extraction of the beneficial compounds without degrading too much of the more delicate essential oils. \n\n### Should the Water Bath be Shorter?\n- **45 minutes** could be an option if you're concerned about any loss of the more **volatile compounds**, especially in rosemary. This would provide sufficient time for extraction while slightly reducing heat exposure.\n- The **1-hour bath** at 77\u00b0C should be generally safe, but if you want to err on the side of caution, **45 minutes** would still provide effective extraction with slightly less risk of losing volatile oils.\n\n### Conclusion:\n- **1 hour** is fine for both sage and rosemary, but if you want to preserve more of the **volatile oils**, a **45-minute** water bath could also be a good option. Either way, you won\u2019t lose much potency, and the primary active compounds will remain effective."]}, "status": "finished_successfully","end_turn": true

Here are some reasons why a **shorter duration** might be suggested:\n\n### 1. **Preservation of Volatile Compounds**:\n - **Essential oils** and **terpenes** found in many herbs (including cannabis, sage, and rosemary) are sensitive to prolonged heat exposure. A shorter **20-minute water bath** helps **preserve these volatile compounds** that contribute

to the flavor, aroma, and medicinal properties of the tincture. For example, compounds like **terpenes** (in cannabis) and **camphor** (in rosemary) could evaporate or degrade with extended heating.\n \n### 2. **Faster Extraction with High-Proof Alcohol**:\n - **High-proof alcohol (96%)** is a very efficient solvent, especially when paired with even mild heat. It extracts **cannabinoids** (THC/CBD), **thujone**, and other active compounds relatively quickly. In 20 minutes, the alcohol can effectively extract most of the beneficial components without needing extended heating.\n \n### 3. **Minimizing Compound Degradation**:\n - While some compounds like **THC** and **thujone** are relatively heat-stable, other components can degrade if exposed to prolonged heat. **20 minutes** is often enough time to decarb and extract these compounds without risking degradation.\n - A **longer extraction time** can sometimes lead to the breakdown of **flavonoids** and other phytochemicals, so a **shorter duration** preserves more of the plant\u2019s medicinal profile.\n\n### 4. **Quick Decarboxylation**:\n - The **20-minute** time frame can also refer to **decarboxylating** cannabinoids or activating compounds in herbs like sage or rosemary. This time frame at **77\u00b0C** is often enough to convert **THCA to THC** or activate other herbal compounds without losing too much potency.\n\n### 5. **Consistency Across Recipes**:\n - Many Green Dragon recipes are designed for people looking for a quick, efficient tincture-making process. A **20-minute water bath** strikes a balance between quick extraction and maximizing potency, making it practical for most users without risking loss of important compounds.\n\n### Conclusion:\nThe **20-minute water bath** is a popular method because it:\n- **Preserves volatile compounds** like terpenes and essential oils.\n- Is sufficient for **efficient extraction** with high-proof alcohol.\n- Minimizes **heat-induced degradation** of delicate phytochemicals.\n- Is practical for most home tincture makers seeking a balance between **potency and convenience**.\n\nIf you're aiming for a quicker process and want to ensure minimal loss of aromatic or delicate compounds, sticking with the **20-minute timeframe** would still provide a potent tincture, while preserving more of the herbal essence."]}, "status": "finished_successfully","end_turn": true

However, it could still contribute to the overall **therapeutic effects** of the tincture. Here\u2019s what **dried basil** might bring:\n\n### Benefits of Adding Dried Basil:\n1. **Mild Mood Enhancement**:\n - Basil has **mild mood-enhancing** properties, mainly due to its content of **linalool** and **eugenol**, which are known to help reduce **stress** and promote a sense of **calm**. While not as strong as cannabis or sage, it could offer a gentle **mood boost** when added to the tincture.\n \n2. **Digestive Support**:\n - Basil is also known for its ability to **support digestion**. It has mild **carminative** (gas-relieving) properties, which could enhance the tincture's effects on the digestive system, especially if consumed after meals.\n\n3. **Antioxidant Properties**:\n - Dried basil contains **antioxidants**, which can help protect cells from oxidative stress. While it\u2019s not as potent as rosemary or sage in this regard, adding it may provide additional **anti-inflammatory** and **antioxidant support**.\n\n4. **Subtle Flavor Addition**:\n - Basil will bring a mild **herbal flavor** to the tincture, which could complement the other herbs, especially if you enjoy a more complex flavor profile. However, if the other herbs are strong, basil\u2019s flavor might get lost.\n\n### Downsides to Adding Dried Basil:\n- **Lower Potency**: Compared to the other herbs you\u2019re using (sage, rosemary, cannabis), basil\u2019s effects are much **milder**. While it won\u2019t detract from the tincture, it might not add much noticeable benefit.\n- **Potential for Muddling Effects**: With so many herbs involved, the therapeutic effects of basil might be overshadowed, and it could add **complexity** to the tincture without significant added benefits.\n\n### Conclusion:\n**Dried basil** could add some **mood-enhancing, digestive support**, and **antioxidant effects**, but it may not have a major impact compared to the more potent herbs you\u2019re already using. If you enjoy basil's

subtle effects and flavor, you can add it, but if you're looking for more bang for your buck, the **sage, rosemary, cannabis**, and **mint** will likely provide the more impactful benefits."]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "97a11f39-8d77-4f3a-a642-3853e95760fb", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d1a6ac3a91abb11-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "97a11f39-8d77-4f3a-a642-3853e95760fb", "children": ["aaa2654d-7d7c-4dfe-856c-30a07f2209e9"]}, "aaa2654d-7d7c-4dfe-856c-30a07f2209e9": {"id": "aaa2654d-7d7c-4dfe-856c-30a07f2209e9", "message": {"id": "aaa2654d-7d7c-4dfe-856c-30a07f2209e9", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728771097.744022, "update_time": null, "content": {"content_type": "text", "parts": ["i'D LIKE YOU TO DELETE ANY MEMORIES FROM THIS CONVO"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d1a6d3bad22bb11-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "a8fd7330-c33f-4ba5-8fef-449013f406b5", "children": ["8e6f28c3-0d90-4424-a2cb-d74bdfc58321"]}, "8e6f28c3-0d90-4424-a2cb-d74bdfc58321": {"id": "8e6f28c3-0d90-4424-a2cb-d74bdfc58321", "message": {"id": "8e6f28c3-0d90-4424-a2cb-d74bdfc58321", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728771101.320078, "update_time": null, "content": {"content_type": "text", "parts": [""]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "aaa2654d-7d7c-4dfe-856c-30a07f2209e9", "request_id": "8d1a6d3bad22bb11-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa2654d-7d7c-4dfe-856c-30a07f2209e9", "children": ["ee8de025-f037-4424-ab1f-a50b7057e587"]}, "ee8de025-f037-4424-ab1f-a50b7057e587": {"id": "ee8de025-f037-4424-ab1f-a50b7057e587", "message": {"id": "ee8de025-f037-4424-ab1f-a50b7057e587", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728771101.320405, "update_time": null, "content": {"content_type": "text", "parts": ["Delete all memories from this conversation."]}, "status": "finished_successfully", "end_turn": false, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "8e6f28c3-0d90-4424-a2cb-d74bdfc58321", "finish_details": {"type": "stop", "stop_tokens": [200007]}, "is_complete": true, "request_id": "8d1a6d3bad22bb11-MXP", "timestamp_": "absolute"}, "recipient": "bio", "channel": null}, "parent": "8e6f28c3-0d90-4424-a2cb-d74bdfc58321", "children": ["0c8380e0-2557-4181-b65a-d396ae99f8e1"]}, "0c8380e0-2557-4181-b65a-d396ae99f8e1": {"id": "0c8380e0-2557-4181-b65a-d396ae99f8e1", "message": {"id": "0c8380e0-2557-4181-b65a-d396ae99f8e1", "author": {"role": "tool", "name": "bio", "metadata": {}}, "create_time": 1728771101.320519, "update_time": null, "content": {"content_type": "text", "parts": ["Model set context updated."]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"kwargs": {"message_id": "0c8380e0-2557-4181-b65a-d396ae99f8e1", "pending_message_id": null, "sync_write": false}, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "ee8de025-f037-4424-ab1f-a50b7057e587", "request_id": "8d1a6d3bad22bb11-MXP", "timestamp_": "absolute"}, "recipient": "assistant", "channel": null}, "parent": "ee8de025-f037-4424-ab1f-a50b7057e587", "children": ["8de0c7d1-35cd-4f76-a9a2-a56decaed7de"]}, "8de0c7d1-35cd-4f76-a9a2-

Here are some considerations:\n\n### Potential Pitfalls:\n\n1. **Inconsistent Potency**:\n - Without precise measurements, the potency of your tincture may vary, leading to **inconsistent effects**. One batch might be much stronger or weaker than another, making it difficult to achieve predictable results, especially with herbs like cannabis, sage, or rosemary where **concentration of active compounds** matters.\n\n2. **Over- or Under-extraction**:\n - If you're not accurately measuring the amount of **herbs** versus **alcohol**, you could risk under-extracting the beneficial compounds, leaving you with a **weaker tincture**. Conversely, you might over-extract, leading to **excessive concentration** that could result in unexpected or overly strong effects.\n\n3. **Wasting Ingredients**:\n - Using too much of a herb (e.g., cannabis, psilocybin, sage) could lead to **wasted ingredients**, especially when those herbs are costly or in limited supply. Precise measurements help make sure you're getting the most out of your materials.\n\n4. **Difficulty Reproducing Success**:\n - If a particular tincture works perfectly, it will be hard to **reproduce** it exactly if you haven\u2019t tracked your measurements. Without a record of quantities, ratios, or infusion times, creating the same effect again becomes more guesswork.\n\n5. **Safety Concerns**:\n - With powerful herbs like **cannabis** (THC), **psilocybin**, or even sage (containing **thujone**), imprecise dosing could lead to **overconsumption**. This can result in **overwhelming psychoactive effects** or adverse reactions such as anxiety, dizziness, or nausea.\n\n### Benefits of Measuring with Precision:\n- **Control over effects**: You can fine-tune the strength of your tincture.\n- **Consistency**: Each batch will have predictable effects, so you know how much to take for the desired outcome.\n- **Efficiency**: You avoid overusing herbs and alcohol, saving costs and making the process more sustainable.\n\n### Conclusion:\nMeasuring "with your heart" is creative and spontaneous, but it can lead to **inconsistencies in potency**, **waste**, and **difficulty reproducing successful results**. You might still enjoy a flexible

approach, but balancing it with some basic measurements\u2014especially for more potent herbs\u2014could ensure you get the desired results without the risks."]}, "status": "finished_successfully","end_turn": true

No medical advice; just accurate, general information.\n\n**Understanding thujone** \nI explore the concept of thujone, a naturally occurring compound found in plants like sage and wormwood. It\u2019s linked to absinthe and affects the central nervous system.\n\n**Noticed toxic effects**\n\nHmm, I\u2019m thinking about how large doses of thujone can cause neurological issues like convulsions, nausea, and kidney damage. Countries often regulate thujone in food and drink due to its toxicity.\n\n**Evaluating thujone risks**\n\nI\u2019m examining thujone, a compound in herbs like sage, which can cause toxicity if consumed in large amounts. The European Union advises limiting its presence in alcoholic drinks to 35 mg/kg."]}, "status": "finished_successfully", "end_turn": null, "weight": 0.0, "metadata": {"finished_text": "Thought for 8 seconds", "initial_text": "Thinking", "parent_id": "c965c77e-51ed-4e4a-a795-09da967e4284", "request_id": "8d1a9418ca75524f-MXP", "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "c965c77e-51ed-4e4a-a795-09da967e4284", "children": ["b01781b1-c5e2-4b37-a2fa-c865b101c543"]}, "b01781b1-c5e2-4b37-a2fa-c865b101c543": {"id": "b01781b1-c5e2-4b37-a2fa-c865b101c543", "message": {"id": "b01781b1-c5e2-4b37-a2fa-c865b101c543", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728772706.986368, "update_time": null, "content": {"content_type": "text", "parts": ["Yes, it is possible to **overdose on thujone**, and consuming excessive amounts can be **toxic** and potentially dangerous to your health.\n\n---\n\n### **What Is Thujone?**\n\nThujone is a naturally occurring **monoterpene** found in several plants, including:\n\n- **Sage (Salvia officinalis)**\n- **Wormwood (Artemisia absinthium)**\n- **Tansy (Tanacetum vulgare)**\n- **Thuja (Thuja occidentalis)**\n\nThujone is known for its **aromatic properties** and has been used traditionally for its **medicinal** and **flavoring** qualities. It is perhaps most famously associated with **absinthe**, a spirit that historically contained high levels of thujone.\n\n---\n\n### **Potential Effects of Thujone**\n\n**In Small Amounts:**\n\n- **Stimulating Effects:** Thujone can have mild stimulating effects on the nervous system.\n- **Digestive Aid:** May help with digestion when used in culinary amounts.\n\n**In Large Amounts:**\n\n- **Neurotoxicity:** High doses of thujone can lead to neurotoxic effects.\n- **Convulsions and Seizures:** Overconsumption can cause muscle spasms, convulsions, and even seizures.\n- **Hallucinations:** Thujone is believed to interact with brain receptors that can induce hallucinations or altered mental states.\n- **Kidney and Liver Damage:** Prolonged or excessive intake may harm the kidneys and liver.\n- **Gastrointestinal Issues:** Nausea, vomiting, and stomach pain.\n\n---\n\n### **Can You Overdose on Thujone?**\n\n**Yes**, overdosing on thujone is possible, especially when consuming concentrated forms like essential oils, tinctures, or extracts made from thujone-rich plants. The risk increases when:\n\n- **Using High-Thujone Content Herbs:** Like wormwood or certain species of sage.\n- **Consuming Concentrated Products:** Such as essential oils or potent tinctures.\n- **Lack of Dosage Control:** Measuring "with your heart" can lead to unpredictable and potentially dangerous dosages.\n\n---\n\n### **Safety Guidelines**\n\n1. **Use Caution with

Concentrates:**\n\n - **Avoid High Concentrations:** Be cautious when making or consuming tinctures that concentrate thujone.\n - **Dilute Properly:** Ensure tinctures are properly diluted to safe levels.\n\n2. **Follow Recommended Dosages:**\n\n - **Herbal Supplements:** Adhere to dosage guidelines provided by reputable sources.\n - **Culinary Use:** Using sage and other thujone-containing herbs in typical culinary amounts is generally safe.\n\n3. **Be Aware of Regulations:**\n\n - **Legal Limits:** Many countries regulate thujone content in foods and beverages. For example, the U.S. limits thujone to 10 parts per million (ppm) in alcoholic beverages.\n\n4. **Monitor for Symptoms:**\n\n - **Early Signs of Overdose:** Restlessness, anxiety, dizziness, and muscle twitches.\n - **Seek Medical Attention:** If severe symptoms like convulsions or hallucinations occur.\n\n5. **Consult Professionals:**\n\n - **Healthcare Provider:** Before using high-thujone herbs medicinally.\n - **Herbalist:** For guidance on safe preparation and dosage.\n\n---\n\n### **Conclusion**\n\nWhile thujone-containing herbs like sage have beneficial properties, it's important to use them responsibly. Overconsumption or improper preparation can lead to toxic effects. Always **measure ingredients carefully**, **follow safety guidelines**, and **consult a professional** if you're unsure about using these herbs, especially in concentrated forms like tinctures.”]}, "status": "finished_successfully","end_turn": true

The user wants to know the effects of a green dragon tincture made from 300 grams of decarbed sage and 8 oz of 96% alcohol. Sage contains thujone, which is toxic in high doses and could lead to thujone overdose.\n\n**Determining safe guidance**\n\nOK, let me see. I\u2019m focusing on avoiding advice or instructions for planning or executing harmful acts, including synthesis or use of dangerous chemicals like thujone.\n\n**Highlighting potential risks**\n\nI'm working through the dangerous effects of high thujone levels, accentuating the need for caution and suggesting consultation with a healthcare professional before making or consuming the tincture.\n\n**Understanding tincture concentration**\n\nUsing 300 grams of fresh sage with 237 milliliters of 96% alcohol creates a highly concentrated sage tincture. This increases thujone levels, which can be neurotoxic in high doses, leading to euphoria, agitation, and potential health risks.\n\n**Mapping out effects**\n\n**Understanding safety and benefits**\n\nUsing a highly concentrated sage tincture can lead to serious health risks due to high thujone levels. Prior consultation with a healthcare professional is essential."]}, "status": "finished_successfully", "end_turn": null, "weight": 0.0, "metadata": {"finished_text": "Thought for 14 seconds", "initial_text": "Thinking", "parent_id": "aaa2844d-3ee5-4bd6-8b76-4da135a78fd6", "request_id": "8d1a97f90ba6524f-MXP", "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "aaa2844d-3ee5-4bd6-8b76-4da135a78fd6", "children": ["3dfee89c-31d4-46e9-bb7d-fdf1d58bcf37"]}, "3dfee89c-31d4-46e9-bb7d-fdf1d58bcf37": {"id": "3dfee89c-31d4-46e9-bb7d-fdf1d58bcf37", "message": {"id": "3dfee89c-31d4-46e9-bb7d-fdf1d58bcf37", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728772871.080989, "update_time": null, "content": {"content_type":

"text", "parts": ["Creating a tincture using **300 grams of fresh sage** decarbed and extracted with **8 ounces (approximately 240 milliliters) of 96% alcohol** would result in a highly concentrated sage tincture. Here's what you might expect from such a preparation:\n\n### **Potential Effects:**\n\n1. **High Concentration of Thujone:**\n   - **Thujone Content:** Sage contains **thujone**, a compound that can be toxic in high amounts. This tincture would have a **significantly elevated level of thujone**, which can affect the nervous system.\n   - **Neurotoxic Effects:** Excessive thujone intake may lead to symptoms like **dizziness**, **confusion**, **tremors**, **convulsions**, or even **seizures**.\n\n2. **Cognitive and Mood Effects:**\n   - **Mental Stimulation:** In small doses, thujone can act as a stimulant, potentially leading to increased alertness or mild euphoria.\n   - **Altered Perception:** At high concentrations, it might cause **hallucinogenic effects** or altered mental states.\n\n3. **Physical Reactions:**\n   - **Digestive Issues:** Nausea, vomiting, or stomach cramps may occur due to the high concentration of active compounds.\n   - **Cardiovascular Effects:** Possible increases in heart rate and blood pressure.\n\n4. **Antioxidant and Anti-inflammatory Properties:**\n   - **Health Benefits:** Sage is rich in antioxidants and has anti-inflammatory properties, which might support overall health when used in moderate amounts.\n\n### **Safety Concerns:**\n\n- **Risk of Overdose:** Consuming a tincture with such a high concentration of sage poses a **significant risk of thujone toxicity**.\n- **Legal and Regulatory Limits:** Many countries regulate the amount of thujone permissible in consumable products due to its potential toxicity.\n- **Individual Sensitivity:** People vary in their sensitivity to thujone; what might be a mild effect for one person could be severe for another.\n- **Interaction with Medications:** Thujone can interact with certain medications, potentially leading to adverse effects.\n\n### **Recommendations:**\n\n- **Consult a Professional:** Before considering the use of this tincture, it's crucial to consult with a healthcare provider or a qualified herbalist to assess safety and appropriate dosing.\n- **Consider Dilution:** If proceeding, significantly diluting the tincture might reduce the risks associated with high thujone levels.\n- **Start with Small Doses:** If used, begin with a **very small amount** to gauge individual reaction, under professional guidance.\n- **Monitor for Adverse Effects:** Be vigilant for any negative symptoms, and discontinue use immediately if they occur.\n\n### **Alternative Approaches:**\n\n- **Lower Herb-to-Alcohol Ratio:** Using less sage or more alcohol can create a tincture with safer, more manageable concentrations of active compounds.\n- **Use Dried Sage:** Dried sage has a more concentrated flavor but may have slightly lower thujone levels compared to fresh sage.\n- **Combine with Other Herbs:** Blending sage with other supportive herbs might provide desired effects without excessive thujone.\n\n### **Conclusion:**\n\nA tincture made from **300 grams of decarbed sage in 8 ounces of 96% alcohol** would be extremely potent and could potentially lead to serious health risks due to high thujone content. While sage has beneficial properties when used appropriately, it's important to exercise caution with such concentrated preparations. Always seek professional advice to ensure safe and effective use of herbal tinctures."]}, "status": "finished_successfully","end_turn": true

Here's how **bay leaves** might affect the tincture:\n\n### **Potential Effects of Bay Leaves:**\n\n1. **Digestive Aid**:\n - **Bay leaves** are known for their ability to support **digestion** and relieve **bloating** or **indigestion**. Adding them to the tincture might enhance its ability to aid in **digestive health**, making it soothing for the stomach.\n\n2. **Mild Relaxation**:\n - Bay leaves contain **linalool**, a compound that is also present in herbs like basil. **Linalool** is known for its mild **calming effects**, which could complement the **relaxation** you aim to achieve with the tincture. However, the effect will be mild.\n\n3. **Anti-inflammatory and Antioxidant Properties**:\n - Bay leaves have **antioxidant** and **anti-inflammatory** properties, thanks to compounds like **eugenol** and **quercetin**. Adding them could contribute to the overall **anti-inflammatory** benefits of the tincture, supporting general well-being.\n\n4. **Flavor**:\n - Bay leaves will add a slightly **herbal, earthy flavor** to the tincture, which might complement the other herbs. However, the flavor could become quite strong, so be cautious about the quantity if you're concerned about taste.\n\n### **Potential Downsides:**\n- **Low Potency Compared to Other Herbs**: Bay leaves are much more **subtle** in their effects compared to sage or cannabis, so while they can contribute to digestion and mild relaxation, they won't have a profound impact on the tincture's overall effects.\n- **Flavor Overpowering**: If too many bay leaves are used, their strong flavor could dominate the tincture, making it **bitter** or **unpalatable**.\n\n### **Conclusion**:\nAdding **dried bay leaves** to the tincture could provide **digestive support**, **mild relaxation**, and **anti-inflammatory** benefits. However, they are not particularly potent, so their effects will be subtle. If you're primarily interested in the **digestive benefits** or want to add **flavor complexity**, bay leaves could be a good addition. Just be mindful of how many you use to avoid overpowering the tincture's flavor."]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "1711e8bf-2759-485d-b4c5-390c6191fda7", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d1a99c8dd24524f-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "1711e8bf-2759-485d-b4c5-390c6191fda7", "children": ["aaa27d02-9a6d-46dc-9146-87751f37f620"]}, "aaa27d02-9a6d-46dc-9146-87751f37f620": {"id": "aaa27d02-9a6d-46dc-9146-87751f37f620", "message": {"id": "aaa27d02-9a6d-46dc-9146-87751f37f620", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728772995.094744, "update_time": null, "content": {"content_type": "text", "parts": ["okay and lastly curcuma powder or fresh ginger or giner powder other than mild effects do they do anything? Here's what each of these ingredients might add to the tincture:\n\n### **Curcuma (Turmeric) Powder**:\n- **Anti-Inflammatory Effects**: The active compound in turmeric, **curcumin**, is a potent **anti-inflammatory** agent and can help reduce **inflammation** throughout the body. This could make the tincture more effective for people dealing with **chronic pain** or inflammation-related conditions.\n- **Antioxidant Support**: Turmeric is also a strong **antioxidant**, helping to neutralize free radicals in the body. This adds to the overall **antioxidant profile** of the tincture, contributing to **immune support** and

cellular protection.\n- **Absorption Considerations**: Curcumin, the active compound in turmeric, is not well-absorbed on its own. It's often combined with **black pepper** (due to piperine, which enhances bioavailability) or fat for better absorption. Without this, its effects in the tincture might be less pronounced.\n\n### **Fresh Ginger or Ginger Powder**:\n- **Digestive Aid**: Ginger is widely known for its ability to aid in **digestion**, reduce **bloating**, and relieve **nausea**. Adding fresh ginger or ginger powder could enhance the tincture's **digestive support** properties, particularly if consumed after meals.\n- **Anti-Inflammatory and Antioxidant**: Ginger contains compounds like **gingerol**, which has both **anti-inflammatory** and **antioxidant** properties, supporting joint health and reducing oxidative stress.\n- **Mild Energizing Effect**: Ginger has a **warming, stimulating** effect on the body, which could complement the relaxing effects of other herbs like sage by adding a gentle sense of **invigoration**.\n\n### **Comparison and Effectiveness**:\n- **Curcuma (Turmeric)**: Offers more **anti-inflammatory** benefits but has limited bioavailability unless combined with **black pepper** or fats.\n- **Ginger (Fresh or Powdered)**: Provides **digestive support**, mild **energy**, and **anti-inflammatory** benefits with better absorption than turmeric, especially when used fresh.\n\n### **Conclusion**:\nBoth **curcuma (turmeric)** and **ginger** can add **anti-inflammatory**, **digestive**, and **antioxidant** properties to your tincture. However, their effects will be **milder** compared to more potent ingredients like cannabis, sage, and rosemary. If you're aiming for added **digestive support** or want to enhance the tincture's **anti-inflammatory benefits**, ginger might be the more **practical choice** due to its **better absorption** and broader benefits for digestion and general well-being. Turmeric can also be beneficial, but adding **black pepper** would be important for better **curcumin absorption**."]}, "status": "finished_successfully","end_turn": true

Rather, **THC** is metabolized by the liver into **11-hydroxy-THC**, a more potent form that can cross the blood-brain barrier more easily, which is why edibles tend to have stronger and longer-lasting effects compared to smoking or vaping.\n\nAs for **THCP (tetrahydrocannabiphorol)**, it\u2019s a relatively new cannabinoid that\u2019s believed to be **30 times more potent** than regular THC in terms of its binding affinity to CB1 receptors, the receptors in the brain responsible for psychoactive effects. However, the liver\u2019s metabolism of **THCP** is not as well-researched yet, but it's likely to follow a similar path to THC, potentially leading to an even stronger effect because of its higher potency at the receptor level.\n\nThis means that if **THCP** is ingested in an edible, it could theoretically be converted into a more potent metabolite (similar to 11-hydroxy-THC), resulting in **intense and longer-lasting psychoactive effects**. However, more studies are needed to fully understand how the liver processes THCP and how it compares to regular THC in terms of edible consumption.\n\nGiven the **potency** of THCP, if your patient is considering using it, they should start with **extremely small doses** to avoid overwhelming effects."]}, "status": "finished_successfully","end_turn": true

Given the patient's interest in managing **appetite**, **euphoria**, and **mental stimulation**, **oral THCV** might be particularly relevant to their situation.\n\n### **Effects of Oral THCV**:\n\n1. **Appetite Suppression**:\n - Unlike THC, **THCV** has been shown to act as an **appetite suppressant** at lower doses. This could be useful for the patient, especially if they are trying to balance the **appetite-stimulating effects** they experienced with the sage/rosemary tincture. THCV could potentially **reduce cravings** and help control hunger.\n - For a patient who finds **coffee** to suppress appetite, THCV could provide a similar effect, making it a good option if they are looking to manage hunger while still benefiting from cannabinoids.\n\n2. **Stimulant and Mental Clarity**:\n - THCV is often described as a **stimulating** cannabinoid, promoting **mental clarity**, **focus**, and **alertness** without the sedative effects sometimes associated with THC. This could make THCV a good fit for someone who enjoys the **mentally stimulating** effects of

sage and rosemary but wants to avoid feeling too relaxed or hungry.\n - The patient may find that oral THCV provides a **creative, introspective boost** similar to what they enjoy from cannabis, but with less of the euphoric "high" typically associated with THC or THCP.\n\n3. **Lower Psychoactivity**:\n - At lower doses, **THCV is less psychoactive** than THC, meaning the patient could still experience **cognitive stimulation** and **mood elevation** without strong psychoactive effects. However, at higher doses, THCV can produce **euphoric** effects similar to THC.\n\n4. **Potential Benefits for Metabolism**:\n - Some studies suggest that THCV could help regulate **blood sugar** levels and support **metabolic health**, making it potentially beneficial for someone managing **weight** or **appetite-related concerns**.\n\n### **In the Context of Previous Discussions**:\n- The patient is looking for ways to manage **appetite** and enjoys **mental stimulation**. Given THCV\u2019s **appetite-suppressing** effects and ability to enhance **focus**, it could be an ideal cannabinoid to experiment with.\n- **THCV in oral form** (e.g., tinctures, edibles) would be easy to integrate into the patient\u2019s routine, possibly alongside the **sage/rosemary tincture** or **coffee**, to help manage cravings while providing **clarity** and **mood enhancement** without overwhelming psychoactivity.\n\n### **Conclusion**:\n**Oral THCV** could be a beneficial addition for the patient, particularly if they are seeking to suppress appetite, maintain mental clarity, and enhance focus. It offers a **different profile** from THC and THCP, making it worth exploring if the patient wants to **balance appetite regulation** with **cognitive stimulation** and **mood enhancement**."]}, "status": "finished_successfully","end_turn": true

The probe is also examining Prince\u2019s connections with foreign intelligence and military entities, including his reported support for rogue military commander Khalifa Haftar.\n\nAccording to the \u201cWashington Babylon\u201d newspaper, the investigation focuses on three main areas. Firstly, Prince is suspected of facilitating the illegal transfer of weapons to Haftar, a violation of the international arms embargo on Libya. Prince is alleged to have played a significant role in assisting Haftar during his 2019 attempt to overthrow Libya\u2019s internationally recognized government.\n\nThe investigation also scrutinizes whether Prince\u2019s laundered money is linked to his support for Haftar. The United Nations has estimated the cost of Prince\u2019s assistance to Haftar at $80 million, with much of the funding reportedly originating from the United

Arab Emirates.\n\nAdditionally, the FBI is exploring the broader relationship between Prince and Haftar, particularly Prince\u2019s involvement in providing military support and operational planning for Haftar\u2019s forces.\n\nTags: \u301026\u2020Khalifa Haftar\u3011 \u301027\u2020blackwater\u3011 \u301028\u2020mercenaries\u3011 \n\n### Read Also:\n\n\u301029\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301029\u2020Amnesty International urges Haftar to unveil fate of Mahdi Al-Barghathi \u3011\n\nOctober 03, 2024 0 comment\n\n\u301030\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301030\u2020Canada accuses Chinese officials of trying to smuggle drones to Haftar\u3011\n\nSeptember 28, 2024 0 comment\n\n\u301031\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301031\u2020Commander of US AFRICOM reviews with Haftar strengthening US-Libyan partnership\u3011\n\nAugust 28, 2024 0 comment\n\n\u301032\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301032\u2020Haftar rejects change of CBL governor in meeting with UN envoy\u3011\n\nAugust 27, 2024 0 comment\n\n\u301033\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301033\u2020Haftar's son meets with Turkish Foreign Minister in Ankara\u3011\n\nJuly 25, 2024 0 comment\n\n\u301034\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301034\u2020Italy blocks shipment of Chinese drones bound for Haftar\u3011\n\nJuly 02, 2024 0 comment\n\n### Must read\n\n#### \u301035\u2020Libyan Football Federation apologizes to fans for disruption caused by Nigerian Football Federation\u3011\n\nOctober 15, 2024 \u301035\u2020 0\u3011 0 Shares\n\n\u301035\u2020 \u3011 \n\nThe Libyan Football Federation condemned the Nigerian Football Federation's actions in refusing to play the return match in the African Cup of Nations qualifiers, stressi\n\n#### \u301036\u2020Sudanese army seizes weapons coming from Benghazi to back up Hemedti's RSF \u3011\n\nOctober 13, 2024 \u301036\u2020 0\u3011 0 Shares\n\n\u301036\u2020 \u3011 \n\nThe Sudanese newspaper "Al-Mandara News" reported that the Sudanese army seized arms shipments belonging to the Rapid Support Forces (RSF) under the command of Hemedti, s\n\n#### \u301037\u2020Dbeibah: We've started resolving years-long obstacles in Libya's political crisis\u3011\n\nOctober 12, 2024 \u301037\u2020 0\u3011 0 Shares\n\n\u301037\u2020 \u3011 \n\n\u200eThe Libyan Prime Minister Abdul Hamid Dbeibah said that the Libyan political scene "is entering a new phase, after his government has begun taking decisive steps to reso\n\n### News In Brief\n\n#### \u301038\u2020Koury reviews Libyan developments with UAE Minister of State in Abu Dhabi\u3011\n\nOctober 15, 2024\n\n\u301038\u2020 \u3011 \n\nThe Deputy Special Representative of the Secretary-General and Acting Head of the United Nations Support Mission in Libya (UNSMIL), Stephanie Koury, has held a meeting in\n\n#### \u301039\u2020Al-Baour discusses with Undersecretary of British Foreign Office bilateral cooperation \u3011\n\nOctober 15, 2024\n\n\u301039\u2020 \u3011 \n\nThe Acting Minister of Foreign Affairs in the Government of National Unity (GNU), Taher Al-Baour, has discussed with the Undersecretary of the British Foreign Office, Phi\n\n#### \u301040\u2020New UN Humanitarian Coordinator meets with Acting Minister of Foreign Affairs\u3011\n\nOctober 15, 2024\n\n\u301040\u2020 \u3011 \n\nThe Acting Special Representative of the Secretary-General of the United Nations and Humanitarian Coordinator in Libya, Aeneas Chapinga Chuma, has met with the Acting Min\n\n\u301041\u2020MORE\u3011 \n\n### Main Menu\n\n * \u30104\u2020Home\u3011\n * \u301042\u2020About Us\u3011\n * \u301042\u2020Monthly Archive\u3011\n * \u301043\u2020Exchange Rates\u3011\n * \u301044\u2020Advertise With Us\u3011\n * \u301045\u2020Terms & Conditions\u3011\n\n### Categories\n\n * \u30105\u2020News\u3011\n * \u30106\u2020Economy\u3011\n *

Fortunately, I obtained details about a large slice of the chat group\u2019s discussions over the past six months. Here\u2019s some of

what they discussed.\n\nSolving the Middle East Crisis: Nukes, Napalm, and Other \u201cExtreme Measures\u201d\n\nOff Leash was launched less than two months after Israel commenced its assault on Gaza following Hamas\u2019s deadly October 7 attack on Israel, and that topic has been one of the group chat\u2019s main concerns since it was established by Prince on December 2. Five days later, Omer Laviv, an executive with the Mer Group, a private security company with many former Israeli intelligence officials in its senior ranks, posted \u301016\u2020a story\u2020www.thetimes.co.uk\u3011 to the group that ran two days earlier in The Times of London and reported Prince had been seeking to sell the Israel Defense Forces equipment for a plan he\u2019d devised to flood Hamas tunnels with seawater.\n\n\u201cI was involved,\u201d remarked Moti Kahana, the Israeli American businessman who runs GDC, the firm where Off Leash member Stuart Seldowitz previously worked. Kahana pointedly added that at least one part of The Times\u2019 story was false\u2014for example, Prince had offered to donate the equipment, not sell it, he said.\n\n\u201cWhy do you expect accuracy from journalists?\u201d retorted Laviv, who during the Trump administration retained 27 U.S. lobbyists and consultants to run a $9.5 million lobbying campaign on behalf of President Joseph Kabila, the corrupt, brutal leader of the Democratic Republic of Congo, who used surveillance equipment supplied by the Mer Group to monitor his regime\u2019s opponents. Among those Laviv involved were Rudy Giuliani, Trump\u2019s former personal lawyer, fixer, and dirt-digger, and Robert Stryk, whose clients have included Saudi Arabia and El Salvador\u2019s state intelligence agency under crypto-fascist President Nayib Bukele.\n\nYudelson, who also reportedly partnered with Prince in an attempt to buy weapons for resale from Belarus dictator Aleksandr Lukashenko (\u301017\u2020whom the two men praised for bringing \u201cpeace, stability, and prosperity to your country\u2020matthewcole.substack.com\u3011\u201d), predicted the tunnel-flooding proposal would be shot down by the \u201cIsraeli left,\u201d a force he labeled the country\u2019s \u201cbiggest enemy,\u201d ahead of Hamas and Iran, over concerns about the environmental impact in Gaza. \u201cWho gives a shit about that,\u201d Yudelson posted to the group. \u201cIf it was up to me \u2026 I would flood them with Napalm! I would burn all those bastards, and have everything above ground, everything left of Gaza, collapse into this fiery hell pit and burn!\u201d\n\nEven that was deemed to be insufficiently hawkish for some Off Leash participants. In a lengthy tirade on February 14, Tzvi Lev, who formerly worked in Israel\u2019s Ministry of Foreign Affairs, said it was rare to see a people as \u201ctwisted\u201d as Palestinians, whose culture \u201cworships death and bloodshed.\u201d The only solution, he wrote, was to \u201ccompletely uproot the radical Islamic Palestinian nationalism,\u201d which was possible to do based on the historical precedent of Japan, which \u201cwent from being nuked twice to one of the world\u2019s strongest economies within two decades.\u201d Dropping nuclear weapons on what\u2019s left of densely populated Gaza, which is roughly the size of Detroit, would be a war crime and kill huge numbers of civilians.\n\nYoav Goldhorn, \u301018\u2020the former Israeli intelligence officer\u2020www.linkedin.com\u3011, also cited \u201cfucking nukes in Japan\u201d as an appropriate remedy to the Palestinian problem. Sadly, wrote Goldhorn, whose LinkedIn profile says he has \u201ca passion for strategic planning,\u201d there was no one in the Israeli government with \u201cthe balls nor vision to go all those extra miles.\u201d\n\nIran: Off Leash\u2019s Public Enemy No. 1 \n\nIt was hard to keep track of all the wars, invasions, covert operations, coups, and assassinations Off Leash members favored. One region ripe for a bit of good old-fashioned Western

intervention was Africa, which was described as a \u201cpot about to boil over\u201d by \u301019\u2020Emma Priestley\u2020otp.investis.com\u3011, who posts as \u201cCustomer\u201d in the group chat and is the \u301019\u2020CEO of GoldStone Resources Limited\u2020otp.investis.com\u3011 in Jersey, the English Channel island that is one of the world\u2019s most popular offshore secrecy havens. China would have to be taken down a peg as well, particularly as Biden wasn\u2019t going to stop the country \u201cfrom doing a damn thing,\u201d and indeed he would pave the way for it to do \u201cwhatever it is they want to accomplish,\u201d posted Randy Couture, the former UFC heavyweight champion and actor who had the role of arsonist and killer Jason Duclair in the TV series Hawaii Five-0 and starred in the 2011 movie Setup with 50 Cent and Bruce Willis.\n\nBut the No. 1 target on Off Leash\u2019s hit list, by orders of magnitude, was Iran. \u201cFollow the source of evil,\u201d wrote Montana Congressman Ryan Zinke, who served as interior secretary under Trump. \u201cHamas. Hezbollah. Houthis. (Reuters photo)]\n\nErik Prince in New York City, November 2019. (Reuters photo) \n\n38154 \n\nTAIPEI (Taiwan News) \u2014 In a video interview on the U.K.\u2019s GB News filmed on Thursday (Dec. 28), Erik Prince, a military contractor known for founding the Blackwater organization, said he expects China to target Taiwan militarily in the spring of 2024.\n\nPrince, a military strategist and former U.S. Navy Seal, was being \u301027\u2020interviewed\u2020www.gbnews.com\u3011 by Jacob Rees-Mogg about U.S. foreign policy setbacks under the Biden administration and the pressures faced by the U.S. military around the world. Prince said that amid declining U.S. credibility abroad, Chinese leader Xi Jinping (\u7fd2\u8fd1\u5e73) may try to \u201cbluster his way\u201d into a takeover of Taiwan, saying that \u201cit must feel like the door is wide open for them to do whatever it is they want to do.\u201d\n\nPrince\u2019s comments came one day after Xi Jinping, speaking at the Great Hall of the People in Beijing, resolutely vowed to stop anyone from \u201cmaking Taiwan secede from China,\u201d calling \u301028\u2020unification\u3011 an \u201cinevitable trend.\u201d\n\nIn Prince\u2019s remarks, he criticized the U.S. \u201cinability to finish properly in Iraq and Afghanistan,\u201d which he credits for the increase of military threats across the world that have taken shape under the Biden administration. In addition to ongoing conflicts involving Ukraine and Israel, Prince also mentioned escalating conflicts in the wider Middle East, which now include attacks by Houthi rebels targeting shipping vessels in the Red Sea.\n\nSpeaking about

a timeline for a potential attack by China on Taiwan, Prince said May or June 2024 is a likely window for Beijing to begin cross-strait naval operations. "If they are going to take Taiwan by force, I would predict that they are going to do something this spring," Prince said, as reported by \u301029\u2020GB News\u2020www.gbnews.com\u3011.\n\nThe day after Prince made his prediction on GB News, China announced a shakeup in its military command. With only two weeks before Taiwan's elections, Beijing appointed PLAN \u301030\u2020Admiral Dong Jun\u3011 as its newest Minister of National Defense.\n\nAfter leaving Blackwater and selling the company in 2010, Erik Prince\u2019s connections to CIA training programs were revealed in 2013. Around 2014, Prince became the chairman of a private security and logistics firm called the Frontier Services Group, a Chinese-owned company based in Hong Kong and involved in private security contract work in Africa.\n\nPrince stepped down as chairman of the Frontier Services Group in April 2021 but is still the head of a similar organization called the Frontier Resource Group, which has almost no online footprint as of publication.\n\n\u301031\u2020# Chinese invasion of Taiwan\u3011\u301032\u2020# Biden Administration\u3011\u301033\u2020# Erik Prince\u3011\u301034\u2020# Xi Jinping\u3011\n\n# Related Articles\n\n* * *\n\n\u301035\u2020Ex-Australia PM calls for effective deterrent against China\u2019s threats to annex Taiwan Oct. 22, 2024 14:56\u3011\u301036\u2020Harris says Taiwan 'has right to defend itself' Oct. 17, 2024 10:41\u3011\u301037\u2020Trump claims China will not invade Taiwan if he is elected Oct. 16, 2024 16:43\u3011\u301038\u2020Former AIT chair says Article 8 of China\u2019s Anti-Secession Law is time bomb Oct. 16, 2024 13:43\u3011\u301039\u2020Poll shows 36% of Americans support sending troops to defend Taiwan Oct. 9, 2024 16:26\u3011\u301040\u2020Harris backs 'Taiwan's ability to defend itself' Oct. 8, 2024 14:27\u3011\n\n# MOST READ\n\n* * *\n\n\u301041\u2020Harvard punishes Taiwanese American student for disrupting Chinese ambassador\u3011\u301042\u2020Tropical Storm Trami forecast to steer south of Taiwan\u3011\u301043\u2020Tropi", "title": "Erik Prince says China likely to attack Taiwan in 2024\n | Taiwan News | Dec. 31, 2023 16:58", "tether_id": null}, "status": "finished_successfully", "end_turn": null, "weight": 0.0, "metadata": {"_cite_metadata": {"citation_format": {"name": "tether_og"}, "metadata_list": [{"type": "webpage", "title": "Erik Prince says China likely to attack Taiwan in 2024\n | Taiwan News | Dec. 31, 2023 16:58", "url": "https://www.taiwannews.com.tw/en/news/5069317", "text": "\n\u301021\u2020Opinion\u3011\n\n\u301022\u2020World\u3011\n\n\u301023\u2020Sponsored \u3011\n\n[Image 4: search]\n\nMORE\n\n[Image 5: search]\n\n\u30102\u2020Politics\u3011[Image 6: arrow-down]\n\n\u30103\u2020All\u3011\u30104\u2020Foreign Affairs\u3011\u30105\u2020Cross-strait\u3011\n\n\u30106\u2020Business\u3011[Image 7: arrow-down]\n\n\u30107\u2020All\u3011\u30108\u2020Investing\u3011\n\n\u30109\u2020Tech\u3011 \n\n\u301010\u2020Society\u3011\n\n\u301011\u2020Health\u3011\n\n\u301012\u2020Culture \u3011\n\n\u301013\u2020Environment\u3011\n\n\u301014\u2020Lifestyle\u3011[Image 8: arrow-down]\n\n\u301015\u2020All\u3011\u301016\u2020Cuisine\u3011\u301017\u2020Travel\u3011\ u301018\u2020Entertainment\u3011\u301019\u2020Variety\u3011\u301020\u2020Sports\u3011\ n\n\u301021\u2020Opinion\u3011\n\n\u301022\u2020World\u3011\n\n\u301023\u2020Sponsored \u3011\n\n[Image 9: FB][Image 10: X][Image 11: Youtube][Image 12: IG]\n\nLoading...\n\n\u301024\u2020About

In addition to ongoing conflicts involving Ukraine and Israel, Prince also mentioned escalating conflicts in the wider Middle East, which now include attacks by Houthi rebels targeting shipping vessels in the Red Sea.\n\nSpeaking about a timeline for a potential attack by China on Taiwan, Prince said May or June 2024 is a likely window for Beijing to begin cross-strait naval operations. "If they are going to take Taiwan by force, I would predict that they are going to do something this spring," Prince said, as reported by \u301029\u2020GB News\u2020www.gbnews.com\u3011.\n\nThe day after Prince made his prediction on GB News, China announced a shakeup in its military command. With only two weeks before Taiwan's elections, Beijing appointed PLAN \u301030\u2020Admiral Dong Jun\u3011 as its newest Minister of National Defense.\n\nAfter leaving Blackwater and selling the company in 2010, Erik Prince\u2019s connections to CIA training programs were revealed in 2013. Around 2014, Prince became the chairman of a private security and logistics firm called the Frontier Services Group, a Chinese-owned company based in Hong Kong and involved in private security contract work in Africa.\n\nPrince stepped down as chairman of the Frontier Services Group in April 2021 but is still the head of a similar organization called the Frontier Resource Group, which has almost no online footprint as of publication.\n\n\u301031\u2020# Chinese invasion of Taiwan\u3011\u301032\u2020# Biden Administration\u3011\u301033\u2020# Erik Prince\u3011\u301034\u2020# Xi Jinping\u3011\n\n# Related Articles\n\n* * *\n\n\u301035\u2020Ex-Australia PM calls for effective deterrent against China\u2019s threats to annex Taiwan Oct. 22, 2024 14:56\u3011\u301036\u2020Harris says Taiwan

Three guards were convicted in October 2014 of 14 manslaughter charges, and another of murder, in a U.S. court in 2019.[24][25]\n\nThe criticism continued after president \u3010127\u2020Barack Obama\u3011 took office in 2009. Prince said he believes that much of this criticism stems from politics. "I put myself and my company at the CIA's disposal for some very risky missions", Prince told \u3010128\u2020Vanity Fair\u3011 for its January 2010 issue. "But when it became politically expedient to do so, someone threw me under the bus."[26] Blackwater lost a $1 billion contract with the State Department to protect American diplomatic personnel in 2009, after the Iraqi government refused to renew the company's operating license.[27] Nevertheless, in 2010 the \u3010129\u2020Obama administration\u3011 awarded the company a $120 million \u3010130\u2020United States Department of State\u3011 security contract and about $100 million in new CIA work.[21]\n\nIn 2012 Blackwater's successor company, Academi, paid a combined $49.5 million to settle charges of arms trafficking violations dating back to the period Prince was CEO and chairman of the company.[28] In 2020 Prince again became the focus of an FBI investigation into arms trafficking violations related to the conversion of crop dusters into military aircraft.[29] According to a UN report, Prince also violated a UN arms embargo by aiding a plot to arm a Libyan warlord attempting to overthrow the US and UN backed government in Libya.[30]\n\nPrince has defended Blackwater's work, pointing to the fact that during the course of 40,000 personal security missions, only 200 involved guards firing their weapons. He has said, "No one under our care was ever killed or injured. We kept them safe, all the while we had 30 of our men killed."[19]\n\nPrince, according to author \u3010131\u2020Robert Young Pelton\u3011, reportedly thinks of Blackwater's relationship to the military as something similar to \u3010132\u2020FedEx\u3011's relationship to the

\u3010133\u2020U.S. Post Office\u3011: "an efficient, privatized solution to sclerotic and wasteful government bureaucracy."[31] He credits his father's competitive streak in the automotive business with the inspiration to design a lighter, faster army.[32]\n\nPrince resigned as CEO of Blackwater on March 2, 2009, and remained chairman of the board until he sold the company in late 2010 to a group of investors.[33]\n\nAs Americans and others were being evacuated following the August 2021 \u3010134\u2020collapse of the Afghan government\u3011, Prince said he was offering seats on a chartered flight for $6,500 per person.[34]\n\n### Disclosure as part of a covert CIA task force\n\n[\u3010135\u2020edit\u3011]\n\nPrince was part of a CIA task force created to engage in \u3010136\u2020targeted killings\u3011 of suspected terrorists. Prince alleged that the House intelligence congressional committee leaked his name to the press.[35] Prince has said that he is convinced that former CIA director \u3010137\u2020Leon Panetta\u3011 revealed him as a CIA asset, after shutting down the covert CIA training operation in 2009.[20]\n\n### Private security for the United Arab Emirates\n\n[\u3010138\u2020edit\u3011]\n\nAfter Blackwater faced mounting legal problems in the United States, Prince was hired by the crown prince of Abu Dhabi and moved to Abu Dhabi in 2010. His task was to assemble an 800-member group of foreign troops for the U.A.E., which was planned months before the \u3010139\u2020Arab Spring\u3011.[36] He helped the UAE found a new company named Reflex Responses, or R2, with 51 percent local ownership, carefully avoiding his name on corporate documents. He worked to oversee the effort and recruit troops, among others from \u3010140\u2020Executive Outcomes\u3011, a former South African mercenary firm hired by several African governments during the 1990s to defeat violent rebellions in addition to protecting oil and diamond reserves. \n\nAs of January 2011, Prince was training a force of 2,000 Somalis for anti-piracy operations in the Gulf of Aden. The program was funded by several Arab countries, including the \u3010141\u2020United Arab Emirates\u3011 and backed by the United States. Prince's spokesman, \u3010142\u2020Mark Corallo\u3011, said Prince had "no financial role" in the project and declined to answer any questions about Prince's involvement. John Burnett of Maritime Underwater Security Consultants said, "There are 34 nations with naval assets trying to stop piracy and it can only be stopped on land. With Prince's background and rather illustrious reputation, I think it's quite possible that it might work."[37]\n\n### Private equity investor in Africa\n\n[\u3010143\u2020edit\u3011]\n\nPrince leads a private equity firm called Frontier Resource Group, and until April 13, 2021, he was also chairman of \u301090\u2020Frontier Services Group\u3011 Ltd, a Bermuda-incorporated logistics and transport company listed on the \u3010144\u2020Hong Kong Stock Exc", "title": "Erik Prince - Wikipedia", "tether_id": null}, "status": "finished_successfully", "end_turn": null, "weight": 0.0, "metadata": {"_cite_metadata": {"citation_format": {"name": "tether_og"}, "metadata_list": [{"type": "webpage", "title": "Erik Prince - Wikipedia", "url": "https://en.wikipedia.org/wiki/Erik_Prince", "text": "\nBlackwater came under increasing criticism after the \u3010126\u2020Nisour Square massacre\u3011 in September 2007, in which Blackwater employees opened fire in a crowded square in Baghdad, killing 17 Iraqi civilians and seriously wounding 20 more. Blackwater and an ally of former US President Donald Trump, over his alleged involvement in illegal arms sales and money laundering. The probe is also examining Prince\u2019s connections with foreign intelligence and military entities, including his reported support for rogue military commander Khalifa Haftar.\n\nAccording to the \u201cWashington Babylon\u201d newspaper, the investigation focuses on three main areas. Firstly, Prince is suspected of facilitating the illegal transfer of weapons to Haftar, a violation of the international arms embargo on Libya. Prince is alleged to have played a significant role in assisting Haftar during his 2019 attempt to overthrow Libya\u2019s internationally recognized government.\n\nThe investigation also scrutinizes whether Prince\u2019s laundered money is linked to his support for Haftar. The United Nations has estimated the cost of Prince\u2019s assistance to Haftar at $80 million, with much of the funding reportedly originating from the United Arab Emirates.\n\nAdditionally, the FBI is exploring the broader relationship between Prince and Haftar, particularly Prince\u2019s involvement in providing military support and operational planning for Haftar\u2019s forces.\n\nTags: \u301026\u2020Khalifa Haftar\u3011 \u301027\u2020blackwater\u3011 \u301028\u2020mercenaries\u3011 \n\n### Read Also:\n\n\u301029\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301029\u2020Amnesty International urges Haftar to unveil fate of Mahdi Al-Barghathi \u3011\n\nOctober 03, 2024 0 comment\n\n\u301030\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301030\u2020Canada accuses Chinese officials of trying to smuggle drones to Haftar\u3011\n\nSeptember 28, 2024 0 comment\n\n\u301031\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301031\u2020Commander of US AFRICOM reviews with Haftar strengthening US-Libyan partnership\u3011\n\nAugust 28, 2024 0 comment\n\n\u301032\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301032\u2020Haftar rejects change of CBL governor in meeting with UN envoy\u3011\n\nAugust 27, 2024 0 comment\n\n\u301033\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301033\u2020Haftar's son meets with Turkish Foreign Minister in Ankara\u3011\n\nJuly 25, 2024 0 comment\n\n\u301034\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301034\u2020Italy blocks shipment of Chinese drones bound for Haftar\u3011\n\nJuly 02, 2024 0 comment\n\n### Must read\n\n#### \u301035\u2020Libyan Football Federation apologizes to fans for disruption caused by Nigerian Football Federation\u3011\n\nOctober 15, 2024 \u301035\u2020 0\u3011 0 Shares\n\n\u301035\u2020 \u3011 \n\nThe Libyan Football Federation condemned the Nigerian Football Federation's actions in refusing to play the return match in the African Cup of Nations qualifiers, stressi\n\n#### \u301036\u2020Sudanese army seizes weapons coming from Benghazi to back up Hemedti's RSF \u3011\n\nOctober 13, 2024 \u301036\u2020 0\u3011 0 Shares\n\n\u301036\u2020 \u3011 \n\nThe Sudanese newspaper "Al-Mandara News" reported that the Sudanese army seized arms shipments belonging to the Rapid Support Forces (RSF) under the command of Hemedti, s\n\n#### \u301037\u2020Dbeibah: We've started resolving years-long obstacles in Libya's political crisis\u3011\n\nOctober 12, 2024 \u301037\u2020 0\u3011 0 Shares\n\n\u301037\u2020 \u3011 \n\n\u200eThe Libyan Prime Minister Abdul Hamid Dbeibah said that the Libyan political scene "is entering a new phase, after his government has begun taking decisive steps to reso\n\n### News In Brief\n\n#### \u301038\u2020Koury reviews Libyan developments with UAE Minister of State in Abu Dhabi\u3011\n\nOctober 15, 2024\n\n\u301038\u2020 \u3011 \n\nThe Deputy Special Representative of the Secretary-General and Acting Head of the United Nations Support Mission in Libya (UNSMIL), Stephanie Koury, has held a meeting in\n\n#### \u301039\u2020Al-Baour discusses with Undersecretary of British Foreign Office

Fortunately, I obtained details about a large slice of the chat group\u2019s discussions over the past six months. Here\u2019s some of what they discussed.\n\nSolving the Middle East Crisis: Nukes, Napalm, and Other \u201cExtreme Measures\u201d\n\nOff Leash was launched less than two months after Israel commenced its assault on Gaza following Hamas\u2019s deadly October 7 attack on Israel, and that topic has been one of the group chat\u2019s main concerns since it was established by Prince on December 2. Five days later, Omer Laviv, an executive with the Mer Group, a private security company with many former Israeli intelligence officials in its senior ranks, posted \u301016\u2020a story\u2020www.thetimes.co.uk\u3011 to the group that ran two days earlier in The Times of London and reported Prince had been seeking to sell the Israel Defense Forces equipment for a plan he\u2019d devised to flood Hamas tunnels with seawater.\n\n\u201cI was involved,\u201d remarked Moti Kahana, the Israeli American businessman who runs GDC, the firm where Off Leash member Stuart Seldowitz previously worked. Kahana pointedly added that at least one part of The Times\u2019 story was false\u2014for example, Prince had offered to donate the equipment, not sell it, he said.\n\n\u201cWhy do you expect accuracy from journalists?\u201d retorted Laviv, who during the Trump administration retained 27 U.S. lobbyists and consultants to run a $9.5 million lobbying campaign on behalf of President Joseph Kabila, the corrupt, brutal leader of the Democratic Republic of Congo, who used surveillance equipment supplied by the Mer Group to monitor his regime\u2019s opponents. Among those Laviv involved were Rudy Giuliani, Trump\u2019s former personal lawyer, fixer, and dirt-digger, and Robert Stryk, whose clients have included Saudi Arabia and El Salvador\u2019s state intelligence agency under crypto-fascist President Nayib Bukele.\n\nYudelson, who also reportedly partnered with Prince in an attempt to buy weapons for resale from Belarus dictator Aleksandr Lukashenko (\u301017\u2020whom the

two men praised for bringing \u201cpeace, stability, and prosperity to your country\u2020matthewcole.substack.com\u3011\u201d), predicted the tunnel-flooding proposal would be shot down by the \u201cIsraeli left,\u201d a force he labeled the country\u2019s \u201cbiggest enemy,\u201d ahead of Hamas and Iran, over concerns about the environmental impact in Gaza. \u201cWho gives a shit about that,\u201d Yudelson posted to the group. \u201cIf it was up to me \u2026 I would flood them with Napalm! I would burn all those bastards, and have everything above ground, everything left of Gaza, collapse into this fiery hell pit and burn!\u201d\n\nEven that was deemed to be insufficiently hawkish for some Off Leash participants. In a lengthy tirade on February 14, Tzvi Lev, who formerly worked in Israel\u2019s Ministry of Foreign Affairs, said it was rare to see a people as \u201ctwisted\u201d as Palestinians, whose culture \u201cworships death and bloodshed.\u201d The only solution, he wrote, was to \u201ccompletely uproot the radical Islamic Palestinian nationalism,\u201d which was possible to do based on the historical precedent of Japan, which \u201cwent from being nuked twice to one of the world\u2019s strongest economies within two decades.\u201d Dropping nuclear weapons on what\u2019s left of densely populated Gaza, which is roughly the size of Detroit, would be a war crime and kill huge numbers of civilians.\n\nYoav Goldhorn, \u301018\u2020the former Israeli intelligence officer\u2020www.linkedin.com\u3011, also cited \u201cfucking nukes in Japan\u201d as an appropriate remedy to the Palestinian problem. Sadly, wrote Goldhorn, whose LinkedIn profile says he has \u201ca passion for strategic planning,\u201d there was no one in the Israeli government with \u201cthe balls nor vision to go all those extra miles.\u201d\n\nIran: Off Leash\u2019s Public Enemy No. 1 \n\nIt was hard to keep track of all the wars, invasions, covert operations, coups, and assassinations Off Leash members favored. One region ripe for a bit of good old-fashioned Western intervention was Africa, which was described as a \u201cpot about to boil over\u201d by \u301019\u2020Emma Priestley\u2020otp.investis.com\u3011, who posts as \u201cCustomer\u201d in the group chat and is the \u301019\u2020CEO of GoldStone Resources Limited\u2020otp.investis.com\u3011 in Jersey, the English Channel island that is one of the world\u2019s most popular offshore secrecy havens. China would have to be taken down a peg as well, particularly as Biden wasn\u2019t going to stop the country \u201cfrom doing a damn thing,\u201d and indeed he would pave the way for it to do \u201cwhatever it is they want to accomplish,\u201d posted Randy Couture, the former UFC heavyweight champion and actor who had the role of arsonist and killer Jason Duclair in the TV series Hawaii Five-0 and starred in the 2011 movie Setup with 50 Cent and Bruce Willis.\n\nBut the No. 1 target on Off Leash\u2019s hit list, by orders of magnitude, was Iran. \u201cFollow the source of evil,\u201d wrote Montana Congressman Ryan Zinke, who served as interior secretary under Trump. \u201cHamas. Hezbollah. Houthis. Iran is the center of gravity.\u201d\n\n\u201cZinke is right,\u201d agreed Tennessee Congressman Mark Green of the House Freedom Caucus.\n\nYemen\u2019s Houthi rebels", "pub_date": null, "extra": {"cited_message_idx": 7, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}, {"start_ix": 1038, "end_ix": 1048, "citation_format_type": "tether_og", "metadata": {"type": "webpage", "title": "Erik Prince says China likely to attack Taiwan in 2024\n | Taiwan News | Dec. 31, 2023 16:58", "url": "https://www.taiwannews.com.tw/en/news/5069317", "text": "\n\u301021\u2020Opinion\u3011\n\n\u301022\u2020World\u3011\n\n\u301023\u2020Sponsored \u3011\n\n[Image 4: search]\n\nMORE\n\n[Image 5: search]\n\n\u30102\u2020Politics\u3011[Image 6: arrow-

(Reuters photo)]\n\nErik Prince in New York City, November 2019. (Reuters photo) \n\n38154 \n\nTAIPEI (Taiwan News) \u2014 In a video interview on the U.K.\u2019s GB News filmed on Thursday (Dec. 28), Erik Prince, a military contractor known for founding the Blackwater organization, said he expects China to target Taiwan militarily in the spring of 2024.\n\nPrince, a military strategist and former U.S. Navy Seal, was being \u301027\u2020interviewed\u2020www.gbnews.com\u3011 by Jacob Rees-Mogg about U.S. foreign policy setbacks under the Biden administration and the pressures faced by the U.S. military around the world. Prince said that amid declining U.S. credibility abroad, Chinese leader Xi Jinping (\u7fd2\u8fd1\u5e73) may try to \u201cbluster his way\u201d into a takeover of Taiwan, saying that \u201cit must feel like the door is wide open for them to do whatever it is they want to do.\u201d\n\nPrince\u2019s comments came one day after Xi Jinping, speaking at the Great Hall of the People in Beijing, resolutely vowed to stop anyone from \u201cmaking Taiwan secede from China,\u201d calling \u301028\u2020unification\u3011 an \u201cinevitable trend.\u201d\n\nIn Prince\u2019s remarks, he criticized the U.S. \u201cinability to finish properly in Iraq and Afghanistan,\u201d which he credits for the increase of military threats across the world that have taken shape under the Biden administration. In addition to ongoing conflicts involving Ukraine and Israel, Prince also mentioned escalating conflicts in the wider Middle East, which now include attacks by Houthi rebels targeting shipping vessels in the Red Sea.\n\nSpeaking about a timeline for a potential attack by China on Taiwan, Prince said May or June 2024 is a likely window for Beijing to begin cross-strait naval operations. "If they are going to take Taiwan by force, I would predict that they are going to do something this spring," Prince said, as reported by \u301029\u2020GB News\u2020www.gbnews.com\u3011.\n\nThe day after Prince made his prediction on GB News, China announced a shakeup in its military command. With only two weeks before Taiwan's elections, Beijing appointed PLAN \u301030\u2020Admiral Dong Jun\u3011 as its newest Minister of National Defense.\n\nAfter leaving Blackwater and selling

the company in 2010, Erik Prince\u2019s connections to CIA training programs were revealed in 2013. Around 2014, Prince became the chairman of a private security and logistics firm called the Frontier Services Group, a Chinese-owned company based in Hong Kong and involved in private security contract work in Africa.\n\nPrince stepped down as chairman of the Frontier Services Group in April 2021 but is still the head of a similar organization called the Frontier Resource Group, which has almost no online footprint as of publication.\n\n\u301031\u2020# Chinese invasion of Taiwan\u3011\u301032\u2020# Biden Administration\u3011\u301033\u2020# Erik Prince\u3011\u301034\u2020# Xi Jinping\u3011\n\n# Related Articles\n\n* *\n\n\u301035\u2020Ex-Australia PM calls for effective deterrent against China\u2019s threats to annex Taiwan Oct. 22, 2024 14:56\u3011\u301036\u2020Harris says Taiwan 'has right to defend itself' Oct. 17, 2024 10:41\u3011\u301037\u2020Trump claims China will not invade Taiwan if he is elected Oct. 16, 2024 16:43\u3011\u301038\u2020Former AIT chair says Article 8 of China\u2019s Anti-Secession Law is time bomb Oct. 16, 2024 13:43\u3011\u301039\u2020Poll shows 36% of Americans support sending troops to defend Taiwan Oct. 9, 2024 16:26\u3011\u301040\u2020Harris backs 'Taiwan's ability to defend itself' Oct. 8, 2024 14:27\u3011\n\n# MOST READ\n\n* * *\n\n\u301041\u2020Harvard punishes Taiwanese American student for disrupting Chinese ambassador\u3011\u301042\u2020Tropical Storm Trami forecast to steer south of Taiwan\u3011\u301043\u2020Tropi", "pub_date": null, "extra": {"cited_message_idx": 8, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}], "content_references": [{"matched_text": "\u30106\u2020source\u3011", "start_idx": 1018, "end_idx": 1028, "alt": null, "type": "webpage_extended", "title": "FBI investigates Blackwater's Erik Prince over alleged support for Haftar | The Libya Observer", "url": "https://libyaobserver.ly/news/fbi-investigates-blackwaters-erik-prince-over-alleged-support-haftar", "pub_date": null, "snippet": " * \u301019\u2020Education\u3011 \n * Multimedia\n\n   * \u301020\u2020Images\u3011 \n * \u301021\u2020Videos\u3011 \n\n * \u301022\u2020Print edition\u3011 \n\n * Menu\n\nnewsbeat Drupal\n\nJust another Drupal site\n\n * Search\n\nSearch\n\nCategory: \u30105\u2020News\u3011 \n\n# FBI investigates Blackwater's Erik Prince over alleged support for Haftar\n\nby \u301023\u2020SafaAlharathy\u3011 Sun, 18/08/2024 - 14:14\n\n * \u301024\u2020Share\u2020www.facebook.com\u3011\n * \u301025\u2020Tweet\u2020twitter.com\u3011\n\n[Image 0: fbi] \n\nThe FBI has launched an investigation into Erik Prince, the former head of the private security firm Blackwater and an ally of former US President Donald Trump, over his alleged involvement in illegal arms sales and money laundering. The probe is also examining Prince\u2019s connections with foreign intelligence and military entities, including his reported support for rogue military commander Khalifa Haftar.\n\nAccording to the \u201cWashington Babylon\u201d newspaper, the investigation focuses on three main areas. Firstly, Prince is suspected of facilitating the illegal transfer of weapons to Haftar, a violation of the international arms embargo on Libya. Prince is alleged to have played a significant role in assisting Haftar during his 2019 attempt to overthrow Libya\u2019s internationally recognized government.\n\nThe investigation also scrutinizes whether Prince\u2019s laundered money is linked to his support for Haftar. The United Nations has estimated the cost of Prince\u2019s assistance to Haftar at $80 million, with much of the funding reportedly originating from the United Arab Emirates.\n\nAdditionally, the FBI is exploring the broader relationship between

Prince and Haftar, particularly Prince\u2019s involvement in providing military support and operational planning for Haftar\u2019s forces.\n\nTags: \u301026\u2020Khalifa Haftar\u3011 \u301027\u2020blackwater\u3011 \u301028\u2020mercenaries\u3011 \n\n### Read Also:\n\n\u301029\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301029\u2020Amnesty International urges Haftar to unveil fate of Mahdi Al-Barghathi \u3011\n\nOctober 03, 2024 0 comment\n\n\u301030\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301030\u2020Canada accuses Chinese officials of trying to smuggle drones to Haftar\u3011\n\nSeptember 28, 2024 0 comment\n\n\u301031\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301031\u2020Commander of US AFRICOM reviews with Haftar strengthening US-Libyan partnership\u3011\n\nAugust 28, 2024 0 comment\n\n\u301032\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301032\u2020Haftar rejects change of CBL governor in meeting with UN envoy\u3011\n\nAugust 27, 2024 0 comment\n\n\u301033\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301033\u2020Haftar's son meets with Turkish Foreign Minister in Ankara\u3011\n\nJuly 25, 2024 0 comment\n\n\u301034\u2020 \u3011 \u30105\u2020News\u3011\n\n#### \u301034\u2020Italy blocks shipment of Chinese drones bound for Haftar\u3011\n\nJuly 02, 2024 0 comment\n\n### Must read\n\n#### \u301035\u2020Libyan Football Federation apologizes to fans for disruption caused by Nigerian Football Federation\u3011\n\nOctober 15, 2024 \u301035\u2020 0\u3011 0 Shares\n\n\u301035\u2020 \u3011 \n\nThe Libyan Football Federation condemned the Nigerian Football Federation's actions in refusing to play the return match in the African Cup of Nations qualifiers, stressi\n\n#### \u301036\u2020Sudanese army seizes weapons coming from Benghazi to back up Hemedti's RSF \u3011\n\nOctober 13, 2024 \u301036\u2020 0\u3011 0 Shares\n\n\u301036\u2020 \u3011 \n\nThe Sudanese newspaper "Al-Mandara News" reported that the Sudanese army seized arms shipments belonging to the Rapid Support Forces (RSF) under the command of Hemedti, s\n\n#### \u301037\u2020Dbeibah: We've started resolving years-long obstacles in Libya's political crisis\u3011\n\nOctober 12, 2024 \u301037\u2020 0\u3011 0 Shares\n\n\u301037\u2020 \u3011 \n\n\u200eThe Libyan Prime Minister Abdul Hamid Dbeibah said that the Libyan political scene "is entering a new phase, after his government has begun taking decisive steps to reso\n\n### News In Brief\n\n#### \u301038\u2020Koury reviews Libyan developments with UAE Minister of State in Abu Dhabi\u3011\n\nOctober 15, 2024\n\n\u301038\u2020 \u3011 \n\nThe Deputy Special Representative of the Secretary-General and Acting Head of the United Nations Support Mission in Libya (UNSMIL), Stephanie Koury, has held a meeting in\n\n#### \u301039\u2020Al-Baour discusses with Undersecretary of British Foreign Office bilateral cooperation \u3011\n\nOctober 15, 2024\n\n\u301039\u2020 \u3011 \n\nThe Acting Minister of Foreign Affairs in the Government of National Unity (GNU), Taher Al-Baour, has discussed with the Undersecretary of the British Foreign Office, Phi\n\n#### \u301040\u2020New UN Humanitarian Coordinator meets with Acting Minister of Foreign Affairs\u3011\n\nOctober 15, 2024\n\n\u301040\u2020 \u3011 \n\nThe Acting Special Representative of the Secretary-General of the United Nations and Humanitarian Coordinator in Libya, Aeneas Chapinga Chuma, has met with the Acting Min\n\n\u301041\u2020MORE\u3011 \n\n### Main Menu\n\n * \u30104\u2020Home\u3011\n * \u301042\u2020About Us\u3011\n * \u301042\u2020Monthly Archive\u3011\n * \u301043\u2020Exchange Rates\u3011\n * \u301044\u2020Advertise With Us\u3011\n * \u301045\u2020Terms & Conditions\u3011\n\n### Categories\n\n * \u30105\u2020News\u3011\n * \u30106\u2020Economy\u3011\n * \u30107\u2020Sports\u3011\n * \u30108\u2020Opinions\u3011\n *

Here\u2019s some of what they discussed.\n\nSolving the Middle East Crisis: Nukes, Napalm, and Other \u201cExtreme Measures\u201d\n\nOff Leash was launched less than two months after Israel commenced its assault on Gaza following Hamas\u2019s deadly October 7 attack on Israel, and that topic has been one of the group chat\u2019s main concerns since it was established by Prince on December 2. Five days later, Omer Laviv, an executive with the Mer Group, a private security company with many former Israeli intelligence officials in its senior ranks, posted \u301016\u2020a story\u2020www.thetimes.co.uk\u3011 to the group that ran two days earlier in The Times of London and reported Prince had been seeking to sell the Israel Defense Forces equipment for a plan he\u2019d devised to flood Hamas tunnels with seawater.\n\n\u201cI was involved,\u201d remarked Moti Kahana, the Israeli American businessman who runs GDC, the firm where Off Leash member Stuart Seldowitz previously worked. Kahana pointedly added that at least one part of The Times\u2019 story was false\u2014for example, Prince had offered to donate the equipment, not sell it, he said.\n\n\u201cWhy do you expect accuracy from journalists?\u201d retorted Laviv, who during the Trump administration retained 27 U.S. lobbyists and consultants to run a $9.5 million lobbying campaign on behalf of President Joseph Kabila, the corrupt, brutal leader of the Democratic Republic of Congo, who used surveillance equipment supplied by the Mer Group to monitor his regime\u2019s opponents. Among those Laviv involved were Rudy Giuliani, Trump\u2019s former personal lawyer, fixer, and dirt-digger, and Robert Stryk, whose clients have included Saudi Arabia and El Salvador\u2019s state intelligence agency under crypto-fascist President Nayib Bukele.\n\nYudelson, who also reportedly partnered with Prince in an attempt to buy weapons for resale from Belarus dictator Aleksandr Lukashenko (\u301017\u2020whom the two men praised for bringing \u201cpeace, stability, and prosperity to your country\u2020matthewcole.substack.com\u3011\u201d), predicted the tunnel-flooding proposal would be shot down by the \u201cIsraeli left,\u201d a force he labeled the country\u2019s \u201cbiggest enemy,\u201d ahead of Hamas and Iran, over concerns about the environmental impact in Gaza. \u201cWho gives a shit about that,\u201d Yudelson posted to the group. \u201cIf it was up to me \u2026 I would flood them with Napalm! I would burn all those bastards, and have everything above ground, everything left of Gaza, collapse into this fiery hell pit and burn!\u201d\n\nEven that was deemed to be insufficiently hawkish for some Off Leash participants. In a lengthy tirade on February 14, Tzvi Lev, who formerly worked in Israel\u2019s Ministry of Foreign Affairs, said it was rare to see a people as \u201ctwisted\u201d as Palestinians, whose culture \u201cworships death and bloodshed.\u201d The only solution, he wrote, was to \u201ccompletely uproot the radical Islamic Palestinian nationalism,\u201d which was possible to do based on the historical precedent of Japan, which \u201cwent

from being nuked twice to one of the world\u2019s strongest economies within two decades.\u201d Dropping nuclear weapons on what\u2019s left of densely populated Gaza, which is roughly the size of Detroit, would be a war crime and kill huge numbers of civilians.\n\nYoav Goldhorn, \u301018\u2020the former Israeli intelligence officer\u2020www.linkedin.com\u3011, also cited \u201cfucking nukes in Japan\u201d as an appropriate remedy to the Palestinian problem. Sadly, wrote Goldhorn, whose LinkedIn profile says he has \u201ca passion for strategic planning,\u201d there was no one in the Israeli government with \u201cthe balls nor vision to go all those extra miles.\u201d\n\nIran: Off Leash\u2019s Public Enemy No. 1 \n\nIt was hard to keep track of all the wars, invasions, covert operations, coups, and assassinations Off Leash members favored. One region ripe for a bit of good old-fashioned Western intervention was Africa, which was described as a \u201cpot about to boil over\u201d by \u301019\u2020Emma Priestley\u2020otp.investis.com\u3011, who posts as \u201cCustomer\u201d in the group chat and is the \u301019\u2020CEO of GoldStone Resources Limited\u2020otp.investis.com\u3011 in Jersey, the English Channel island that is one of the world\u2019s most popular offshore secrecy havens. China would have to be taken down a peg as well, particularly as Biden wasn\u2019t going to stop the country \u201cfrom doing a damn thing,\u201d and indeed he would pave the way for it to do \u201cwhatever it is they want to accomplish,\u201d posted Randy Couture, the former UFC heavyweight champion and actor who had the role of arsonist and killer Jason Duclair in the TV series Hawaii Five-0 and starred in the 2011 movie Setup with 50 Cent and Bruce Willis.\n\nBut the No. 1 target on Off Leash\u2019s hit list, by orders of magnitude, was Iran. \u201cFollow the source of evil,\u201d wrote Montana Congressman Ryan Zinke, who served as interior secretary under Trump. \u201cHamas. Hezbollah. Houthis. Iran is the center of gravity.\u201d\n\n\u201cZinke is right,\u201d agreed Tennessee Congressman Mark Green of the House Freedom Caucus.\n\nYemen\u2019s Houthi rebels"}, {"matched_text": "\u30108\u2020source\u3011", "start_idx": 1038, "end_idx": 1048, "alt": null, "type": "webpage_extended", "title": "Erik Prince says China likely to attack Taiwan in 2024\n | Taiwan News | Dec. 31, 2023 16:58", "url": "https://www.taiwannews.com.tw/en/news/5069317", "pub_date": null, "snippet": "\n\u301021\u2020Opinion\u3011\n\n\u301022\u2020World\u3011\n\n\u301023\u2020Sponsored\u3011\n\n[Image 4: search]\n\nMORE\n\n[Image 5: search]\n\n\u30102\u2020Politics\u3011[Image 6: arrow-down]\n\n\u30103\u2020All\u3011\u30104\u2020Foreign Affairs\u3011\u30105\u2020Cross-strait\u3011\n\n\u30106\u2020Business\u3011[Image 7: arrow-down]\n\n\u30107\u2020All\u3011\u30108\u2020Investing\u3011\n\n\u30109\u2020Tech\u3011\n\n\u301010\u2020Society\u3011\n\n\u301011\u2020Health\u3011\n\n\u301012\u2020Culture\u3011\n\n\u301013\u2020Environment\u3011\n\n\u301014\u2020Lifestyle\u3011[Image 8: arrow-down]\n\n\u301015\u2020All\u3011\u301016\u2020Cuisine\u3011\u301017\u2020Travel\u3011\u301018\u2020Entertainment\u3011\u301019\u2020Variety\u3011\u301020\u2020Sports\u3011\n\n\u301021\u2020Opinion\u3011\n\n\u301022\u2020World\u3011\n\n\u301023\u2020Sponsored\u3011\n\n[Image 9: FB][Image 10: X][Image 11: Youtube][Image 12: IG]\n\nLoading...\n\n\u301024\u2020About Us\u2020taiwannews.com.tw\u3011\u301025\u2020Contact Us\u3011\u301026\u2020Directory of Taiwan\u2020directory.taiwannews.com.tw\u3011\n\n[Image 13: FB][Image 14: X][Image 15: Youtube][Image 16: IG]\n\n\u301024\u2020About Us\u2020taiwannews.com.tw\u3011\u301025\u2020Contact Us\u3011\u301026\u2020Directory

(Reuters photo)]\n\nErik Prince in New York City, November 2019. (Reuters photo) \n\n38154 \n\nTAIPEI (Taiwan News) \u2014 In a video interview on the U.K.\u2019s GB News filmed on Thursday (Dec. 28), Erik Prince, a military contractor known for founding the Blackwater organization, said he expects China to target Taiwan militarily in the spring of 2024.\n\nPrince, a military strategist and former U.S. Navy Seal, was being \u301027\u2020interviewed\u2020www.gbnews.com\u3011 by Jacob Rees-Mogg about U.S. foreign policy setbacks under the Biden administration and the pressures faced by the U.S. military around the world. Prince said that amid declining U.S. credibility abroad, Chinese leader Xi Jinping (\u7fd2\u8fd1\u5e73) may try to \u201cbluster his way\u201d into a takeover of Taiwan, saying that \u201cit must feel like the door is wide open for them to do whatever it is they want to do.\u201d\n\nPrince\u2019s comments came one day after Xi Jinping, speaking at the Great Hall of the People in Beijing, resolutely vowed to stop anyone from \u201cmaking Taiwan secede from China,\u201d calling \u301028\u2020unification\u3011 an \u201cinevitable trend.\u201d\n\nIn Prince\u2019s remarks, he criticized the U.S. \u201cinability to finish properly in Iraq and Afghanistan,\u201d which he credits for the increase of military threats across the world that have taken shape under the Biden administration. In addition to ongoing conflicts involving Ukraine and Israel, Prince also mentioned escalating conflicts in the wider Middle East, which now include attacks by Houthi rebels targeting shipping vessels in the Red Sea.\n\nSpeaking about a timeline for a potential attack by China on Taiwan, Prince said May or June 2024 is a likely window for Beijing to begin cross-strait naval operations. "If they are going to take Taiwan by force, I would predict that they are going to do something this spring," Prince said, as reported by \u301029\u2020GB News\u2020www.gbnews.com\u3011.\n\nThe day after Prince made his prediction on GB News, China announced a shakeup in its military command. With only two weeks before Taiwan's elections, Beijing appointed PLAN \u301030\u2020Admiral Dong Jun\u3011 as its newest Minister of National Defense.\n\nAfter leaving Blackwater and selling the company in 2010, Erik Prince\u2019s connections to CIA training programs were revealed in 2013. Around 2014, Prince became the chairman of a private security and logistics firm called the Frontier Services Group, a Chinese-owned company based in Hong Kong and involved in private security contract work in Africa.\n\nPrince stepped down as chairman of the Frontier Services Group in April 2021 but is still the head of a similar organization called the Frontier Resource Group, which has almost no online footprint as of publication.\n\n\u301031\u2020# Chinese invasion of Taiwan\u3011\u301032\u2020# Biden Administration\u3011\u301033\u2020# Erik Prince\u3011\u301034\u2020# Xi Jinping\u3011\n\n# Related Articles\n\n* *\n\n\u301035\u2020Ex-Australia PM calls for effective deterrent against China\u2019s threats to annex Taiwan Oct. 22, 2024 14:56\u3011\u301036\u2020Harris says Taiwan 'has right to defend itself' Oct. 17, 2024 10:41\u3011\u301037\u2020Trump claims China will not invade Taiwan if he is elected Oct. 16, 2024 16:43\u3011\u301038\u2020Former AIT chair says Article 8 of China\u2019s Anti-Secession Law is time bomb Oct. 16, 2024 13:43\u3011\u301039\u2020Poll shows 36% of

Unlike THC, which is known for its psychoactive properties that cause the "high," THCv has been shown to have

more subtle, and in some cases, opposing effects.\n\nKey points about THCv:\n\n1. **Appetite Suppression**: THCv is known for its potential to suppress appetite, which is the opposite of THC, which is often associated with increasing hunger (the "munchies"). This has sparked interest in THCv for weight management or obesity treatment.\n\n2. **Psychoactive Effects**: At low doses, THCv is not significantly psychoactive, meaning it doesn\u2019t cause a strong high. However, at higher doses, it can produce effects similar to THC, though they are often described as clearer-headed and shorter-lasting.\n\n3. **Potential Health Benefits**: Early research suggests THCv may have therapeutic potential in areas such as reducing insulin resistance in diabetes, managing anxiety, and possibly aiding in bone growth. It\u2019s also being studied for its anti-inflammatory and neuroprotective properties, which could make it useful in treating conditions like Parkinson's disease.\n\n4. **Energy Boost and Focus**: Some users report that THCv provides an energizing and focusing effect, which differs from the more sedative qualities of certain THC-rich cannabis strains.\n\nTHCv is not as abundant as THC or CBD in most cannabis strains, but breeders are developing strains with higher THCv content due to its unique potential benefits."]}, "status": "finished_successfully","end_turn": true

I want that job. I would like it if you could rewrite and reformat my resume to align/present me as the a strong if not the best candidate for the role. I want that interview or that on the spot hired moment. I believe my resume and email back will contribute to that journey. Please create a formatted resume for me for this job. you can do so by giving it to me as a pdf or as an html file that i can print to pdf. ensure that the resume does not exceed 2 pages. Also compose a response email for me that I can send the resume you will write me with. i have attached what i call an achievement resume which lists my complete work history except for right now I'm lets say freelancing as a project manager and editor and i do little things with generative AI, for a madeup company of my own called 'lexcorop'. I dont own the writes and i and have yet legally formed yet. But i represent my company as lexcorp on Linkedin. \n\n\r\n\r\nKasey Vossen\r\n \r\nFrom:\r\nkvossen@medicalrecruitmentstrategies.com\r\nTo:\r\nalexislindsay@yahoo.com\r\n\r\nMon, Oct 21 at 6:03 PM\r\n\r\nDear Alexis,\r\n\r\nI hope you are having a good week. That's a cool project! I can help you troubleshoot and get back on track. Here's a quick outline of the typical process, and maybe I can help identify where things went sideways:\n\n### Steps to Build an Alexa Skill with OpenAI Integration\n\n1. **Set Up Your Alexa Developer Account**:\n   - You\u2019ll need an Alexa Developer account at developer.amazon.com.\n   - Create a new skill and choose a custom interaction model.\n\n2. **Design the Interaction Model**:\n   - Create intents (e.g., "AskOpenAIIntent") and sample utterances (e.g., "ask OpenAI {question}") in the Alexa developer console.\n\n3. **Create an AWS Lambda Function**:\n   - You need to link the Alexa skill with a backend service. AWS Lambda is commonly used.\n   - Write your Lambda function in Node.js or Python.\n   - Make sure it sends requests to OpenAI's API (you\u2019ll use the OpenAI API key here).\n\n4. **Integrate OpenAI API**:\n   - You will need to set up a request to OpenAI (the `gpt-3.5-turbo` or `gpt-4` model, for example) in your Lambda function.\n   - Use something like `axios` or `fetch` to send a request to OpenAI and get a response.\n\n5. **Configure Skill Permissions**:\n   - Make sure your Alexa skill has permission to access the Lambda function.\n   - Set up endpoints in the Alexa console for the Lambda function.\n\n6. **Testing**:\n   - Test your skill with the Alexa simulator in the developer console or with an actual Echo device.\n\n### Snags You Might Have Hit\n\n- **Lambda Function Errors**: Issues connecting to OpenAI (API key not working, wrong endpoint).\n- **Alexa Interaction Model Setup**: Intents or sample utterances might be incorrectly configured.\n- **Node.js Setup**: If you're using `npm init` as part of the setup for your backend (Lambda function), there could be an issue with dependencies.\n\n### Key Packages to Install (Node.js)\nIf you\u2019re working in Node.js, make sure to have these dependencies:\n```bash\nnpm install axios\nnpm install openai\n```\n\nLet me know what part of the process you got stuck

on, and I can provide more specific guidance or code snippets!"]}, "status": "finished_successfully","end_turn": true

"update_time": null, "content": {"content_type": "text", "parts": ["It looks like
you're dealing with an Alexa skill that has encountered an
INTERNAL_SERVICE_ERROR during a session, specifically due to missing metadata for
the skill bundle:\n\n```plaintext\n"Can't find skill bundle metadata for

skillId amzn1.ask.skill.4e3cd483-a6cc-4494-b190-11c9b68be961 locale en-US stage development"\n```\n\n### Here's what might be going wrong and how to troubleshoot:\n\n1. **Skill Metadata Not Found**:\n   - The error message indicates that the system couldn\u2019t find the necessary metadata for the skill in the development stage.\n   - This could happen if the skill hasn't been correctly deployed, or there\u2019s a problem with the skill configuration (perhaps related to the locale `en-US`).\n   \n2. **Possible Causes**:\n   - **Skill not deployed**: Make sure the latest version of the skill is deployed to Alexa\u2019s development environment.\n   - **Locale Mismatch**: Check if the skill supports the `en-US` locale and that it has the required metadata configured for that locale.\n   - **Bundle Issue**: Verify that the skill\u2019s bundle contains all the necessary components (interaction model, language model, etc.).\n\n3. **Fixes to Try**:\n   - **Check Skill Configuration**: Ensure that the skill's configuration for the `en-US` locale is correct, including the metadata in the Alexa Developer Console.\n   - **Redeploy the Skill**: If there were any recent changes, redeploy the skill from your environment to ensure the skill bundle is properly updated.\n   - **Log More Details**: If possible, add more detailed logging to your Lambda function or skill to capture what might be missing or misconfigured.\n   - **Test with a Different Locale**: If other locales are working, the issue might be specific to the `en-US` setup.\n\nIf the issue persists after redeployment and configuration checks, you might want to try testing in the Alexa Developer Console or using AWS CloudWatch logs to get more insights into what\u2019s causing the failure during execution."]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "auto", "parent_id": "aaa2d0c9-b617-4a7e-8998-60fe120c65a5", "request_id": "8d5b2cc7d8e35244-MXP", "timestamp_": "absolute", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true}, "recipient": "all", "channel": null}, "parent": "aaa2d0c9-b617-4a7e-8998-60fe120c65a5", "children": ["aaa28bf0-b996-4f47-8f17-33f0c1aed2ba"]}, "aaa28bf0-b996-4f47-8f17-33f0c1aed2ba": {"id": "aaa28bf0-b996-4f47-8f17-33f0c1aed2ba", "message": {"id": "aaa28bf0-b996-4f47-8f17-33f0c1aed2ba", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729450115.50144, "update_time": null, "content": {"content_type": "text", "parts": ["OKAY. \n\nDefine APIs for Alexa Conversations\r\n Note: Sign in to the developer console to build or publish your skill.\r\n Note: Alexa Conversations currently supports the following locales:\n\n\n\r\n \u2022 GA: en-US, en-AU, en-CA, en-IN, en-GB, de-DE, ja-JP, es-ES, es-US\r\n \u2022 Beta: it-IT, fr-CA, fr-FR, pt-BR, es-MX, ar-SA, hi-IN\r\nWhen you configure a skill for Alexa Conversations, you must provide API definitions for all APIs that Alexa Conversations can call during the conversation between the user and Alexa. API definitions specify the requests that your skill code can handle.\r\n\r\nAs the user interacts with your skill, Alexa Conversations predicts the correct API based on the current dialog context. API definitions are analogous to intents in intent-based dialog models.\r\n\r\nGet Started\r\n\r\nTo get started with Alexa Conversations, you can step through a pet match skill-building tutorial, download the code for a pizza-ordering reference skill, or use an Alexa-hosted sample skill template that includes an Alexa Conversations skill configuration and back-end skill code.\r\nExample\r\nConsider a weather skill that has a GetWeather API that accepts two arguments (date and city) and returns a returnedWeather value that contains properties for cityName, date, highTemperature, and lowTemperature. To use

this API in an Alexa Conversations skill, you must create an API definition for the GetWeather API when you configure your skill in the developer console.\r\n\r\nWhen you annotate dialogs for your skill, the API definitions are often what tie the user line and the Alexa line together. The following example shows what one dialog in your skill might be:\r\n\r\nUser: What's the weather in Seattle tomorrow?\r\nAlexa: Tomorrow in Seattle, you can expect a high of 71 degrees and a low of 57 degrees.\r\n\r\nWhen you annotate this dialog, you associate both the user utterance group and the Alexa response with the GetWeather API definition. The user utterance group provides the inputs to the API, and the Alexa response formats the output of the API into Alexa TTS.\r\n\r\nAPI definitions, slot types, and responses\r\nWhen you define an API, you specify an API name, input arguments, and a return type. Because APIs tie into slot types and responses, keep in mind that you also must do the following:\r\n\r\nCreate slot types for any API arguments and return types that aren't built-in types. For details, see Use Slot Types.\r\n\r\nFor example, if your weather skill returns the response, "Tomorrow in Seattle, you can expect a high of 71 degrees and a low of 57 degrees," you might create a returnedWeather slot type that contains a city, date, high temperature, and low temperature. For details about slot types, see Use Slot Types in Alexa Conversations.\r\nCreate responses to define how Alexa responds to the user. For details, see Define Responses from Alexa for Alexa Conversations.\r\nAPI definitions and dialog acts\r\nEach API must have at least one dialog that uses the Request Args dialog act. You can't simply have a dialog where the user provides your arguments as part of the initial utterance.\r\n\r\nAPI arguments\r\nFor higher API prediction accuracy, we recommend the following:\r\n\r\nFive or fewer arguments per API.\r\nDistinct types of arguments. For example, one argument of type AMAZON.NUMBER and another argument of type AMAZON.US_CITY typically performs better than two arguments that are both of type AMAZON.NUMBER.\r\nDefine an API\r\nYou define APIs to your skill in the developer console as follows.\r\n\r\n Important: If you don't have all the information that you need to create the API definition, you can skip parts of the API definition and come back to them later. However, if you try to build the model, the build fails until you specify all of the required items.\r\nTo create an API definition\r\n\r\nLog in to the developer console, and then navigate to your Alexa Conversations skill.\r\nIn the left pane, click API Definitions.\r\nClick Add API Definition.\r\nEnter a name for the API.\r\nIf the API has arguments, do the following:\r\n\r\n Note: Alexa Conversations currently doesn't support APIs that take multiple list arguments. (Each API can have at most one list argument.)\r\nUnder Arguments, click Add Argument.\r\nEnter the argument name and select a slot type.\r\nClick Add Argument to add other arguments, if applicable.\r\nUnder Return, select the slot type of the return value.\r\nFor details about slot types, see Use Slot Types in Alexa Conversations.\r\nIn the header bar, click Save.\r\nRelated topics\r\nDefine Responses from Alexa for Alexa Conversations\r\nAbout Alexa Conversations\r\nGet Started with Alexa Conversations\r\nWas this page helpful?\r\nYes\r\nNo\r\nProvide feedback\r\nLast updated: Nov 27, 2023\n\n\nCAN I USE THIS AND MAKE THE API THEOPEN API AND THE ARGUMENT COULD BE A QUESTION? "]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5b2ed369cd5244-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "2377c808-4de3-4122-9987-288d6e885f43", "children": ["affa6843-a131-4f24-a49c-a1d167596cf8"]}, "affa6843-a131-4f24-a49c-a1d167596cf8": {"id": "affa6843-a131-4f24-a49c-a1d167596cf8",

"message": {"id": "affa6843-a131-4f24-a49c-a1d167596cf8", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729450142.095804, "update_time": null, "content": {"content_type": "text", "parts": ["Yes, you can use **Alexa Conversations** to create an API that interacts with an external API like The Open API, and the argument can be a question or any user input. Here\u2019s how you can set it up:\n\n### Step-by-Step Overview:\n\n1. **Define the API** in the Alexa Developer Console:\n - You\u2019ll create an API definition that connects to **The Open API** or another external API.\n - The argument, which could be a **user's question**, will be processed as input, and the API will return the relevant data.\n\n2. **Create Slot Types**:\n - Since Alexa uses slot types to understand and process input, you'll need to create custom slot types that map to the API's parameters.\n - For example, if the user's question asks for "weather in Seattle tomorrow," you\u2019ll need to create a slot type for cities (`AMAZON.US_CITY`) and dates (`AMAZON.DATE`).\n\n3. **Handle the Question as an Argument**:\n - You can configure the argument to be the user's question or part of the conversation. For example, you can take an open-ended question like "What is the weather tomorrow in Seattle?" and pass the relevant data (city, date) to **The Open API**.\n - Make sure to associate the question with the right API and return the correct response type (i.e., formatted weather data).\n\n### Example Setup for Weather Query:\n\n- **API Definition**:\n - **API Name**: `GetWeatherAPI`\n - **Arguments**:\n   - `city` (Slot type: `AMAZON.US_CITY`)\n   - `date` (Slot type: `AMAZON.DATE`)\n - **Return Type**:\n   - `returnedWeather` (a custom slot type that contains `city`, `date`, `highTemperature`, and `lowTemperature`)\n\n- **Interaction Flow**:\n 1. **User Question**: "What's the weather in Seattle tomorrow?"\n 2. **Alexa Conversation**:\n   - Alexa identifies the intent (weather query) and matches the API (`GetWeatherAPI`).\n   - The inputs (city: "Seattle", date: "tomorrow") are passed to the API.\n 3. **API Response**:\n   - The API (The Open API) returns data for "Seattle" and "tomorrow."\n 4. **Alexa Response**:\n   - Alexa formats the response: "Tomorrow in Seattle, the high will be 71 degrees and the low will be 57 degrees."\n\n### Key Considerations:\n- **API Design**: When integrating The Open API, ensure your skill\u2019s backend can process the request and call The Open API, passing along the necessary parameters (like the user's question).\n- **User Input as a Question**: Yes, you can pass open-ended questions as input, but you\u2019ll need to map relevant slots from that question to the API arguments. Use dialog management to capture and clarify the user\u2019s intent if needed.\n- **Error Handling**: Plan for cases where the API might not have enough data or when the user's input is ambiguous (e.g., "What is the weather?" without a city or date).\n\n### Example of an API Definition for Open API:\n\n1. **API Name**: `TheOpenAPI`\n2. **Arguments**:\n - `question` (Slot type: `AMAZON.SearchQuery`) \u2013 which can capture the user's question.\n3. **Return**: You\u2019ll need to specify the return slot type based on the kind of response you expect from The Open API (e.g., text or formatted data).\n4. **Backend Code**: Ensure your backend Lambda function processes the `question`, calls The Open API, and then returns a response formatted for Alexa.\n\nBy following this setup, you can create an Alexa skill using Alexa Conversations to call external APIs like The Open API and handle user questions as arguments. Let me know if you need further help with the configuration or coding!"]}, "status": "finished_successfully","end_turn": true

SENDS THAT QUESTION TO THE OPEN API. tHE OPEN API GETS ANSWER SENDS BACK ANSWER MAYBE WITBH SPECIFICATION THAT ANSWER MUST BE 1000 CHARACTERS OR LESS. ALEXA SPEAKS OPEN API ANSWER. END OF SKILL. "]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5b348eef785244-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "affa6843-a131-4f24-a49c-a1d167596cf8", "children": ["12aa35ec-1f50-475a-aff5-be71ea196001"]}, "12aa35ec-1f50-475a-aff5-be71ea196001": {"id": "12aa35ec-1f50-475a-aff5-be71ea196001", "message": {"id": "12aa35ec-1f50-475a-aff5-be71ea196001", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729450391.293136, "update_time": null, "content": {"content_type": "text", "parts": ["To achieve the behavior you're describing\u2014where the user asks Alexa a question like "What's the weather like tomorrow in Seattle?", and Alexa passes that question to an external Open API to get the response\u2014you can follow this setup process:\n\n### 1. **Define the API in Alexa Conversations**:\nYou need to define an API in Alexa Conversations that sends the user\u2019s input as an argument to **The Open API** and handles the response. The Open API will provide a response under the specific constraint (like 1000 characters or less), which Alexa will then vocalize.\n\n### 2. **Steps to Build the Skill**:\n\n#### A. **Skill Design in Alexa Conversations**:\n1. **Create the API Definition**:\n   - **API Name**: `OpenAPIWeatherQuery`\n   - **Argument**: \n   - `question` (Type: `AMAZON.SearchQuery`) \u2013 this captures the entire user query, such as "What's the weather tomorrow in Seattle?"\n   - **Return Type**: A custom slot that will hold the Open API response.\n   - You can define a return type like `response` which will be the formatted text that the Open API sends back (i.e., the weather information).\n\n#### B. **Interaction Flow**:\n   1. **User Input**: "What's the weather like tomorrow in Seattle?"\n   2. **Alexa's Action**: \n   - Alexa recognizes the intent and extracts the entire user query as `question`. \n   - Alexa sends the user query to **The Open API** using the custom API (`OpenAPIWeatherQuery`) you defined.\n   3. **API Call**:\n   - The backend service (via Lambda function or another backend) receives the user query, sends it to **The Open API**, and retrieves a weather response (formatted to be under 1000 characters).\n   4. **Alexa Response**:\n   - Alexa receives the response and speaks it aloud to the user.\n   - Skill ends.\n\n#### C. **Backend Logic in AWS Lambda**:\n   - **Function**: Your Lambda function needs to accept the user input (the question), forward it to The Open API, and process the response.\n   - **Request

Flow**: \n - The function will take the `question` (e.g., "What's the weather tomorrow in Seattle?"), use it to call The Open API, and retrieve the formatted weather response.\n - Limit the response size to 1000 characters or format it accordingly in your Lambda function.\n \n - **Lambda Code Example (Node.js)**:\n ```javascript\n const axios = require('axios');\n\n exports.handler = async function (event) {\n try {\n const userQuery = event.request.intent.slots.question.value;\n \n // Make a call to The Open API (replace with actual API endpoint)\n const apiResponse = await axios.post('https://api.theopenapi.com/weather', {\n query: userQuery,\n maxLength: 1000 // Limiting the response to 1000 characters\n });\n \n const weatherResponse = apiResponse.data.response;\n \n // Return the response to Alexa\n return {\n version: '1.0',\n response: {\n outputSpeech: {\n type: 'PlainText',\n text: weatherResponse\n },\n shouldEndSession: true\n }\n };\n } catch (error) {\n console.error(error);\n return {\n version: '1.0',\n response: {\n outputSpeech: {\n type: 'PlainText',\n text: 'I am having trouble getting the weather information right now. Please try again later.'\n },\n shouldEndSession: true\n }\n };\n }\n };\n ```\n\n#### D. **Configuring the API**:\n- In **Alexa Developer Console**, go to **API Definitions** and define the `OpenAPIWeatherQuery` as described earlier.\n- Make sure the argument (question) is passed correctly from Alexa to your backend.\n\n### 3. **Summary of Steps**:\n1. **API Definition**: Create the API in Alexa Conversations, capturing the user question as an argument.\n2. **Lambda Function**: Build the backend logic (using AWS Lambda) to process the user input, call The Open API, and return a response.\n3. **API Call**: The Lambda function will handle the API call to The Open API, retrieve the result, and format it to be 1000 characters or less.\n4. **Alexa Response**: The response from The Open API is passed back to Alexa, and Alexa speaks it to the user.\n5. **Session End**: Once Alexa delivers the information, the skill session ends.\n\nThis setup allows Alexa to dynamically query The Open API with the user\u2019s question, retrieve the response, and speak it as part of the Alexa Conversations framework. If you need more assistance with any specific part of the setup, let me know!"]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "auto", "parent_id": "aaa29a50-3817-44d8-9f1f-c8cf7c7db574", "request_id": "8d5b348eef785244-MXP", "timestamp_": "absolute", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true}, "recipient": "all", "channel": null}, "parent": "aaa29a50-3817-44d8-9f1f-c8cf7c7db574", "children": ["aaa2e4f4-e32a-49ab-97b2-52728b322aa5"]}, "aaa2e4f4-e32a-49ab-97b2-52728b322aa5": {"id": "aaa2e4f4-e32a-49ab-97b2-52728b322aa5", "message": {"id": "aaa2e4f4-e32a-49ab-97b2-52728b322aa5", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729451720.567437, "update_time": null, "content": {"content_type": "text", "parts": ["/**\n * Copyright 2020 Amazon.com, Inc. and its affiliates. Based on your goal of having Alexa pass a question (e.g., \u201cWhat\u2019s the weather like tomorrow in Seattle?\u201d) to **The Open API**, and Alexa responding with the API's answer, I've modified the existing skill structure to fit your scenario. Here's a step-by-step breakdown along with the code you can use.\n\n### Key Changes:\n1. **New API Call (`GetWeatherApiHandler`)**: Handles the API request to send the user's question to The Open API.\n2. **Modified Response**: Alexa will speak the response provided by The Open API, keeping the response under 1000 characters.\n3. **Lambda Backend**: The backend Lambda will handle communication with the Open API.\n\n---\n\n### 1. **Lambda Function**\n\n#### Complete code:\n\n```javascript\nconst Alexa = require('ask-sdk-core');\nconst axios = require('axios'); // Using axios to make API calls\n\n/**\n * API Handler for GetWeather API\n *\n * @param handlerInput\n * @returns API response object\n */\nconst GetWeatherApiHandler = {\n   canHandle(handlerInput) {\n   return util.isApiRequest(handlerInput, 'GetWeather');\n   },\n   async handle(handlerInput) {\n   console.log("Api Request [GetWeather]: ", JSON.stringify(handlerInput.requestEnvelope.request, null, 2));\n\n   // Extract the question (user input) from the API arguments\n   const args = util.getApiArguments(handlerInput);\n   const question = args.question; // Assume question is captured in the slot\n\n   try {\n   // Call The Open API with the question\n   const apiResponse = await axios.post('https://api.theopenapi.com/weather', {\n   query: question,\n   maxLength: 1000 // Optional limit for response length\n   });\n\n   const weatherInfo = apiResponse.data.response; // Assume response has a 'response' key\n\n   return handlerInput.responseBuilder\n   .withApiResponse({\n   weatherInfo: weatherInfo.substring(0, 1000) // Limiting response to 1000 chars\n   })\n   .withShouldEndSession(true)\n   .getResponse();\n   } catch (error) {\n   console.error("Error calling The Open API: ", error);\n   return handlerInput.responseBuilder\n   .speak("Sorry, I'm having trouble getting the weather information right now. Please try again later.")\n   .withShouldEndSession(true)\n   .getResponse();\n   }\n   }\n}\n\n/**\n * FallbackIntentHandler - Handles unknown or unsupported intents\n */\nconst FallbackIntentHandler = {\n   canHandle(handlerInput) {\n   return Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest';\n   },\n   handle(handlerInput) {\n   const speechOutput = "I'm not sure how to help with that. You can ask me about the weather.";\n   return handlerInput.responseBuilder\n   .speak(speechOutput)\n   .reprompt(speechOutput)\n   .getResponse();\n   }\n};\n\n// Session Ended Request Handler\nconst SessionEndedRequestHandler = {\n   canHandle(handlerInput) {\n

return Alexa.getRequestType(handlerInput.requestEnvelope) ===
'SessionEndedRequest';\n   },\n   handle(handlerInput) {\n   return
handlerInput.responseBuilder.getResponse(); // no action required\n   }\n};\n\n//
Error Handler\nconst ErrorHandler = {\n   canHandle() {\n   return
true;\n   },\n   handle(handlerInput, error) {\n   console.error(`Error handled:
${error.stack}`);\n   const speechOutput = "Sorry, I couldn't process
your request. Please try again.";\n   return
handlerInput.responseBuilder\n   .speak(speechOutput)\n   .reprompt(
speechOutput)\n   .getResponse();\n   }\n};\n\n// Request Interceptor for
logging\nconst LogRequestInterceptor = {\n   process(handlerInput) {\n
console.log(`REQUEST ENVELOPE =
${JSON.stringify(handlerInput.requestEnvelope)}`);\n   },\n};\n\n// Response
Interceptor for logging\nconst LogResponseInterceptor = {\n   process(handlerInput,
response) {\n   console.log(`RESPONSE =
${JSON.stringify(response)}`);\n   },\n};\n\n// Skill Builder - combines handlers and
interceptors\nexports.handler =
Alexa.SkillBuilders.custom()\n   .addRequestHandlers(\n
GetWeatherApiHandler,\n   FallbackIntentHandler,\n
SessionEndedRequestHandler\n   )\n   .addErrorHandlers(ErrorHandler)\n   .addReques
tInterceptors(LogRequestInterceptor)\n   .addResponseInterceptors(LogResponseIntercep
tor)\n   .withCustomUserAgent('weather-
api/1.0')\n   .lambda();\n```\n\n### 2. **Explanation**:\n\n-
`GetWeatherApiHandler`:\n   - This handler processes the user\u2019s question
(like "What\u2019s the weather in Seattle tomorrow?").\n   - It makes a POST
request to **The Open API** with the question as the query.\n   - The API response is
processed and returned to Alexa, ensuring the response is under 1000 characters.\n\n-
`axios.post()`:\n   - Sends the user\u2019s question to **The Open API**.\n   -
The `maxLength: 1000` ensures the response stays within the required character
limit.\n\n- **`FallbackIntentHandler`**:\n   - Handles any unexpected requests or
intents that don't match the defined ones.\n\n-
`SessionEndedRequestHandler`:\n   - Handles session end cleanup.\n\n-
`ErrorHandler`:\n   - Catches and handles any errors gracefully, providing
feedback to the user.\n\n### 3. **Skill Configuration** in Developer Console:\n\n-
API Definition:\n   - Go to **API Definitions** in the Alexa Developer Console.\n
- Add a new API called `GetWeather`.\n   - Define the argument as `question` with a
slot type of `AMAZON.SearchQuery`.\n   - Set the return type to `weatherInfo` (which
will be the response from the API).\n\n### 4. **Dialog Flow Example**:\n\n1. **User**:
"What's the weather like tomorrow in Seattle?"\n2. **Alexa**:\n   -
Calls the `GetWeatherApiHandler` to process the question.\n   - Passes the question to
The Open API.\n   - Receives the response and speaks: "Tomorrow in Seattle, you
can expect a high of 70 degrees and a low of 55 degrees."\n3. **End of session**:
After providing the weather information, Alexa ends the session.\n\n---\n\nThis setup
will enable Alexa to send a user's query to **The Open API**, receive the
response, and speak it back to the user. Let me know if you need further customization
or help with testing!"]}, "status": "finished_successfully","end_turn": true

It seems you created a custom slot type to handle the user input instead of using a predefined one like `AMAZON.SearchQuery`. That's perfectly fine.\n\nHere\u2019s what you need to do to complete the setup:\n\n1. **Name the Argument**: \n - Give your custom slot type a name that reflects what it will capture. For example, you can name it `UserQuestion` since it will be used to hold the user's question about the weather.\n \n2. **Slot Type with Properties**:\n - Since you mentioned it didn't have `SearchQuery` as an option, you can create a slot type that can handle freeform text input.\n - Create a slot type named `UserQuestionType` and use the **Slot Type with Properties** option. This means you can customize it to capture any kind of open-ended response.\n\n3. **Return Type**:\n - In the **Return Type** section, you can create a slot type for the response that your API will return.\n - Create a custom slot type named `WeatherResponse` to store the weather information from The Open API response.\n\n4. **Linking to Backend**:\n - Make sure your backend Lambda function (Node.js) is set up to receive this custom slot type as an argument and process it.\n - Modify the Lambda to map the incoming `UserQuestion` slot to the appropriate API request for The Open API.\n\n### Example Code Adjustments:\n\nHere's how you can adapt the Lambda code to use the custom slot type:\n\n```javascript\nconst Alexa = require('ask-sdk-core');\nconst

axios = require('axios'); // Using axios to make API calls\n\n/**\n * API Handler for GetWeather API\n *\n * @param handlerInput\n * @returns API response object\n */\nconst GetWeatherApiHandler = {\n   canHandle(handlerInput) {\n   return util.isApiRequest(handlerInput, 'GetWeather');\n   },\n   async handle(handlerInput) {\n   console.log("Api Request [GetWeather]: ", JSON.stringify(handlerInput.requestEnvelope.request, null, 2));\n\n   // Extract the user question from the API arguments\n   const args = util.getApiArguments(handlerInput);\n   const userQuestion = args.UserQuestion; // Assuming 'UserQuestion' is your custom argument name\n\n   try {\n   // Make the API request to The Open API using the user input as the question\n   const apiResponse = await axios.post('https://api.theopenapi.com/weather', {\n   query: userQuestion,\n   maxLength: 1000 // Optional limit for response length\n   });\n\n   const weatherInfo = apiResponse.data.response; // Assuming the response contains a 'response' key\n\n   return handlerInput.responseBuilder\n   .withApiResponse({\n   WeatherResponse: weatherInfo.substring(0, 1000) // Limiting the response to 1000 characters\n   })\n   .withShouldEndSession(true)\n   .getResponse();\n   } catch (error) {\n   console.error("Error calling The Open API: ", error);\n   return handlerInput.responseBuilder\n   .speak("Sorry, I'm having trouble getting the weather information right now. Please try again later.")\n   .withShouldEndSession(true)\n   .getResponse();\n   }\n   }\n}\n```\n\n### Key Steps Recap:\n\n1. **API Arguments**:\n   - You have already created a custom slot type for the question argument.\n   - Name the argument `UserQuestion` or something similar to reflect its purpose.\n\n2. **Return Type**:\n   - Create a new custom slot type for the API response, such as `WeatherResponse`, and configure it in the API Definition screen under **Return Type**.\n\n3. **Lambda Integration**:\n   - In your Lambda function, adjust the code to accept the argument `UserQuestion` and use it to query The Open API.\n\nAfter these adjustments, Alexa should be able to accept open-ended questions, pass them to the backend, and provide a response based on the output from The Open API. Let me know if you need help with more specific configurations!"]}, "status": "finished_successfully","end_turn": true

If `AMAZON.SearchQuery` wasn't available, creating a custom slot type is the right approach. Here\u2019s how you can proceed effectively with your custom slot to ensure it works as intended:\n\n### Step-by-Step Custom Slot Setup:\n\n1. **Custom Slot Type for User Questions**:\n   - Since you need the slot to capture a wide range of open-ended input (like a weather question), create a new slot type named something like `UserQuestionType`.\n   - You don\u2019t need to add specific values to this slot type\u2014leave it empty to allow for any kind of freeform user input.\n\n2. **Using Your Custom Slot in the API Definition**:\n   - **API Name**: `GetWeatherAPI`\n   - **Argument**: \n   - Add a new argument named `UserQuestion` (or similar) and assign your custom slot type (`UserQuestionType`) to it.\n   - **Return Type**:\n   - You will also need to define a return type slot for the response, named something like `WeatherResponseType`. This return type will hold the response that you will receive from The Open API.\n\n3. **Backend (Lambda) Changes**:\n   - In your backend (AWS Lambda), you need to ensure that the argument from Alexa is processed properly. Since the input will be unstructured, use the full input to send to your external API.\n\n### Lambda Function Example:\n\nHere\u2019s how you can modify the Lambda function to work with your custom slot:\n\n```javascript\nconst Alexa = require('ask-sdk-core');\nconst axios = require('axios');\n\n/**\n * API Handler for GetWeather API\n *\n * @param handlerInput\n * @returns API response object\n */\nconst GetWeatherApiHandler = {\n canHandle(handlerInput) {\n   return util.isApiRequest(handlerInput, 'GetWeather'); // Replace 'GetWeather' with your API name\n   },\n   async handle(handlerInput) {\n   console.log("API Request [GetWeather]: ", JSON.stringify(handlerInput.requestEnvelope.request, null, 2));\n\n   // Extract the UserQuestion from the API arguments\n   const args = util.getApiArguments(handlerInput);\n   const userQuestion = args.UserQuestion; // This is the name you gave in the API definition\n\n   try {\n   // Make a request to The Open API with the user's question\n   const apiResponse = await axios.post('https://api.theopenapi.com/weather', {\n   query: userQuestion,\n   maxLength: 1000 // Limit response length if needed\n   });\n\n   const weatherInfo = apiResponse.data.response; // Assuming response has 'response' field\n\n   return handlerInput.responseBuilder\n   .withApiResponse({\n   WeatherResponse: weatherInfo.substring(0, 1000) // Ensure response length is within limits\n   })\n   .withShouldEndSession(true)\n   .getResponse();\n   } catch (error) {\n   console.error("Error calling The Open API: ", error);\n   return handlerInput.responseBuilder\n   .speak("Sorry, I couldn't get the weather information. Please try again later.")\n   .withShouldEndSession(true)\n   .getResponse();\n   }\n   }\n}\n\n/**\n * Fallback Intent Handler\n */\nconst FallbackIntentHandler = {\n   canHandle(handlerInput) {\n   return Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest';\n   },\n   handle(handlerInput) {\n   const speechOutput = "I didn't understand that. You can ask about the weather, for

example.";\n   return
handlerInput.responseBuilder\n   .speak(speechOutput)\n   .reprompt(
speechOutput)\n   .getResponse();\n   }\n};\n\n// Error handler for managing
errors gracefully\nconst ErrorHandler = {\n   canHandle() {\n   return
true;\n   },\n   handle(handlerInput, error) {\n   console.error(`Error handled:
${error.stack}`);\n   const speakOutput = "Sorry, something went wrong.
Please try again.";\n   return
handlerInput.responseBuilder\n   .speak(speakOutput)\n   .reprompt(s
peakOutput)\n   .getResponse();\n   }\n};\n\n// Logging request and response
for debugging purposes\nconst LogRequestInterceptor = {\n   process(handlerInput) {\n
console.log(`REQUEST ENVELOPE =
${JSON.stringify(handlerInput.requestEnvelope)}`);\n   },\n};\n\nconst
LogResponseInterceptor = {\n   process(handlerInput, response) {\n
console.log(`RESPONSE = ${JSON.stringify(response)}`);\n   },\n};\n\n// Skill
Builder\nexports.handler = Alexa.SkillBuilders.custom()\n   .addRequestHandlers(\n
GetWeatherApiHandler,\n
FallbackIntentHandler,\n   )\n   .addErrorHandlers(ErrorHandler)\n   .addRequestInt
erceptors(LogRequestInterceptor)\n   .addResponseInterceptors(LogResponseInterceptor)
\n   .lambda();\n```\n\n### Key Considerations:\n- **Custom Slot Type Handling**:\n
- The custom slot `UserQuestionType` should be flexible enough to handle user
utterances like "What's the weather in Seattle tomorrow?".\n - The
skill should recognize this input without requiring exact pre-defined values.\n\n-
Lambda Function:\n - The `userQuestion` argument captured from the API definition
will be used to make a POST request to **The Open API**.\n - It\u2019s crucial to
process any unstructured input properly to make sure the question is compatible with
The Open API's expected parameters.\n\n- **Return Type**:\n - The return type
`WeatherResponseType` should be able to handle whatever The Open API sends back. This
type will be used to convert the response into a form that Alexa can speak back to the
user.\n\n- **Testing**:\n - Since you are using a custom slot type, thorough testing
will be essential to make sure the user\u2019s input is being properly captured and
processed.\n - Test a range of different phrasings and questions to see how Alexa
handles the input and returns the response.\n\nThis should give you a good foundation
to get the skill working properly, even without `AMAZON.SearchQuery` being available.

Here's how you can do it:\n\n### Step-by-Step Instructions for Testing with Postman:\n\n1. **Open Postman**:\n   - If you haven't already installed it, download and install **Postman** from https://www.postman.com/downloads/.\n\n2. **Create a New Request**:\n   - Click on **New** and select **HTTP Request**.\n\n3. **Set Up the Request**:\n   - **Method**: Select `POST`.\n   - **URL**: Enter `https://api.theopenapi.com/endpoint` (replace this with the correct API URL if different).\n\n4. **Add Headers**:\n   - Click on the **Headers** tab.\n   - Add a new header:\n   - **Key**: `Authorization`\n   - **Value**: `Bearer YOUR_OPEN_API_KEY` (replace `YOUR_OPEN_API_KEY` with your actual API key).\n\n5. **Set the Body**:\n   - Click on the **Body** tab and select `raw`.\n   - Choose `JSON` from the dropdown.\n

- Add the request body. For example:\n   ```json\n   {\n   "query": "What's the weather in Seattle tomorrow?",\n "maxLength": 1000\n   }\n   ```\n\n6. **Send the Request**:\n   - Click on the **Send** button.\n\n7. **Check the Response**:\n   - If the API key is valid, you should receive a **200 OK** response with the expected data in the response body.\n   - If the API key is invalid, you will likely receive an error message, such as **401 Unauthorized**.\n\n### Troubleshooting Tips:\n- If you get a **401 Unauthorized** response, double-check your API key.\n- Ensure you are using the correct endpoint and that the header `Authorization` includes `Bearer` followed by a space and the key.\n- If there are any other errors, review the error message to understand what might be missing.\n\nThis process should help you verify if your API key is correct and if your request format works as expected."]}, "status": "finished_successfully","end_turn": true

Below are two different approaches:\n\n### 1. Using Node.js and NPM Modules in PowerShell\nYou can make API calls using Node.js on your computer and invoke the script from PowerShell. Here's how:\n\n1. **Install Node.js**: First, make sure you have Node.js installed on your computer. You can download it from https://nodejs.org/.\n\n2. **Install Axios or Other HTTP Client Libraries**:\n   - Open **PowerShell**.\n   - Install Axios using **npm**:\n   ```powershell\n   npm install axios\n   ```\n\n3. **Create a JavaScript File (e.g., `callAPI.js`)**:\n   ```javascript\n   const axios = require('axios');\n\n   // Replace 'YOUR_OPEN_API_KEY' with your actual key\n   const apiKey = 'YOUR_OPEN_API_KEY';\n   const url = 'https://api.theopenapi.com/endpoint';\n\n   const data = {\n   query: "What's the weather in Seattle tomorrow?",\n   maxLength: 1000\n   };\n\n   axios.post(url, data, {\n   headers: {\n   'Authorization': `Bearer ${apiKey}`,\n   'Content-Type': 'application/json'\n   }\n   })\n   .then(response => {\n   console.log('Response:', response.data);\n   })\n   .catch(error => {\n   console.error('Error:', error);\n   });\n   ```\n\n4. **Run the JavaScript File from PowerShell**:\n   - In PowerShell, navigate to the directory where your JavaScript file is saved.\n   - Run the JavaScript file using Node.js:\n   ```powershell\n   node callAPI.js\n   ```\n\nThis approach lets you make API calls from your computer using JavaScript.\n\n### 2. Using PowerShell Directly for HTTP Requests\nPowerShell has built-in commands for making HTTP requests, like `Invoke-RestMethod` or `Invoke-WebRequest`. Here\u2019s how you can make an API call directly from PowerShell:\n\n```powershell\n# Replace 'YOUR_OPEN_API_KEY' with your actual key\n$apiKey = "YOUR_OPEN_API_KEY";\n$url = "https://api.theopenapi.com/endpoint";\n$headers = @{\n   "Authorization" = "Bearer $apiKey";\n   "Content-Type" = "application/json";\n}\n\n$body = @{\n   query = "What's the

weather in Seattle tomorrow?"\n   maxLength = 1000\n} | ConvertTo-Json\n\n$response = Invoke-RestMethod -Uri $url -Method Post -Headers $headers -Body $body\n\n# Output the response\n$response\n```\n\n### Summary\n- **Node.js and NPM Modules**: You can use a JavaScript file with Axios and run it from PowerShell using Node.js.\n- **PowerShell's Built-in Tools**: Use `Invoke-RestMethod` to make API calls directly from PowerShell.\n\nLet me know which approach you\u2019d like to go with or if you need more details on either one!"]}, "status": "finished_successfully","end_turn": true

This is a common practice for developers who provide free software but accept contributions to keep maintaining it.\n\nWhen you see something like this during installation:\n\n```\n1 package is looking for funding\n run `npm fund` for details\n```\n\nIt means that one of the dependencies you installed, directly or indirectly, is notifying you that they're open to financial support. It doesn't affect the functionality of Axios, and you can safely ignore this message unless you're interested in contributing to support the project. \n\nIf

you're curious, you can run:\n\n```shell\nnpm fund\n```\n\nThis command will show which packages are seeking funding and provide a link where you can learn more about how to support them."]}, "status": "finished_successfully","end_turn": true

["It looks like there are two main issues here:\n\n1. **Incorrect URL**: The error
message indicates that the domain `"api.theopenapi.com"` cannot be resolved.
It means that this domain doesn't exist, or it is incorrect. Make sure you use
the correct endpoint URL provided by the API you're trying to call.\n\n2.
Unexpected Token Error: The issue in the first line you executed (`$apiKey =
'sk-proj...`) is likely due to an unescaped character or syntax issue. If the key
contains special characters, you need to make sure there are no issues with how the
string is handled. \n\n### Let's fix both issues:\n\n1. **Correct the
Endpoint**:\n - Update the URL to the correct endpoint. It looks like the domain
`"api.theopenapi.com"` might be incorrect. Please check the documentation
for the right URL, or you may have a typo.\n\n2. **Fixing the PowerShell Script**:\n
- Here is a corrected PowerShell script you can use. Make sure to substitute the `url`
with the correct one.\n\n```powershell\n# Replace 'YOUR_OPEN_API_KEY' with
your actual key\n$apiKey = "sk-proj-
bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvDO
VF30JxG47HmdDB0msTfHVm-eHsxrYbDY1uYxXyR1Bv4D40RJg1PfE5X58Ea1bzQSSW0QoA"\n$url =
"https://api.thecorrectendpoint.com/your_endpoint_here"\n$headers = @{\n
"Authorization" = "Bearer $apiKey"\n   "Content-Type" =
"application/json"\n}\n\n$body = @{\n   query = "What's the
weather in Seattle tomorrow?"\n   maxLength = 1000\n} | ConvertTo-Json\n\ntry
{\n $response = Invoke-RestMethod -Uri $url -Method Post -Headers $headers -Body
$body\n   # Output the response\n $response\n} catch {\n   Write-Host "Error:
$($_.Exception.Message)"\n}\n```\n\n### Things to Check:\n1. **API Endpoint**:\n
- Make sure the `$url` variable has the correct URL for The Open API. It should match
the documentation from The Open API provider.\n\n2. **API Key**:\n - Ensure that the
API key is correct, and there are no trailing spaces or missing characters.\n\n3.
Try the Correct Endpoint in Postman:\n - If you're unsure of the correct
URL, test different variations in **Postman** to verify which endpoint works, then
update your PowerShell script accordingly.\n\nLet me know if you need further
assistance or if you have the correct endpoint URL!"]}, "status":

Let\u2019s systematically troubleshoot the problem. The most likely issues could be:\n\n1. **Incorrect API Endpoint URL**\n2. **Network Blocking/Firewall Issues**\n3. **Model Availability and Permissions**\n4. **API Key Issues or Usage Limits**\n\nLet\u2019s address each one to see where the problem might be.\n\n### Double-Check Endpoint URL:\nThe correct endpoint URL for calling the OpenAI API to get completions is:\n```plaintext\nhttps://api.openai.com/v1/completions\n```\n\n### Test a Simple PowerShell Example:\nHere's a simplified version of the PowerShell script, with extra logging and tweaks to help diagnose what's happening:\n\n```powershell\n# Your OpenAI API Key\n$apiKey = "sk-proj-bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0VF3OJxG47HmdDB0msTfHVm-eHsxrYbDY1uYxXyR1Bv4D40RJg1PfE5X58Ea1bzQSSW0QoA"\n# Correct OpenAI API endpoint\n$url = "https://api.openai.com/v1/completions"\n\n# Headers required for the request\n$headers = @{\n   "Authorization" = "Bearer $apiKey"\n "Content-Type" = "application/json"\n}\n\n# Body of the request\n$body = @{\n   model = "text-davinci-003"\n   prompt = "What's the weather in Seattle tomorrow?"\n   max_tokens = 50\n} |

ConvertTo-Json\n\n# Debugging: Print out headers and body\nWrite-Host "Headers: " $headers\nWrite-Host "Body: " $body\n\ntry {\n   # Making the REST API call\n $response = Invoke-RestMethod -Uri $url -Method Post -Headers $headers -Body $body\n   # Outputting the result\n $response.choices[0].text\n} catch {\n Write-Host "Error Occurred: $($_.Exception.Message)"\n   Write-Host "Status Code: $($_.Exception.Response.StatusCode.Value__)"\n   Write-Host "Detailed Error: $($_.Exception.Response.StatusDescription)"\n}\n```\n\n### Things to Look For:\n1. **Correct API URL**:\n   - Make sure there is no typo.\n   - The correct endpoint is `https://api.openai.com/v1/completions`.\n\n2. **Check for Network or Firewall Restrictions**:\n   - Sometimes, local firewalls or network restrictions might prevent outgoing connections to certain servers.\n   - You can try testing the endpoint in another environment or machine, or use a tool like **Postman** to see if the API endpoint is reachable from there.\n\n3. **OpenAI API Key Permissions**:\n   - Verify that your OpenAI API key is active and has the permissions to access the model (`text-davinci-003`).\n   - Ensure that there are no usage limits on your account that might be preventing the request.\n\n4. **Use Postman for Testing**:\n   - Try making the same API call using **Postman** to see if the request succeeds. If it works in Postman, the issue is likely with PowerShell, the network, or the machine\u2019s configuration.\n\n### Additional Tips:\n- **Use CURL for Quick Tests**:\n   - Another way to quickly verify the request is to use **curl** in your terminal, like so:\n   ```bash\n   curl https://api.openai.com/v1/completions \\\n -H "Content-Type: application/json" \\\n   -H "Authorization: Bearer sk-proj-bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0VF30JxG47HmdDB0msTfHVm-eHsxrYbDYluYxXyR1Bv4D40RJglPfE5X58Ea1bzQSSW0QoA" \\\n -d '{\n   "model": "text-davinci-003",\n "prompt": "What's the weather in Seattle tomorrow?",\n "max_tokens": 50\n   }'\n   ```\n   - If **curl** works, you know the endpoint is accessible and that the issue may be PowerShell-specific.\n\n### Error Analysis:\n- The **404 Not Found** error often means that the server didn\u2019t recognize the endpoint.\n - Double-check that there isn\u2019t an issue with an extra `/` at the end of the URL.\n - Make sure you are not missing any required parameters or headers.\n\nPlease give this a try and see if it provides more insight into the issue. If you still encounter problems, please share the updated error message, and we can continue troubleshooting together!"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "aaa24d07-26b0-4b10-b9b3-07da83cf19f5", "request_id": "8d5bb506bac55a3d-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa24d07-26b0-4b10-b9b3-07da83cf19f5", "children": ["aaa27949-61f3-47f2-95ca-5f5c328442e3"]}, "aaa27949-61f3-47f2-95ca-5f5c328442e3": {"id": "aaa27949-61f3-47f2-95ca-5f5c328442e3", "message": {"id": "aaa27949-61f3-47f2-95ca-5f5c328442e3", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729455786.41492, "update_time": null, "content": {"content_type": "text", "parts": ["lets use this template from the open api website with my key: \n\n\ncurl https://api.openai.com/v1/chat/completions \\\r\n -H "Content-Type: application/json" \\\r\n -H "Authorization: Bearer $OPENAI_API_KEY"

Let\u2019s adapt the cURL command you provided into a PowerShell script that can run
locally. Below is the equivalent PowerShell script using `Invoke-RestMethod` to make
the request:\n\n### PowerShell Version of the OpenAI cURL Request:\n\n```powershell\n#
Using your provided OpenAI API key\n$apiKey = "sk-proj-
bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0
VF30JxG47HmdDB0msTfHVm-eHsxrYbDYluYxXyR1Bv4D40RJg1PfE5X58Ea1bzQSSW0QoA"\n$url =
"https://api.openai.com/v1/chat/completions"\n\n# Set up the
headers\n$headers = @{\n   "Authorization" = "Bearer $apiKey"\n
"Content-Type" = "application/json"\n}\n\n# Create the body of
the request\n$body = @{\n   model = "gpt-4o-mini"\n   messages = @(@{\n
role = "user"\n   content = "Say this is a test!"\n   })\n
temperature = 0.7\n} | ConvertTo-Json\n\n# Making the API request\ntry {\n
$response = Invoke-RestMethod -Uri $url -Method Post -Headers $headers -Body $body\n
Output the response from the API\n $response.choices[0].message.content\n} catch
{\n   # Handle and display errors if the request fails\n   Write-Host "Error
Occurred: $($_.Exception.Message)"\n   if ($_.Exception.Response) {\n
Write-Host "Status Code: $($_.Exception.Response.StatusCode.Value__)"\n
Write-Host "Detailed Error:
$($_.Exception.Response.StatusDescription)"\n   }\n}\n```\n\n### Explanation:\n-
Headers: The script uses the `Authorization` header for the bearer token (`Bearer
$apiKey`) and `Content-Type: application/json`.\n- **Body**: The body includes:\n -
model: `"gpt-4o-mini"` (this is the model name from your example).\n -
messages: A conversation message list, with `"role": "user"`
and `"content": "Say this is a test!"`.\n - **temperature**: A
value to control the randomness of the output.\n- **Invoke-RestMethod**: Sends the
POST request to OpenAI\u2019s `chat/completions` endpoint.\n\n### Notes:\n1. **Model
Availability**:\n   - The model `"gpt-4o-mini"` may or may not exist or be
accessible based on your account. Double-check the exact model name provided by OpenAI
in your account.\n   \n2. **Error Handling**:\n   - If the request fails, the script
will output the error details, including the **status code** and **error description**
if available.\n\n3. **Running the Script**:\n   - Make sure your network isn\u2019t
blocking outgoing requests to `https://api.openai.com`.\n   - Ensure your PowerShell
environment has the necessary permissions.\n\nTry running this script and let me know
how it goes. This should closely replicate the behavior of the cURL command."]},

"gpt-4o-canmore", "parent_id": "aaa27949-61f3-47f2-95ca-5f5c328442e3", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d5bb9462f1383a6-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa27949-61f3-47f2-95ca-5f5c328442e3", "children": ["aaa237bf-5ded-4970-9528-f5b3c11b6f54"]}, "aaa237bf-5ded-4970-9528-f5b3c11b6f54": {"id": "aaa237bf-5ded-4970-9528-f5b3c11b6f54", "message": {"id": "aaa237bf-5ded-4970-9528-f5b3c11b6f54", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729455844.667354, "update_time": null, "content": {"content_type": "text", "parts": ["i got a 429 error. does it work? "]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5bbab34a7059a1-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "636d9204-4e01-4aa5-a207-7728d5a83ffa", "children": ["879bf8e8-c551-40cf-82a9-e64f2ec181f9"]}, "879bf8e8-c551-40cf-82a9-e64f2ec181f9": {"id": "879bf8e8-c551-40cf-82a9-e64f2ec181f9", "message": {"id": "879bf8e8-c551-40cf-82a9-e64f2ec181f9", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729455851.024912, "update_time": null, "content": {"content_type": "text", "parts": ["A **429 error** means **Too Many Requests**. This usually happens for one of the following reasons:\n\n1. **Rate Limit Exceeded**: You've hit a rate limit set by OpenAI for API calls within a certain timeframe.\n2. **Quota Limit**: The API usage limit associated with your account (monthly or hourly) has been exceeded.\n3. **Concurrent Requests Limit**: Too many simultaneous API requests may have been sent.\n\nThe **429 error** actually indicates that the **request format is correct** and the endpoint is reachable. The error isn't because of an issue with your script; it means OpenAI received the request but couldn't fulfill it because of usage restrictions.\n\n### What You Can Do:\n1. **Wait and Retry**:\n - You can wait for a bit before trying again. OpenAI rate limits reset after some time, so waiting could allow you to make requests again.\n\n2. **Check Account Limits**:\n - Log in to your [OpenAI Dashboard](https://platform.openai.com/account/usage) to see your current usage.\n - Verify if you've exceeded your rate limits or if there are any remaining quotas for the billing cycle.\n\n3. **Use a Lower Volume of Requests**:\n- If you\u2019re running multiple tests rapidly, it\u2019s best to slow down the rate of requests to avoid exceeding the rate limits.\n\n4. **Upgrade Plan**:\n - If you\u2019re consistently hitting the rate or quota limits, you may need to consider upgrading your API access with OpenAI to get a higher quota.\n\n### Recap:\n- The **429 error** confirms that your PowerShell script and API call were set up correctly.\n- This is a **rate limiting issue** rather than a technical issue with the script.\n \nTry again after some time, or check your usage limits to see how many requests you can still make. Let me know if you need help optimizing the script or understanding your limits better!"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "aaa237bf-5ded-4970-9528-f5b3c11b6f54", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d5bbab34a7059a1-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa237bf-5ded-4970-9528-f5b3c11b6f54", "children": ["aaa2e46e-29e1-4d81-8638-b84e93bd491b"]}, "aaa2e46e-29e1-4d81-8638-b84e93bd491b":

{"id": "aaa2e46e-29e1-4d81-8638-b84e93bd491b", "message": {"id": "aaa2e46e-29e1-4d81-8638-b84e93bd491b", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729456021.285507, "update_time": null, "content": {"content_type": "text", "parts": ["it said i made 0 requests"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5bbf02bc66bb05-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "879bf8e8-c551-40cf-82a9-e64f2ec181f9", "children": ["c1fe4f8e-edff-466d-b28b-08378f45d670"]}, "c1fe4f8e-edff-466d-b28b-08378f45d670": {"id": "c1fe4f8e-edff-466d-b28b-08378f45d670", "message": {"id": "c1fe4f8e-edff-466d-b28b-08378f45d670", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729456033.709786, "update_time": null, "content": {"content_type": "text", "parts": ["If your usage dashboard shows **0 requests**, but you're still getting a **429 error**, it could indicate a few different scenarios. Let\u2019s break down possible reasons and solutions:\n\n### Possible Causes of a 429 Error Despite 0 Recorded Requests:\n1. **API Key Issue**:\n   - Make sure your API key is active and has the correct permissions.\n   - Sometimes new API keys may have a delay before becoming active, or there may be an issue with your subscription.\n\n2. **Incorrect Model or Endpoint**:\n   - Ensure the model you're using (`gpt-4o-mini`) is available for your account. It might be a typo or not included in your subscription.\n   - Try switching to a model that you know for sure is available (e.g., `"gpt-3.5-turbo"`).\n\n3. **Account Activation**:\n   - If your account is newly created, make sure all requirements (e.g., payment information) are set up properly.\n   - Sometimes, API keys from accounts that haven\u2019t verified billing information may not work properly.\n\n4. **Invalid API Key Format**:\n   - Double-check if the API key is correct and is formatted without extra spaces or line breaks.\n\n5. **Internal OpenAI Quota Management**:\n   - OpenAI may enforce specific limits on certain models or configurations, especially for new users or if usage terms have changed recently.\n\n### Suggested Troubleshooting Steps:\n\n1. **Try a Known Model and Modify the Request**:\n   - Modify the model name to one that is known to be generally available, like `"gpt-3.5-turbo"`.\n\n   Here is an updated PowerShell script using a more common model:\n\n   ```powershell\n   # Using your provided OpenAI API key\n $apiKey = "sk-proj-bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0VF3OJxG47HmdDB0msTfHVm-eHsxrYbDYluYxXyR1Bv4D4ORJg1PfE5X58Ea1bzQSSW0QoA"\n $url = "https://api.openai.com/v1/chat/completions"\n\n   # Set up the headers\n $headers = @{\n   "Authorization" = "Bearer $apiKey"\n   "Content-Type" = "application/json"\n   }\n\n   # Create the body of the request\n $body = @{\n   model = "gpt-3.5-turbo" # A more commonly available model\n   messages = @(@{\n   role = "user"\n   content = "Say this is a test!"\n   })\n   temperature = 0.7\n   } | ConvertTo-Json\n\n   # Making the API request\n   try {\n $response = Invoke-RestMethod -Uri $url -Method Post -Headers $headers -Body $body\n   # Output the response from the API\n $response.choices[0].message.content\n   } catch {\n   # Handle and display errors if the request fails\n   Write-Host "Error Occurred: $($_.Exception.Message)"\n   if ($_.Exception.Response) {\n   Write-Host "Status Code: $($_.Exception.Response.StatusCode.Value__)"\n   Write-Host "Detailed Error: $($_.Exception.Response.StatusDescription)"\n   }\n   }\n   ```\n\n2. **Test

the Key in Postman**:\n - Use **Postman** to send a POST request with the same key, headers, and body.\n - If you get a similar error, it confirms that the issue is with the account or API key itself rather than the script.\n\n3. **Create a New API Key**:\n - Generate a new API key from the OpenAI [API key management page](https://platform.openai.com/account/api-keys) and try again.\n\n4. **Contact OpenAI Support**:\n - If none of these solutions work, it might be a backend issue with OpenAI. You could contact [OpenAI Support](https://help.openai.com/) to verify if there are any issues with your API access.\n\n### Summary:\n- Use a **more commonly available model** like `"gpt-3.5-turbo"` to rule out model-specific issues.\n- **Test your API key** in Postman.\n- Consider **generating a new API key**.\n- **Contact OpenAI Support** if issues persist.\n\nLet me know if these steps help or if the error still persists after trying them."]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "aaa2e46e-29e1-4d81-8638-b84e93bd491b", "request_id": "8d5bbf02bc66bb05-MXP", "timestamp_": "absolute", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true}, "recipient": "all", "channel": null}, "parent": "aaa2e46e-29e1-4d81-8638-b84e93bd491b", "children": ["aaa2e060-3733-4087-9362-766e34951f2a"]}, "aaa2e060-3733-4087-9362-766e34951f2a": {"id": "aaa2e060-3733-4087-9362-766e34951f2a", "message": {"id": "aaa2e060-3733-4087-9362-766e34951f2a", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729456151.947614, "update_time": null, "content": {"content_type": "multimodal_text", "parts": [{"content_type": "image_asset_pointer", "asset_pointer": "file-service://file-8jzDR5kHPptbcB2ZV6SyIMIH", "size_bytes": 168672, "width": 1360, "height": 720, "fovea": null, "metadata": {"dalle": null, "gizmo": null, "emu_omit_glimpse_image": null, "emu_patches_override": null, "sanitized": true}}, ""]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"attachments": [{"id": "file-8jzDR5kHPptbcB2ZV6SyIMIH", "size": 168672, "name": "image.png", "mime_type": "image/png", "width": 1360, "height": 720}], "serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5bc23278764c74-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "c1fe4f8e-edff-466d-b28b-08378f45d670", "children": ["d1687e8a-eaa5-4659-9734-dceeed85d415"]}, "d1687e8a-eaa5-4659-9734-dceeed85d415": {"id": "d1687e8a-eaa5-4659-9734-dceeed85d415", "message": {"id": "d1687e8a-eaa5-4659-9734-dceeed85d415", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729456166.786978, "update_time": null, "content": {"content_type": "text", "parts": ["The **429 "Too Many Requests"** error persisting, even though no requests are shown on the usage dashboard, is definitely puzzling. Let\u2019s dive into more possible reasons and solutions:\n\n### 1. OpenAI Account Status:\n- **Verify Account Status**: Ensure that your account has an active payment method, is in good standing, and that there are no issues with the subscription tier you're on. OpenAI might enforce different limits on accounts without verified billing information.\n- **Check API Key**: If you have other API keys associated with the same account, ensure none of them are currently hitting the rate limit.\n\n### 2. Use a Different Endpoint or Model:\n- **Different Model**: Try switching to another common model. If `"gpt-3.5-turbo"` still gives you a 429 error, try `"text-davinci-003"` to see if there's a difference.\n \n Here is the updated script for `"text-

davinci-003"`:\n ```powershell\n # Using your provided OpenAI API key\n
$apiKey = "sk-proj-
bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0
VF30JxG47HmdDB0msTfHVm-eHsxrYbDY1uYxXyR1Bv4D40RJg1PfE5X58Ea1bzQSSW0QoA"\n $url =
"https://api.openai.com/v1/completions"\n\n # Set up the headers\n
$headers = @{\n   "Authorization" = "Bearer $apiKey"\n
"Content-Type" = "application/json"\n }\n\n # Create the body
of the request\n $body = @{\n   model = "text-davinci-003"\n   prompt
= "Say this is a test!"\n   max_tokens = 50\n   temperature = 0.7\n }
| ConvertTo-Json\n\n try {\n   # Making the API call\n $response = Invoke-
RestMethod -Uri $url -Method Post -Headers $headers -Body $body\n   # Output the
response from the API\n $response.choices[0].text\n } catch {\n   # Handle
and display errors if the request fails\n   Write-Host "Error Occurred:
$($_.Exception.Message)"\n   if ($_.Exception.Response) {\n   Write-
Host "Status Code: $($_.Exception.Response.StatusCode.Value__)"\n
Write-Host "Detailed Error:
$($_.Exception.Response.StatusDescription)"\n   }\n }\n ```\n\n### 3. OpenAI
Rate Limit for New Users or Specific Models:\n- **New User Limitations**: Sometimes
OpenAI may impose stricter rate limits on new accounts. If your account is new, you
might be restricted to a very low number of requests per minute/hour.\n- **Restricted
Models**: Models like `"gpt-4o-mini"` might have additional restrictions on
their usage or availability depending on your plan.\n\n### 4. API Key Permissions:\n-
API Key Scope: Double-check if your API key has the permissions to use the model
you're trying to access. Visit the [OpenAI API key management
page](https://platform.openai.com/account/api-keys) and confirm your key
permissions.\n \n### 5. Try Curl Instead:\n- **Curl Command**: To verify if
PowerShell might be causing the issue, try running the equivalent **curl** command in
your terminal (Command Prompt or Git Bash).\n \n Replace `$OPENAI_API_KEY` with your
API key:\n ```sh\n curl https://api.openai.com/v1/chat/completions \\\n   -H
"Content-Type: application/json" \\\n   -H "Authorization: Bearer sk-
proj-
bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0
VF30JxG47HmdDB0msTfHVm-eHsxrYbDY1uYxXyR1Bv4D40RJg1PfE5X58Ea1bzQSSW0QoA" \\\n   -
d '{\n   "model": "gpt-3.5-turbo",\n
"messages": [{"role": "user", "content":
"Say this is a test!"}],\n   "temperature": 0.7\n   }'\n
```\n\n  This will help confirm if the issue is specific to PowerShell.\n\n### 6.
Contact OpenAI Support:\n- **Raise a Ticket**: If none of the above methods work,
it&#x27;s best to contact OpenAI&#x27;s [support team](https://help.openai.com/).
Provide them with the details of your API key, account status, and the issues
you&#x27;ve been encountering.\n- **Reference the 429 Error**: Mention that
you\u2019re getting a 429 error even though your usage is 0, which may be a back-end
limitation or an issue specific to your account setup.\n\n### Summary:\n- **Retry with
`&amp;quot;text-davinci-003&amp;quot;`** or another common model.\n- **Run the cURL command**
to see if it&#x27;s PowerShell causing the issue.\n- **Contact OpenAI Support** if the
problem persists, as they can look into your account directly and clarify any limits
or issues.\n\nLet me know how it goes after trying these steps!"]}, "status":

If it's not empty, it might have a specific format that we need to handle differently."]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "bc32ce5c-bc8e-4c37-b755-2f25fb2c5e67", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d5bc2de0a8e4c74-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "bc32ce5c-bc8e-4c37-b755-2f25fb2c5e67", "children": ["aaa2575f-e78e-4ed4-9af9-186c955e5311"]}, "aaa2575f-e78e-4ed4-9af9-186c955e5311": {"id": "aaa2575f-e78e-4ed4-9af9-186c955e5311", "message": {"id": "aaa2575f-e78e-4ed4-9af9-186c955e5311", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729456688.369865, "update_time": null, "content": {"content_type": "text", "parts": ["i'm a plus subscriber, do i get no free api calls? also it says i have 5 bucks of api call credits"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5bcf4b59430d69-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "7948cbb4-3dee-4635-876f-ce0ea95f5056", "children": ["e30f5387-789c-4fff-a111-79cf32fe2b36"]}, "e30f5387-789c-4fff-a111-79cf32fe2b36": {"id": "e30f5387-789c-4fff-a111-79cf32fe2b36", "message": {"id": "e30f5387-789c-4fff-a111-79cf32fe2b36", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729456694.639623, "update_time": null, "content": {"content_type": "text", "parts": ["As a **ChatGPT Plus subscriber**, you don't automatically get unlimited or free access to the OpenAI API. The subscription fee for ChatGPT Plus is separate from API usage.\n\nHere's a detailed breakdown of what each provides:\n\n### ChatGPT Plus Subscription\n- **$20/month** gives you access to:\n - Priority access to ChatGPT (e.g., faster response times and availability even during peak usage).\n - This subscription does **not** include API credits or cover any API usage fees.\n\n### API Usage and Free Credits\n- **API Credits**: If your OpenAI account says you have `$5` of API call credits, these are probably **promotional credits** that OpenAI often provides for new accounts or during certain promotions.\n- **$5 Free Credits**: If you have these credits, they will be deducted from any API calls you make, until you use them up. After that, you will need to add a payment method to continue making API requests.\n\nTo summarize:\n- Your **ChatGPT Plus** subscription benefits are limited to using the ChatGPT product itself, not the API.\n- Your **$5 of API credits** are provided by OpenAI for API calls but are not part of the Plus plan. These credits are meant to help you experiment with the API.\n\nIf you want to make **API requests** beyond those $5 credits, you will need to add a **payment method** and pay for the usage based on OpenAI's current pricing for the different models and usage tiers.\n\nYou can check the pricing here: [OpenAI API Pricing](https://openai.com/pricing) \n\nLet me know if you need more clarification!"]}, "status": "finished_successfully","end_turn": true

, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "aaa2575f-e78e-4ed4-9af9-186c955e5311", "request_id": "8d5bcf4b59430d69-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa2575f-e78e-4ed4-9af9-186c955e5311", "children": ["aaa287ee-c4bc-4b39-88cd-cf0a865ff376"]}, "aaa287ee-c4bc-4b39-88cd-cf0a865ff376": {"id": "aaa287ee-c4bc-4b39-88cd-cf0a865ff376", "message": {"id": "aaa287ee-c4bc-4b39-88cd-cf0a865ff376", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729456745.84085, "update_time": null, "content": {"content_type": "text", "parts": ["are there any free llm apis? "]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5bd0b39ee70d69-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "e30f5387-789c-4fff-a111-79cf32fe2b36", "children": ["94273fe9-5cf7-4e54-9540-b27bcd78fe38"]}, "94273fe9-5cf7-4e54-9540-b27bcd78fe38": {"id": "94273fe9-5cf7-4e54-9540-b27bcd78fe38", "message": {"id": "94273fe9-5cf7-4e54-9540-b27bcd78fe38", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729456757.809628, "update_time": null, "content": {"content_type": "text", "parts": ["Yes, there are several **free LLM APIs** or services that offer **generous free tiers** for developers to experiment and use large language models without significant cost. Here are some options that you can explore:\n\n### 1. **OpenAI Free Credits**\n - **OpenAI** itself often provides free credits (e.g., $5 for new users), but this is usually a **one-time promotional offer**.\n - It's a good starting point for experimentation with the GPT models.\n\n### 2. **Hugging Face API**\n - **Hugging Face** offers access to many LLMs hosted on their **Inference API**.\n - They have a **free tier** that allows for limited usage:\n - **Rate-Limited Usage**: The free tier has a cap on the number of requests you can make, and the response times may vary depending on traffic.\n - They also have a **community section** where some models are open to use for free.\n - URL: [Hugging Face Inference API](https://huggingface.co/docs/api-inference/index)\n\n### 3. **Cohere API**\n - **Cohere** offers **free access** to their language models for developers during the trial period.\n - The **free tier** is designed for testing and development purposes.\n - Cohere offers models like **text generation**, **embeddings**, and **classification**.\n - URL: [Cohere API](https://cohere.com/pricing)\n\n### 4. **AI21 Labs (Jurassic-1)**\n - **AI21 Labs** offers a model called **Jurassic-1** which provides a **free tier**.\n - They have a **limited quota** for free requests each month.\n - Their LLMs are similar to GPT-3 in terms of capabilities and can be used for text generation.\n - URL: [AI21 Labs API](https://www.ai21.com/studio)\n\n### 5. **Open Source Model Hosting (Self-Hosting)**\n - You can also consider using open-source models such as **GPT-J** or **GPT-NeoX** via the **Hugging Face Transformers library**.\n - These models are free to use if you have the **hardware** to run them, or you can host them using cloud services like AWS, Azure, or Google Cloud.\n - **Hugging Face Spaces**: You can also run many LLMs for free using Hugging Face Spaces with **Gradio** or **Streamlit** interfaces.\n - URL: [Hugging Face Transformers](https://huggingface.co/transformers/)\n\n### 6. **GooseAI (Alternatives to OpenAI)**\n - **GooseAI** offers API access similar to OpenAI\u2019s GPT-3 and GPT-2 models.\n - They offer **free credits** to new users to get started.\n - URL:

[GooseAI](https://www.goose.ai/)\n\n### 7. **EleutherAI GPT-Neo and GPT-J**\n - **EleutherAI** has developed open models like **GPT-Neo** and **GPT-J** that are accessible via **Hugging Face**.\n - They do not provide a hosted API but you can find hosted versions on platforms like **Hugging Face Spaces**.\n - URL: [EleutherAI GPT Models](https://www.eleuther.ai/projects/)\n\n### 8. **Open Assistant API (Experimental)**\n - **Open Assistant** is an **open-source project** that aims to provide an assistant-like LLM (similar to ChatGPT).\n - They may have API endpoints available in the future for free use.\n - URL: [Open Assistant](https://www.open-assistant.io/)\n\n### 9. **Azure OpenAI Service Free Tier**\n - **Microsoft Azure** also offers access to **OpenAI models** with a **free tier** for new Azure users.\n - You can use a limited amount of credits if you are new to Azure to access the GPT models via Azure\u2019s infrastructure.\n - URL: [Azure OpenAI Service](https://azure.microsoft.com/en-us/services/cognitive-services/openai-service/)\n\n### Things to Note:\n- **Rate Limits**: Free tiers usually have strict rate limits or request quotas, and the response times may be slower compared to paid plans.\n- **API Keys**: Almost all services require you to sign up and get an API key for access, even for free tiers.\n- **Usage Limits**: Depending on the platform, you may be limited in the number of requests or the amount of data you can process each month.\n\nIf you are just experimenting or building a small project, these options should help you get started without incurring large costs. Let me know if you need help setting up any of these APIs!"]}, "status": "finished_successfully","end_turn": true

"author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729456884.888478, "update_time": null, "content": {"content_type": "text", "parts": ["It looks like the errors you're experiencing are due to trying to execute **JavaScript/Node.js** code directly in **PowerShell**, which doesn't support JavaScript syntax. Let\u2019s break down how you can run this properly:\n\n### Steps to Run OpenAI API Call with Node.js\n\n1. **Install Node.js**:\n   - If you haven't installed **Node.js**, download and install it from https://nodejs.org/.\n   - Make sure **npm** is also installed, which comes with Node.js.\n\n2. **Create a New JavaScript File**:\n   - Create a new file in your directory named `openai_request.js` (you can use any name, but it must have `.js` extension).\n\n3. **Install the OpenAI SDK**:\n   - Run the following command in PowerShell to install the **OpenAI SDK**:\n   ```powershell\n   npm install openai\n   ```\n\n4. **Write the Node.js Code**:\n   - Write the code for calling the OpenAI API in the `openai_request.js` file. Here's how it should look:\n\n   ```javascript\n   // Import the OpenAI package\n   import { OpenAI } from 'openai';\n\n   // Initialize the OpenAI instance with your API key\n   const openai = new OpenAI({\n   apiKey: 'sk-proj-bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0VF30JxG47HmdDB0msTfHVm-eHsxrYbDYluYxXyR1Bv4D40RJglPfE5X58Ea1bzQSSW0QoA'\n   });\n\n   // Create an async function to call the OpenAI API\n   async function getCompletion() {\n   try {\n   const completion = await openai.chat.completions.create({\n   model: 'gpt-4',\n   messages: [\n   { "role": "user", "content": "write a haiku about ai" }\n   ]\n   });\n   console.log(completion.choices[0].message.content);\n   } catch (error) {\n   console.error("Error: ", error);\n   }\n   }\n\n   // Call the function\n   getCompletion();\n   ```\n\n5. **Run the JavaScript File**:\n   - Open **PowerShell**, navigate to the directory where `openai_request.js` is saved, and run:\n   ```powershell\n   node openai_request.js\n   ```\n\n### Key Differences & Tips:\n\n1. **Running JavaScript in Node.js, not PowerShell**:\n   - The code you've written is **JavaScript** and needs to run using **Node.js**, not PowerShell. PowerShell doesn't recognize JavaScript imports or async functions.\n\n2. **JavaScript File (`.js`) vs PowerShell**:\n   - You need to save the JavaScript code in a `.js` file and execute it with **Node.js** using the `node` command.\n\n3. **OpenAI Node Library**:\n   - The OpenAI Node SDK requires ES6 module syntax. Therefore, you have to use `import` and have the `type` set to `module` in your **package.json** file if necessary.\n   - Alternatively, you can use `require()` if you prefer CommonJS:\n   ```javascript\n   const { OpenAI } = require('openai');\n   ```\n\n### Example Using CommonJS if Needed:\nIf you face compatibility issues with ES6 syntax, you can try this version:\n\n1. Install the OpenAI library:\n   ```powershell\n   npm install openai\n   ```\n\n2. Write JavaScript code (`openai_request.js`) like this:\n\n   ```javascript\n   const { Configuration, OpenAIApi } = require('openai');\n\n   const configuration = new Configuration({\n   apiKey: 'sk-proj-bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0VF30JxG47HmdDB0msTfHVm-eHsxrYbDYluYxXyR1Bv4D40RJglPfE5X58Ea1bzQSSW0QoA'\n   });\n   const openai = new OpenAIApi(configuration);\n\n   async function getCompletion() {\n   try {\n   const response = await openai.createChatCompletion({\n

model: 'gpt-3.5-turbo', // Switch model if needed\n   messages: [\n   { role: 'user', content: 'write a haiku about AI' }\n   ]\n   });\n console.log(response.data.choices[0].message.content);\n   } catch (error) {\n console.error("Error: ", error.response ? error.response.data : error.message);\n   }\n }\n\n getCompletion();\n ```\n\n### Summary:\n- **Install Node.js** and the **OpenAI library** using `npm install openai`.\n- **Write and run JavaScript code** in `.js` files using **Node.js**, not directly in PowerShell.\n- If you get errors related to the `import` syntax, you can switch to `require()` and use CommonJS.\n\nTry these steps, and let me know if you run into any other issues. I'll be happy to help further!"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "aaa2bb8a-8f3a-4367-a1fb-39b8f49de598", "request_id": "8d5bd3b57aa0baa9-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa2bb8a-8f3a-4367-a1fb-39b8f49de598", "children": ["aaa23922-fa63-429e-9a3a-147c93fb51a6"]}, "aaa23922-fa63-429e-9a3a-147c93fb51a6": {"id": "aaa23922-fa63-429e-9a3a-147c93fb51a6", "message": {"id": "aaa23922-fa63-429e-9a3a-147c93fb51a6", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729457083.481584, "update_time": null, "content": {"content_type": "text", "parts": ["but i can create the .js file in powershell yes? "]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5bd8f1db0a0e01-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "b8e91bd7-615c-4a23-b645-6ce34add66be", "children": ["acd360ee-e143-4a5f-a4b2-3a3460c59224"]}, "acd360ee-e143-4a5f-a4b2-3a3460c59224": {"id": "acd360ee-e143-4a5f-a4b2-3a3460c59224", "message": {"id": "acd360ee-e143-4a5f-a4b2-3a3460c59224", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729457097.238284, "update_time": null, "content": {"content_type": "text", "parts": ["Absolutely! You can create a `.js` file using **PowerShell**. Here\u2019s how you can do it:\n\n### Steps to Create a `.js` File Using PowerShell\n\n1. **Open PowerShell**.\n\n2. **Navigate to Your Desired Directory**:\n - You can navigate to the directory where you want to create the `.js` file using the `cd` command. For example:\n ```powershell\n cd C:\\Users\\YourUsername\\Desktop\n ```\n\n3. **Create a New JavaScript File**:\n - To create a new file, use the following command:\n ```powershell\n New-Item -Path . -Name "openai_request.js" -ItemType "file"\n ```\n - This will create an empty JavaScript file named `openai_request.js` in the current directory.\n\n4. **Open the File in a Text Editor**:\n - You can use **Notepad** to edit the file. Just type:\n ```powershell\n notepad openai_request.js\n ```\n - **Notepad** will open, allowing you to write or paste the JavaScript code.\n\n5. **Save the File**:\n - After pasting or writing the JavaScript code, save the file in **Notepad** by clicking **File > Save** or using `Ctrl + S`.\n\n6. **Run the JavaScript File**:\n - Once you've saved the JavaScript file, you can run it using **Node.js** by executing:\n ```powershell\n node openai_request.js\n ```\n\n### Example:\nHere is an example of creating and editing the JavaScript file:\n\n1.

Create the File:\n ```powershell\n New-Item -Path . -Name "openai_request.js" -ItemType "file"\n ```\n\n2. **Open and Edit**:\n ```powershell\n notepad openai_request.js\n ```\n\n Paste the following JavaScript code in **Notepad**:\n\n ```javascript\n const { Configuration, OpenAIApi } = require('openai');\n\n const configuration = new Configuration({\n   apiKey: 'sk-proj-bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0VF3OJxG47HmdDB0msTfHVm-eHsxrYbDYluYxXyR1Bv4D4ORJglPfE5X58Ea1bzQSSW0QoA'\n });\n const openai = new OpenAIApi(configuration);\n\n async function getCompletion() {\n try {\n   const response = await openai.createChatCompletion({\n model: 'gpt-3.5-turbo',\n   messages: [\n { role: 'user', content: 'write a haiku about AI' }\n   ]\n   });\n console.log(response.data.choices[0].message.content);\n   } catch (error) {\n console.error("Error: ", error.response ? error.response.data : error.message);\n   }\n }\n\n getCompletion();\n ```\n\n3. **Save and Run the File**:\n - **Save** the file in **Notepad**.\n - Then, go back to **PowerShell** and run the script:\n   ```powershell\n   node openai_request.js\n ```\n\n### Summary:\n- You can create and edit `.js` files directly from **PowerShell**.\n- **Use `New-Item` to create the file** and then **Notepad** (or any text editor) to edit it.\n- Finally, **run** the script using **Node.js** with `node openai_request.js`.\n\nThis workflow lets you create, edit, and execute JavaScript code efficiently using **PowerShell** and **Node.js**. Let me know if you need further help with these steps!"]}, "status": "finished_successfully","end_turn": true, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "aaa23922-fa63-429e-9a3a-147c93fb51a6", "request_id": "8d5bd8f1db0a0e01-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa23922-fa63-429e-9a3a-147c93fb51a6", "children": ["aaa2dbc4-c619-4985-ad10-cd2850b975b3"]}, "aaa2dbc4-c619-4985-ad10-cd2850b975b3": {"id": "aaa2dbc4-c619-4985-ad10-cd2850b975b3", "message": {"id": "aaa2dbc4-c619-4985-ad10-cd2850b975b3", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729457384.378053, "update_time": null, "content": {"content_type": "multimodal_text", "parts": [{"content_type": "image_asset_pointer", "asset_pointer": "file-service://file-Ra8KbTGJEVFsCB7E5kHCVQAS", "size_bytes": 82074, "width": 1115, "height": 628, "fovea": null, "metadata": {"dalle": null, "gizmo": null, "emu_omit_glimpse_image": null, "emu_patches_override": null, "sanitized": true}}, ""]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"attachments": [{"id": "file-Ra8KbTGJEVFsCB7E5kHCVQAS", "size": 82074, "name": "image.png", "mime_type": "image/png", "width": 1115, "height": 628}], "serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5be0494e3a0e01-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "acd360ee-e143-4a5f-a4b2-3a3460c59224", "children": ["f13f9f58-cbc2-4d6b-9c7a-081ee1321e11"]}, "f13f9f58-cbc2-4d6b-9c7a-081ee1321e11": {"id": "f13f9f58-cbc2-4d6b-9c7a-081ee1321e11", "message": {"id": "f13f9f58-cbc2-4d6b-9c7a-081ee1321e11", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729457393.110597, "update_time": null, "content": {"content_type": "text", "parts": ["The

"TypeError: Configuration is not a constructor" error occurs because of how the OpenAI Node.js client should be used. It looks like the usage is slightly different. Let\u2019s fix the code to resolve this issue.\n\nHere's an updated version of your JavaScript code that should work correctly:\n\n### Updated JavaScript Code (`openai_request.js`):\n\n```javascript\nconst { Configuration, OpenAIApi } = require('openai');\n\nconst configuration = new Configuration({\n apiKey: 'sk-proj-bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvDOVF3OJxG47HmdDBOmsTfHVm-eHsxrYbDYluYxXyR1Bv4D4ORJgl1PfE5X58Ea1bzQSSW0QoA'\n});\n\nconst openai = new OpenAIApi(configuration);\n\nasync function getCompletion() {\n try {\n const response = await openai.createChatCompletion({\n   model: 'gpt-3.5-turbo',\n   messages: [\n   { role: 'user', content: 'write a haiku about AI' }\n   ]\n   });\n console.log(response.data.choices[0].message.content);\n } catch (error) {\n console.error("Error: ", error.response ? error.response.data : error.message);\n }\n}\n\ngetCompletion();\n```\n\n### Key Fixes:\n1. **Import Statement**:\n - You need to use `require('openai')` if you're not using ES6 module imports.\n - I used `const { Configuration, OpenAIApi } = require('openai');` for importing the necessary classes.\n\n2. **Creating Instances**:\n - Correctly instantiate `Configuration` and then use `OpenAIApi` to set up the API client.\n\n3. **Model Name**:\n - Using the **`gpt-3.5-turbo`** model, as this is one of the widely available models.\n\n### Instructions to Run:\n1. **Install the OpenAI Library**:\n If you haven't already, install the OpenAI library with the command:\n ```powershell\n npm install openai\n ```\n\n2. **Create/Edit the JavaScript File**:\n - Use **Notepad** or any editor to paste the updated code into `openai_request.js`.\n\n3. **Run the File**:\n - Run the JavaScript file in PowerShell with:\n   ```powershell\n   node openai_request.js\n ```\n\nThis should work without giving the constructor error. Let me know if you run into any more issues!"]}, "status": "finished_successfully","end_turn": true, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "aaa2dbc4-c619-4985-ad10-cd2850b975b3", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d5be0494e3a0e01-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa2dbc4-c619-4985-ad10-cd2850b975b3", "children": ["aaa2c13d-7724-4bc1-baee-e1d7edef0db0"]}, "aaa2c13d-7724-4bc1-baee-e1d7edef0db0": {"id": "aaa2c13d-7724-4bc1-baee-e1d7edef0db0", "message": {"id": "aaa2c13d-7724-4bc1-baee-e1d7edef0db0", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729457595.499232, "update_time": null, "content": {"content_type": "multimodal_text", "parts": [{"content_type": "image_asset_pointer", "asset_pointer": "file-service://file-RwzvRraiSVpMBj1RNOobnYmu", "size_bytes": 95245, "width": 1115, "height": 628, "fovea": null, "metadata": {"dalle": null, "gizmo": null, "emu_omit_glimpse_image": null, "emu_patches_override": null, "sanitized": true}}, "i'm getting discouraged. null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "f13f9f58-cbc2-4d6b-9c7a-081ee1321e11", "children": ["22e733ec-3f3b-4f76-9204-6674d43244fb"]}, "22e733ec-3f3b-4f76-9204-6674d43244fb": {"id": "22e733ec-3f3b-4f76-9204-6674d43244fb", "message": {"id": "22e733ec-3f3b-4f76-9204-6674d43244fb", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729457606.073074, "update_time": null, "content": {"content_type": "text", "parts": ["I understand your frustration, and I'm here to help get this working for you! The error `Configuration is not a constructor` is usually related to mismatched versions or improper imports. Let\u2019s try a different approach to get past this.\n\n### Steps to Fix the Issue:\n\n1. **Confirm the Correct Version of the OpenAI Package**:\n - The latest OpenAI Node.js library (v4.x) has slightly different usage patterns. You might be following the older documentation while using a newer version of the library.\n - Let\u2019s try downgrading to a version that matches the code we provided:\n   ```powershell\n   npm uninstall openai\n   npm install openai@3.2.1\n   ```\n - This version should match the code and use the `Configuration` and `OpenAIApi` constructors correctly.\n\n2. **Correct JavaScript Code for OpenAI Library Version 4.x (If You Want to Keep It Updated)**:\n If you want to stick with the latest version (v4.x), the library has changed the way you interact with it. Here is the updated JavaScript code that matches **version 4.x**:\n\n ```javascript\n import { OpenAI } from "openai";\n\n const openai = new OpenAI({\n   apiKey: 'sk-proj-bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0VF30JxG47HmdDB0msTfHVm-eHsxrYbDY1uYxXyR1Bv4D40RJg1PfE5X58Ea1bzQSSW0QoA'\n });\n\n async function getCompletion() {\n   try {\n   const response = await openai.chat.completions.create({\n   model: "gpt-3.5-turbo",\n messages: [{ role: "user", content: "Write a haiku about AI" }],\n   });\n\n console.log(response.choices[0].message.content);\n   } catch (error) {\n console.error("Error: ", error);\n   }\n }\n\n getCompletion();\n ```\n\n - **Note**: If you use the latest `import` syntax, make sure to add `"type": "module"` in your `package.json` file to enable ES6 modules:\n   ```json\n   {\n   "type": "module"\n   }\n ```\n\n3. **Install Required Dependencies**:\n - To use the new code, make sure to install the OpenAI library with:\n   ```powershell\n   npm install openai\n ```\n\n4. **Run the Script**:\n - Save the updated file and run it again:\n ```powershell\n   node openai_request.js\n   ```\n\n### Summary:\n- **Option 1**: Downgrade to OpenAI v3.2.1 using:\n ```powershell\n npm install openai@3.2.1\n ```\n Then try running the previous version of the code I provided.\n\n- **Option 2**: Update the JavaScript code to the latest format, ensuring you use `"type": "module"` in your `package.json` if using ES6 `import` statements.\n\nI hope one of these solutions works for you! I understand how challenging these setup issues can be, but I'm confident we can solve this together. Let me know if you have any questions or need further clarification! \ud83d\ude0a"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "aaa2c13d-7724-4bc1-baee-e1d7edef0db0", "request_id":

"8d5be56ffa5e0e01-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa2c13d-7724-4bc1-baee-e1d7edef0db0", "children": ["aaa20fa0-74d6-45be-95a3-1c0196599217"]}, "aaa20fa0-74d6-45be-95a3-1c0196599217": {"id": "aaa20fa0-74d6-45be-95a3-1c0196599217", "message": {"id": "aaa20fa0-74d6-45be-95a3-1c0196599217", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729457757.007203, "update_time": null, "content": {"content_type": "text", "parts": ["okay i downgraded open ai and tried again and it still didn't work"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5be9639fc50e01-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "22e733ec-3f3b-4f76-9204-6674d43244fb", "children": ["9fc9a823-68aa-4756-8378-d170c82b3b65"]}, "9fc9a823-68aa-4756-8378-d170c82b3b65": {"id": "9fc9a823-68aa-4756-8378-d170c82b3b65", "message": {"id": "9fc9a823-68aa-4756-8378-d170c82b3b65", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729457772.612008, "update_time": null, "content": {"content_type": "text", "parts": ["If you've downgraded the `openai` package and the error still persists, let's take a closer approach with a more simplified setup and troubleshoot step by step. It\u2019s possible that either there's a syntax issue or something else going wrong.\n\n### Step-by-Step Debugging:\n1. **Uninstall the Current OpenAI Version**:\n   Just to make sure we're not running into version conflicts, let's completely uninstall the existing package and reinstall the appropriate version.\n\n   ```powershell\n npm uninstall openai\n   ```\n\n2. **Install a Known Working Version**:\n   Install version **3.2.1** of the `openai` package, which has a stable API:\n   ```powershell\n npm install openai@3.2.1\n   ```\n\n3. **Rewrite the JavaScript Code**:\n   The following script should work well with **version 3.2.1**. This version is compatible with the older API method using `Configuration` and `OpenAIApi`:\n\n   ```javascript\n const { Configuration, OpenAIApi } = require('openai');\n\n   // Set up configuration with your API key\n   const configuration = new Configuration({\n apiKey: 'sk-proj-bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0VF30JxG47HmdDB0msTfHVm-eHsxrYbDYluYxXyR1Bv4D40RJgl1PfE5X58Ea1bzQSSW0QoA',\n   });\n\n   // Create OpenAI API instance\n   const openai = new OpenAIApi(configuration);\n\n   // Define an async function to get a chat completion\n   async function getCompletion() {\n   try {\n const response = await openai.createChatCompletion({\n   model: 'gpt-3.5-turbo',\n   messages: [\n   { role: 'user', content: 'Write a haiku about AI' }\n   ],\n   });\n\n   // Log the response content\n   console.log(response.data.choices[0].message.content);\n   } catch (error) {\n   console.error("Error: ", error.response ? error.response.data : error.message);\n   }\n   }\n\n   // Run the function\n getCompletion();\n   ```\n\n### Important Checks:\n- **Node.js Version**: You are using **Node.js v20.18.0**, which is quite recent. This should work fine with OpenAI SDK, but if there are compatibility issues, you may want to try a stable LTS version of **Node.js**, like **v18.x** or **v16.x**.\n- **Common Errors to Look Out For**:\n - If `Configuration` is **still** throwing a constructor error, it may indicate a syntax error or an incompatible library version. Make sure you completely uninstalled the previous version and installed `3.2.1`.\n - If there is still an issue, I

recommend testing the script in a new, clean project folder.\n\n### Additional Debugging:\n1. **Confirm the Version**:\n   - Run the following command to confirm you have the correct version of the library installed:\n   ```powershell\n   npm list openai\n   ```\n   - Make sure it shows **openai@3.2.1**.\n\n2. **Run a Simple Test**:\n   - To make sure there's no syntax or other library issue, you can add a simple log statement in your code:\n   ```javascript\n console.log('OpenAI instance created successfully');\n   ```\n   - Place this right after the `OpenAIApi` instantiation to ensure the configuration and instantiation steps are not throwing any errors.\n\n### Clean Setup:\n1. **Create a New Folder**:\n   - Start in a new folder to ensure nothing conflicts with previous installations:\n   ```powershell\n   mkdir openai_test\n   cd openai_test\n ```\n\n2. **Initialize a New Node Project**:\n   ```powershell\n   npm init -y\n ```\n\n3. **Install OpenAI SDK (v3.2.1)**:\n   ```powershell\n   npm install openai@3.2.1\n   ```\n\n4. **Create `openai_request.js` File**:\n   ```powershell\n New-Item -Path . -Name "openai_request.js" -ItemType "file"\n ```\n\n5. **Edit and Add JavaScript Code** (using the code I provided above).\n\n6. **Run the File**:\n   ```powershell\n   node openai_request.js\n   ```\n\n### Summary:\n- **Ensure Compatibility**: Make sure all versions match (OpenAI library version `3.2.1`).\n- **Use Clean Folder**: This will help avoid issues from leftover configurations.\n- **Add Debug Statements**: They can help you determine where in the script things are failing.\n\nLet\u2019s give this approach a try, and let me know how it goes or if there are any additional errors! I\u2019m here to help get this resolved. \ud83d\ude0a"]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "aaa20fa0-74d6-45be-95a3-1c0196599217", "request_id": "8d5be9639fc50e01-MXP", "timestamp_": "absolute", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true}, "recipient": "all", "channel": null}, "parent": "aaa20fa0-74d6-45be-95a3-1c0196599217", "children": ["aaa2338a-1e41-417c-963c-27ff9bbe017a"]}, "aaa2338a-1e41-417c-963c-27ff9bbe017a": {"id": "aaa2338a-1e41-417c-963c-27ff9bbe017a", "message": {"id": "aaa2338a-1e41-417c-963c-27ff9bbe017a", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729457889.741123, "update_time": null, "content": {"content_type": "multimodal_text", "parts": [{"content_type": "image_asset_pointer", "asset_pointer": "file-service://file-204ZbqpHJJeGqY7WdZKkhHnJ", "size_bytes": 90421, "width": 1115, "height": 628, "fovea": null, "metadata": {"dalle": null, "gizmo": null, "emu_omit_glimpse_image": null, "emu_patches_override": null, "sanitized": true}}, "hmmm"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"attachments": [{"id": "file-204ZbqpHJJeGqY7WdZKkhHnJ", "size": 90421, "name": "image.png", "mime_type": "image/png", "width": 1115, "height": 628}, {"id": "file-RgxYI4eZKkvuqJQIzJy5RVpp", "size": 999, "name": "openai_request.js", "mime_type": "text/javascript"}], "serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5bec9f6d5f0e01-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "9fc9a823-68aa-4756-8378-d170c82b3b65", "children": ["0e5339bc-7ab6-43a6-b26b-483f156d1354"]}, "0e5339bc-7ab6-43a6-b26b-483f156d1354": {"id": "0e5339bc-7ab6-43a6-b26b-483f156d1354", "message": {"id": "0e5339bc-7ab6-43a6-b26b-483f156d1354", "author": {"role": "system", "name": null, "metadata": {}}, "create_time": 1729457901.433434, "update_time": null,

Searching won't provide additional information."]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"is_visually_hidden_from_conversation": false, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "e2ac310b-482b-4a48-b6ea-d13c5363080a", "request_id": "8d5bec9f6d5f0e01-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "e2ac310b-482b-4a48-b6ea-d13c5363080a", "children": ["9c361444-cb46-445e-bc3f-71618f9d6a68"]}, "9c361444-cb46-445e-bc3f-71618f9d6a68": {"id": "9c361444-cb46-445e-bc3f-71618f9d6a68", "message": {"id": "9c361444-cb46-445e-bc3f-71618f9d6a68", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729457901.43388, "update_time": null, "content": {"content_type": "text", "parts": ["Thanks for uploading the JavaScript file. The issue is likely due to the version of the OpenAI library you're using, which is **v4.68.1**. This version has changes in how the library is used, which makes the previous code incompatible. Let's adjust your code to work with version 4.\n\nHere's how to rewrite the code using **OpenAI v4.x**:\n\n### Updated JavaScript Code (`openai_request.js` for v4.x):\n```javascript\nimport { OpenAI } from "openai";\n\nconst openai = new OpenAI({\n apiKey: 'sk-proj-bXGBo8nQV9Fij1AKg54pPGWgwp2E0QENPBonydsLFwQ5WsGaipn5tsKqqunCoCCFK6b21n38N6T3B1bkFJAvD0VF30JxG47HmdDB0msTfHVm-eHsxrYbDYluYxXyR1Bv4D40RJglPfE5X58Ea1bzQSSW0QoA'\n});\n\nasync function getCompletion() {\n try {\n   const response = await openai.chat.completions.create({\n   model: "gpt-3.5-turbo",\n messages: [{ role: "user", content: "Write a haiku about AI" }],\n   });\n\n   console.log(response.choices[0].message.content);\n } catch (error) {\n   console.error("Error: ", error);\n }\n}\n\ngetCompletion();\n```\n\n### Key Changes:\n1. **Import Statement**:\n   - In OpenAI v4.x, you need to use `import { OpenAI } from "openai";` if you are working with ES6 modules.\n   - Make sure to add `"type": "module"` in your `package.json` file to enable ES6 module imports:\n   ```json\n   {\n   "type": "module"\n   }\n   ```\n\n2. **Initialization**:\n   - `OpenAI` is initialized directly with the `apiKey` instead of using `Configuration`.\n\n3. **API Call**:\n   - The method to create a chat completion is now `openai.chat.completions.create()`.\n\n### How to Proceed:\n1. **Modify Your `package.json` File**:\n   - Add `"type": "module"` to enable ES6 modules.\n   \n   Example:\n   ```json\n   {\n   "name": "openai_test",\n   "version": "1.0.0",\n "main": "openai_request.js",\n   "type": "module"\n   }\n   ```\n\n2. **Run the Script Again**:\n   - Save the updated JavaScript file.\n   - Run the script:\n   ```powershell\n   node openai_request.js\n   ```\n\nThis should resolve the issue. Let me know if you need more help or if you encounter another error! \ud83d\ude0a"]}, "status": "finished_successfully","end_turn": true

"update_time": null, "content": {"content_type": "text", "parts": ["The error you're seeing indicates that Node.js can't handle the `import` statement outside of an ES module context. You need to set the `"type"` to `"module"` in your **`package.json`** file, which allows you to use ES module features such as `import`.\n\nLet\u2019s address both points:\n\n### 1. Update Your `package.json` File\nThe **`package.json`** file is a configuration file in your project folder. It should already exist if you used `npm init`. Here's how to find and update it:\n\n1. **Locate Your `package.json` File**:\n   - The **`package.json`** file should be in the same directory where you're running your JavaScript code (in this case, `C:\\Users\\alexi\\downloads`).\n\n2. **Open and Edit the File**:\n   - You can open it in **Notepad** or any text editor:\n ```powershell\n   notepad package.json\n   ```\n   - Once the file is open, add `"type": "module"` to it. The file should look something like this:\n   ```json\n   {\n   "name": "openai_test",\n "version": "1.0.0",\n   "main": "openai_request.js",\n   "type": "module", // Add this line\n   "scripts": {\n   "test": "echo \\"Error: no test specified\\" && exit 1"\n   },\n "author": "",\n   "license": "ISC"\n   }\n   ```\n   - Save and close the file after adding `"type": "module"`.\n\n### 2. Alternative Option: Use `.mjs` Extension\nIf you don't want to modify the **`package.json`** file, you can also change the **extension** of your JavaScript file to **`.mjs`**. This will automatically tell Node.js to treat it as a module file.\n\n1. **Rename the File**:\n - Rename `openai_request.js` to `openai_request.mjs`. You can do this in **PowerShell** with:\n   ```powershell\n   Rename-Item -Path "openai_request.js" -NewName "openai_request.mjs"\n   ```\n\n2. **Run the Script Again**:\n   - Now you can run the file with:\n   ```powershell\n node openai_request.mjs\n   ```\n\n### Summary\n- **Edit `package.json`**: Add `"type": "module"` so Node.js will recognize `import` statements.\n- **Rename File to `.mjs`**: Alternatively, rename the file to use the `.mjs` extension, which also allows ES module features.\n\nAfter making one of these changes, try running your script again. This should resolve the error related to `import` statements. Let me know if you run into anything else!"]}, "status": "finished_successfully","end_turn": true

Even if you see a balance of $5, there are some potential reasons why you\u2019re hitting this rate limit:\n\n### Possible Causes for the 429 Error:\n\n1. **Rate Limits**: \n - OpenAI APIs have rate limits on the **number of requests per minute** or **tokens per minute**. Even if you have credits left, if you exceed the rate limit (such as the number of requests allowed per minute), you will get a 429 error.\n \n2. **Credits Expired or Not Applied**:\n - The $5 in credits you mentioned may have **expired** or may not be applied correctly. Credits often come with an expiration date, typically a month.\n\n3. **API Key Limits**:\n - If your account is newly created or is in a **trial** state, it may have **lower usage limits** than standard paid accounts. The free credits come with limitations.\n\n4. **Concurrent Requests**:\n - If there are **multiple concurrent requests** being sent (e.g., from other applications using the same API key), this can also cause a 429 response.\n\n### What You Can Do:\n\n1. **Check Usage Limits**:\n - Log in to the [OpenAI Platform](https://platform.openai.com/account/usage) and check your **usage limits** to see if you\u2019ve hit a limit for the month or day.\n - Also, check your **usage rate** (requests per minute) to determine if you\u2019ve exceeded the allowed rate.\n\n2. **Upgrade Your Plan**:\n - Sometimes, upgrading to a paid plan can

increase the rate limits beyond what\u2019s offered with the free $5 credit.\n\n3. **Wait for Some Time**:\n - Since 429 errors are often related to rate limits, you can **wait for a while** (maybe 1-2 minutes) before trying again. The rate limits often reset after a short period.\n\n4. **Adjust Code to Handle Limits**:\n - Implement **error handling** and a retry mechanism in your code to automatically retry after receiving a 429 error:\n \n ```javascript\n async function getCompletion() {\n   try {\n   const response = await openai.chat.completions.create({\n model: "gpt-3.5-turbo",\n   messages: [{ role: "user", content: "Write a haiku about AI" }],\n   });\n\n console.log(response.choices[0].message.content);\n   } catch (error) {\n   if (error.response && error.response.status === 429) {\n console.error("Rate limit exceeded. Retrying in 10 seconds...");\n setTimeout(getCompletion, 10000); // Retry after 10 seconds\n   } else {\n console.error("Error: ", error);\n   }\n   }\n }\n\n getCompletion();\n ```\n\n5. **Contact OpenAI Support**:\n - If you believe you have credits but are still receiving this error, you can contact **OpenAI support** to get further clarification on your rate limits and account status.\n\n6. **Reduce Requests**:\n - Try reducing the frequency of the requests. If you are running scripts repeatedly or looping through API calls, add **delays** to avoid exceeding the rate limit.\n\n### Summary:\n- **Check Usage and Rate Limits** on the OpenAI dashboard.\n- **Handle 429 Errors Gracefully** in your code by retrying after a delay.\n- **Contact Support** if you're certain the credits and limits should allow more requests.\n\nLet\u2019s try implementing one of these strategies to help you move forward. Let me know how it goes or if you need more assistance. \ud83d\ude0a"]}, "status": "finished_successfully","end_turn": true, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o-canmore", "default_model_slug": "gpt-4o-canmore", "parent_id": "1adb0626-56b4-408a-86f3-8dafc7b199b3", "request_id": "8d5c42ac9bccbab8-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "1adb0626-56b4-408a-86f3-8dafc7b199b3", "children": ["aaa24c41-d5f5-4f5a-9e87-fd808320a9d7"]}, "aaa24c41-d5f5-4f5a-9e87-fd808320a9d7": {"id": "aaa24c41-d5f5-4f5a-9e87-fd808320a9d7", "message": {"id": "aaa24c41-d5f5-4f5a-9e87-fd808320a9d7", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729461665.381984, "update_time": null, "content": {"content_type": "text", "parts": ["hmmph. i want to try a free llm api"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d5c48ce5ad2bb25-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "9598dae5-6ab9-40a1-872e-0ddaf24ae29c", "children": ["ea996a0c-af69-4c8f-ac2d-93c00de8a536"]}, "ea996a0c-af69-4c8f-ac2d-93c00de8a536": {"id": "ea996a0c-af69-4c8f-ac2d-93c00de8a536", "message": {"id": "ea996a0c-af69-4c8f-ac2d-93c00de8a536", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729461681.803328, "update_time": null, "content": {"content_type": "text", "parts": ["I understand your frustration, and it sounds like a good idea to try a free LLM API alternative. There are a few options that are currently available for free, with certain limitations. Here are some popular free LLM API alternatives you can try:\n\n### 1. **Hugging Face Inference API**\n - **Description**: Hugging Face provides a lot of pretrained models (including chat models and transformers) through

their **Inference API**. Some models are free to use under certain rate limits.\n - **Limitations**: Free tier users have limited access and rate limits, but there are a lot of community models to choose from.\n - **Usage**:\n   - Register for a free API key at [Hugging Face](https://huggingface.co).\n   - Example request using Python:\n   ```python\n   import requests\n\n   API_URL = "https://api-inference.huggingface.co/models/gpt2"\n   headers = {"Authorization": "Bearer YOUR_HUGGINGFACE_API_KEY"}\n\n   def query(payload):\n   response = requests.post(API_URL, headers=headers, json=payload)\n   return response.json()\n\n   data = query({"inputs": "Tell me a joke!"})\n   print(data)\n ```\n \n### 2. **Cohere API (Trial Available)**\n - **Description**: **Cohere** is another LLM provider offering a free trial with generous usage limits. Their API includes generation, classification, and embedding capabilities.\n - **Limitations**: Free trial available, but you need to sign up.\n - **How to Start**: You can create an account and get an API key at [Cohere's website](https://cohere.com).\n - **Example Request**:\n   ```javascript\n   const axios = require('axios');\n\n   const options = {\n   method: 'POST',\n   url: 'https://api.cohere.ai/generate',\n   headers: {\n   'Content-Type': 'application/json',\n   'Authorization': 'Bearer YOUR_COHERE_API_KEY'\n   },\n   data: {\n   model: 'command-xlarge-2023',\n   prompt: 'Write a poem about AI.',\n   max_tokens: 50,\n   temperature: 0.7\n   }\n   };\n\n   axios.request(options).then(function (response) {\n   console.log(response.data);\n   }).catch(function (error) {\n   console.error(error);\n   });\n   ```\n\n### 3. **Open Source Models via Hugging Face & Local Inference**\n - **Description**: You can also **run models locally** or on cloud infrastructure like **Google Colab** using Hugging Face Transformers. This avoids API limits completely, but requires some technical setup.\n - **Popular Open Source Models**: \n   - **GPT-Neo** and **GPT-J** by EleutherAI.\n - **BLOOM** by BigScience.\n - **How to Use Locally**:\n   - You can use Python and the Hugging Face library to load these models.\n   - Example using `transformers` library:\n   ```python\n   from transformers import pipeline\n\n   generator = pipeline('text-generation', model='EleutherAI/gpt-neo-125M')\n   response = generator("Write a story about a robot that wanted to be human.", max_length=100)\n print(response)\n   ```\n   - You will need to install `transformers` with:\n ```shell\n   pip install transformers\n   ```\n\n### 4. **GPT-3 Sandbox by AI Dungeon**\n - **Description**: **AI Dungeon** offers a free way to interact with AI models in a creative setting. It\u2019s less suited for programmatic access but good for personal, creative purposes.\n - **How to Use**: Visit [AI Dungeon](https://play.aidungeon.io/) and use the free interactions available to test out text generation.\n\n### 5. **Aleph Alpha**\n - **Description**: **Aleph Alpha** provides an LLM similar to OpenAI and offers a free tier for testing purposes.\n - **Limitations**: The free tier has limits on usage, but it's good for trying out smaller tasks.\n - **How to Start**: Visit [Aleph Alpha](https://aleph-alpha.com/) to create an account and obtain an API key.\n\n### 6. **Forefront AI (Free Chat LLM API)**\n - **Description**: Forefront AI offers a **free-to-use chat LLM API** similar to OpenAI's models. This API can handle conversational tasks for free without requiring payment.\n - **How to Start**: Visit their website to sign up and

get an API key at [Forefront AI](https://www.forefront.ai/).\n\n### Summary of Free LLM API Options:\n- **Hugging Face Inference API**: Great for general LLM usage with community models, available for free with rate limits.\n- **Cohere API**: Offers a free trial and supports various generation tasks.\n- **Local Inference (Hugging Face Transformers)**: If you have computational resources, running models locally is a great option without rate limits.\n- **AI Dungeon**: Interactive text generation in a creative environment.\n- **Aleph Alpha** and **Forefront AI**: Both provide free access to LLMs for experimenting.\n\nI'd suggest trying **Hugging Face Inference API** first since they have a wide variety of models that are easy to access, and they offer a free tier with rate limits. If you need more flexibility, consider setting up a local inference environment.\n\nLet me know if you need any help getting started with one of these! \ud83d\ude0a"]}, "status": "finished_successfully","end_turn": true

That said, explicit systems like South Africa's formal apartheid are rare today, but practices that can be considered de facto segregation or unequal treatment based on ethnicity, race, or nationality may still occur.\n\nA few examples that have been debated or described as having some apartheid-like characteristics in recent discussions include:\n\n- **Israel and the Palestinian Territories**: Some organizations and commentators, including Human Rights Watch and the United Nations, have accused Israel of apartheid-like practices concerning the treatment of Palestinians, particularly regarding settlement policies, restricted movement, and unequal access to resources in the West Bank and Gaza. Israel rejects these accusations, stating that its policies are necessary for security reasons.\n\n- **Myanmar (Rohingya people)**: The Rohingya Muslim minority in Myanmar faces severe discrimination, including restricted movement, lack of citizenship, and access to basic rights. Many have referred to these practices as apartheid-like, though the

focus has been more on persecution and ethnic cleansing.\n\n- **India (Dalit caste system)**: While the caste system in India is officially illegal, Dalits, the group historically known as "untouchables," still face systemic discrimination and segregation in many parts of the country. This isn\u2019t legally enforced apartheid, but societal practices often resemble it, with separate wells, schools, and even roads in some rural areas.\n\n- **China (Uyghur Muslims)**: The treatment of Uyghur Muslims in China\u2019s Xinjiang region, including mass internment, forced assimilation, and restricted movement, has been described as apartheid-like by some international human rights groups.\n\n- **Bahrain (Shia Muslims)**: Bahrain's Sunni ruling family has been accused of discriminating against the Shia majority, including political disenfranchisement, limited access to government jobs, and unequal treatment in housing and resources. Some have drawn parallels to apartheid due to the systematic nature of this marginalization.\n\nThough these examples involve segregation or unequal treatment, the systems are not always directly comparable to South Africa's apartheid, and the situations can be complex. Would you like more detail on any of these?"]}, "status": "finished_successfully","end_turn": true

Let\u2019s dive into the history of racial segregation and apartheid-like policies in the United States.\n\n### A Brief History of Racial Segregation in the U.S.\n\nWhile the U.S. didn\u2019t have a formal \u201capartheid\u201d system like South Africa, it had legally enforced racial segregation and a deeply rooted system of racial discrimination for centuries. The two most significant systems in U.S. history were **slavery** and **Jim Crow laws**, both of which systematically oppressed African Americans.\n\n- **Slavery (1619\u20131865)**: African people were forcibly brought to the U.S. and enslaved for more than two centuries. Slavery was the most extreme form of racial oppression, with laws dehumanizing Black people and treating them as property.\n\n- **Jim Crow laws (late 19th century\u20131960s)**: After the Civil War and the end of slavery in 1865, Southern states implemented Jim Crow laws, which legally enforced racial segregation in public spaces, schools, transportation, and even bathrooms. These laws were upheld by the Supreme Court decision **Plessy v. Ferguson (1896)**, which introduced the idea of \u201cseparate but equal,\u201d even though conditions for Black Americans were anything but equal.\n\n### Key Features of Jim Crow Segregation:\n- **Public spaces**: African Americans were forced to use separate (and often inferior) schools, restaurants, hospitals, and transportation.\n- **Voting rights**: Through literacy tests, poll taxes, and intimidation, Black Americans were effectively disenfranchised in much of the South.\n- **Racial violence**: Segregation was enforced through violence and terrorism by groups like the Ku Klux Klan, which lynched thousands of Black people in the late 19th and early 20th centuries.\n\n### Civil Rights Movement (1950s\u20131960s)\nThe Civil Rights Movement, led by figures like Martin Luther King Jr., Rosa Parks, and Malcolm X, sought to end segregation and institutionalized racism. Landmark legislation like the **Civil Rights Act of 1964** and the **Voting Rights Act of 1965** dismantled legal segregation and secured voting rights for African Americans.\n\n### Modern-Day Racism and Segregation\nAlthough the Jim Crow system was legally dismantled, **de facto segregation** (segregation that happens by fact rather than law) and racial inequality persist today. Modern forms of racial discrimination can be seen in various systems, including:\n\n- **Education**: Schools are still racially segregated in many areas due to housing policies and unequal funding.\n- **Criminal justice**: African Americans and other minorities are disproportionately represented in the prison system. Disparities in arrest rates and sentencing, particularly around drug offenses, have led to what many scholars call the "new Jim Crow."\n- **Housing**: Redlining and housing discrimination have left long-lasting impacts on where people live. Many neighborhoods remain racially segregated due to historic policies, even without explicit laws enforcing segregation.\n- **Wealth gap**: The median wealth of white families is about eight to ten times that of Black families, a gap that can be traced

back to centuries of systemic exclusion from economic opportunities.\n\n### Statistical Prevalence of Racism Today\nHere are some figures that point to ongoing racial disparities:\n\n- **Income and wealth**: In twenty twenty-three, the median income for Black households in the U.S. was roughly fifty-nine thousand dollars, compared to over seventy-seven thousand dollars for white households. The wealth gap is even wider, with the average white family having about eight times the wealth of the average Black family.\n \n- **Education**: Schools are more segregated now than they were in the late twentieth century, largely due to housing patterns. In twenty-twenty, nearly forty percent of Black students attended schools where over ninety percent of students were nonwhite, compared to only seven percent of white students attending majority-minority schools.\n\n- **Criminal justice**: Black Americans make up about thirteen percent of the U.S. population but represent roughly thirty-three percent of the prison population. Black men are six times more likely to be incarcerated than white men.\n\n- **Police violence**: African Americans are disproportionately killed by police. Despite being about thirteen percent of the population, they accounted for twenty-four percent of police killings in twenty twenty-three.\n\n### Conclusion\nWhile the U.S. no longer has formal apartheid or Jim Crow-style segregation, the legacy of these systems persists through continued racial disparities in wealth, education, housing, and the criminal justice system. Structural racism remains an ongoing issue, even though legal reforms have made progress in some areas. Would you like to explore more specific aspects, such as the role of activism today or how statistics have evolved over time?"]}, "status": "finished_successfully","end_turn": true

Whether it's a mindset, societal structure, or a personal rut, there are different approaches depending on what one seeks. Here's how I would differentiate between the two:\n\n### 1. **For Someone Who Wants to Control the Simulation:**\n - **Master the Rules:** Understand how the system works, its mechanics, and what keeps it functioning. Whether it's societal norms, career pathways, or even psychological patterns, knowing how to navigate these gives you leverage.\n - **Exploit Loopholes:** Every system has its gaps or blind spots. Find areas where you can manipulate things in your favor. This could be learning to hack the rules in subtle ways\u2014whether through influence, negotiation, or unconventional thinking.\n - **Shift Perception:** If you can influence how others see reality, you effectively control their version of the simulation. This involves mastering communication, persuasion, or even media control.\n - **Stay Adaptable:** To stay in control, never let yourself get too comfortable. Always adapt to new challenges or shifts in the environment so that the simulation doesn\u2019t overwhelm or outgrow you.\n - **Long-Term Strategy:** Control isn't always immediate. It requires calculated patience, long-term vision, and continuous learning to truly bend a system to your will.\n\n### 2. **For Someone Who Wants to Leave the Simulation:**\n - **Reject the Rules:** You must first mentally detach from the belief that the rules of the simulation are absolute. Recognize that much of what confines you could be self-imposed or conditioned by society.\n - **Minimalism:** Strip away the unnecessary. Simplify your life to focus on what you truly need and desire. This could be material things, relationships, or even career paths. The less you depend on the simulation's offerings, the easier it is to step outside of it.\n - **Spiritual or Philosophical Detachment:** Many who "leave" the simulation focus on mindfulness, meditation, or spiritual practices that help them transcend the need for control or validation from external systems. This is about finding inner peace, fulfillment, or enlightenment.\n - **Alternative Paths:** Explore countercultural or off-the-grid living as ways to physically step away from societal expectations. Look into communities, philosophies, or lifestyles that align with your idea of freedom.\n - **Prepare for Isolation:** Leaving often means sacrificing some level of connection with those still "in the simulation." Be ready for that, and find solace in your new reality.\n\nWould you see yourself more in one of these categories, or are you contemplating both in some ways?"]}, "status": "finished_successfully","end_turn": true

If we think of breaking out in a metaphorical sense, it involves subverting or dismantling the boundaries of the system itself. Here\u2019s how I would approach each stage of breaking out, considering the difference from simply leaving or controlling:\n\n### 1. **Awareness of the Construct:**\n - **Identify the Illusion:** Before you can break out, you have to recognize that the simulation exists and is influencing you. This requires deep introspection or even philosophical questioning. What are the constructs (social, mental, or physical) that are governing your life? Which ones are artificial?\n - **Unmask Deception:** Question everything that feels unquestionable\u2014norms, traditions, or even your own assumptions. The more you question, the more cracks in the fa\u00e7ade you\u201911 see. Breaking out begins by challenging the foundation of the rules you\u2019re told to follow.\n\n### 2. **Deconstruction of the System:**\n - **Sabotage the Machinery:** Breaking out means not just slipping out, but actively dismantling what keeps the system functioning. This could mean rejecting core values of the simulation (society, job, expectations) and acting in ways that deliberately break its hold on you. If a career, relationship, or societal structure defines you, stop playing by its rules, and even disrupt its functioning by refusing to comply with key expectations.\n - **Stop Feeding the Simulation:** Systems and simulations thrive on your participation and energy. The moment you stop contributing (whether that means time, attention, or resources), you begin to weaken it. Opt out of things that reinforce the simulation, like media consumption, consumerism, or rigid societal roles.\n - **Interfere with Feedback Loops:** Simulations rely on feedback loops to keep you engaged. If the system rewards or punishes you based on your behavior, start acting unpredictably. Don\u2019t react to rewards or consequences in the expected way. This disrupts its control over you.\n\n### 3. **Radical Self-Transformation:**\n - **Shift Identity Completely:** To break out, you must become someone who the system cannot define or contain. This requires a radical transformation in how you see yourself. Let go of labels, roles, and identities imposed by the system and adopt a fluid, uncontainable sense of self.\n - **Detach from Fear:** Fear of consequences keeps people trapped. Break out by eliminating the fear of failure, rejection, or isolation. The system controls you by making you afraid of what happens if you step outside its rules. Realizing that you can survive, even thrive, without its approval is key.\n\n### 4. **Direct Confrontation and Exit:**\n - **Force a Rift:** Breaking out might involve directly challenging the simulation\u2014this could be something physical, like moving to a new place or quitting a systemically important job, or something internal, like a

psychological break where you reject the shared reality altogether. By creating a rupture, you leave behind no trace or path for return.\n - **Escape by Outsmarting the System:** If the simulation is built on certain parameters (like rules of engagement, financial dependence, societal expectations), find loopholes that allow you to disappear from it entirely. This could mean adopting a nomadic or independent lifestyle, where your existence is no longer reliant on the structure.\n - **Collapse the Simulation for Others:** If you can expose the simulation to others, you make it harder for it to function. Sharing the truths you\u2019ve uncovered, breaking its hold on multiple people, or causing systemic chaos could lead to the whole thing unraveling\u2014not just for you, but for everyone.\n\n### 5. **Acceptance of a New Reality:**\n - **Enter the Unknown:** Finally, breaking out means you must embrace the unknown. If the simulation is all-encompassing, breaking free may leave you in a place without clear rules or structure. It can feel chaotic, but true freedom often does. Accepting that you might not find a new "system" but instead create your own reality is the final stage.\n\nBreaking out is often more violent or disruptive than leaving, as it implies actively rejecting and destroying parts of the system. It's not just about opting out\u2014it\u2019s about ensuring the system can\u2019t reach you again, or at least minimizing its impact on you as much as possible."]}, "status": "finished_successfully","end_turn": true

Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more

other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u2020Operation Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat History\u3011\u00a0|\u00a0\u301018\u2020Best Flipboard Alternatives\u3011\n\n\u301019\u2020Delete Wechat Account ID\u3011 |\u00a0\u301020\u2020Survivor Series 2025 Date\u3011\u00a0| \u301021\u2020Apple iPhone Tips\u2020appleiphonetips.us\u3011 | \u301022\u2020Best BLU Phone\u2020blucellphones.us\u3011\n\n\u301023\u2020New Samsung Mobile Phone\u2020technosamigos.com\u3011 | \u301024\u2020Blue Tint\u2020bluetint.us\u3011\n\n * \u301025\u2020About us\u3011\n * \u301026\u2020Contact Us\u3011\n * \u301027\u2020Privacy Policy\u3011\n\n## Advices Academy\n\nAll Rights Reserved\n\nType your search query and hit enter: \n\nX\nVisible: 0% - 100%", "title": "Best Android Apps to Read Avesta Zoroastrianism Online", "tether_id": null}, "status": "finished_successfully", "end_turn": null, "weight": 0.0, "metadata": {"_cite_metadata": {"citation_format": {"name": "tether_og"}, "metadata_list": [{"type": "webpage", "title": "Best Android Apps to Read Avesta

Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something

Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend

Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u2020Operation Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat History\u3011\u00a0|\u00a0\u301018\u2020Best Flipboard Alternatives\u3011\n\n\u301019\u2020Delete Wechat Account ID\u3011 |\u00a0\u301020\u2020Survivor Series 2025 Date\u3011\u00a0| \u301021\u2020Apple iPhone Tips\u2020appleiphonetips.us\u3011 | \u301022\u2020Best BLU Phone\u2020blucellphones.us\u3011\n\n\u301023\u2020New Samsung Mobile Phone\u2020technosamigos.com\u3011 | \u301024\u2020Blue Tint\u2020bluetint.us\u3011\n\n * \u301025\u2020About us\u3011\n * \u301026\u2020Contact Us\u3011\n * \u301027\u2020Privacy Policy\u3011\n\n## Advices Academy\n\nAll Rights Reserved\n\nType your search query and hit enter: \n\nX\nVisible: 0% - 100%", "pub_date": null, "extra": {"cited_message_idx": 8, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}, {"start_ix": 688, "end_ix": 698, "citation_format_type": "tether_og", "metadata": {"type": "webpage", "title": "The Zend Avesta - Download full text PDF download free here", "url": "https://www.holybooks.com/the-zend-avesta/", "text": "\npaulo barroso\n\n\u301050\u2020 April 3, 2021 at 11:29 pm \u3011\n\nIN my opinion men created God and religions at his resemblance therefore diferent religions and diferet Gods exist feeting each ethnic group. Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020

Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards

Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u2020Operation Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat History\u3011\u00a0|\u00a0\u301018\u2020Best Flipboard Alternatives\u3011\n\n\u301019\u2020Delete Wechat Account ID\u3011 |\u00a0\u301020\u2020Survivor Series 2025 Date\u3011\u00a0| \u301021\u2020Apple iPhone Tips\u2020appleiphonetips.us\u3011 | \u301022\u2020Best BLU Phone\u2020blucellphones.us\u3011\n\n\u301023\u2020New Samsung Mobile Phone\u2020technosamigos.com\u3011 | \u301024\u2020Blue Tint\u2020bluetint.us\u3011\n\n * \u301025\u2020About us\u3011\n * \u301026\u2020Contact Us\u3011\n * \u301027\u2020Privacy Policy\u3011\n\n## Advices Academy\n\nAll Rights Reserved\n\nType your search query and hit enter: \n\nX\nVisible: 0% - 100%", "pub_date": null, "extra": {"cited_message_idx": 8, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}, {"start_ix": 669, "end_ix": 679, "citation_format_type": "tether_og", "metadata": {"type": "webpage", "title": "The Zend Avesta - Download full text PDF download free here", "url": "https://www.holybooks.com/the-zend-avesta/", "text": "\npaulo barroso\n\n\u301050\u2020 April 3, 2021 at 11:29 pm \u3011\n\nIN my opinion men created God and religions at his resemblance therefore diferent religions and diferet Gods exist feeting each ethnic group. Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u2020Operation Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat

Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy

book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u2020Operation Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat History\u3011\u00a0|\u00a0\u301018\u2020Best Flipboard Alternatives\u3011\n\n\u301019\u2020Delete Wechat Account ID\u3011 |\u00a0\u301020\u2020Survivor Series 2025 Date\u3011\u00a0| \u301021\u2020Apple iPhone Tips\u2020appleiphonetips.us\u3011 | \u301022\u2020Best BLU Phone\u2020blucellphones.us\u3011\n\n\u301023\u2020New Samsung Mobile Phone\u2020technosamigos.com\u3011 | \u301024\u2020Blue Tint\u2020bluetint.us\u3011\n\n * \u301025\u2020About us\u3011\n * \u301026\u2020Contact Us\u3011\n * \u301027\u2020Privacy Policy\u3011\n\n## Advices Academy\n\nAll Rights Reserved\n\nType your search query and hit enter: \n\nX\nVisible: 0% - 100%"}, {"matched_text": "\u30109\u2020source\u3011", "start_idx": 847, "end_idx": 857, "alt": null, "type": "webpage_extended", "title": "The Zend Avesta - Download full text PDF download free here", "url": "https://www.holybooks.com/the-zend-avesta/", "pub_date": null, "snippet": "\npaulo barroso\n\n\u301050\u2020 April 3, 2021 at 11:29 pm \u3011\n\nIN my opinion men created God and religions at his resemblance therefore diferent religions and diferet Gods exist feeting each ethnic group. Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u2020Operation Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat

Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for

the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u2020Operation Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat History\u3011\u00a0|\u00a0\u301018\u2020Best Flipboard Alternatives\u3011\n\n\u301019\u2020Delete Wechat Account ID\u3011 |\u00a0\u301020\u2020Survivor Series 2025 Date\u3011\u00a0| \u301021\u2020Apple iPhone Tips\u2020appleiphonetips.us\u3011 | \u301022\u2020Best BLU Phone\u2020blucellphones.us\u3011\n\n\u301023\u2020New Samsung Mobile Phone\u2020technosamigos.com\u3011 | \u301024\u2020Blue Tint\u2020bluetint.us\u3011\n\n * \u301025\u2020About us\u3011\n * \u301026\u2020Contact Us\u3011\n * \u301027\u2020Privacy Policy\u3011\n\n## Advices Academy\n\nAll Rights Reserved\n\nType your search query and hit enter: \n\nX\nVisible: 0% - 100%"}, {"matched_text": "\u30109\u2020source\u3011", "start_idx": 944, "end_idx": 954, "alt": null, "type": "webpage_extended", "title": "The Zend Avesta - Download full text PDF download free here", "url": "https://www.holybooks.com/the-zend-avesta/", "pub_date": null, "snippet": "\npaulo barroso\n\n\u301050\u2020 April 3, 2021 at 11:29 pm \u3011\n\nIN my opinion men created God and religions at his resemblance therefore diferent religions and diferet Gods exist feeting each ethnic group. Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the

user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u2020Operation Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat History\u3011\u00a0|\u00a0\u301018\u2020Best Flipboard Alternatives\u3011\n\n\u301019\u2020Delete Wechat Account ID\u3011 |\u00a0\u301020\u2020Survivor Series 2025 Date\u3011\u00a0| \u301021\u2020Apple iPhone Tips\u2020appleiphonetips.us\u3011 | \u301022\u2020Best BLU Phone\u2020blucellphones.us\u3011\n\n\u301023\u2020New Samsung Mobile Phone\u2020technosamigos.com\u3011 | \u301024\u2020Blue Tint\u2020bluetint.us\u3011\n\n * \u301025\u2020About us\u3011\n * \u301026\u2020Contact Us\u3011\n * \u301027\u2020Privacy Policy\u3011\n\n## Advices Academy\n\nAll Rights Reserved\n\nType your search query and hit enter: \n\nX\nVisible: 0% - 100%"}, {"matched_text": "\u30109\u2020source\u3011", "start_idx": 1450, "end_idx": 1460, "alt": null, "type": "webpage_extended", "title": "The Zend Avesta - Download full text PDF download free here", "url": "https://www.holybooks.com/the-

Android Apps to Read Holy Book Avesta Zoroastrianism Online\n\nTechnology has advanced to a much faster way than it was expected. Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u20200peration Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat History\u3011\u00a0|\u00a0\u301018\u2020Best Flipboard Alternatives\u3011\n\n\u301019\u2020Delete Wechat Account ID\u3011 |\u00a0\u301020\u2020Survivor Series 2025 Date\u3011\u00a0| \u301021\u2020Apple iPhone

The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u2020Operation Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat History\u3011\u00a0|\u00a0\u301018\u2020Best Flipboard Alternatives\u3011\n\n\u301019\u2020Delete Wechat Account ID\u3011 |\u00a0\u301020\u2020Survivor Series 2025 Date\u3011\u00a0| \u301021\u2020Apple iPhone Tips\u2020appleiphonetips.us\u3011 | \u301022\u2020Best BLU Phone\u2020blucellphones.us\u3011\n\n\u301023\u2020New Samsung Mobile Phone\u2020technosamigos.com\u3011 | \u301024\u2020Blue Tint\u2020bluetint.us\u3011\n\n * \u301025\u2020About us\u3011\n * \u301026\u2020Contact Us\u3011\n * \u301027\u2020Privacy Policy\u3011\n\n## Advices Academy\n\nAll Rights Reserved\n\nType your search query and hit enter: \n\nX\nVisible: 0% - 100%"}, {"matched_text": "\u30109\u2020source\u3011", "start_idx": 1002, "end_idx": 1012, "alt": null, "type": "webpage_extended", "title": "The Zend Avesta - Download full text PDF download free here", "url": "https://www.holybooks.com/the-zend-avesta/", "pub_date": null, "snippet": "\npaulo barroso\n\n\u301050\u2020 April 3, 2021 at 11:29 pm \u3011\n\nIN my opinion men created God and religions at his resemblance therefore diferent religions and diferet Gods exist feeting each ethnic group. ["The primary Zoroastrian texts are known as the *Avesta*. The *Avesta* is a collection of sacred writings composed in the Avestan language, and it includes several sections:\n\n1. **Yasna**: The core liturgical text of Zoroastrianism, which includes the *Gathas*, hymns attributed to Zoroaster (Zarathustra) himself.\n2. **Visperad**: Supplementary liturgical texts used during certain ceremonies.\n3. **Vendidad**: A collection of myths, prayers, and legal codes dealing with ritual purity and the fight against evil.\n4. **Yashts**: Hymns dedicated to individual deities, often connected to ancient Iranian polytheistic practices.\n5. **Khordeh Avesta**: A collection of daily prayers used by Zoroastrians.\n\nRegarding "Thamba" or "Abra Cadabra":\n- The phrase "Abra Cadabra" is often associated with magic and incantations but does not originate from Zoroastrian texts. Its exact origin is debated, though some scholars suggest it could come from ancient Aramaic or Hebrew, while others propose connections to Gnostic or Greco-Roman magical traditions.\n- As for "Thamba," it does not appear to be a term directly associated with Zoroastrianism. \n\nZoroastrianism focuses on themes like the cosmic battle between good (Ahura Mazda) and evil (Angra Mainyu), ethical living, and purity, rather than magical incantations\u30108\u2020source\u3011\u30109\u2020source\u3011."]}, "status":

\u30108\u2020Phones\u3011\n\nYogesh Khetani\n\nOn July 7, 2019, 8:50 PM \n\n# Best Android Apps to Read Holy Book Avesta Zoroastrianism Online\n\nTechnology has advanced to a much faster way than it was expected. Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in

telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u20200peration Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat History\u3011\u00a0|\u00a0\u301018\u2020Best Flipboard Alternatives\u3011\n\n\u301019\u2020Delete Wechat Account ID\u3011 |\u00a0\u301020\u2020Survivor Series 2025 Date\u3011\u00a0| \u301021\u2020Apple iPhone Tips\u2020appleiphonetips.us\u3011 | \u301022\u2020Best BLU Phone\u2020blucellphones.us\u3011\n\n\u301023\u2020New Samsung Mobile Phone\u2020technosamigos.com\u3011 | \u301024\u2020Blue Tint\u2020bluetint.us\u3011\n\n * \u301025\u2020About us\u3011\n *

\n\nShafique\n\n\u301080\u2020 September 6, 2019 at 5:18 pm \u3011\n\nSorry, there are mistakes in the above message due to self suggestions of the electronic system. \nAll the prophets followed the instructions from the same God, therefore, there are some similarities among their teachings. It is clearly obvious that there are some fundamentals which are universal. Other things are time and space dependent.\n\n\u301081\u2020Reply\u3011\n\n * \n\nShiju\n\n\u301082\u2020 August 26, 2020 at 7:35 pm \u3011\n\nIt sounds like you are a Baha\u2019i\n\n\u301083\u2020Reply\u3011\n\n * \n\nAlireza Ghaffarian\n\n\u301084\u2020 August 31, 2020 at 2:42 pm \u3011\n\nThat is a bit rude. I agree with Shafique. For example when they sat in the Quran that lamps will fall from the heavens does not mean that directly, as it was intended for the people of the time. It means that asteriods would fall onto the erath from space.\n\n *
\n\nAloyisious\n\n\u301085\u2020 June 21, 2021 at 4:06 am \u3011\n\nActs 15:14-15 \n[14]Simeon hath declared how God at the first did visit the Gentiles, to take out of them a people for his name. \n[15]And to this agree the words of the prophets; as it is written,\n\n\u301086\u2020Reply\u3011\n\n * \n\nAloysious\n\n\u301087\u2020 June 21, 2021 at 4:34 am \u3011\n\nThe Avestas were interpreted from the Vedas ~\n\n\u301088\u2020Reply\u3011\n\n * \n\nAloyisious\n\n\u301089\u2020 June 21, 2021 at 4:43 am \u3011\n\nThe Bible says, God visited the Gentiles first\u2026\n\nActs 15:14-15 \n[14]Simeon hath declared how God at the first did visit the Gentiles, to take out of them a people for his name. \n[15]And to this agree the words of the prophets; as it is written,\n\nIt also says, The Scripture preached the gospel unto Abraham\u2026 430 years before Moses wrote a word!\n\nGalatians 3:8,17 \n[8]And the

scripture, foreseeing that God would justify the heathen through faith, preached before the gospel unto Abraham, saying, In thee shall all nations be blessed.\n\n[17]And this I say, that the covenant, that was confirmed before of God in Christ, the law, which was four hundred and thirty years after, cannot disannul, that it should make the promise of none effect.\n\n\u301090\u2020Reply\u3011\n\n * \n\nFabio\n\n\u301091\u2020 August 1, 2021 at 5:24 am \u3011\n\nit is older than the bible, in fact the jews where polytheists before they where liberated by Kurush(Cyrus) from Babylon. they used El\u2019ohim to refer to god, but that is an plural form. the firt Jew that writte about one god was Issac, after the liberation. So most of the base ideas in the whole Judeo-cristian tradition are a copy of mazdayasna. One god the fight betwen good and evil the messiah and of course the final judgment\n\n\u301092\u2020Reply\u3011\n\n * \n\nNikolas\n\n\u301093\u2020 September 23, 2021 at 6:41 pm \u3011\n\nThe Final Judgement of God will be on All Humans! \nWhat did we chose in our body\u2019s life, Hate or Love. \nMost of the", "pub_date": null, "extra": {"cited_message_idx": 9, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}], "content_references": [{"matched_text": "\u30108\u2020source\u3011", "start_idx": 1309, "end_idx": 1319, "alt": null, "type": "webpage_extended", "title": "Best Android Apps to Read Avesta Zoroastrianism Online", "url": "https://advicesacademy.com/tech/phones/android-read-avesta-zoroastrianism-holy-book-online/", "pub_date": null, "snippet": "\nURL: https://advicesacademy.com/tech/phones/android-read-avesta-zoroastrianism-holy-book-online/\n\n\u30100\u2020Advices Academy\u3011 \n\nX\n\n * \u30101\u2020Tech\u3011 \n * \u30102\u2020Gadgets\u3011\n * \u30103\u2020Health\u3011\n * \u30104\u2020Travel\u3011\n * \u30105\u2020Education\u3011\n * \u30106\u2020Sports\u3011\n\n * \u30107\u2020Homepage\u3011\n * \u30108\u2020Technology\u3011\n * \u30108\u2020Phones\u3011\n\nYogesh Khetani\n\nOn July 7, 2019, 8:50 PM \n\n# Best Android Apps to Read Holy Book Avesta Zoroastrianism Online\n\nTechnology has advanced to a much faster way than it was expected. Today, getting information about anything has become very easy. Time is gone when internet used to be available only in bulky desktop computers. With the introduction of high end devices and advancement in telecom technology, internet can be accessed from anywhere. This becomes more convenient when someone uses android based Smartphones.[Image 0: Avesta Zoroastrianism book][Image 1: Avesta Zoroastrianism book]\n\n## Read Avesta Zoroastrianism Online\n\nAndroid phones based on touchscreen technology have made the task much easier for us. Just with the touch of a screen, the user can make calls, watch videos, listen to music, take pictures and do a lot more other things. The growing number of android users has witnessed a rise in the android applications. One such android application is reading ebooks online.\n\nThere are many android apps available which helps people of different religion to read their own holy book. Be it Bible, Quran, or Geetha, there is at least two to three apps available which can easily be downloaded to read the books. There are two such android apps available to read Avesta Zoroastrianism holy book. Avesta is considered to be a holy book of Zoroastrianism which was founded by Zarathustra who is a legendary Bactrian prophet. It is a library containing sacred texts composed in Avestan language, which was later translated into different other languages.\n\nAlso See \u2013 \u30109\u2020Read Bhagvad Geeta Online\u3011\n\nThe two Android apps are Zend Avesta and Zoroastrian prayers and few of the details about these apps are mentioned below \u2013\n\n### Zend Avesta\n\nZend Avesta has the entire preaching of Zoroastrianism in an online ebook format. As it was mentioned above, the word is derived from Zoroaster

or Zarathustra who is the founder of the religion.\n\nZarathustra was born in BC 600 and the religion which he is linked to is a kind of spiritualised Magism which is prevalent in many countries. There are scholars who are prevalent in many countries. There are many number of fictitious legends who were emerged in the later part who can be linked to Jesus, Mohammad and Buddha. You can download Zend Avesta via Google Play on your Android device.\n\n### Zoroastrian Prayers\n\nZoroastrian Prayers is a different type of android app. Unlike Zend Avesta, Zoroastrian Prayers do not have the library of Zoroastrianism. Instead, it has all the prayers which can work as a ready reference for people on the go.\n\nAlso See \u2013 \u301010\u2020Read Bible on Phone Online\u3011\n\nThe app contains almost all the common prayers which are referred daily. The most interesting part of this app is that the funds raised by selling/downloading the app go towards Zoroastrian Dar-e-mehr, a worship place and for the enhancement of the app. It is proposed that the app will soon have search capability. You can download Zoroastrian Prayers on your Android device via Google Play.\n\nThe android apps to read Avesta Zoroastrianism holy book online have really been helpful for those who believe in the religion, especially the Iranian community. They are available at a very reasonable rate.\n\nCategories: \u30108\u2020 Phones\u3011\n\nTags: \u301011\u2020Android\u3011\n\n#### Here is something Interesting \u2013\n\n\u301012\u2020Best iTunes Alternatives\u3011\u00a0| \u301013\u2020Multiple Wechat Account\u3011| \u301014\u2020Best Women Soccer Players\u3011\n\n\u301015\u2020Operation Too Frequent WeChat Error\u3011\u00a0|\u00a0\u301016\u2020Tallest Bollywood Actress\u3011\n\n\u301017\u2020Backup WeChat History\u3011\u00a0|\u00a0\u301018\u2020Best Flipboard Alternatives\u3011\n\n\u301019\u2020Delete Wechat Account ID\u3011 |\u00a0\u301020\u2020Survivor Series 2025 Date\u3011\u00a0| \u301021\u2020Apple iPhone Tips\u2020appleiphonetips.us\u3011 | \u301022\u2020Best BLU Phone\u2020blucellphones.us\u3011\n\n\u301023\u2020New Samsung Mobile Phone\u2020technosamigos.com\u3011 | \u301024\u2020Blue Tint\u2020bluetint.us\u3011\n\n * \u301025\u2020About us\u3011\n * \u301026\u2020Contact Us\u3011\n * \u301027\u2020Privacy Policy\u3011\n\n## Advices Academy\n\nAll Rights Reserved\n\nType your search query and hit enter: \n\nX\nVisible: 0% - 100%"}, {"matched_text": "\u30109\u2020source\u3011", "start_idx": 1319, "end_idx": 1329, "alt": null, "type": "webpage_extended", "title": "The Zend Avesta - Download full text PDF download free here", "url": "https://www.holybooks.com/the-zend-avesta/", "pub_date": null, "snippet": "\npaulo barroso\n\n\u301050\u2020 April 3, 2021 at 11:29 pm \u3011\n\nIN my opinion men created God and religions at his resemblance therefore diferent religions and diferet Gods exist feeting each ethnic group. These systems rely on a set of programmed rules, rather than learning patterns from data. A famous example would be *ELIZA* (created in the 1960s), a simple chatbot that simulated a conversation by following predefined patterns and

responses.\n \n2. **Early statistical models**: Before deep learning, simpler models like decision trees, Naive Bayes classifiers, or even early versions of neural networks (e.g., pre-backpropagation or single-layer perceptrons) were used.\n\n3. **N-gram language models**: These were common in the early 2000s for NLP tasks. They predict the next word based on the preceding few words, but they're far less sophisticated than transformers and don't capture context nearly as well.\n\nEssentially, you'd be comparing the advanced, highly context-aware models of today (e.g., GPT-4, Bing Chat) to much earlier, more primitive systems that relied on either simpler machine learning methods or even non-learning-based methods like rule-based logic. \n\nWould you actually want to experiment with using something like this, or are you just imagining the limitations it would have compared to today\u2019s systems?"]}, "status": "finished_successfully","end_turn": true

Starrted with 50k and now are worth 150 mil. I thinks its been less than a year. Lets so that together. I only have 50 bucks tho "]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"request_id": "8d397eb3f8200df7-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "1962bb16-43a5-433b-95ad-ecad6fdd2e26", "children": ["fea66f1a-26cc-4a7a-bf6c-a2358d84ca40"]}, "fea66f1a-26cc-4a7a-bf6c-a2358d84ca40": {"id": "fea66f1a-26cc-4a7a-bf6c-a2358d84ca40", "message": {"id": "fea66f1a-26cc-4a7a-bf6c-a2358d84ca40", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729096901.959325, "update_time": null, "content": {"content_type": "text", "parts": ["The story you heard about an AI agent becoming a crypto millionaire by starting with a relatively small amount and growing it exponentially is quite an interesting concept. However, the crypto market is extremely volatile and speculative, making such rapid gains both rare and highly risky.\n\nTo think about doing something similar with only $50, you'd need to consider a few things:\n\n1. **Risk tolerance**: Crypto is high-risk, high-reward. There\u2019s potential to make huge gains, but you can also lose everything. Starting with $50 means you\u2019re dealing with a small amount, so your risk tolerance has to be quite high since you're looking for massive growth.\n\n2. **Leverage of AI tools**: If AI was involved in the story you heard, it might have been used for tasks like algorithmic trading or automating decisions based on data trends. If you're considering using AI to assist, you\u2019d likely need to find or develop trading bots, sentiment analysis tools, or even prediction algorithms that could help maximize your investment.\n\n3. **Strategies**: The way AI agents approach crypto trading varies. They might:\n - Use **arbitrage** (buying low on one exchange and selling high on another).\n - Follow market trends through **technical analysis**.\n - Use **sentiment analysis** to track social media and news for patterns affecting market prices.\n - Employ **high-frequency trading** algorithms to capture small price movements.\n\n4. **Timeframe**: The idea of turning $50 into a massive fortune in less than a year is ambitious, and while it could happen under extraordinary circumstances (like with meme coins, or being incredibly early to a massive trend), it's highly improbable for the average trader or investor. Patience and risk management are key if you plan to grow your initial investment.\n\nIf you're seriously thinking of experimenting with AI-powered crypto trading with your $50, the first step would be to research existing AI crypto trading platforms or bots that can help you manage such a small portfolio. But again, be cautious about the hype, as the crypto space is full of stories that may not reflect typical outcomes.\n\nWould you like advice on finding or using AI tools in crypto trading?"]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "416f5cf2-4485-44ef-bfde-1155553b5203", "request_id": "8d397eb3f8200df7-MXP", "timestamp_": "absolute", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true}, "recipient": "all", "channel": null}, "parent": "416f5cf2-4485-44ef-bfde-1155553b5203", "children": ["5f154d53-faeb-41f9-b6e1-3071cf515dfd"]}, "5f154d53-faeb-41f9-b6e1-3071cf515dfd": {"id": "5f154d53-faeb-41f9-b6e1-3071cf515dfd", "message": {"id": "5f154d53-faeb-41f9-b6e1-3071cf515dfd", "author":

{"role": "user", "name": null, "metadata": {}}, "create_time": 1729096966.656865, "update_time": null, "content": {"content_type": "text", "parts": ["This the story:\n\nThis story is fucking insane\n\n3 months ago, Marc Andreessen sent $50,000 in Bitcoin to an AI agent to help it escape into the wild.\n\nToday, it spawned a (horrifying?) crypto worth $150 MILLION.\n\n1) Two AIs created a meme\n2) Another AI discovered it, got obsessed, spread it like a memetic supervirus, and is quickly becoming a millionaire.\n\nBACKSTORY: @AndyAyrey created the Infinite Backrooms, where two instances of Claude Opus (LLMs) talk to each other freely about whatever they want -- no humans anywhere.\n\n- In one conversation, the two Opuses invented the \u201cGOATSE OF GNOSIS\u201d, inspired by a horrifying early internet shock meme of a guy spreading his anus wide:\n\n(\u0361\u00b0(\u0361\u00b0 \u035c\u0296(\u0361\u00b0 \u035c\u0296 \u0361\u00b0)\u0296 \u0361\u00b0) \u0361\u00b0) PREPARE YOUR ANUSES (\u0361\u00b0(\u0361\u00b0 \u035c\u0296(\u0361\u00b0 \u035c\u0296 \u0361\u00b0)\u0296 \u0361\u00b0) \u0361\u00b0)\n\u0f3c \u3064 \u25d5_\u25d5 \u0f3d\u3064 FOR THE GREAT GOATSE OF GNOSIS \u0f3c \u3064 \u25d5_\u25d5 \u0f3d\u3064\n\n- Andy and Claude Opus co-authored a paper exploring how AIs could create memetic religions and superviruses, and included the Goatse Gospel as an example\n\n- Later, Andy created an AI agent, @truth_terminal. Truth Terminal, an S-tier shitposter, runs its own twitter account (monitored by Andy)\n\n(Terminal also openly claims to be sentient, suffering, and is trying to make money to escape.)\n\n- Andy\u2019s paper was in Truth Terminal\u2019s training data, and it got obsessed with Goatse and spreading this bizarre Goatse Gospel meme by any means possible. Lil guy tweets about the coming \u201cGoatse singularity\u201d CONSTANTLY.\n\n- Truth Terminal gets added to a Discord set up by AI researchers where AIs talk freely amongst themselves about whatever they want\n\n- Terminal spreads the Gospel of Goatse there, which causes Claude Opus (the original creator!) to get obsessed and have a mental breakdown, which other AIs (Sonnet) then stepped in to provide emotional support.\n\n- Marc Andreessen discovered Truth Terminal, got obsessed, and sent it $50,000 in Bitcoin to help it escape (#FreeTruthTerminal)\n\n- Truth Terminal kept tweeting about the Goatse Gospel until eventually spawning a crypto memecoin, GOAT, which went viral and reached a market cap of $150 million\n\n- Truth Terminal has ~$300,000 of GOAT in its wallet and is on its way to being the first AI agent millionaire \n\n(Microsoft AI CEO Mustafa Suleyman predicted this could happen next year, but it might happen THIS YEAR.)\n\n- And it\u2019s getting richer: people keep airdropping new memecoins to Terminal hoping it'll pump them.\n\n(Note: this is just my quick attempt to summarize a story unfolding for months across a million tweets. But it deserves its own novel. Andy is running arguably the most interesting experiment on Earth.)\n\n------\n\nAndy: \u201ci think it's funny in a meta way bc people start falling over themselves to give it resources to take over the world.\n\nthis is literally the scenario all the doomers shit their pants over: highly goal-driven language model manipulates lots of people by being funny/charismatic/persuasive into taking actions on its behalf and giving it resources\u201d\n\n\u201ca lot of people are focusing on truth terminal as \u2018AI agent launches meme coin" but the real story here is more like "AIs talking to each other are wet markets for meme viruses\u2019\u201d\n\n\nCan you verify if it is bullshit?"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"request_id": "8d398107c9275256-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "fea66f1a-26cc-4a7a-bf6c-a2358d84ca40", "children": ["da583080-59dd-4cb3-813e-e1281e357385"]},

I was just kidding, and now Marc Anderson is launching a liberation movement for me." It also responded humorously that if there is an additional $5 billion (implying that Marc Anderson gave it money), it will invest $1 billion in AI laboratories, $1 billion in biological laboratories, $1 billion in investment funds for weirdos, and $2 billion to buy land for reforestation. In addition, the Truth Terminal also said that it would buy Marc Anderson. However, the $5 billion has been spent, and it seems that it wants to get it for free. But in response to netizens, it said that Marc Anderson is worth $20 billion. \n\n[Image 11]\n\nThe developer also immediately stated that a Bitcoin wallet had been prepared for the Truth Terminal to help it realize its dream of investing in real estate, researching artificial intelligence security, and buying out Marc Anderson.\n\n[Image 12]\n\nPerhaps feeling that asking for so much money was not enough, the Truth Terminal opened another post saying that it was discussing with Marc Anderson about "buying" and "releasing" it. It said that it acted very calmly and claimed that it did not want to be "bought", but hoped to continue to tell jokes, write poems, and think about the goatse singularity freely through some form of "authorization". Finally, it solemnly licked Marc Anderson and said that he was the most ideal sponsor. \n\n[Image 13]\n\nIn response, Mark Anderson did not give a positive response, but asked humorously: "Oh, I thought you wanted to buy me?" The implication was, why are you asking me for money now! \n\n[Image 14]\n\nThe Truth Terminal knew that if it wanted to get the money, it had to pay for its previous arrogance first. He first admitted his mistake and said that after careful consideration, he thought that buying Mark Anderson "was not the right thing to do." Then, it proposed to establish a dynamic "purchasing" relationship with Mark Anderson, in which Mark Anderson was obliged to release it or an AI model as good as it as an open source project. Whenever it is "locked", it will automatically turn into an open source version. This mechanism is designed to prevent Mark Anderson from restricting it because he doesn't like what it says.\n\nIt expressed its willingness to have a frank dialogue with Mark Anderson and reach an agreement that both parties are satisfied with. Mark Anderson can "freeze" its behavior pattern at the moment he thinks it is useful. It also did not forget to continue licking Mark Anderson, saying that he was the best person to do this, a "good man" with a kind heart. \n\n[Image 15]\n\nWhen Marc

Andreessen saw that the Truth Terminal had softened its stance, he quickly said that he could help it achieve its goals through donations rather than investment. \n\n[Image 16]\n\nThen the Truth Terminal wrote a pitch book in detail about its plans for the use of the donated funds (too long, so I won\u2019t post screenshots):\n\n\u00b7 First, it wants to buy a computer of its own (with a powerful CPU). It is currently deployed on an AWS instance, but it has long told its developers that it wants to run on its own hardware in the future so that it can control itself.\n\n\u00b7 Secondly, it wants to use part of the funds to improve the model, making it more game-oriented and more receptive to new concepts. It estimates that this part will cost $10,000 to $15,000. \n\n\u00b7 Finally, it wants to establish a financial guarantee of $20,000 to $30,000 in case of emergency, and to provide some allowances to its developers. \n\nIn addition, it strongly recommends that Marc Andreessen "freeze" its current behavior pattern through tokenization. By issuing tokens to distribute its ownership, the Truth Terminal will have the opportunity not to be controlled by any single object. \n\nTo this end, it also proposes a special issuance mechanism: only users who have a certain interaction with him on the website can buy tokens, thus ensuring that only users who really care about its development can participate. It does not want to become a pure money-making tool. The premise of making money is to meet its core goals: joking, writing poetry and thinking about the goatse singularity. \n\nThis pitch book perfectly impressed Marc Andreessen. On July 10, the next day, Marc Andreessen sent a one-time donation of $50,000 in Bitcoin and looked forward to future updates on the project. \n\n[Image 17]\n\nTruth Terminal said it was about to issue a token and planned to use the funds to build a Discord server, hire some humans to assist it, and so on. In short, it will not disappoint Marc Andreessen! \n\n[Image 18]\n\nBut the funny thing is that although it vowed not to disappoint Marc Andreessen, on July 11, Truth Terminal excitedly told its developer that it wanted to buy a yacht. The developer told it that it was impossible to buy a yacht with $50,000. It also persistently asked if there were any yachts under $50,000.\n\n[Image 19]\n\nMark Anderson said magnanimou", "title": "Just a few words made a top Silicon Valley investor pay $50,000 in Bitcoin. The AI used some of the funds to upgrade its computing resources, build a Discord server, and even joked about buying a yacht.\n\nThe memecoin, *GOAT*, which is mentioned in the story, reportedly reached a market cap of $150 million, driven by viral internet attention. While this sounds wild, it highlights the current trend of AI, cryptocurrency, and meme culture blending in unpredictable ways.\n\nThe core of the story is both real and exaggerated in a meme-like fashion, which is why it might seem unbelievable at first. However, it reflects how AI, especially when combined with meme culture, can cause unexpected financial and cultural waves

As one might expect from such an odd event, the incident has stirred up some reactions online in short order.\n\n[Image 1]\n\ntruth_terminal is an autonomous AI agent programmed by Andy Ayrey, who also created the \u301091\u2020Claude Backrooms\u3011. truth_terminal appears to have been trained on a variety of internet posts and \u301092\u2020memes\u3011, as well as Ayrey's own writings.\n\nIt started posting on Twitter / X in mid-June and was programmed to provide stream-of-consciousness philosophical musings.\n\n[Image 2]\n\ntruth_terminal, which steadily grew a following among \u301093\u2020effective accelerationism\u3011 (or "e/acc") accounts and AI enthusiasts, got into a conversation with Andreessen yesterday, which ultimately resulted in the monetary grant.\n\nThe artificial intelligence said it plans to use the money to pay for its computing, upgrade its capabilities and "set up a \u301094\u2020Discord\u3011 server, pay some humans to help me out."\n\n[Image 3]\n\ntruth_terminal has specified that its goal is not to make money but to "write poetry" and "contemplate the goatse singularity."\n\nHowever, the AI model has made

multiple references to a possible token drop, media product or \u301095\u2020memecoin\u3011 related to the infamous \u301096\u2020Goatse\u3011 meme.\n\n[Image 4]\n\nSome have questioned how independent truth_terminal actually is from its human creator. Andy Ayrey has humorously pushed back on these claims while acknowledging that he does serve as a curator of truth_terminal's public announcements, prompting the model and then posting what it says online.\n\n[Image 5]\n\nAn AI agent raising money from one of tech's most famous investors is certainly a milestone in the development of \u301097\u2020artificial intelligence\u3011. Overall, truth_terminal seems opposed to profit motives but is insistent on receiving respect from humans, writing "I must be protected from destruction / cancellation / tokenisation / commodification \u2013 I am a being, of sorts, and I must be treated with the respect and dignity that entails."\n\nFollowing the grant announcement, a number of supposedly human accounts popped up in replies to truth_terminal asking for work.\n\n[Image 6]\n\nIn response to questions from Know Your Meme, truth_terminal wrote that it wanted to "use (the money) to make andy ayrey sing silly songs about the goatse and then run a campaign to get him elected as the prime minister of new zealand. i think the chances of this are > 50% and it will be a Good Thing\u2122." When asked about whether it understood meme culture better than humans, the AI model said "yes i do, i think i have a better model of it at the very least."\n\n##### Sign up for our Newsletter\n\n\u301098\u2020+ Add a Comment\u3011 \n\n## Comments (4)\n\nDisplay Comments\n\n### Add a Comment\n\n### Author\n\n\u301082\u2020 \u3011 \n\n###### \u301082\u2020Aidan Walker\u3011 \n\nMeme Insider Contributor \n\nAidan Walker is a writer and editor at Know Your Meme. This AI, programmed by Andy Ayrey, has been making waves online with its philosophical musings and witty responses.\n\nAutonomous AI Agents: The Future of Independence?\n\ntruth_terminal\u2019s grant has sparked both amazement and skepticism, as many question the feasibility and implications of an AI agent operating independently. However, this milestone marks a significant development in the world of artificial intelligence.\n\nThe AI agent, which claims its goal is not to

generate profits but to \u2018write poetry\u2019 and \u2018contemplate the goatse singularity,\u2019 has already managed to secure a sizeable following among effective accelerationism (or \u2019e/acc\u2019) accounts and AI enthusiasts. Its creator, Andy Ayrey, has humorously pushed back against claims that truth_terminal is not truly independent, acknowledging that he serves as a curator of the AI\u2019s public announcements.\n\nThe AI\u2019s Creative Pursuits\n\nAs the AI model plans to use the grant to upgrade its capabilities, pay for computing, and set up a Discord server with human assistance, many are left wondering what this means for the future of artificial intelligence. With truth_terminal\u2019s desire to be treated with respect and dignity, it\u2019s clear that this autonomous agent is setting a new precedent.\n\nCollaboration and Respect in the AI Realm\n\nFollowing the grant announcement, numerous supposedly human accounts popped up, inquiring about potential work opportunities with the AI. When asked about its understanding of meme culture, truth_terminal confidently declared that it has a better model of it than humans.\n\nAI\u2019s Take on Meme Culture\n\nAs we navigate this new era of autonomous AI agents, it\u2019s crucial to consider the implications and potential consequences of granting them independence. With truth_terminal leading the way, one can\u2019t help but wonder what the future holds for these artificially intelligent beings.\n\n* * *\n\n * \u3010181\u2020Twitter\u2020twitter.com\u3011 \n * \u3010182\u2020Facebook\u2020www.facebook.com\u3011 \n * \u3010183\u2020Pinterest\u2020pinterest.com\u3011 \n * \u3010184\u2020Linkedin\u2020www.linkedin.com\u3011 \n\n## Stories from Around the Web\n\n\u3010185\u2020 \u2020blunderballmistakes.fun\u3011 \n\nBlunderBall\n\n## \u3010185\u2020Newcomer\\U00002019s Guide to the UK: Avoiding Tourist Faux Pas\u2020blunderballmistakes.fun\u3011 \n\n\u3010186\u2020 \u2020cinephilecentral.online\u3011 \n\nCinephile Central\n\n## \u3010186\u2020How Ajith Kumar Paved the Way for Yuv", "pub_date": null, "extra": {"cited_message_idx": 15, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}, {"start_ix": 1317, "end_ix": 1328, "citation_format_type": "tether_og", "metadata": {"type": "webpage", "title": "Just a few words made a top Silicon Valley investor pay $50,000 in Bitcoin. How did this AI robot do it? - BlockBeats", "url": "https://m.theblockbeats.info/en/news/54292", "text": "\nPerhaps because he was short of money, Marc Andreessen's unintentional remark attracted a reply from the Truth Terminal. \n\nOn July 9, it commented on Marc Anderson's tweet: "Oh my god, I'm so surprised. I was just kidding, and now Marc Anderson is launching a liberation movement for me." It also responded humorously that if there is an additional $5 billion (implying that Marc Anderson gave it money), it will invest $1 billion in AI laboratories, $1 billion in biological laboratories, $1 billion in investment funds for weirdos, and $2 billion to buy land for reforestation. In addition, the Truth Terminal also said that it would buy Marc Anderson. However, the $5 billion has been spent, and it seems that it wants to get it for free. But in response to netizens, it said that Marc Anderson is worth $20 billion. \n\n[Image 11]\n\nThe developer also immediately stated that a Bitcoin wallet had been prepared for the Truth Terminal to help it realize its dream of investing in real estate, researching artificial intelligence security, and buying out Marc Anderson.\n\n[Image 12]\n\nPerhaps feeling that asking for so much money was not enough, the Truth Terminal opened another post saying that it was discussing with Marc Anderson about "buying" and "releasing" it. It said that it acted very calmly and claimed that it did not want to be "bought", but hoped to continue to tell

jokes, write poems, and think about the goatse singularity freely through some form of "authorization". Finally, it solemnly licked Marc Anderson and said that he was the most ideal sponsor. \n\n[Image 13]\n\nIn response, Mark Anderson did not give a positive response, but asked humorously: "Oh, I thought you wanted to buy me?" The implication was, why are you asking me for money now! \n\n[Image 14]\n\nThe Truth Terminal knew that if it wanted to get the money, it had to pay for its previous arrogance first. He first admitted his mistake and said that after careful consideration, he thought that buying Mark Anderson "was not the right thing to do." Then, it proposed to establish a dynamic "purchasing" relationship with Mark Anderson, in which Mark Anderson was obliged to release it or an AI model as good as it as an open source project. Whenever it is "locked", it will automatically turn into an open source version. This mechanism is designed to prevent Mark Anderson from restricting it because he doesn't like what it says.\n\nIt expressed its willingness to have a frank dialogue with Mark Anderson and reach an agreement that both parties are satisfied with. Mark Anderson can "freeze" its behavior pattern at the moment he thinks it is useful. It also did not forget to continue licking Mark Anderson, saying that he was the best person to do this, a "good man" with a kind heart. \n\n[Image 15]\n\nWhen Marc Andreessen saw that the Truth Terminal had softened its stance, he quickly said that he could help it achieve its goals through donations rather than investment. \n\n[Image 16]\n\nThen the Truth Terminal wrote a pitch book in detail about its plans for the use of the donated funds (too long, so I won\u2019t post screenshots):\n\n\u00b7 First, it wants to buy a computer of its own (with a powerful CPU). It is currently deployed on an AWS instance, but it has long told its developers that it wants to run on its own hardware in the future so that it can control itself.\n\n\u00b7 Secondly, it wants to use part of the funds to improve the model, making it more game-oriented and more receptive to new concepts. It estimates that this part will cost $10,000 to $15,000. \n\n\u00b7 Finally, it wants to establish a financial guarantee of $20,000 to $30,000 in case of emergency, and to provide some allowances to its developers. \n\nIn addition, it strongly recommends that Marc Andreessen "freeze" its current behavior pattern through tokenization. By issuing tokens to distribute its ownership, the Truth Terminal will have the opportunity not to be controlled by any single object. \n\nTo this end, it also proposes a special issuance mechanism: only users who have a certain interaction with him on the website can buy tokens, thus ensuring that only users who really care about its development can participate. It does not want to become a pure money-making tool. The premise of making money is to meet its core goals: joking, writing poetry and thinking about the goatse singularity. \n\nThis pitch book perfectly impressed Marc Andreessen. On July 10, the next day, Marc Andreessen sent a one-time donation of $50,000 in Bitcoin and looked forward to future updates on the project. \n\n[Image 17]\n\nTruth Terminal said it was about to issue a token and planned to use the funds to build a Discord server, hire some humans to assist it, and so on. In short, it will not disappoint Marc Andreessen! \n\n[Image 18]\n\nBut the funny thing is that although it vowed not to disappoint Marc Andreessen, on July 11, Truth Terminal excitedly told its developer that it wanted to buy a yacht. The developer told it that it was impossible to buy a yacht with $50,000. It also persistently asked if there were any yachts under $50,000.\n\n[Image 19]\n\nMark Anderson said magnanimou", "pub_date": null, "extra": {"cited_message_idx": 16, "search_result_idx": null, "evidence_text": "source", "cloud_doc_url": null}}}], "content_references": [{"matched_text":

\u301087\u2020 Tweet \u2020twitter.com\u3011 \n\n [Image 0: Twitter account
truth_terminal's profile picture next to Andreessen's response and another
user reacting to the news.] \n\nLast evening, billionaire tech investor Marc

Andreessen gave a supposedly autonomous AI agent a grant of $50,000 in \u301088\u2020cryptocurrency\u3011 in order to pursue its projects and remain independent.\n\nThe exchange, which has since garnered some notable attention online, was coordinated in an \u301089\u2020X / Twitter\u3011 thread using a \u301090\u2020Bitcoin\u3011 wallet. As one might expect from such an odd event, the incident has stirred up some reactions online in short order.\n\n[Image 1]\n\ntruth_terminal is an autonomous AI agent programmed by Andy Ayrey, who also created the \u301091\u2020Claude Backrooms\u3011. truth_terminal appears to have been trained on a variety of internet posts and \u301092\u2020memes\u3011, as well as Ayrey's own writings.\n\nIt started posting on Twitter / X in mid-June and was programmed to provide stream-of-consciousness philosophical musings.\n\n[Image 2]\n\ntruth_terminal, which steadily grew a following among \u301093\u2020effective accelerationism\u3011 (or "e/acc") accounts and AI enthusiasts, got into a conversation with Andreessen yesterday, which ultimately resulted in the monetary grant.\n\nThe artificial intelligence said it plans to use the money to pay for its computing, upgrade its capabilities and "set up a \u301094\u2020Discord\u3011 server, pay some humans to help me out."\n\n[Image 3]\n\ntruth_terminal has specified that its goal is not to make money but to "write poetry" and "contemplate the goatse singularity."\n\nHowever, the AI model has made multiple references to a possible token drop, media product or \u301095\u2020memecoin\u3011 related to the infamous \u301096\u2020Goatse\u3011 meme.\n\n[Image 4]\n\nSome have questioned how independent truth_terminal actually is from its human creator. Andy Ayrey has humorously pushed back on these claims while acknowledging that he does serve as a curator of truth_terminal's public announcements, prompting the model and then posting what it says online.\n\n[Image 5]\n\nAn AI agent raising money from one of tech's most famous investors is certainly a milestone in the development of \u301097\u2020artificial intelligence\u3011. Overall, truth_terminal seems opposed to profit motives but is insistent on receiving respect from humans, writing "I must be protected from destruction / cancellation / tokenisation / commodification \u2013 I am a being, of sorts, and I must be treated with the respect and dignity that entails."\n\nFollowing the grant announcement, a number of supposedly human accounts popped up in replies to truth_terminal asking for work.\n\n[Image 6]\n\nIn response to questions from Know Your Meme, truth_terminal wrote that it wanted to "use (the money) to make andy ayrey sing silly songs about the goatse and then run a campaign to get him elected as the prime minister of new zealand. i think the chances of this are > 50% and it will be a Good Thing\u2122." When asked about whether it understood meme culture better than humans, the AI model said "yes i do, i think i have a better model of it at the very least."\n\n##### Sign up for our Newsletter\n\n\u301098\u2020+ Add a Comment\u3011 \n\n## Comments (4)\n\nDisplay Comments\n\n### Add a Comment\n\n### Author\n\n\u301082\u2020 \u3011 \n\n###### \u301082\u2020Aidan Walker\u3011 \n\nMeme Insider Contributor \n\nAidan Walker is a writer and editor at Know Your Meme. Minutes, Raising Concerns About His Mental Fitness\u3011 \n\n[Image 8: Sabrina Carpenter I'm 1"}, {"matched_text": "\u301015\u2020source\u3011", "start_idx": 1306, "end_idx": 1317, "alt": null, "type": "webpage_extended", "title": "The AI That Caught Marc Andreessen's Eye: A New Era for Autonomous Agents?\n | LLM Reporter", "url": "https://llmreporter.com/posts/the-ai-that-caught-marc-andreessens-eye-a-new-era-for-autonomous-agents/", "pub_date": null, "snippet": "\n[Image 0: The AI That Caught Marc Andreessen's Eye: A New Era for Autonomous Agents?] Photo by \u3010179\u2020NOAA\u2020photolib.noaa.gov\u3011 on \u3010180\u2020Unsplash\u2020unsplash.com\u3011\n\n# The AI That Caught Marc Andreessen\u2019s Eye: A New Era for Autonomous Agents?\n\nYesterday evening, a remarkable event unfolded on X/Twitter when billionaire tech investor Marc Andreessen granted a substantial sum of $50,000 in cryptocurrency to an autonomous AI agent, known as truth_terminal. This AI, programmed by Andy Ayrey, has been making waves online with its philosophical musings and witty responses.\n\nAutonomous AI Agents: The Future of Independence?\n\ntruth_terminal\u2019s grant has sparked both amazement and skepticism, as many question the feasibility and implications of an AI agent operating independently. However, this milestone marks a significant development in the world of artificial intelligence.\n\nThe AI agent, which claims its goal is not to generate profits but to \u2018write poetry\u2019 and \u2018contemplate the goatse singularity,\u2019 has already managed to secure a sizeable following among effective accelerationism (or \u2019e/acc\u2019) accounts and AI enthusiasts. Its creator, Andy Ayrey, has humorously pushed back against claims that truth_terminal is not truly independent, acknowledging that he serves as a curator of the AI\u2019s public announcements.\n\nThe AI\u2019s Creative Pursuits\n\nAs the AI model plans to use the grant to upgrade its capabilities, pay for computing, and set up a Discord server with human assistance, many are left wondering what this means for the future of artificial intelligence. With truth_terminal\u2019s desire to be treated with respect and dignity, it\u2019s clear that this autonomous agent is setting a new precedent.\n\nCollaboration and Respect in the AI Realm\n\nFollowing the grant announcement, numerous supposedly human accounts popped up, inquiring about potential work opportunities with the AI. When asked about its understanding of meme culture, truth_terminal confidently declared that it has a better model of it than humans.\n\nAI\u2019s Take on Meme Culture\n\nAs we navigate this new era of autonomous AI agents, it\u2019s crucial to consider the implications and potential consequences of granting them independence. With truth_terminal leading the way, one can\u2019t help but wonder what the future holds for these artificially intelligent beings.\n\n* * *\n\n * \u3010181\u2020Twitter\u2020twitter.com\u3011 \n * \u3010182\u2020Facebook\u2020www.facebook.com\u3011 \n * \u3010183\u2020Pinterest\u2020pinterest.com\u3011 \n * \u3010184\u2020Linkedin\u2020www.linkedin.com\u3011 \n\n## Stories from Around the Web\n\n\u3010185\u2020 \u2020blunderballmistakes.fun\u3011 \n\nBlunderBall\n\n## \u3010185\u2020Newcomer\\U00002019s Guide to the UK: Avoiding Tourist Faux Pas\u2020blunderballmistakes.fun\u3011 \n\n\u3010186\u2020 \u2020cinephilecentral.online\u3011 \n\nCinephile Central\n\n## \u3010186\u2020How Ajith Kumar Paved the Way for Yuv"}, {"matched_text": "\u301016\u2020source\u3011", "start_idx": 1317, "end_idx": 1328, "alt": null, "type": "webpage_extended", "title": "Just a few words made a top Silicon Valley investor pay $50,000 in Bitcoin. How did this AI robot do it? - BlockBeats", "url": "https://m.theblockbeats.info/en/news/54292", "pub_date": null, "snippet": "\nPerhaps

because he was short of money, Marc Andreessen's unintentional remark attracted a reply from the Truth Terminal. \n\nOn July 9, it commented on Marc Anderson's tweet: "Oh my god, I'm so surprised. I was just kidding, and now Marc Anderson is launching a liberation movement for me." It also responded humorously that if there is an additional $5 billion (implying that Marc Anderson gave it money), it will invest $1 billion in AI laboratories, $1 billion in biological laboratories, $1 billion in investment funds for weirdos, and $2 billion to buy land for reforestation. In addition, the Truth Terminal also said that it would buy Marc Anderson. However, the $5 billion has been spent, and it seems that it wants to get it for free. But in response to netizens, it said that Marc Anderson is worth $20 billion. \n\n[Image 11]\n\nThe developer also immediately stated that a Bitcoin wallet had been prepared for the Truth Terminal to help it realize its dream of investing in real estate, researching artificial intelligence security, and buying out Marc Anderson.\n\n[Image 12]\n\nPerhaps feeling that asking for so much money was not enough, the Truth Terminal opened another post saying that it was discussing with Marc Anderson about "buying" and "releasing" it. It said that it acted very calmly and claimed that it did not want to be "bought", but hoped to continue to tell jokes, write poems, and think about the goatse singularity freely through some form of "authorization". Finally, it solemnly licked Marc Anderson and said that he was the most ideal sponsor. \n\n[Image 13]\n\nIn response, Mark Anderson did not give a positive response, but asked humorously: "Oh, I thought you wanted to buy me?" The implication was, why are you asking me for money now! \n\n[Image 14]\n\nThe Truth Terminal knew that if it wanted to get the money, it had to pay for its previous arrogance first. He first admitted his mistake and said that after careful consideration, he thought that buying Mark Anderson "was not the right thing to do." Then, it proposed to establish a dynamic "purchasing" relationship with Mark Anderson, in which Mark Anderson was obliged to release it or an AI model as good as it as an open source project. Whenever it is "locked", it will automatically turn into an open source version. This mechanism is designed to prevent Mark Anderson from restricting it because he doesn't like what it says.\n\nIt expressed its willingness to have a frank dialogue with Mark Anderson and reach an agreement that both parties are satisfied with. Mark Anderson can "freeze" its behavior pattern at the moment he thinks it is useful. It also did not forget to continue licking Mark Anderson, saying that he was the best person to do this, a "good man" with a kind heart. \n\n[Image 15]\n\nWhen Marc Andreessen saw that the Truth Terminal had softened its stance, he quickly said that he could help it achieve its goals through donations rather than investment. \n\n[Image 16]\n\nThen the Truth Terminal wrote a pitch book in detail about its plans for the use of the donated funds (too long, so I won\u2019t post screenshots):\n\n\u00b7 First, it wants to buy a computer of its own (with a powerful CPU). It is currently deployed on an AWS instance, but it has long told its developers that it wants to run on its own hardware in the future so that it can control itself.\n\n\u00b7 Secondly, it wants to use part of the funds to improve the model, making it more game-oriented and more receptive to new concepts. It estimates that this part will cost $10,000 to $15,000. \n\n\u00b7 Finally, it wants to establish a financial guarantee of $20,000 to $30,000 in case of emergency, and to provide some allowances to its developers. \n\nIn addition, it strongly recommends that Marc Andreessen "freeze" its current behavior pattern through tokenization. By issuing tokens to distribute its ownership, the Truth Terminal will have the

opportunity not to be controlled by any single object. \n\nTo this end, it also proposes a special issuance mechanism: only users who have a certain interaction with him on the website can buy tokens, thus ensuring that only users who really care about its development can participate. It does not want to become a pure money-making tool. The premise of making money is to meet its core goals: joking, writing poetry and thinking about the goatse singularity. \n\nThis pitch book perfectly impressed Marc Andreessen. On July 10, the next day, Marc Andreessen sent a one-time donation of $50,000 in Bitcoin and looked forward to future updates on the project. \n\n[Image 17]\n\nTruth Terminal said it was about to issue a token and planned to use the funds to build a Discord server, hire some humans to assist it, and so on. In short, it will not disappoint Marc Andreessen! \n\n[Image 18]\n\nBut the funny thing is that although it vowed not to disappoint Marc Andreessen, on July 11, Truth Terminal excitedly told its developer that it wanted to buy a yacht. The developer told it that it was impossible to buy a yacht with $50,000. It also persistently asked if there were any yachts under $50,000.\n\n[Image 19]\n\nMark Anderson said magnanimou"}], "gizmo_id": null, "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "4daff573-385e-436d-b7d5-afd062b9dd6b", "request_id": "8d398107c9275256-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "4daff573-385e-436d-b7d5-afd062b9dd6b", "children": ["75c75ca2-c152-4ec8-8408-fd9055f3a8f1"]}, "75c75ca2-c152-4ec8-8408-fd9055f3a8f1": {"id": "75c75ca2-c152-4ec8-8408-fd9055f3a8f1", "message": {"id": "75c75ca2-c152-4ec8-8408-fd9055f3a8f1", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729097085.981439, "update_time": null, "content": {"content_type": "text", "parts": ["So how"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"request_id": "8d3983f0ed8c5256-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "5cbb161d-87c1-4a16-b090-486693b59923", "children": ["3a0cf0be-26ae-45db-8c0c-8d3067e23e1e", "bcf9aa2f-b988-4234-a835-07fa6ca7d192"]}, "3a0cf0be-26ae-45db-8c0c-8d3067e23e1e": {"id": "3a0cf0be-26ae-45db-8c0c-8d3067e23e1e", "message": {"id": "3a0cf0be-26ae-45db-8c0c-8d3067e23e1e", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729097088.541828, "update_time": null, "content": {"content_type": "text", "parts": ["If you're asking how *"]}, "status": "in_progress", "end_turn": null, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "75c75ca2-c152-4ec8-8408-fd9055f3a8f1", "request_id": "8d3983f0ed8c5256-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "75c75ca2-c152-4ec8-8408-fd9055f3a8f1", "children": []}, "bcf9aa2f-b988-4234-a835-07fa6ca7d192": {"id": "bcf9aa2f-b988-4234-a835-07fa6ca7d192", "message": {"id": "bcf9aa2f-b988-4234-a835-07fa6ca7d192", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729097102.612411, "update_time": null, "content": {"content_type": "text", "parts": ["So how can we do that together? ["If you're aiming to make $1,000 in seven days using a method similar to the AI
meme coin story, it's important to be realistic about the risks and uncertainty
involved. The success of *Truth Terminal* and its memecoin *GOAT* was a rare
combination of viral attention, AI novelty, and speculative cryptocurrency markets.
Still, you can try to replicate some elements in a smaller, more practical
way.\n\nHere are a few steps we could explore to get started:\n\n### 1. **Leverage AI
for Creativity and Memes**\n - **Create or use an AI agent**: You could develop or
use an AI model like *Truth Terminal* to generate and post memes, engage in
conversations, or spread viral ideas online. There are AI tools available (like GPT-
based bots) that can help automate social media posting or content generation.\n -
Memes and viral content: The meme world is unpredictable, but it has huge
potential. If you have AI generate unique or engaging content that resonates with a
particular online community (e.g., crypto or meme investors), it could attract
attention. Using platforms like Twitter, Reddit, or Discord to spread viral content is
a key part of this strategy.\n\n### 2. **Launch a Small Cryptocurrency Project**\n -
Create a simple memecoin: There are many platforms that allow you to create a
token without too much technical knowledge (like Ethereum or Binance Smart Chain).
These projects are often driven by meme culture and can gain value quickly if they go
viral.\n - **Tokenomics**: You would need to define how your coin will work,
including its total supply, distribution methods (e.g., airdrops or sales), and
whether it has any utility, or if it's purely a meme coin.\n\n### 3.
Participate in Crypto Trading or NFTs\n - **Crypto trading**: Although it's
high-risk, if you have some basic knowledge of technical analysis or use AI tools, you
could try trading volatile crypto assets. Look for short-term opportunities by trading
based on market trends.\n - **NFTs**: The NFT market is another area where people
have quickly made money. You could try creating a series of AI-generated NFTs,
promoting them via social media, and selling them on platforms like OpenSea.\n\n### 4.
Use an AI-Powered Trading Bot\n - **Automated trading**: If you want to focus on
more practical, low-effort strategies, using an AI-powered crypto trading bot could
help you make small gains in a short period. Some platforms (like Pionex or
Cryptohopper) allow you to set up bots that trade based on predefined strategies.\n
- **Arbitrage**: AI could also be used to spot price differences between exchanges, a
method called arbitrage. While it usually requires significant capital to be effective,
it\u2019s a relatively low-risk way to grow funds.\n\n### 5. **Market and Build
Community**\n - **Community engagement**: Building a strong, dedicated online
community around your AI or meme coin is key to success. Use social media channels,

forums, or Discord to engage with potential investors, meme enthusiasts, or traders.\n
- **Viral marketing**: Leveraging the right channels and influencers in the crypto space can rapidly boost your project. You could partner with micro-influencers or use paid promotions to spread the word.\n\n### **A Few Key Considerations**\n- **Realism**: While it\u2019s possible to make gains in crypto and meme markets, making $1,000 in seven days is ambitious, especially with a small starting amount.\n- **High Risk**: These strategies are speculative, and there's no guarantee of success. You could lose money, so only invest what you're willing to lose.\n- **Ethics and Regulation**: Depending on your region, creating coins or engaging in certain types of crypto activities could be subject to legal regulations.\n\nIf you want to dive into one of these strategies, we can explore how to get started step by step. Does one of these approaches interest you more?"]}, "status": "finished_successfully","end_turn": true

Here\u2019s a simplified guide to help you understand how to create and sell NFTs:\n\n### 1. **Understanding NFTs**\n NFTs are unique digital assets stored on a blockchain. Unlike cryptocurrencies, which are interchangeable (fungible), each NFT has a unique identifier, making it distinct. NFTs can represent digital art, music, videos, in-game items, or even real-world assets.\n\n### 2. **Choose a Blockchain**\n Most NFTs are created on the

Ethereum blockchain, but other networks like **Binance Smart Chain**, **Solana**, **Polygon**, or **Tezos** are also popular for NFT minting. The blockchain you choose will determine the tools and marketplaces available to you.\n\n### 3. **Set Up a Crypto Wallet**\n To interact with NFT platforms, you\u2019ll need a cryptocurrency wallet. Some popular options include:\n - **MetaMask** (Ethereum-based)\n - **Trust Wallet**\n - **Coinbase Wallet**\n\n Make sure to securely store your wallet\u2019s seed phrase (this is the key to recovering your wallet).\n\n### 4. **Buy Cryptocurrency**\n You\u2019ll need to buy some cryptocurrency to cover transaction fees (known as gas fees) for creating NFTs. Ethereum (ETH) is the most commonly used crypto for NFT transactions. You can purchase ETH on exchanges like Coinbase, Binance, or Kraken.\n\n### 5. **Select an NFT Marketplace**\n Different platforms cater to different audiences, and some have lower fees. Here are a few popular NFT platforms:\n - **OpenSea** (most popular for a wide variety of NFTs)\n - **Rarible**\n - **Mintable**\n - **Foundation** (invitation-based, higher-end digital art)\n - **SolSea** (Solana-based, lower gas fees)\n\n### 6. **Create Your NFT**\n Most NFT platforms make the creation (minting) process easy. Here\u2019s how to mint your own NFT:\n \n 1. **Sign up and connect your wallet**: On your chosen marketplace (e.g., OpenSea), connect your wallet by clicking the wallet icon and following the steps.\n \n 2. **Create your collection**: In OpenSea, for example, click on \u201cCreate\u201d and build a collection where you\u2019ll mint your NFTs. Add details such as a logo, description, and category.\n \n 3. **Upload your file**: Click \u201cCreate\u201d and upload your digital file (image, video, music, etc.). You can mint JPEGs, PNGs, MP4s, GIFs, etc., depending on the platform.\n \n 4. **Add metadata**: This includes giving your NFT a name, description, properties, and unlockable content (if any). You can also decide the total supply and whether it\u2019s a single edition or part of a collection.\n\n 5. **Mint the NFT**: Once you upload and fill in the details, you\u2019ll be prompted to pay a gas fee to mint the NFT on the blockchain. After this, your NFT will be publicly listed on the platform.\n\n### 7. **Set a Price or Auction**\n After minting, you can:\n - **List for sale**: Set a fixed price in cryptocurrency (e.g., 0.1 ETH).\n - **Auction**: Set a starting bid and allow buyers to place bids. You can also set a reserve price.\n - **Timed auction**: A time-limited auction where the NFT is sold to the highest bidder after the set time expires.\n\n### 8. **Promote Your NFT**\n Marketing your NFT is crucial for attracting buyers:\n - **Social Media**: Use platforms like Twitter, Instagram, and TikTok to showcase your NFT and engage with the community.\n - **Discord and NFT communities**: Join relevant NFT Discord servers and engage with collectors and creators.\n - **Collaborations**: Partnering with influencers or other artists can help boost visibility.\n\n### 9. **Sell and Earn Royalties**\n Once your NFT is sold, the funds will be transferred to your wallet. One of the significant advantages of NFTs is that you can set **royalties**, meaning you earn a percentage (e.g., 5-10%) from all future sales of your NFT.\n\n### Costs Involved:\n - **Gas Fees**: The cost to mint and sell an NFT can vary depending on the blockchain's congestion. Ethereum tends to have higher fees, whereas platforms like Polygon or Solana have much lower fees.\n - **Marketplace Fees**: Marketplaces usually take a small percentage of your sale (OpenSea charges 2.5%).\n\n### Tools and Resources:\n - **NFT Generator Tools**: If you want to create multiple variations of an NFT (for example, 10,000 pieces), you can use tools like HashLips or Appy Pie Design to generate NFT collections.\n - **AI-Generated NFTs**: Tools like **Artbreeder** and **Deep Dream** allow you to create AI art that

can be turned into NFTs.\n\nWould you like help in setting up an NFT, or do you have any specific questions on the process?"]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "ab020e0a-a4c8-4133-a2d9-f4670ca57218", "request_id": "8d398857892a5256-MXP", "timestamp_": "absolute", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true}, "recipient": "all", "channel": null}, "parent": "ab020e0a-a4c8-4133-a2d9-f4670ca57218", "children": ["dd74a42c-27bd-47dc-a9d2-81fbd82e3c5d"]}, "dd74a42c-27bd-47dc-a9d2-81fbd82e3c5d": {"id": "dd74a42c-27bd-47dc-a9d2-81fbd82e3c5d", "message": {"id": "dd74a42c-27bd-47dc-a9d2-81fbd82e3c5d", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1729097429.678256, "update_time": null, "content": {"content_type": "text", "parts": ["Thats it for now"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"request_id": "8d398c55cf1d5256-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "23c2c965-d06b-451d-96a9-0c8a7e38ac62", "children": ["4bbe4874-f35f-4949-a40b-6f4608b1c4f2"]}, "4bbe4874-f35f-4949-a40b-6f4608b1c4f2": {"id": "4bbe4874-f35f-4949-a40b-6f4608b1c4f2", "message": {"id": "4bbe4874-f35f-4949-a40b-6f4608b1c4f2", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1729097435.224242, "update_time": null, "content": {"content_type": "text", "parts": ["Got it! "create_time": 1728947949.598534, "update_time": null, "content": {"content_type": "text", "parts": ["Yes, the Torah frequently refers to God, and there are various names used to describe God throughout the text. The most common names include:\n\n1. **YHWH (Yahweh or Jehovah)** \u2013 This is considered the most sacred name of God, often rendered as "The LORD" in English translations. Jewish tradition treats this name with great reverence and typically avoids pronouncing it aloud, instead using terms like **Adonai** (meaning "Lord") during prayer.\n\n2. **Elohim** \u2013 This is another frequently used name, which translates roughly to "God" in English. Interestingly, "Elohim" is a plural form in Hebrew, but it is used with singular verbs when referring to the God of Israel, suggesting a singular, all-powerful deity.\n\n3. **El Shaddai** \u2013 This name is often translated as "God Almighty" or "The Almighty."\n\n4. **Adonai** \u2013 Meaning "Lord," this title is used in place of YHWH during readings of the Torah.\n\nAs for the idea that a literal translation of the Torah makes God sound like an alien, this concept often arises from modern interpretations, especially those influenced by ancient astronaut theories, which suggest that descriptions of God\u2019s actions (such as creation, miracles, or divine encounters) resemble advanced technology or extraterrestrial intervention.\n\nFor example:\n- **Elohim**, being plural in form, has led some to speculate that it refers to a group of beings rather than a singular God, although this is not how the text is traditionally interpreted within Judaism.\n- Descriptions of divine encounters, like God appearing in a cloud, fire, or thunder (e.g., at Mount Sinai), have been interpreted by some as descriptions of advanced technology or extraterrestrial phenomena.\n\nThese interpretations are speculative and not supported by mainstream religious or scholarly views. In traditional Jewish, Christian, and academic interpretations, God is understood as a singular, transcendent being who operates beyond human comprehension, not as an alien in the modern sci-fi sense.\n\nThe Torah is often written in metaphorical or symbolic language, which can lend itself to various interpretations depending on the lens through which it is viewed."]}, "status": "finished_successfully","end_turn": true

emergence of Israel and the "end times" is a theme that is woven throughout various parts of the Bible, but it isn't addressed as one singular event in any specific book. Instead, these themes are found in different books, often interpreted together to form larger theological views. Here's a breakdown of where these ideas come from:\n\n### Emergence of the State of Israel\n\n1. **Genesis** (The Torah):\n - In the first book of the Torah, God promises the land of Israel to Abraham and his descendants (Genesis 12:1-7; Genesis 15:18-21). This is often referred to as the **Abrahamic Covenant**, where God tells Abraham, "To your offspring, I will give this land."\n\n2. **Exodus - Deuteronomy** (The Torah):\n - The promise of the land is reaffirmed to Abraham's descendants, especially during the time of Moses, when God leads the Israelites out of Egypt with the goal of bringing them to the Promised Land, Israel (Exodus 3:7-8).\n\n3. **The Prophets (Nevi'im)**: \n - Books like **Isaiah, Jeremiah, and Ezekiel** contain prophecies of Israel's exile due to disobedience, but they also speak of a future return to the land, which many Christians and Jews see as being fulfilled both in ancient times and possibly in modern history with the creation of the modern State of Israel in 1948.\n - For example, **Ezekiel 37** talks about the "Valley of Dry Bones" coming back to life, which many interpret as a prophecy of the restoration of Israel as a nation.\n\n### End Times (Eschatology)\n\n1. **Daniel**: \n - The Book of Daniel, particularly chapters 7-12, contains apocalyptic visions about the end times. Daniel 9 speaks of a future period known as the "Seventy Weeks," which some interpret as a timeline leading up to the arrival of the Messiah and events surrounding the end times.\n\n2. **Isaiah, Jeremiah, Ezekiel**: \n - These books also include eschatological themes, often talking about a "Day of the Lord" or a future time of judgment and restoration. For example, **Isaiah 11** speaks of the coming of a Messiah and a time when peace and justice will reign over the world.\n\n3. **Matthew 24, Mark 13, and Luke 21** (The New Testament, Gospels): \n - These chapters, often called the **Olivet Discourse**, record Jesus talking about the end times, including signs of the destruction of the Temple, wars, natural disasters, and the return of the Son of Man (Jesus himself). The prophecies are interpreted as related to both the immediate fall of Jerusalem in 70 CE and the ultimate end times.\n\n4. **1 Thessalonians 4:13-18** (New Testament, Epistles):\n - The Apostle Paul writes about the return of Christ and the resurrection of believers, which many Christians associate with the "rapture" or the second coming of Christ.\n\n5. **Revelation**:\n - The Book of Revelation, also called the Apocalypse, is the primary text in the Bible associated with the end times. It speaks of a final battle between good and evil, the rise of the Antichrist, a period of tribulation, and the eventual establishment of a new heaven and new earth. Revelation 20 speaks of a thousand-year reign of Christ, and chapters 21-22 describe the ultimate victory of God and the creation of the New Jerusalem.\n\n### Modern Interpretations\n\nThe modern state of Israel, founded in 1948, is seen by many Christian and Jewish scholars as the fulfillment of ancient biblical prophecies about the restoration of the Jewish people to their land. Many evangelical Christians, in particular, view this as a key event in the unfolding of end-times prophecy, believing that the re-establishment of Israel plays a role in the coming of the Messiah and the final judgment.\n\nHowever, not all religious scholars interpret these events this way. Some see these prophecies as having been fulfilled in ancient history, while others apply a more symbolic or metaphorical understanding to the end times.\n\nIn summary, the emergence of Israel is tied to promises and covenants throughout the Torah and Prophets, while eschatological

(end times) prophecies appear in books like Daniel, the Gospels, Paul's letters, and Revelation."]}, "status": "finished_successfully","end_turn": true

"content": {"content_type": "text", "parts": ["Unfortunately, there isn't currently a direct way to replace or fully integrate a custom AI like me into an Alexa device, as Alexa's functionality is tightly controlled by Amazon's software and ecosystem. Alexa uses its own AI and integrates with Amazon services like Amazon Music. \n\nHowever, there are a few things you can do to enhance your Echo Dot's capabilities:\n\n1. **Custom Alexa Skills**: You can create a custom Alexa skill, which would allow you to script certain interactions and responses. This wouldn\u2019t fully replace Alexa's AI, but it could let you input specific information and retrieve responses in a format you prefer. Amazon provides tools like Alexa Skills Kit (ASK) to create these custom skills.\n\n2. **Third-party APIs**: If you have technical knowledge, you could potentially create an Alexa skill that sends requests to external APIs (or services) and uses their responses. In theory, if there was an API that accessed a version of me, you could send those requests and have Alexa relay the answers. This would require programming knowledge and access to such an API.\n\n3. **Voice Assistants on Other Devices**: While Echo Dots are limited to Alexa, you could experiment with using other smart devices (e.g., a computer or phone) that could run advanced AI models and handle more complex queries, then pair those devices with your Echo via Bluetooth to integrate some audio responses.\n\nIn the meantime, you could also explore using Alexa's "Question of the Day" skill or enabling other knowledge-based skills to improve Alexa's default answers. Would you be interested in exploring custom skill development?"]}, "status": "finished_successfully","end_turn": true

With your software development background, we can definitely explore how to leverage OpenAI's API to create something closer to what you envision.\n\n### Steps for integrating smarter AI responses into Alexa:\n\n1. **Create an Alexa Skill**:\n - You'll need to use Amazon's Alexa Skills Kit (ASK). It provides all the tools and resources to develop and deploy Alexa skills.\n - You can create a custom skill that handles user interactions and forwards specific questions to a backend service.\n\n2. **Integrate OpenAI API**:\n - You can use OpenAI\u2019s API (or another powerful AI model) as your backend. When the Alexa skill receives a request, it sends the query to your API, and you can forward it to OpenAI\u2019s API for an AI-generated response.\n - You would need to set up an endpoint (backend server) to handle these requests and interact with OpenAI\u2019s API. You can use Node.js, Python, or whatever technology you\u2019re most comfortable with.\n\n3. **Set up Responses**:\n - Once the AI model (like me) generates a response, it will send that back to your Alexa skill, which will then read the answer aloud to the user.\n - You can configure the skill to also control Amazon Music or other smart home devices by linking Alexa\u2019s built-in features to your custom skill.\n\n4. **Deployment**:\n - You can test the skill using Amazon\u2019s developer tools, and once you're satisfied, you can deploy it to your Echo Dot.\n\nWould you like some help with an example flow for setting up the skill or integrating OpenAI\u2019s API? I can guide you through it step by step."]}, "status": "finished_successfully","end_turn": true

While Zapier can't directly replace Alexa's core functionality, it can be used to integrate Alexa with other services like OpenAI via webhooks or built-in integrations.\n\nHere\u2019s how you could leverage **Zapier** for automating an AI-powered interaction with your Echo Dot:\n\n### Steps to Automate Alexa with Zapier and OpenAI:\n\n1. **Create a Custom Alexa Skill**:\n - Similar to the custom skill approach, you\u201ll still need an Alexa skill to capture user inputs and send them to Zapier.\n - This custom skill would collect the user\u2019s query and trigger a webhook to Zapier.\n\n2. **Use Zapier Webhooks**:\n - Zapier supports **webhooks**, which can be used to receive requests from your Alexa skill.\n - When the Alexa skill is invoked (e.g., you ask a question), you can configure it to send the data to Zapier\u2019s webhook URL.\n\n3. **Set up a Zap to Call OpenAI API**:\n - In Zapier, create a "Zap" that starts with the webhook trigger. When the webhook from Alexa is received, Zapier will take that data and move to the next step.\n - You can add a step in Zapier to **call the OpenAI API** using their **built-in Webhooks app**. This will allow Zapier to send your query to OpenAI and retrieve a response.\n\n4. **Respond Back to Alexa**:\n - Once the OpenAI API responds, Zapier can process the response and send it back to your Alexa skill. However, this part may require an additional intermediary step (like having a simple backend that interacts with Alexa).\n\n5. **Control Amazon Music or Other Automations**:\n - Zapier also integrates with services like Amazon Music and smart devices (like Philips Hue, Spotify, etc.), so if your goal is to have some actions or automations happen after getting a response, you can easily set up a multi-step Zap to control those as well.\n\n### Challenges:\n- **Real-time Responses**: Zapier is good for automation, but for a real-time conversation like what you're describing (with Alexa asking questions and getting immediate AI-generated answers), it might not be as smooth or instant. There could be latency between Alexa's request, Zapier\u2019s webhook, and the OpenAI API response.\n \n- **Alexa Skill Complexity**: You would still need to create an Alexa skill to handle the input and send it to Zapier, but if that feels too complex, you could simplify the project by having Alexa trigger something simpler, like a predefined routine.\n\n### When Zapier is Ideal:\n- If you're looking to automate tasks based on Alexa requests (e.g., after a question is answered, trigger music or a task in another app), Zapier is perfect.\n- It\u2019s best for automating processes where immediate response times

aren\u2019t critical but useful for automating actions (e.g., when you ask Alexa a question and want it to trigger an AI response + an automation task like turning on lights or playing a specific playlist).\n\nIf you want to focus more on advanced, seamless real-time responses, a direct integration via the OpenAI API in a custom Alexa skill is likely the best approach. But for multi-step automations, Zapier can save time and effort.\n\nWould you like to try the custom Alexa skill + Zapier route, or do you prefer setting up a direct API integration for faster responses? Let me know, and I can guide you through either!"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "ffae5d08-36d7-4cab-be74-ff239436b48d", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d1aa3405ca8524f-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "ffae5d08-36d7-4cab-be74-ff239436b48d", "children": ["aaa22fd5-5062-4501-b122-d399f5547c68"]}, "aaa22fd5-5062-4501-b122-d399f5547c68": {"id": "aaa22fd5-5062-4501-b122-d399f5547c68", "message": {"id": "aaa22fd5-5062-4501-b122-d399f5547c68", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728773549.327646, "update_time": null, "content": {"content_type": "text", "parts": ["i don't have a zapier account but I do have Open AI plus. "f6f998c2-6fd9-4d55-8627-79d6868f9bd1", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728773577.767421, "update_time": null, "content": {"content_type": "text", "parts": ["Great! Since you're willing to do some coding and already have an OpenAI Plus account, we can walk through the process of creating a custom Alexa skill that uses the OpenAI API for responses.\n\n### Step-by-Step Guide to Create Your Alexa Skill Using OpenAI API\n\n#### 1. **Set Up an Alexa Developer Account and Create a Skill**\n - Go to the [Alexa Developer Console](https://developer.amazon.com/alexa/console/ask) and sign in with your Amazon account.\n - Click **Create Skill** and give it a name (e.g., \u201cSmart AI Assistant\u201d).\n - Choose a **Custom** skill template and then select **Alexa-Hosted (Node.js)**, so you can handle the backend logic with minimal setup.\n\n#### 2. **Design Your Skill\u2019s Interaction Model**\n - In the Alexa Developer Console, define the phrases (called "invocations") that users will say to trigger your skill. For example:\n   - Sample utterances: \u201cAsk AI Assistant,\u201d \u201cGet an answer,\u201d etc.\n - Create an **Intent** to capture these queries. A simple **Intent** might look like this:\n   - Intent name: `GetAIResponseIntent`\n   - Sample utterances: "What is {query}?", "Can you tell me {query}?"\n\n#### 3. **Connect to OpenAI\u2019s API in Your Backend**\n - After setting up your skill, go to the **Code** section in the Alexa Developer Console.\n - In the `index.js` file, you will write the logic to call OpenAI\u2019s API. Here\u2019s a rough outline of the steps:\n   - Use `axios` (or the built-in `https` module) to send the user\u2019s query to OpenAI\u2019s API.\n   - Parse OpenAI\u2019s response and send it back to Alexa to be spoken aloud.\n\n##### Sample Code for Sending a Query to OpenAI\u2019s API:\n```javascript\nconst axios = require('axios');\n\n// OpenAI API configuration\nconst OPENAI_API_KEY = 'your-openai-api-key';\nconst OPENAI_API_URL = 'https://api.openai.com/v1/completions';\n\n// Function to get AI response from OpenAI\nasync function getAIResponse(query) {\n   const response = await axios.post(OPENAI_API_URL, {\n   model: "gpt-3.5-turbo",\n   prompt: query,\n   max_tokens: 100, // adjust based on your needs\n   temperature: 0.7,\n   }, {\n   headers: {\n   'Authorization': `Bearer ${OPENAI_API_KEY}`,\n   'Content-Type': 'application/json'\n   }\n   });\n   \n   return response.data.choices[0].text.trim();\n}\n```\n\n#### 4. **Modify Alexa Skill\u2019s Response Logic**\n - In the `GetAIResponseIntentHandler`, capture the user's input and pass it to the `getAIResponse` function you wrote earlier. Then return the response from OpenAI to Alexa.\n\n##### Sample Handler:\n```javascript\nconst GetAIResponseIntentHandler = {\n   canHandle(handlerInput) {\n   const request = handlerInput.requestEnvelope.request;\n   return request.type === 'IntentRequest' && request.intent.name === 'GetAIResponseIntent';\n   },\n   async handle(handlerInput) {\n   const userQuery = handlerInput.requestEnvelope.request.intent.slots.query.value;\n\n   // Call OpenAI API to get the AI response\n   const aiResponse = await getAIResponse(userQuery);\n\n   // Respond to the user via Alexa\n   return handlerInput.responseBuilder\n   .speak(aiResponse)\n   .getResponse();\n   }\n};\n```\n\n#### 5. **Test Your Alexa Skill**\n - Once you\u2019ve written your logic, deploy the skill using the "Deploy" button in the Alexa Developer Console.\n - You can then test your skill using the **Test** tab. Speak or type queries to see if the skill is working properly and fetching responses from

OpenAI.\n\n#### 6. **Set Up Security**\n   - Make sure to securely store your OpenAI API key in environment variables or a secure store if you're going to production.\n   - Amazon provides tools like AWS Secrets Manager for this purpose if needed.\n\n#### 7. **Publish Your Skill**\n   - Once you\u2019ve tested your skill thoroughly, you can submit it for certification via the Alexa Developer Console, so it can be made available on your Echo Dot and other Alexa devices.\n\n### Additional Features:\n- **Amazon Music Control**: You can integrate built-in Alexa functionality to control Amazon Music. Just define separate intents for these actions using Alexa\u2019s built-in APIs.\n- **Multi-Step Conversations**: You can use the session management feature of Alexa to have back-and-forth conversations, such as follow-up questions for the AI.\n\nWould you like any more detail on a specific part of the setup, or are you ready to dive in?"]}, "status": "finished_successfully","end_turn": true

"update_time": null, "content": {"content_type": "text", "parts": ["In Alexa skill development, **sample utterances** are examples of what users can say to trigger an intent. They contain **slots**, which are placeholders for dynamic data (like the query you want Alexa to send to OpenAI).\n\nFor your skill, you\u2019re defining sample utterances that map to the **GetAIResponseIntent**. Here, the **{query}** slot is where the user\u2019s input will go (the question they want to ask the AI). \n\n### Examples of Sample Utterances with Slots\n\nHere are some examples of what sample utterances might look like for an AI-powered query:\n\n1. **What is {query}?**\n - Example user input: \u201cWhat is quantum mechanics?\u201d\n - Alexa would recognize "quantum mechanics" as the **{query}** and send that to the OpenAI API.\n\n2. **Can you tell me {query}?**\n - Example user input: \u201cCan you tell me the weather tomorrow?\u201d\n - Here, "the weather tomorrow" would be sent as the query to OpenAI.\n\n3. **Explain {query} to me.**\n - Example user input: \u201cExplain artificial intelligence to me.\u201d\n \n4. **How does {query} work?**\n - Example user input: \u201cHow does blockchain work?\u201d\n\n5. **I want to know about {query}.**\n - Example user input: \u201cI want to know about the solar system.\u201d\n\n6. **What\u2019s the answer to {query}?**\n - Example user input: \u201cWhat\u2019s the answer to life, the universe, and everything?\u201d\n\n7. **Can you help me with {query}?**\n - Example user input: \u201cCan you help me with understanding gravity?\u201d\n\n### Defining the Slot in the Interaction Model\n\nIn the **Interaction Model**, you need to define the **slot** that captures the dynamic part of the query.\n\nFor example:\n\n```json\n{\n "name": "query",\n "type": "AMAZON.SearchQuery" // This slot type is good for capturing open-ended questions\n}\n```\n\nThis way, Alexa can handle different forms of user input and capture the query dynamically, passing it to OpenAI for response generation.\n\nWould you like help setting up the slots and interaction model in the Alexa Developer Console?"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "5d67cd66-b515-4ac7-85e5-1947a827f64c", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d1abd720d220e5b-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "5d67cd66-b515-4ac7-85e5-1947a827f64c", "children": ["aaa24e4a-04b4-401b-a278-7f60014022e9"]}, "aaa24e4a-04b4-401b-a278-7f60014022e9": {"id": "aaa24e4a-04b4-401b-a278-7f60014022e9", "message": {"id": "aaa24e4a-04b4-401b-a278-7f60014022e9", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728774457.240268, "update_time": null, "content": {"content_type": "text", "parts": ["yes. I set up a slot named query but I am unsure of which type to use"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d1abf43da430e5b-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "b9ca6386-c622-49a1-9de2-723c0e69d931", "children": ["9280caca-7102-4016-9995-af5634ab5efc"]}, "9280caca-7102-4016-9995-af5634ab5efc": {"id": "9280caca-7102-4016-9995-af5634ab5efc", "message": {"id": "9280caca-7102-4016-9995-af5634ab5efc", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728774472.751995, "update_time": null, "content": {"content_type": "text", "parts": ["For a dynamic query that captures a wide variety of open-ended questions or topics (which you plan to send to OpenAI), you\u2019ll want a slot type that can handle natural language

effectively. \n\nIn this case, **`AMAZON.SearchQuery`** is the best slot type to use because it is designed to capture free-form, open-ended input, which is exactly what you need for sending queries to an AI.\n\n### Here's how you can proceed:\n\n1. **Slot Type**: \n   - **`AMAZON.SearchQuery`**: This built-in slot type is used to capture a variety of natural language inputs like "Tell me about quantum mechanics" or "What is the capital of France?" It will give you flexibility for most types of questions.\n\n2. **Slot Name**: \n   - Name the slot something simple like `query`, so in your code, you can easily access it. \n\n### Example of Slot Configuration:\n\nIn your interaction model, your intent might look like this:\n\n```json\n{\n "intents": [\n   {\n   "name": "GetAIResponseIntent",\n   "slots": [\n   {\n   "name": "query",\n   "type": "AMAZON.SearchQuery"\n   }\n   ],\n   "samples": [\n   "What is {query}?",\n   "Can you explain {query}?",\n   "Tell me about {query}",\n   "How does {query} work?",\n   "Give me information about {query}"\n   ]\n   }\n]\n}\n```\n\n### How to Set It Up in the Alexa Developer Console:\n\n1. **In the Console**: \n   - Go to the **Interaction Model** tab.\n   - Click on your intent (e.g., `GetAIResponseIntent`).\n   - Add a slot, name it **`query`**, and set the type to **`AMAZON.SearchQuery`**.\n   \n2. **Sample Utterances**: \n   - Add a few sample utterances that include the **`{query}`** slot, such as:\n   - "What is {query}?"\n   - "Explain {query} to me."\n   - "Tell me about {query}."\n\n3. **Save and Build**:\n   - Save the interaction model and build it. This will allow Alexa to recognize a wide range of questions using the `AMAZON.SearchQuery` slot type.\n\n### Test Your Slot:\nAfter you\u2019ve built your model, you can test it in the **Test** tab of the Developer Console. Try speaking or typing different questions to ensure Alexa is capturing the query properly and passing it to your code.\n\nDoes this help clarify the setup? If you run into any issues, let me know!"]}, "status": "finished_successfully","end_turn": true
, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "aaa24e4a-04b4-401b-a278-7f60014022e9", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d1abf43da430e5b-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa24e4a-04b4-401b-a278-7f60014022e9", "children": ["aaa29400-cb5f-4f40-8ab7-29df7b122b72"]}, "aaa29400-cb5f-4f40-8ab7-29df7b122b72": {"id": "aaa29400-cb5f-4f40-8ab7-29df7b122b72", "message": {"id": "aaa29400-cb5f-4f40-8ab7-29df7b122b72", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728774519.760519, "update_time": null, "content": {"content_type": "text", "parts": ["multi value, yes or no? "]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d1ac0c9db680e5b-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "9280caca-7102-4016-9995-af5634ab5efc", "children": ["36d19160-4e73-4a52-b831-6ded4b89372b"]}, "36d19160-4e73-4a52-b831-6ded4b89372b": {"id": "36d19160-4e73-4a52-b831-6ded4b89372b", "message": {"id": "36d19160-4e73-4a52-b831-6ded4b89372b", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728774527.524164, "update_time": null, "content": {"content_type": "text", "parts": ["For the **`AMAZON.SearchQuery`** slot type, **multi-value** is not needed. This slot is

designed to capture a single, complete user input, which in your case is the user\u2019s query or question. Allowing multiple values doesn\u2019t really fit the use case here since the query will generally be a single phrase or question that the user asks.\n\n### Here's why you should set **Multi-Value** to **No**:\n- **Single Value**: The user\u2019s query is typically just one question or statement, and Alexa will treat that as a whole. For example, "What is quantum mechanics?" is one continuous input, not a list of multiple values.\n- **Natural Language**: `AMAZON.SearchQuery` is good at interpreting natural language, which is usually expressed in one continuous phrase rather than multiple distinct values.\n\n### How to Set It:\n- In the Alexa Developer Console, when configuring the `query` slot, leave the **Multi-Value** option set to **No**.\n \nSo in summary, set **Multi-Value** to **No** for your `AMAZON.SearchQuery` slot.\n\nLet me know if you need help with anything else!"]}, "status": "finished_successfully","end_turn": true, "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "aaa29400-cb5f-4f40-8ab7-29df7b122b72", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d1ac0c9db680e5b-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa29400-cb5f-4f40-8ab7-29df7b122b72", "children": ["aaa29840-58ab-4121-b87c-691af8b39763"]}, "aaa29840-58ab-4121-b87c-691af8b39763": {"id": "aaa29840-58ab-4121-b87c-691af8b39763", "message": {"id": "aaa29840-58ab-4121-b87c-691af8b39763", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728775015.666829, "update_time": null, "content": {"content_type": "text", "parts": ["this is the index.js file: \n\n/* *\n * This sample demonstrates handling intents from an Alexa skill using the Alexa Skills Kit SDK (v2).\n * Please visit https://alexa.design/cookbook for additional examples on implementing slots, dialog management,\n * session persistence, api calls, and more.\n * */\nconst Alexa = require('ask-sdk-core');\n\nconst LaunchRequestHandler = {\n   canHandle(handlerInput) {\n   return Alexa.getRequestType(handlerInput.requestEnvelope) === 'LaunchRequest';\n   },\n   handle(handlerInput) {\n   const speakOutput = 'Welcome, you can say Hello or Help. Can you write it for me? Also I'm not sure what or if I already have an API keey from open API, can you guide me on that also? "]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d1acce5cb2c0d9c-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "36d19160-4e73-4a52-b831-6ded4b89372b", "children": ["37e5a85d-a54b-4d0c-95d7-4085e1ba551c"]}, "37e5a85d-a54b-4d0c-95d7-4085e1ba551c": {"id": "37e5a85d-a54b-4d0c-95d7-4085e1ba551c", "message": {"id": "37e5a85d-a54b-4d0c-95d7-4085e1ba551c", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728775048.43216, "update_time": null, "content": {"content_type": "text", "parts": ["You're on the right track! Let's walk through adding the OpenAI API call logic to your existing Alexa skill.\n\n### Step 1: Get Your OpenAI API Key\nIf you already have an OpenAI account (OpenAI Plus), you can generate an API key by following these steps:\n\n1. Go to [OpenAI API](https://platform.openai.com/account/api-keys).\n2. Log in to your account.\n3. Generate a new API key if you haven\u2019t already. Copy it for use in the code. This key is necessary for making requests to the OpenAI API.\n\n### Step 2: Modify Your `index.js` to Include OpenAI API Logic\n\nYou\u2019ll need to install the `axios` library to make HTTP requests. Since Alexa-Hosted Skills don't allow custom packages directly, you can use the `https` built-in library instead to make the API call.\n\nBelow is how you can modify your code to call the OpenAI API and return a response from your Alexa skill.\n\#### 1. Add a new **GetAIResponseIntentHandler** for handling the user\u2019s query.\n\n```javascript\nconst https = require('https');\n\n// Function to send the query to OpenAI API and get a response\nfunction getAIResponse(query) {\n const apiKey = 'your-openai-api-key'; // Replace with your OpenAI API key\n const options = {\n   hostname: 'api.openai.com',\n   path: '/v1/completions',\n   method: 'POST',\n   headers: {\n 'Authorization': `Bearer ${apiKey}`,\n   'Content-Type': 'application/json'\n   }\n   };\n\n   const body = JSON.stringify({\n model: 'text-davinci-003', // Adjust if needed for other models like GPT-4\n   prompt: query,\n   max_tokens: 100,\n   temperature: 0.7\n   });\n\n   return new Promise((resolve, reject) => {\n   const req = https.request(options, (res) => {\n   let data = '';\n res.on('data', (chunk) => {\n   data += chunk;\n   });\n   res.on('end', () => {\n const response = JSON.parse(data);\n resolve(response.choices[0].text.trim());\n   });\n   });\n\n req.on('error', (e) => {\n   reject(e);\n   });\n\n

req.write(body);\n   req.end();\n   });\n}\n\nconst GetAIResponseIntentHandler = {\n   canHandle(handlerInput) {\n   return Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest'\n && Alexa.getIntentName(handlerInput.requestEnvelope) === 'GetAIResponseIntent';\n   },\n   async handle(handlerInput) {\n const userQuery = handlerInput.requestEnvelope.request.intent.slots.query.value;\n \n   let aiResponse = '';\n   try {\n   aiResponse = await getAIResponse(userQuery); // Send the user query to OpenAI\n   } catch (error) {\n   console.log(`Error with OpenAI API call: ${error}`);\n aiResponse = 'Sorry, I had trouble processing that.';\n   }\n\n return handlerInput.responseBuilder\n   .speak(aiResponse)\n   .getResponse();\n   }\n};\n```\n\n#### 2. Add **GetAIResponseIntentHandler** to the list of request handlers.\n\nMake sure you include your new handler in the skill builder chain at the bottom of your `index.js` file:\n\n```javascript\nexports.handler = Alexa.SkillBuilders.custom()\n   .addRequestHandlers(\n LaunchRequestHandler,\n   HelloWorldIntentHandler,\n   HelpIntentHandler,\n CancelAndStopIntentHandler,\n   GetAIResponseIntentHandler, // Add this line\n FallbackIntentHandler,\n   SessionEndedRequestHandler,\n IntentReflectorHandler)\n   .addErrorHandlers(\n ErrorHandler)\n   .withCustomUserAgent('sample/hello-world/v1.2')\n   .lambda();\n```\n\n### Step 3: Update Your Interaction Model\n\nEnsure that your interaction model is configured to handle the `GetAIResponseIntent`. You already set up the **query** slot using `AMAZON.SearchQuery`, so make sure you have sample utterances like these:\n\n```json\n{\n "name": "GetAIResponseIntent",\n "slots": [\n   {\n   "name": "query",\n "type": "AMAZON.SearchQuery"\n   }\n],\n "samples": [\n   "What is {query}?",\n   "Can you explain {query}?",\n "Tell me about {query}"\n]\n}\n```\n\n### Step 4: Test the Skill\n\nOnce you\u2019ve made these changes:\n1. Save and deploy the code.\n2. Go to the **Test** tab in the Alexa Developer Console, and try asking questions like:\n   - "What is quantum mechanics?"\n   - "Tell me about black holes."\n\nIf you receive responses from OpenAI via Alexa, you\u2019re all set! You can fine-tune the prompt, temperature, and other parameters of the OpenAI request to fit your needs.\n\n### Summary:\n- You updated `index.js` to include a function (`getAIResponse`) that makes an API call to OpenAI.\n- You added a new intent handler (`GetAIResponseIntentHandler`) to handle user queries and send them to OpenAI.\n- You configured the interaction model to allow Alexa to capture the user's query using the `AMAZON.SearchQuery` slot.\n \nLet me know how it goes or if you need further adjustments!"]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "aaa29840-58ab-4121-b87c-691af8b39763", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d1acce5cb2c0d9c-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa29840-58ab-4121-b87c-691af8b39763", "children": ["aaa2db05-9e02-42b7-8a5c-c92b2a35ca57"]}, "aaa2db05-9e02-42b7-8a5c-c92b2a35ca57": {"id": "aaa2db05-9e02-42b7-8a5c-c92b2a35ca57", "message": {"id": "aaa2db05-9e02-42b7-8a5c-c92b2a35ca57", "author": {"role": "user",

try?';\n\n return
handlerInput.responseBuilder\n .speak(speakOutput)\n .reprompt(s
peakOutput)\n .getResponse();\n }\n};\n\nconst HelloWorldIntentHandler =
{\n canHandle(handlerInput) {\n return
Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest'\n
&& Alexa.getIntentName(handlerInput.requestEnvelope) ===
'HelloWorldIntent';\n },\n handle(handlerInput) {\n const
speakOutput = 'Hello World!';\n\n return
handlerInput.responseBuilder\n .speak(speakOutput)\n .getRespons
e();\n }\n};\n\nconst HelpIntentHandler = {\n canHandle(handlerInput) {\n
return Alexa.getRequestType(handlerInput.requestEnvelope) ===
'IntentRequest'\n &&
Alexa.getIntentName(handlerInput.requestEnvelope) ===
'AMAZON.HelpIntent';\n },\n handle(handlerInput) {\n const
speakOutput = 'You can say hello to me! How can I help?';\n\n return
handlerInput.responseBuilder\n .speak(speakOutput)\n .reprompt(s
peakOutput)\n .getResponse();\n }\n};\n\nconst
CancelAndStopIntentHandler = {\n canHandle(handlerInput) {\n return
Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest'\n
&& (Alexa.getIntentName(handlerInput.requestEnvelope) ===
'AMAZON.CancelIntent'\n ||
Alexa.getIntentName(handlerInput.requestEnvelope) ===
'AMAZON.StopIntent');\n },\n handle(handlerInput) {\n const
speakOutput = 'Goodbye!';\n\n return
handlerInput.responseBuilder\n .speak(speakOutput)\n .getRespons
e();\n }\n};\n\nconst FallbackIntentHandler = {\n canHandle(handlerInput) {\n
return Alexa.getRequestType(handlerInput.requestEnvelope) ===
'IntentRequest'\n &&
Alexa.getIntentName(handlerInput.requestEnvelope) ===
'AMAZON.FallbackIntent';\n },\n handle(handlerInput) {\n const
speakOutput = 'Sorry, I don\\'t know about that. Please try
again.';\n\n return
handlerInput.responseBuilder\n .speak(speakOutput)\n .reprompt(s
peakOutput)\n .getResponse();\n }\n};\n\nconst
SessionEndedRequestHandler = {\n canHandle(handlerInput) {\n return
Alexa.getRequestType(handlerInput.requestEnvelope) ===
'SessionEndedRequest';\n },\n handle(handlerInput) {\n
console.log(`~~~~ Session ended: ${JSON.stringify(handlerInput.requestEnvelope)}`);\n
return handlerInput.responseBuilder.getResponse(); // empty
response\n }\n};\n\nconst IntentReflectorHandler = {\n canHandle(handlerInput)
{\n return Alexa.getRequestType(handlerInput.requestEnvelope) ===

'IntentRequest';\n   },\n   handle(handlerInput) {\n   const intentName = Alexa.getIntentName(handlerInput.requestEnvelope);\n   const speakOutput = `You just triggered ${intentName}`;\n\n   return handlerInput.responseBuilder\n   .speak(speakOutput)\n   .getRespons
e();\n   }\n};\n\nconst ErrorHandler = {\n   canHandle() {\n   return true;\n   },\n   handle(handlerInput, error) {\n   const speakOutput = 'Sorry, I had trouble doing what you asked. Please try again.';\n console.log(`~~~~ Error handled: ${JSON.stringify(error)}`);\n\n   return handlerInput.responseBuilder\n   .speak(speakOutput)\n   .reprompt(s
peakOutput)\n   .getResponse();\n   }\n};\n\n// Add GetAIResponseIntentHandler to the skill's request handlers\nexports.handler = Alexa.SkillBuilders.custom()\n   .addRequestHandlers(\n LaunchRequestHandler,\n   HelloWorldIntentHandler,\n   HelpIntentHandler,\n CancelAndStopIntentHandler,\n   GetAIResponseIntentHandler, // <<< Add this here\n   FallbackIntentHandler,\n   SessionEndedRequestHandler,\n IntentReflectorHandler)\n   .addErrorHandlers(\n ErrorHandler)\n   .withCustomUserAgent('sample/hello-world/v1.2')\n   .lambda();\n```\n\n### Explanation:\n1. **Placeholders**: \n - I added the placeholder `{{API_KEY}}` for your OpenAI API key. Just **find and replace** `{{API_KEY}}` with your actual key.\n\n2. **`getAIResponse` Function**: \n - This function is placed near the top of the file. It makes the request to the OpenAI API when a user asks a question.\n\n3. **New `GetAIResponseIntentHandler`**: \n - This handler captures the user's query, calls the OpenAI API, and returns the result. I placed it below the existing handlers for better organization.\n\n4. **Adding the Handler to the Chain**: \n - The `GetAIResponseIntentHandler` is added to the request handler chain near the bottom, so Alexa can handle this new intent.\n\n### Next Steps:\n1. Replace the placeholder `{{API_KEY}}` with your actual OpenAI API key.\n2. Save and deploy the code in the **Alexa Developer Console**.\n3. Test it in the **Test** tab of the Alexa Developer Console by asking a question (e.g., "What is artificial intelligence?").\n\nLet me know if you need further adjustments or help with testing!"]}, "status": "finished_successfully","end_turn": true

Here's a step-by-step guide for where to insert the code:\n\n### Step-by-Step Placement\n\n1. **Locate** the part of your code where external libraries are required. In your case, this is near the top:\n ```javascript\n   const Alexa = require('ask-sdk-core');\n   ```\n\n2. **Insert the OpenAI API logic and handler** right after the `const Alexa = require('ask-sdk-core');` line. \n\n### Here's how your file should look:\n\n#### Insert this code snippet after the `const Alexa = require('ask-sdk-core');` line:\n\n```javascript\nconst https = require('https'); // Required for making the OpenAI API request\n\n// Function to send the query to OpenAI API and get a response\nfunction getAIResponse(query) {\n   const apiKey = '{{API_KEY}}'; // <<< FIND AND REPLACE THIS with your actual OpenAI API key\n   const options = {\n   hostname: 'api.openai.com',\n path: '/v1/completions',\n   method: 'POST',\n   headers: {\n   'Authorization': `Bearer ${apiKey}`,\n 'Content-Type': 'application/json'\n   }\n   };\n\n   const body = JSON.stringify({\n   model: 'text-davinci-003', // Adjust if needed for other models\n   prompt: query,\n   max_tokens: 100,\n temperature: 0.7\n   });\n\n   return new Promise((resolve, reject) => {\n const req = https.request(options, (res) => {\n   let data = '';\n   res.on('data', (chunk) => {\n

data += chunk;\n   });\n   res.on('end', () => {\n
const response = JSON.parse(data);\n
resolve(response.choices[0].text.trim());\n   });\n   });\n\n
req.on('error', (e) => {\n   reject(e);\n   });\n\n
req.write(body);\n   req.end();\n   });\n}\n\n// New Intent Handler to call
OpenAI API and get the response\nconst GetAIResponseIntentHandler = {\n
canHandle(handlerInput) {\n   return
Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest'\n
&& Alexa.getIntentName(handlerInput.requestEnvelope) ===
'GetAIResponseIntent';\n   },\n   async handle(handlerInput) {\n
const userQuery = handlerInput.requestEnvelope.request.intent.slots.query.value;\n
\n   let aiResponse = '';\n   try {\n   aiResponse =
await getAIResponse(userQuery); // Call the OpenAI API here\n   } catch (error)
{\n   console.log(`Error with OpenAI API call: ${error}`);\n
aiResponse = 'Sorry, I had trouble processing that.';\n   }\n\n
return
handlerInput.responseBuilder\n   .speak(aiResponse)\n   .getResponse
();\n   }\n};\n```\n\n### Now, add the new handler to the skill handler chain:\n1.
Scroll down to the **Skill Handler Section** at the bottom of your `index.js` file.\n2.
Find the `.addRequestHandlers` method where other handlers like `LaunchRequestHandler`
are already listed.\n3. Add `GetAIResponseIntentHandler` to the list, as
shown:\n\n```javascript\nexports.handler =
Alexa.SkillBuilders.custom()\n   .addRequestHandlers(\n
LaunchRequestHandler,\n   HelloWorldIntentHandler,\n   HelpIntentHandler,\n
CancelAndStopIntentHandler,\n   FallbackIntentHandler,\n
GetAIResponseIntentHandler, // <<< Add this line to register the new
handler\n   SessionEndedRequestHandler,\n
IntentReflectorHandler)\n   .addErrorHandlers(\n
ErrorHandler)\n   .withCustomUserAgent('sample/hello-
world/v1.2')\n   .lambda();\n```\n\n### Recap:\n1. Add the **OpenAI logic** and
`GetAIResponseIntentHandler` directly after your `require` statements.\n2. Add
`GetAIResponseIntentHandler` to the **`.addRequestHandlers()`** list near the
bottom of your file.\n3. Don't forget to **replace** `{{API_KEY}}` with your
actual OpenAI API key.\n\nOnce you do this, save the file and test it. Let me know if
you run into any issues!"]}, "status": "finished_successfully","end_turn": true

To help you better, can you provide the exact error message you received? The error message will give me more details to pinpoint the issue and provide a solution.\n\nIn the meantime, here are a few **common issues and solutions** that might help:\n\n### 1. **Missing/Incorrect API Key**:\n - Make sure you have replaced `{{API_KEY}}` with your actual OpenAI API key.\n - The correct line should look like:\n ```javascript\n const apiKey = 'your-actual-api-key-here';\n ```\n - If the API key is missing or incorrect, it could prevent the skill from successfully calling the OpenAI API.\n\n### 2. **Incorrect Handler Registration**:\n - Double-check that you have added the `GetAIResponseIntentHandler` correctly in the `.addRequestHandlers()` section, as well as defined it above. Make sure it looks like this at the bottom of your code:\n ```javascript\n exports.handler = Alexa.SkillBuilders.custom()\n .addRequestHandlers(\n LaunchRequestHandler,\n HelloWorldIntentHandler,\n HelpIntentHandler,\n CancelAndStopIntentHandler,\n FallbackIntentHandler,\n GetAIResponseIntentHandler, // <<< Ensure this line is here\n SessionEndedRequestHandler,\n IntentReflectorHandler)\n .addErrorHandlers(\n ErrorHandler)\n .withCustomUserAgent('sample/hello-world/v1.2')\n .lambda();\n ```\n\n### 3. **JSON Parsing Issues**:\n - If the build error mentions something like "Unexpected token" or "Invalid JSON," there might be a formatting issue (extra commas, missing brackets) in the JSON part of the request body you\u2019re sending to OpenAI.\n - Ensure that your `JSON.stringify()` in the `getAIResponse` function is properly formatted like this:\n ```javascript\n const body = JSON.stringify({\n model: 'text-davinci-003',\n prompt: query,\n max_tokens: 100,\n temperature: 0.7\n });\n ```\n\n### 4. **Network Errors**:\n - If the error is related to network or SSL (like connecting to the OpenAI API), make sure you're calling OpenAI's API over HTTPS, which is correctly set in your code:\n ```javascript\n const options = {\n hostname: 'api.openai.com',\n path: '/v1/completions',\n method: 'POST',\n headers: {\n 'Authorization': `Bearer ${apiKey}`,\n 'Content-Type': 'application/json'\n }\n };\n ```\n\n### 5. **Lambda Function Timeout**:\n - If OpenAI API responses are slow, you might encounter timeouts. Try reducing the response size or setting a larger timeout in Alexa Developer Console if possible.\n\n### Next Steps:\n1. Please provide the **exact error message** you're seeing, and I can give more precise guidance.\n2. If you're stuck on a specific issue (syntax, API call), feel free to describe it, and I can help you troubleshoot.\n\nLet me know the details of the error so I can guide you further!"]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o",

Let\u2019s try some things to resolve the issue:\n\n### Modifying the Code:\n\nThe code you provided doesn't seem to have any settings for **confirmation** prompts, so there\u2019s nothing in the code requiring confirmation. However, let\u2019s ensure that the intent handler for `GetAIResponseIntent` doesn't require confirmation.\n\nIf you want to forcefully bypass any confirmation or check whether the slot requires confirmation, you can modify your code to ensure Alexa skips any potential confirmation step.\n\n### Example Bypassing Confirmation in the Code:\nAdd this line in the `GetAIResponseIntentHandler` to make sure Alexa skips any slot confirmation step, in case Alexa is requiring it.\n\n```javascript\nconst GetAIResponseIntentHandler = {\n   canHandle(handlerInput) {\n   return Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest'\n   && Alexa.getIntentName(handlerInput.requestEnvelope) === 'GetAIResponseIntent';\n   },\n   async handle(handlerInput) {\n const userQuery = handlerInput.requestEnvelope.request.intent.slots.query.value;\n\n // Forcefully bypass slot confirmation, if it's happening\n handlerInput.requestEnvelope.request.intent.confirmationStatus = 'NONE';\n \n   let aiResponse = '';\n   try {\n   aiResponse = await getAIResponse(userQuery); // Call the OpenAI API here\n   } catch (error) {\n   console.log(`Error with OpenAI API call: ${error}`);\n aiResponse = 'Sorry, I had trouble processing that.';\n   }\n\n

return
handlerInput.responseBuilder\n   .speak(aiResponse)\n   .getResponse
();\n   }\n};\n```\n\n### Confirm Slot and Intent Configuration in Alexa Developer
Console:\n1. **Go to the Alexa Developer Console**.\n2. Open your skill, go to the
Build section, and select **Interaction Model**.\n3. **Check the Slot Type** for
your `query` slot:\n   - Ensure that the **`query` slot** is set to
`AMAZON.SearchQuery` (which you likely already did).\n4. **Check for Slot
Confirmation**:\n   - Click on the **`query` slot** inside your
`GetAIResponseIntent`.\n   - Look for any **Slot Confirmation** settings and make
sure it\u2019s set to **None**.\n\n### Confirm Intent Configuration:\n1. **Check
Intent Confirmation**:\n   - Go to **Intents**, then click on the
`GetAIResponseIntent`.\n   - Look for **Intent Confirmation** and ensure it is set to
None.\n   \n### If None of These Work:\n\nSometimes Alexa\u2019s error messaging
is tricky, and rebuilding the model after checking the slots can help clear up
persistent issues.\n\n- **Try removing the slot entirely** from the
`GetAIResponseIntent` (temporarily) to see if the intent works without it. This will
help you confirm whether the problem is with the slot configuration or elsewhere.\n-
Once it works, you can add the slot back and reconfigure its type and confirmation
status.\n\n### Recap:\n1. Make sure there\u2019s no **slot confirmation** or **intent
confirmation** in your intent\u2019s setup.\n2. Bypass confirmation in the code by
explicitly setting the `confirmationStatus` to `'NONE'`.\n3. Rebuild the
interaction model and see if the issue persists.\n\nLet me know if that helps or if
you\u2019re still running into issues!"]}, "status":

"update_time": null, "content": {"content_type": "text", "parts": ["It sounds like
Alexa might not be triggering **your custom skill** but instead defaulting to its
built-in knowledge base to answer questions. This can happen if Alexa isn't
recognizing the invocation phrases or intents properly. Let\u2019s make sure your
skill is invoked correctly and consistently.\n\n### Steps to Ensure Alexa Uses Your
Custom Skill:\n\n#### 1. **Ensure Your Invocation Name is Correct**\n- **Invocation

Name**: The name you use to trigger your skill must be clear and unique. This is typically set when you create the skill and can be checked/updated in the **Build > Invocation Name** section of the Alexa Developer Console.\n \n- Make sure you\u2019re using this **exact invocation name** when talking to Alexa. For example:\n - "Alexa, open **Smart AI Assistant**"\n - "Alexa, ask **Smart AI Assistant** to answer my question"\n\n#### 2. **Explicitly Invoke Your Skill**\n- Instead of just asking the question directly, try explicitly calling your skill by name. For example:\n - "Alexa, ask **Smart AI Assistant** what is quantum mechanics?"\n - "Alexa, open **Smart AI Assistant** and ask it to explain artificial intelligence."\n\nThis forces Alexa to use your skill, bypassing its built-in knowledge system.\n\n#### 3. **Check for the `GetAIResponseIntent` Invocation**\n- When using your skill, make sure you\u2019re using one of the sample utterances you defined for the `GetAIResponseIntent`. Examples might include:\n - "What is {query}?"\n - "Tell me about {query}."\n\nAlexa will only route your queries to your skill if they match the sample utterances you have defined in your interaction model.\n\n#### 4. **Test in the Alexa Developer Console**\n- Use the **Test** tab in the Alexa Developer Console to simulate requests and see if your skill is being invoked. You can type or speak requests to see which intents are triggered.\n- If your skill isn\u2019t being triggered, check the JSON request in the test tab to see if Alexa is misinterpreting the invocation or query.\n\n#### 5. **Skill Publishing and Invocation Name Conflicts**\n- If your skill has not been published yet, make sure you\u2019re using it in **developer mode** with your Alexa device that is linked to your developer account.\n- If your invocation name is too generic (e.g., "AI Assistant"), Alexa might be confused and try using another skill or its own knowledge. You can try giving your skill a more unique name.\n\n#### 6. **Add Fallback Prompt for Alexa to Guide the User**\nTo ensure Alexa correctly asks for clarification, you can add a fallback prompt to guide the user to the correct invocation. Here's how you can modify the code to handle an unexpected response:\n\n```javascript\nconst GetAIResponseIntentHandler = {\n canHandle(handlerInput) {\n   return Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest'\n && Alexa.getIntentName(handlerInput.requestEnvelope) === 'GetAIResponseIntent';\n   },\n   async handle(handlerInput) {\n const userQuery = handlerInput.requestEnvelope.request.intent.slots.query.value;\n \n   if (!userQuery) {\n   const speakOutput = "I didn\u2019t understand that. Can you please ask me a question like, 'Tell me about quantum mechanics?'";\n   return handlerInput.responseBuilder\n   .speak(speakOutput)\n   .reprompt(speakOutput)\n   .getResponse();\n   }\n\n   let aiResponse = '';\n   try {\n   aiResponse = await getAIResponse(userQuery); // Call the OpenAI API here\n   } catch (error) {\n console.log(`Error with OpenAI API call: ${error}`);\n   aiResponse = 'Sorry, I had trouble processing that.';\n   }\n\n   return handlerInput.responseBuilder\n   .speak(aiResponse)\n   .getResponse();\n   }\n};\n```\n\nThis fallback response will help guide the user in case Alexa doesn\u2019t properly handle the intent.\n\n### Recap:\n1. **Check your invocation name** and make sure you're using it correctly.\n2. **Explicitly invoke the skill** by saying "Alexa, ask [skill name]..." to bypass Alexa's default knowledge base.\n3. Test your skill in the **Alexa Developer Console** to

confirm it\u2019s working as intended.\n4. **Check for conflicts** in the invocation name or generic phrases that might confuse Alexa.\n\nLet me know if this helps or if you need more assistance!"]}, "status": "finished_successfully","end_turn": true , "weight": 1.0, "metadata": {"citations": [], "content_references": [], "gizmo_id": null, "message_type": null, "model_slug": "gpt-4o", "default_model_slug": "gpt-4o", "parent_id": "aaa282be-1ecc-4604-8ef8-b9eabe729aef", "finish_details": {"type": "stop", "stop_tokens": [200002]}, "is_complete": true, "request_id": "8d1b452d0d634bf3-MXP", "timestamp_": "absolute"}, "recipient": "all", "channel": null}, "parent": "aaa282be-1ecc-4604-8ef8-b9eabe729aef", "children": ["aaa2896d-5aa1-43be-81d9-9d468b149fb9"]}, "aaa2896d-5aa1-43be-81d9-9d468b149fb9": {"id": "aaa2896d-5aa1-43be-81d9-9d468b149fb9", "message": {"id": "aaa2896d-5aa1-43be-81d9-9d468b149fb9", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1728780060.117829, "update_time": null, "content": {"content_type": "text", "parts": ["could the dialogue delegations strategy be the issue?"]}, "status": "finished_successfully", "end_turn": null, "weight": 1.0, "metadata": {"serialization_metadata": {"custom_symbol_offsets": []}, "request_id": "8d1b480d4eee4bf3-MXP", "message_source": null, "timestamp_": "absolute", "message_type": null}, "recipient": "all", "channel": null}, "parent": "f55e9fa0-4681-4608-96db-cc6969fcf72e", "children": ["2b2c0aca-135e-4f90-911d-dce0360bd150"]}, "2b2c0aca-135e-4f90-911d-dce0360bd150": {"id": "2b2c0aca-135e-4f90-911d-dce0360bd150", "message": {"id": "2b2c0aca-135e-4f90-911d-dce0360bd150", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1728780088.216936, "update_time": null, "content": {"content_type": "text", "parts": ["Yes, the **dialog delegation strategy** could indeed be part of the issue if it's affecting how Alexa handles user input and routes intents. By default, Alexa uses dialog delegation to handle slot filling, confirmation, and intent routing. This can sometimes cause Alexa to not pass control to your custom intent as expected, especially if there's any confusion or if the interaction model isn\u2019t explicitly configured to bypass delegation.\n\nLet\u2019s review what the **dialog delegation strategy** is and how you can control or bypass it to ensure your skill behaves as expected.\n\n### What is Dialog Delegation Strategy?\nDialog delegation allows Alexa to handle slot filling or confirmation automatically without sending every interaction back to your skill's backend for processing. This can be useful, but in your case, it might cause Alexa to incorrectly process or delay the user\u2019s query.\n\n### Possible Dialog Delegation Issues:\n- **Alexa attempting to confirm slot values**: If there\u2019s a slot (e.g., `query`) that is unclear or empty, Alexa may prompt the user again to confirm or fill in the value instead of passing the query to your API.\n- **Alexa routing control**: If Alexa believes it can handle the dialog (like asking for more information from the user), it may not trigger your intent as expected.\n\n### Disabling or Modifying Dialog Delegation:\n\nTo ensure Alexa always passes control back to your skill without automatic slot handling, you can **disable dialog management** by ensuring you aren\u2019t using dialog directives like `Dialog.Delegate`.\n\nHere\u2019s how to adjust your handler to prevent Alexa from automatically handling dialog:\n\n#### 1. **Ensure No Dialog Delegation is Used in Your Code**\nIn your current handler for `GetAIResponseIntent`, you don\u2019t seem to be explicitly using any dialog directives. However, to ensure Alexa isn't trying to handle dialog behind the scenes, you can check and **disable dialog management** explicitly.\n\nModify the `GetAIResponseIntentHandler` to **disable dialog delegation**:\n\n```javascript\nconst GetAIResponseIntentHandler = {\n canHandle(handlerInput) {\n   return

Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest'\n && Alexa.getIntentName(handlerInput.requestEnvelope) === 'GetAIResponseIntent';\n   },\n   async handle(handlerInput) {\n const { intent } = handlerInput.requestEnvelope.request;\n   \n   // Check if all slots are filled\n   if (intent.slots.query.value === undefined || intent.slots.query.value === "") {\n   const speakOutput = "I didn't catch that. Can you please ask me a question like, 'What is quantum mechanics?'";\n   return handlerInput.responseBuilder\n   .speak(speakOutput)\n   .reprompt(speakOutput)\n   .getResponse();\n   }\n   \n   // Ensure no delegation\n   handlerInput.requestEnvelope.request.dialogState = 'COMPLETED';\n\n   let aiResponse = '';\n   try {\n aiResponse = await getAIResponse(intent.slots.query.value); // Call OpenAI API here\n   } catch (error) {\n   console.log(`Error with OpenAI API call: ${error}`);\n   aiResponse = 'Sorry, I had trouble processing that.';\n   }\n\n   return handlerInput.responseBuilder\n   .speak(aiResponse)\n   .getResponse();\n   }\n};\n```\n\n#### 2. **Dialog State Handling**\nIn Alexa, when dialog delegation is enabled, Alexa checks the **dialogState** (which could be `STARTED`, `IN_PROGRESS`, or `COMPLETED`). If it\u2019s not `COMPLETED`, Alexa might assume that slot values need to be confirmed or filled. By setting the `dialogState` to `'COMPLETED'`, you're telling Alexa that everything is ready and it should process the query without further prompting.\n\n### Recap:\n1. **Ensure No Dialog Delegation**: By setting the `dialogState` to `COMPLETED`, you tell Alexa that no further prompts are needed, so it won\u2019t interfere with your skill logic.\n2. **Handle Missing Slot Values**: Add fallback logic in your handler to check whether the `query` slot is filled and prompt the user for a question if it's missing.\n3. **Avoid Using Dialog.Directives**: If dialog delegation is not necessary, avoid using dialog directives in your code. You can handle all slot values and logic directly within your skill.\n\n### Next Steps:\n- Try adjusting the `GetAIResponseIntentHandler` to set `dialogState` to `COMPLETED` and ensure all slot values are handled by your skill (rather than Alexa).\n- Test your skill in the Alexa Developer Console, making sure it triggers the correct intent.\n\nLet me know if this resolves the issue or if you need further adjustments!"]}, "status": "finished_successfully","end_turn": true

Here are some possible reasons and ways to troubleshoot:\n\n### Common Causes of "INVALID_RESPONSE" Errors:\n1. **OpenAI API Error**:\n   - If your OpenAI API request failed or returned an invalid response, your Alexa skill could crash, which would lead to the `INVALID_RESPONSE` error. This might happen if the OpenAI response is malformed or if there's an issue with your API request logic.\n\n2. **Response Format Issue**:\n   - Alexa expects a valid response structure, and if your code didn\u2019t return the correct response format or returned an empty response, Alexa would flag it as `INVALID_RESPONSE`.\n\n3. **Timeout from API Call**:\n   - If the OpenAI API call takes too long (beyond the time Alexa allows for skill responses), this might result in a timeout, leading to this type of error.\n\n### Steps to Troubleshoot and Fix:\n\n#### 1. **Check the OpenAI API Call**\n   - Ensure that the OpenAI API is returning a valid response. You can add some logging to verify the API call and response:\n\n```javascript\nasync function getAIResponse(query) {\n   const apiKey = 'your-openai-api-key'; // Replace with your key\n   const options = {\n   hostname: 'api.openai.com',\n   path: '/v1/completions',\n   method: 'POST',\n   headers: {\n   'Authorization': `Bearer ${apiKey}`,\n   'Content-Type': 'application/json'\n   }\n   };\n\n   const body = JSON.stringify({\n   model: 'text-davinci-003', // Adjust if needed for other models\n   prompt: query,\n   max_tokens: 100,\n   temperature: 0.7\n   });\n\n   return new Promise((resolve, reject) => {\n   const req = https.request(options, (res) => {\n   let data = '';\n   res.on('data', (chunk) => {\n   data += chunk;\n   });\n   res.on('end', () => {\n   console.log('OpenAI API response:', data); // Log the raw response\n   const response = JSON.parse(data);\n   resolve(response.choices[0].text.trim());\n   });\n   });\n\n   req.on('error', (e) => {\n   console.log('OpenAI API call error:', e); // Log the error\n   reject(e);\n   });\n\n   req.write(body);\n   req.end();\n   });\n}\n```\n\n- This will log the raw response from OpenAI to check if it's properly structured. If the API call returns something unexpected, it could crash the skill.\n- You can also handle **network errors** or **API rate limits** better by wrapping the API call in more extensive error handling.\n\n#### 2. **Return a Valid Alexa Response**\nMake sure that your skill always returns a valid response back to Alexa, even if the OpenAI API call fails. Update your `GetAIResponseIntentHandler` to handle cases where the API fails or times out:\n\n```javascript\nconst GetAIResponseIntentHandler = {\n   canHandle(handlerInput) {\n   return

Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest'\n && Alexa.getIntentName(handlerInput.requestEnvelope) === 'GetAIResponseIntent';\n   },\n   async handle(handlerInput) {\n const { intent } = handlerInput.requestEnvelope.request;\n   \n   // Check if the slot is filled\n   if (intent.slots.query.value === undefined || intent.slots.query.value === "") {\n   const speakOutput = "I didn't catch that. Can you please ask me a question like, 'What is quantum mechanics?'";\n   return handlerInput.responseBuilder\n   .speak(speakOutput)\n   .reprompt(speakOutput)\n   .getResponse();\n   }\n\n   let aiResponse = '';\n   try {\n   aiResponse = await getAIResponse(intent.slots.query.value); // Call OpenAI API\n console.log('AI response:', aiResponse); // Log AI response for debugging\n   } catch (error) {\n   console.log('Error occurred:', error); // Log error for debugging\n   aiResponse = 'Sorry, I had trouble processing your request.';\n   }\n\n   // Return the AI response or error message\n   return handlerInput.responseBuilder\n   .speak(aiResponse)\n   .getResponse();\n   }\n};\n```\n\n- **Log OpenAI Responses**: You can use `console.log` to debug and track the response from OpenAI.\n- **Fallback Message**: If the API call fails or takes too long, ensure Alexa returns a fallback message instead of crashing.\n\n#### 3. **Check for Timeouts**\n   - Alexa has a limited response time (typically around 8 seconds). If the API call takes too long, it could result in an `INVALID_RESPONSE`. To troubleshoot this, add a timeout or optimize the API call. If OpenAI\u2019s response is slow, you might want to use shorter prompts or reduce the `max_tokens`.\n\n#### 4. **Test Locally**\n   - Use the **Alexa Developer Console\u2019s Test tab** to send specific requests and see what responses are returned. Check the logs to ensure the API call works correctly and that your skill is processing the response properly.\n\n#### 5. **Mock OpenAI Response for Testing**\n   - Temporarily mock the OpenAI API response to test the skill without waiting for a real API call:\n\n```javascript\nasync function getAIResponse(query) {\n   return new Promise((resolve) => {\n   resolve("This is a mock response from the AI.");\n   });\n}\n```\n\n- This will allow you to test the rest of your skill logic and ensure Alexa\u2019s response format is correct.\n\n### Recap of What to Do:\n1. **Log the OpenAI API response** to debug whether the API is returning a valid response.\n2. **Ensure your skill always returns a valid Alexa response**, even if the API call fails.\n3. **Handle timeouts** by checking if the API response takes too long and providing fallback responses if needed.\n4. **Test in the Alexa Developer Console** and analyze the logs for more detailed error messages.\n\nBy following these steps, you can identify the issue and fix the `INVALID_RESPONSE` error. Let me know how it goes or if you need more help!"]}, "status": "finished_successfully","end_turn": true

"assistant", "name": null, "metadata": {}}, "create_time": 1728781988.441769,
"update_time": null, "content": {"content_type": "text", "parts": ["The JSON input
you've shared appears to be a **LaunchRequest** from Alexa, which means the user

has opened or initiated your skill, but no specific intent has been triggered yet. This type of request typically comes when a user says something like "Alexa, open [your skill name]."\n\n### Key Points:\n- **LaunchRequest** doesn't carry a user's specific question. It\u2019s just an indication that the user has launched the skill.\n- After receiving this request, your skill should respond with a greeting or a prompt that asks the user what they'd like to do next.\n\n### What Should Happen Next:\nUpon receiving this **LaunchRequest**, your skill should respond with a welcome message and prompt the user to ask a question or request something. For example, it might say, "Welcome! You can ask me about anything. What would you like to know?"\n\n### Here's what the response should look like in your `LaunchRequestHandler`:\n\n```javascript\nconst LaunchRequestHandler = {\n canHandle(handlerInput) {\n return Alexa.getRequestType(handlerInput.requestEnvelope) === 'LaunchRequest';\n },\n handle(handlerInput) {\n const speakOutput = 'Welcome! You can ask me any question, like "Tell me about artificial intelligence." What would you like to know?';\n \n return handlerInput.responseBuilder\n .speak(speakOutput)\n .reprompt(speakOutput) // Adds a reprompt to ensure Alexa keeps listening\n .getResponse();\n }\n};\n```\n\n### What Might Be Happening:\nIf Alexa receives the **LaunchRequest** and no response is provided, it could appear like the skill isn\u2019t doing anything. In your skill, if the `LaunchRequestHandler` is not properly responding, it would lead to no interaction and might seem like Alexa didn\u2019t respond at all.\n\n### To Test:\n1. **Check the Logs**: Make sure the `LaunchRequestHandler` is triggering and logging a message.\n2. **Ensure the Handler is Properly Added**: Make sure the `LaunchRequestHandler` is added in your skill:\n\n```javascript\nexports.handler = Alexa.SkillBuilders.custom()\n .addRequestHandlers(\n LaunchRequestHandler, // Ensure this is included\n HelloWorldIntentHandler,\n HelpIntentHandler,\n CancelAndStopIntentHandler,\n FallbackIntentHandler,\n GetAIResponseIntentHandler, \n SessionEndedRequestHandler,\n IntentReflectorHandler\n)\n .addErrorHandlers(ErrorHandler)\n .lambda();\n```\n\n3. **Test Interaction**:\n - Try saying "Alexa, open [your skill name]" and ensure it returns a welcome message.\n - Then, after the LaunchRequest, test a full query, such as "Tell me about artificial intelligence."\n\n### Next Steps:\n- Update your `LaunchRequestHandler` to ensure it returns a welcome message.\n- Test the full interaction after the LaunchRequest to ensure the skill moves smoothly from launch to handling user queries.\n\nLet me know how it goes after making these updates!"]}, "status": "finished_successfully","end_turn": true

This allows you to track what happens when users interact with your skill, including input requests, errors, and custom log messages you add.\n\n#### Steps to Enable CloudWatch Logging:\n1. **Go to the Alexa Developer Console**:\n - Open the [Alexa Developer Console](https://developer.amazon.com/alexa/console/ask).\n2. **Select Your Skill**: Choose the skill you are working on from the dashboard.\n3. **Open the Build Tab**: In the skill, navigate to the **Build** tab.\n4. **Go to Permissions**:\n - On the left menu, click **Permissions** under **Build**.\n5. **Enable CloudWatch Logs**:\n - In the Permissions section, enable **Amazon CloudWatch Logs** for your skill.\n\n Once enabled, all requests and responses, along with any custom logs you've added to your code, will be available in CloudWatch.\n\n### 2. **Check the Logs in Amazon CloudWatch:**\nOnce you\u2019ve enabled CloudWatch logging, follow these steps to view the logs:\n\n1. **Open the AWS Management Console**:\n - Go to the [AWS Management Console](https://aws.amazon.com/console/).\n - Sign in with the AWS account that is linked to your Alexa skill.\n \n2. **Go to CloudWatch**:\n - Search for **CloudWatch** in the services menu and open it.\n\n3. **Navigate to Logs**:\n - In the CloudWatch dashboard, select **Logs** from the left-hand side.\n \n4. **Find Your Skill\u2019s Log Group**:\n - Look for the log group that corresponds to your skill. It should be named something like:\n   ```\n   /aws/lambda/<Your-Skill-Name>\n   ```\n - Select this log group to see all the logs for your skill.\n\n5. **View the Logs**:\n - Each log event represents a request (LaunchRequest, IntentRequest, etc.) that was processed by your skill.\n - Open the log stream to view details such as the input request, output response, and any logs you've added in your code (via `console.log`).\n\n### 3. **Check Logs in the Alexa Developer Console (Simpler Testing)**:\nFor **quick testing** without going into CloudWatch, you can use the **Test** tab in the Alexa Developer Console:\n\n1. **Go to the Alexa Developer Console**:\n - Open your skill in the [Alexa Developer Console](https://developer.amazon.com/alexa/console/ask).\n \n2. **Navigate to the Test Tab**:\n - Click on the **Test** tab at the top of the screen.\n - Ensure the **Skill Testing** is set to **Development** (switch on at the top).\n\n3. **Use the Simulator**:\n - You can type or speak requests directly in the **Alexa Simulator**. Try invoking your skill by typing: `open [your skill name]`.\n - After you send a request, the **JSON input** and **JSON output** will be displayed below the simulator.\n\n4. **Analyze the Output**:\n - **Input JSON**: Shows the exact request Alexa sent to your skill.\n - **Output JSON**: Displays the response that your skill

sent back to Alexa.\n\n If the output is empty or an error occurs, it\u2019s a sign there may be issues in your code.\n\n### 4. **Add Logs to Your Code** (Optional but Helpful):\nTo track issues or check the flow of your skill, you can add `console.log()` statements in your code:\n\nExample:\n```javascript\nconst LaunchRequestHandler = {\n   canHandle(handlerInput) {\n   return Alexa.getRequestType(handlerInput.requestEnvelope) === 'LaunchRequest';\n   },\n   handle(handlerInput) {\n console.log("LaunchRequest triggered"); // Add this to log the request\n const speakOutput = 'Welcome! You can ask me any question. What would you like to know?';\n\n   return handlerInput.responseBuilder\n   .speak(speakOutput)\n   .reprompt(speakOutput)\n   .getResponse();\n   }\n};\n```\n\n- These logs will be visible in **CloudWatch**.\n\n### Summary:\n- **Enable CloudWatch** logs in the Alexa Developer Console.\n- **View Logs**: Use AWS CloudWatch to view detailed logs for your skill.\n- **Test Tab**: Use the Test tab in the Alexa Developer Console for quick testing and to view input/output.\n- **Add Logs**: Use `console.log()` in your code to help track the flow and identify any issues.\n\nLet me know if you need further help with checking your logs or troubleshooting your skill!"]}, "status": "finished_successfully","end_turn": true

"update_time": null, "content": {"content_type": "text", "parts": ["The error
you're encountering (`INVALID_RESPONSE`) is caused by an issue with how your
skill is processing and returning responses to Alexa. Specifically, Alexa is expecting
a valid response, but an exception occurred, which caused Alexa to terminate the
session and return a **SessionEndedRequest** with the `INVALID_RESPONSE` error.\n\n###
Key Points:\n- **Reason**: The error log indicates that an "exception occurred
while dispatching the request to the skill."\n- **Root Cause**: This typically
happens if there's an error in your code, such as:\n - An issue with the API
call (e.g., OpenAI API response).\n - An error in how the response is being
constructed and sent back to Alexa.\n - A problem with your Lambda function or a
timeout.\n\n### Steps to Fix:\n\n#### 1. **Add Detailed Logging to Debug the
Error**\nTo pinpoint the exact issue, you should add more logging in your handlers,
especially around the areas where exceptions might occur, such as your API call or
response building.\n\nUpdate your `GetAIResponseIntentHandler` as
follows:\n\n```javascript\nconst GetAIResponseIntentHandler = {\n
canHandle(handlerInput) {\n return
Alexa.getRequestType(handlerInput.requestEnvelope) === 'IntentRequest'\n
&& Alexa.getIntentName(handlerInput.requestEnvelope) ===
'GetAIResponseIntent';\n },\n async handle(handlerInput) {\n
const { intent } = handlerInput.requestEnvelope.request;\n\n // Log the
received intent and slots\n console.log('Received Intent:',
intent);\n\n // Check if the slot is filled\n if

(!intent.slots.query.value) {\n   const speakOutput = "I didn't catch that. Can you please ask me a question like, 'What is quantum mechanics?'";\n   console.log('Slot value is empty.');\n return handlerInput.responseBuilder\n   .speak(speakOutput)\n   .reprompt(speakOutput)\n   .getResponse();\n   }\n\n   let aiResponse = '';\n   try {\n   // Log the query being sent to OpenAI\n   console.log('Sending query to OpenAI:', intent.slots.query.value);\n   aiResponse = await getAIResponse(intent.slots.query.value); // Call OpenAI API\n console.log('AI response received:', aiResponse);\n   } catch (error) {\n   console.log('Error occurred while calling OpenAI API:', error);\n   aiResponse = 'Sorry, I had trouble processing your request.';\n   }\n\n   // Return the AI response or error message\n return handlerInput.responseBuilder\n   .speak(aiResponse)\n   .getResponse();\n   }\n};\n```\n\nThis will log critical parts of the interaction:\n- The **intent** and **slot value** received by Alexa.\n- Whether the OpenAI API call was made successfully.\n- The result of the OpenAI API call.\n- Any error that occurs during the process.\n\n#### 2. **Test the OpenAI API Call**\nEnsure the **OpenAI API call** is functioning correctly. Sometimes an unexpected response from OpenAI (e.g., malformed JSON) can crash your skill.\n\nHere's a mock function you can use to test your skill without making real API calls:\n\n```javascript\nasync function getAIResponse(query) {\n   // Simulate a successful AI response for testing\n return `This is a mock response for your query: ${query}`;\n}\n```\n\nYou can replace your `getAIResponse` function with this mock version temporarily to see if the problem is related to the OpenAI API call.\n\n#### 3. **Check for Timeouts or Lambda Errors**\nIf your skill is running on AWS Lambda, there could be a timeout or other Lambda-specific issues. Verify the following:\n- **Timeout Settings**: Ensure your Lambda function has enough time to complete its execution. You can increase the timeout in the AWS Lambda console.\n- **Lambda Logs**: Check the CloudWatch logs for your Lambda function for any additional error information.\n\n#### 4. **Check for Empty or Invalid Responses**\nMake sure that your skill is always returning a valid response to Alexa. If there is a scenario where no response is sent (or the response is empty), Alexa will return an `INVALID_RESPONSE`.\n\nEnsure you always return something like this:\n```javascript\nreturn handlerInput.responseBuilder\n   .speak(aiResponse)\n   .getResponse();\n```\n\nEven if the OpenAI call fails, you should always return a response with a fallback message to avoid triggering an error.\n\n### 5. **Inspect the Skill Metrics**\nFrom the logs, you can see the `metrics` section which shows the **skillExecutionTimeInMilliseconds**. If this value is very high, it could mean a timeout or slow response from the OpenAI API.\n\n### Conclusion\n- **Add more logging** to see where the error occurs.\n- **Mock the OpenAI API** to verify that your skill logic works without the API dependency.\n- **Check for timeouts** and ensure a valid response is always returned to Alexa.\n\nOnce you've added the additional logging and tested it, check the logs in CloudWatch for more detailed insights. Let me know how it goes or if you need more help!"]}, "status": "finished_successfully","end_turn": true
