funds or benefits from the government. \nInstead of raising taxes on individuals who have worked hard to amass wealth we should first look to set regulations that protect the rights of citizens. Government should create an environment where individuals are allowed to flourish. For example the Build Back Better Act includes provisions for universal pre-K (Points to Know 2021). This provision allows for all 3-4-year-olds to receive an education. As we are all created equal any inequalities stem from as Adam Smith suggested habit custom and education (Otteson 2013). \nFurthermore the government often raises taxes on individuals to pay for social initiatives when raising corporate tax rates would be more equitable. Right now the federal corporate income tax rate is 21% combined with varying state tax rates of up to 11.5% (York 2021). It is also important to note that the United States has the largest gross domestic product (GDP) at approximately \$21 trillion (United States of America - Place Explorer - Data Commons n.d.). Just the slightest increase in corporate taxes could generate billions to improve the lives of each citizen. \nIn contrast to the United States currently France has the highest combined tax rate at 32% (York 2021) but with a much smaller GDP at \$2.6 trillion (France | Data n.d.). In addition after loopholes and deductions the effective tax rate for most large corporations is relatively lower than that figure. Therefore instead of unevenly taxing individuals the government needs to tax corporations more and reduce loopholes. \nFor any social contract to work everyone needs to contribute their fair share. However fairness and equality are not always the same thing. Indeed many philosophical theories centered around fairness acknowledge that sometimes inequality is acceptable. In For example according to Mcmanus et al. (2018) in his Justice as Fairness theory John Rawls argued that inequality is acceptable if it benefits the least advantaged members of society. Because many of the factors that benefit the most privileged are unearned \u201cRawls argues that social stability requires us to benefit those who do not have the same advantage so that they are regarded as equally worthy members of the same society\u201d (p. 228). Therefore because it may benefit the least privileged members of society one could argue that higher taxes for the wealthy are just and fair even when viewed through social contract theory. \nA just society is \u201cgrounded in cooperation and mutual advantage between its individual members\u201d (Mcmanus et al. 2018 p. 201). Taxing the nation\u2019s highest earners helps to fund the government. The government is needed to maintain an ordered and safe society. The government is comprised of individuals. Thus one could also argue that the government taxing the rich to support the less fortunate is an example of cooperation for mutual advantage. \nFinally higher taxes for the rich are arguably justifiable because not every wealthy person has earned their riches. Very often the most affluent citizens have benefitted from \u201cthe accomplishments of past generations not to mention the support of public institutions (like the National Science Foundation) and services (like schools) that foster innovation and lead to greater productivity\u201d (Kohn 2010 para. 7). Therefore one could assert that the wealthy owe a debt to society and as they have gained more they should contribute more. \nHowever regardless of whether the government taxes the rich more or less the true source of immorality in this situation is capitalism itself. One of the main philosophical underpinnings of capitalism is the idea that \u201cman's mind is competent in dealing with reality that it is morally good for each person to strive for his own happiness\u201d (Capitalism FAQ: Theory n.d.). However in reality capitalism creates a society where each person strives toward monetary rewards for themselves because that represents access to personal happiness. As a result capitalism perpetuates inequalities and encourages a

competitive and divisive mindset which ultimately destabilizes society. Instead of encouraging humanity to work together for the betterment and progression of all we instead live our whole life attempting to amass and hoard wealth. \nLike our founding fathers the majority of Congress is wealthy. Today over half of the members of Congress are millionaires (Evers-Hillstrom 2020). They depend on the donations from lobbyists funded by corporations to finance their campaigns. In the pursuit of their happiness they like us are working to earn a dollar. \nThe Build Back Better Act is now with the Senate. While there are hopes that the bill will pass before Christmas passing the bill in the Senate is expected to be an uphill battle. Many senators argue that its provisions are too costly and will negatively affect the economy (Reilly & Damp; Cole 2021). \nIn a just society \u201cAccording to [John] Rawls leaders and followers must work together to guarantee the basic rights of those who cannot speak up for themselves\u201d (McManus et al. 2018 p. 242). However given the political climate of the day the personal wealth of the majority of Congress and the overarching influence of capitalism it is unlikely the bill will pass in its current form. More than likely some of the existing provisions to aid poor and median income households or the tax increases included in the legislature will be dropped before it is approved by the Senate (Reilly & Dole 2021). \nIn America we citizens look to the state to support and relieve us from the inherent injustices and inequalities we experience while living in our capitalistic system. We expect government leaders to be the antithesis of greedy capitalists. We believe that they act ethically and never make decisions motivated by self-interest and personal gain. We hope that politicians make decisions with all citizens\u2019\u2014be they rich or poor\u2014best interests in mind. Our social contract imbues them with the power to choose how we use and distribute a resource of finite nature and availability\u2014money. \nIs it moral to tax the rich to support the poor? Ultimately its ethicality is irrelevant in a society underpinned by a system that creates and maintains a culture driven by scarcity and choice. Moreover any society where its leaders must consider rectifying one inequality with another inequality where greed and self-interest abound and are encouraged is innately immoral from conception. \n\t\nReferences\nCapitalism FAQ: Theory. INTRODUCTION 4\n\n2 SCOPE MANAGEMENT 6\n\n3 COST MANAGEMENT 11\n\n4 PROCUREMENT AND QUALITY MANAGEMENT 12\n\n5 PROJECT RESOURCE MANAGEMENT 13\n\n6 PROJECT COMMUNICATIONS MANAGEMENT 14\n\n7 RISK MANAGEMENT AND REGISTER 15\n\n8 STAKEHOLDER ENGAGEMENT 16\n\nAPPENDIX A: PROJECT MANAGEMENT PLAN APPROVAL 21\n\nAPPENDIX B: ANNEX DIRECTORY 22\n\nAPPENDIX C: GLOSSARY 24\n\nAPPENDIX D: EXTERNAL DOCUMENTATION AND RESOURCES 25\n\nPage 3 of 25\n\n\n\n1 INTRODUCTION\n\n1.1 PURPOSE OF THE PROJECT MANAGEMENT PLAN\n\nThe following project management plan was completed for the project titled \u201cTrecce\u201d. It\n\nwas developed based on acceptance of the related Project Charter and defines how this\n\nproject will be executed, monitored, controlled, and closed. This PMP is addressed to all\n\nstakeholders, including the management team, all sponsors, and the project team. Trecce\n\naims to mobilize chefs and volunteers to take part in a month-long pilot event at Mensa\n\nGiovanni Paolo II to offer nutritious meals to the economically disadvantaged while\n\nreducing food waste and fostering community engagement. The name Trecce, meaning\n\nbraids in Italian, derives from the intertwined connection the kitchen, chefs, and \n\ncommunity will have during this project. \n\nPage 4 of 25\n\n\n1.2 ASSUMPTIONS AND CONSTRAINTS\n\nThe Assumption and Constraints matrix is a very crucial component of the Risk\n\nManagement Plan. It is very important in forecasting, which is important in building a\n\nproject vision, and identifying project deliverables. Constraints on the other hand could\n\nserve as potential risks if not well managed. The matrix can serve as a guide to the \n\nProject Management Team in identifying all known risks.\n\nPlease refer to the Assumption and Constraints matrix for a detailed description of all\n\nregistered project assumptions and constraints. The matrix can be found in the Risk\n\nManagement Plan folder.\n\nSee Annex 1: Assumption and constraints\n\nPage 5 of 25\n\n\n\n2 SCOPE MANAGEMENT\n\n2.1 REQUIREMENTS DOCUMENTATION\n\nThe requirements of Trecce include all needs to lead to a successful food service for\n\nbeneficiaries. These include acquiring the needed stakeholders, having an adequate\n\nlocation for food preparation and service, providing schedules to stakeholders, and the \n\nmeans to analyze program success.\n\n2.2 REQUIREMENTS TRACEABILITY MATRIX\n\nSee Annex 2: Requirements Traceability Matrix\n\n2.3 WORK BREAKDOWN STRUCTURE\n\nThe Trecce Work Breakdown Structure (WBS) categorizes all work needed to complete\n\nthe project and represents 100% of the scope. The WBS is broken down into the \n\nfollowing format:\n\n1. Project Management\n\n1.1. Execution\n\n1.1.1. Communication Plan Execution\n\n1.1.2. Project Work Execution\n\n1.1.3. Risk Response Execution\n\n1.2. Monitoring & Damp; Controlling\n\n1.2.1. Risk Monitoring\n\n1.2.2. Schedule & amp; Milestone Controlling\n\n1.2.3. Cost monitoring\n\n1.3. Close\n\n1.3.1. Project Close Documents\n\n1.3.2. Project Close\n\n2. Planning\n\n2.1. Procurement\n\n2.1.1. Food/service supplies $\n\n2.1.2$ . Transportation for food/materials $\n\n2.2$ . Schedule\n\n2.2.1. Chef schedule\n\n2.2.2. Volunteer schedule\n\n2.2.3. Timeline for day of service\n\n2.3. Location\n\n2.3.1. Site visit to kitchen\n\n2.3.2. Kitchen space checklist $\n\n2.3.3$ . Dining space checklist $\n\n2.4$ . KPIs $\n\n2.6$  of 25 $\n\n\n3.6$ Recruitment\n\n3.1. Chefs\n\n3.1.1. Chef pre-selection meetings\n\n3.1.2. Chef partnership agreements\n\n3.1.3. Chef confirmation\n\n3.1.4. Pre-month-of-service meetings with chefs\n\n3.2. Partners\n\n3.2.1. Partner pre-selection meetings\n\n3.2.2. Partner agreements\n\n3.2.3. Confirmation of partners\n\n3.2.4. Partner pre-month-ofservice meetings\n\n3.3. Volunteers\n\n3.3.1. Development of recruitment/advertising materials\n\n3.3.2. Marketing launch\n\n3.3.3. Volunteer sign up period\n\n3.3.4. Volunteer roles determination\n\n3.4. Team Building Event\n\n4. Month of Service\n\n4.1. Food Coordination\n\n4.1.1. Donation food delivery\n\n4.1.2. Menu

selection\n\n4.1.3. Purchased food delivery\n\n4.2. Volunteer coordination\n\n4.2.1. Kitchen volunteer coordination\n\n4.2.2. Service area volunteer coordination\n\n4.3. Site coordination\n\n4.3.1. Kitchen coordination\n\n4.3.2. Food service area coordination\n\n4.4. Food Service\n\n5. Post Service Month Evaluation\n\n5.1. Feedback\n\n5.1.1. Chef feedback meetings\n\n5.1.2. Volunteer feedback via surveys\n\n5.1.3. Beneficiaries feedback via verbal questions\n\n5.1.4. Partner feedback meetings\n\n5.2. Data Analyzation\n\n5.2.1. KPI analyzation\n\n5.2.2. Feedback analyzation\n\n5.2.3. Feedback report\n\n5.3. Milestone Review Meeting\n\nSee Annex 3: WBS Dictionary\n\nSee Annex 4: ProjectLibre WBS\n\n2.3.1 CHANGE MANAGEMENT PLAN\n\nIf any stakeholder believes a change to the project scope or schedule is necessary, they\n\nPage 7 of 25\n\n\nwill be required to complete the Trecce Change Request Form. Once completed, they will\n\nneed to email this form to the project management team, indicated in the project charter. \n\nAt that time, the project management team will review the request and determine if the \n\nchange is approved or denied, completing any research on the change as needed. If\n\napproved, the project management team will be responsible for informing the affected\n\nstakeholders and updating any related project documents such as the schedule, activity\n\nlist, risk register, responsibility assignment matrix, or any document the PM team deems\n\naffected. If the request is denied, the PM team should respond to the stakeholder who\n\nrequested the change, indicating the reason for the denial.\n\nSee Annex 5: Change Request Form\n\n2.4 PROJECT SCHEDULE MANAGEMENT\n\nThe project schedule has been broken into the following phases: planning, recruitment, a\n\nmonth of service, and a post-service-month evaluation. The timeline for each phase\n\ndiffers due to project work needs, the man hours needed to complete the phase, observed\n\nholidays in Rome, and being mindful of our external stakeholders' schedules. \n\nDuring the planning phase, the main tasks will include procurement of materials, \n\nscheduling for the month of service, and food kitchen logistics. The timeline for this \n\nphase starts three months before the month of service and will last until the end of \n\nSeptember. As chefs and partners will dictate planning details, a lot of the work in this\n\nphase will occur after recruitment.\n\nThe recruitment of partners has already started in September of 2022. As Trecce\n\nrelies on donors to fund the project, it is important to receive around 50% of our\n\ndonation goal before the kickoff meeting on May 2, 2023. Therefore, we felt the urgency\n\nto start requesting donations as soon as possible. The recruitment of chefs will start at\n\nthe project kickoff and last until June 30, 2023. Holding this recruitment early on allows\n\nfor the most preparation of schedules and planning. Volunteers will start to be recruited\n\nonce marketing materials are launched and can sign up all the way up to the month of\n\nservice.\n\nThe timeline for the month of service includes all activities needed to conduct a\n\ndinner service successfully. Dinner service days include Tuesdays, Wednesdays, and\n\nPage 8 of 25\n\n\nThursdays. The food delivery will take place on Mondays, Tuesdays, and Wednesdays, \n\none day before the meal service, to ensure our chefs have time to properly inspect the\n\ndonated food, determine a menu, and request any food items that need to be bought to\n\ncomplete the meal.\n\nFor the post-service-month evaluation, the goal is to understand whether or not this \n\npilot program has been successful or not. The schedule includes time to hear the\n\nopinions of chefs, partners, volunteers, and beneficiaries to understand the program's\n\npros and cons. Once all data is collected, the project management team will analyze this\n\ndata and compile a report stating their opinion. \n\n2.4.1 ACTIVITY LIST AND ATTRIBUTES\n\nThe Trecce activity

list encompasses all activities that must be completed in order for\n\nthe project to be successful. These were developed from the Work Breakdown Structure\n\nand should include 100% of the project work. Included in the activity list are the activity\n\nID, activity Name, WBS ID, predecessor and successor activities, logical relationship\n\nindicators, leads/lags, the imposed deadline, and the location where the activity will take\n\nplace. The project management team is responsible for monitoring the activity list and\n\nmaking any necessary updates during the project lifecycle. \n\nSee Annex 7: Activity List\n\n2.4.2 MILESTONE LIST\n\nMilestone Deadline\n\nGaining committed donors to fund project at 50% 02/05/23\n\nMeeting recruitment requirements for chefs. 30/06/2023\n\nMeeting recruitment requirements for partners 30/06/2023\n\nMeeting recruitment requirements for volunteers 29/09/23\n\nThe first meal service 02/10/2023\n\nThe last meal service 31/10/2023\n\nAll expected feedback is collected for analysis  $07/11/2023 \ln completing$  the follow-up phase tasks 15/11/2023\n\nSee Annex 8: Milestones\n\n2.4.3 PROJECT SCHEDULE\n\nSee Annex 6: ProjectLibre Gantt Chart\n\nSee Annex 7: Activity list\n\nPage 9 of 25\n\nhttps://drive.google.com/file/d/1KEQKckZ4wXzWammYTsR6mjKu65fmn an/view?usp=share \_link\n\nNee Annex 3: WBS Dictionary\n\nSee Annex 21: Day of Service Timeline\n\nPage 10 of 25\n\n\n3 COST MANAGEMENT\n\n3.1 BUDGET & CHEDULE OF EXPENSES\n\nAt the start of planning we assume that 50% of the project funding has been secured. \n\nFundraising activities will continue throughout the project. In addition, as this is a\n\ncharitable endeavor, the project management team has agreed to donate 60% of their\n\nsalary toward the project. The schedule of funding partners with donation amount, along\n\nwith a complete schedule of expenses and contingency funding amounts to be found in\n\nthe annex.\n\nSee Annex 9: Budget and Schedule of expenses\n\nPage 11 of 25\n\n\n4 PROCUREMENT AND QUALITY MANAGEMENT\n\n4.1 PROCUREMENT AND QUALITY MANAGEMENT PLAN OVERVIEW\n\nThe Trecce Procurement Management Plan aims to define the project\u2019s procurement and\n\nquality management process. The plan will set out the procurement and quality\n\nmanagement guidelines, define the risks associated with the procurement and quality\n\nmanagement strategy, and suggest the strategy for mitigating those risks. Specifically, \n\nthe Procurement Management Plan will define the following:\n\n\u25cf Project procurement partners and donating partners\n\n\u25cf Quality and procurement work breakdown structures (WBSs)\n\n\u25cf Establishing partner deliverables and deadlines\n\n\u25cf Which items are to be procured via direct purchase, pricing, and timelines\n\n\u25cf Determining material costs \n\n\u25cf Risks associated with procurement management\n\n\u25cf How procurement risks will be mitigated\n\n\u25cf How procurement is coordinated with project scope, budget, and schedule \n\n\u25cf Inventory and Quality Assessment Log Template\n\n\u25cf Quality management criteria\n\n\u25cf Specify all constraints pertaining to procurement\n\n\u25cf Performance metrics for procurement activities\n\nPlease refer to Annex 10 for the complete Trecce Procurement and Quality Management\n\nP1an.\n\nSee Annex 10: Trecce - Procurement and Quality Management Plan\n\nSee Annex 11: Inventory and Quality Assessment Log\n\nPage 12 of 25\n\n\n5 PROJECT RESOURCE MANAGEMENT\n\nThe Resource Management Plan defines the approach to identify, acquire, and manage\n\nthe human and physical resources needed for the Trecce project. Resources are key\n\ncomponents of any project. Therefore, successfully identifying all the required human\n\nand material resources required for this endeavor is fundamental. The Resource\n\nManagement Plan also encompasses the Team Charter, a key document that outlines\n\nteam members' roles and responsibilities, team values, agreements, and operating\n\nguidelines. Please refer

to the Resource Management Plan for a detailed description of all\n\nresources identified, how they will be managed and utilized for project success, and all\n\nnecessary information on the Team Charter.\n\nSee Annex 12: Project Resource Management Plan\n\n5.1 RESPONSIBILITY ASSIGNMENT MATRIX\n\nThe Responsibility Assignment Matrix is a key component of the Resource Management\n\nPlan, which is required to inform all project team members on the assignment of project\n\ntasks/activities. This matrix details each project work activity, clearly indicating the \n\nhuman resource responsible of performing specific project activity/s, who is accountable\n\nfor its success or failure, who is to be consulted before the activity is conducted, and who\n\nis to be informed. The Trecce Project Team chose the RASCI matrix as opposed to the \n\nRASCI matrix because of the support component in the former. The support component\n\nis vital to this project as this is a social endeavor based on humanitarian ideals; therefore, \n\nteamwork, collaboration, and support are highly emphasized for all stakeholders\n\ninvolved to boost the chances of project success. Please refer to the Responsibility\n\nAssignment Matrix for a detailed description of all project activities and assignments. \n\nSee Annex 13: RASCI Matrix\n\nPage 13 of 25\n\n\n6 PROJECT COMMUNICATIONS MANAGEMENT\n\nCommunication is critical in any project, not only for involving the stakeholders and \n\nincreasing stakeholder engagement but also to avoid potential mistakes caused by\n\nmiscommunication. For this project, we have established the following communicational\n\npillars that played a central role in our communication plan: transparency, to create a\n\nsafe space, clarity, and a safe approach to handling personal information. With these\n\npillars in mind, we have tried to communicate successfully with our target audience and \n\nall involved stakeholders. We have used a tailored approach to communicate with\n\nstakeholders, partners, volunteers, etc. This is accomplished through using different\n\ncommunication tools per group in order to communicate as well as possible. All the \n\nspecific information on which tactics and tools were used per group and a more detailed\n\nexplanation of our communication plan can be found in the following document. \n\nSee Annex 14: Communications Plan\n\n6.1 PROJECT COMMUNICATIONS MANAGEMENT PLAN\n\nIn the communication matrix, we have provided an overview of the outgoing\n\ncommunication stream. The table includes the information we provide, the recipient, the \n\ncommunication method, the frequency but also the person in charge of our project team. \n\nThe table also includes the assumptions and constraints we foresee for the information\n\nprovided.\n\nSee Annex 15: Communication Matrix\n\nSee Annex 22: Communication Pillars\n\nPage 14 of 25\n\n\n7 RISK MANAGEMENT AND REGISTER\n\nA project risk is any foreseen or unknown issue that can potentially have a positive or\n\nnegative impact on the project. The Trecce Project Team successfully worked with the \n\nrelevant stakeholders in identifying all known project risks. Mitigation strategies have\n\nbeen clearly defined in the risk matrix. Likewise, the recommended contingency action\n\nwill be utilized should the risk occur. Contingency plans have been put in place to\n\naddress any future unforeseen risk or residual risks. The importance of this matrix to\n\nproject success cannot be overemphasized, as risks can be quantified and calculated to\n\ndetermine the financial impact they could pose to the project. This tool is vital in tracking\n\nand managing all risks to mitigate, eliminate, or exploit any risk. \n\nSee Annex 16: Risk Register\n\n7.1 ISSUE LOG\n\nThe Issue Log is crucial during project execution to track and document all issues\n\nthat may arise during the course of the project. This matrix is important in detailing and \n\nassigning issues to individuals and setting a due date for the successful resolution of \n\nissues. This

document will help the Trecce Project Team to monitor, assign, and solve\n\nissues before they potentially grow into constraints or risks for the project. \n\nSee Annex 17: Issue Log matrix\n\nPage 15 of 25\n\n\n\n8 STAKEHOLDER ENGAGEMENT\n\nEngagement and dialogue with stakeholders are crucial if a project is to become\n\nsuccessful. Stakeholder engagement is the process of interacting with actors involved in\n\nand impacted by a project. It is particularly important to a project as its completion often\n\ndepends on how stakeholders see the project.\n\nVarious stakeholders are mobilized for this project, from the Coordinator and other\n\nstaff working at the Mensa Giovanni Paolo II who are directly involved in the daily\n\noperations and management of the establishment to the economically challenged\n\npersons who are the recipients of free meals provided by the Mensa\u2019s feeding program. \n\nIn between are the different service providers as well as range of volunteers involved in\n\nthe project, i.e., volunteer chefs and servers, current partners supporting the feeding\n\nprogram (i.e., Comune di Roma and the local church) and new partners providing funds\n\nand other resources mobilized for the project and the project team.\n\nPage 16 of 25\n\n\n8.1 PROJECT TRECCE KEY STAKEHOLDERS\n\nMensa Caritas Diocesana "Giovanni Paolo II" Coordinator and staff. Carlo\n\nVirtu is Mensa's Coordinator. As the key decision maker in Mensa, his leadership and\n\nbuy-in are crucial to successfully rolling out the project. At Mensa, he is responsible for\n\nCoordinating all activities of the Food Kitchen, reporting, and liaison with stakeholders. \n\nHe is ably supported by a team composed of an Assistant Coordinator (Simon\n\nEsuperanzi), an Administrative Officer (Massimo Ceccarelli), and a Cleaning/\n\nOrganization Staff (Brenda Longo). This team, in particular its Coordinator, is contacted\n\nand consulted right from the very start of the project where the Trecce Project concept\n\nwas presented. After listening to and taking into account their inputs, the overall project\n\nidea was revised, and from which the overall work plan and budget were developed. The\n\nteam is obviously very much involved in the pilot project implementation and in\n\nevaluating its effectiveness after completing the pilot phase. It is important that\n\ninteraction with this group is carried out in person, with clear agreements documented in\n\nwriting to avoid any misunderstanding and miscommunication. \n\nComune di Roma and Caritas Roma. As the two organizations supporting the \n\ncurrent feeding program at Mensa, it is important that the Trecce project builds on the \n\nongoing program they currently support. As with the Mensa team, both Comune and\n\nCaritas are contacted and consulted right from the very start of the project, where the \n\nTrecce Project concept was presented. Their inputs and suggestions are integrated into\n\nthe design of the project, and their full support moving forward was solicited. The Project\n\nteam assures the Comune and Caritas that the Trecce Project will build on the current\n\nfeeding program that they are supporting and that any changes to be made are only to\n\nimprove it. Regular and open communication, both verbal and written, takes place\n\nregularly, with meeting agreements documented. \n\nProject beneficiaries. The project is designed with the economically disadvantaged in\nmind, i.e., hundreds of people who rely on free meals provided by Mensa. But free meals\n\ndo not need to be less nutritious. Trecce Project is all about serving nutritious meals\n\nprepared by volunteer chefs/student chefs. Feedback from the beneficiaries will be\n\nsolicited verbally during or right after each meal service. \n\nPage 17 of 25\n\n\nFood transport service provider. Transport provider LogTech SRL is mobilized to\n\nensure timely delivery of food items/ingredients, either donated or purchased. They are\n\nbriefed as regards the project, emphasizing the critical role they play in avoiding delays\n\nand smooth

execution of daily plans. \n\nToo Good To Go, Glovo, and Food for Good. These partners are all engaged in\n\nreducing food waste and in making nutritious food accessible. Trecce project partners\n\nwith them to provide ready meals to the Trecce project in case of insufficient meals\n\nduring project execution. Also, should there be excess food items prepared, they are also\n\nmobilized to deliver to other individuals or other charities in Rome. Terms of\n\ncollaboration with these partners are spelled out in a Partnership Agreement which is\n\ndiscussed and agreed upon with them following the presentation and discussion of the\n\nTrecce Project prior to its kickoff.\n\nPartner chefs, Culinary Schools, and Chef associations. There is no shortage of \n\nfood practitioners in Rome. Foremost of these are various restaurant chefs, culinary\n\nschools, and chef associations in the city. With thousands of members among \n\nprofessional chefs and restaurateurs (in the case of associations) and future chefs and\n\nteachers (in the case of culinary schools), these establishments is a rich pool of volunteer\n\nchefs, teachers, and students whose values and passion are fully aligned with the\n\nphilosophy of the Trecce project, i.e., making nutritious food available while reducing\n\nfood loss and waste. Chef associations are solicited to entice and encourage their member\n\nchefs to volunteer for the program and cook meals for the project beneficiaries. \n\nRestaurant chefs who are not members of any of the associations are also approached to\n\nvolunteer as well. In the case of culinary schools, a special arrangement is explored\n\nwhere the involvement of the culinary students in the project can be counted and\n\nvalidated as part of their community immersion and practices within their own\n\ncurriculum. The Trecce Project will be pitched to these establishments and individuals. \n\nTerms of collaboration are spelled out in a Partnership Agreement that will be discussed\n\nand signed among the parties concerned. \n\nPartner foundations. Foundations are private entities serving public goals. Prospect\n\nresearch was carried out to identify private foundations in Rome whose mission and \n\nobjectives are aligned with the Trecce Project objectives. The various foundations\n\nPage 18 of 25\n\n\n\nidentified as partners for the project operate in Rome, promoting and supporting causes\n\nsuch as community welfare and social inclusion (e.g., ACRI), families and people in\n\neconomic difficulty, migrants and refugees (e.g., Enel Cuore Onlus), health and aid to the \n\nunderprivileged (e.g., Fondazione di Roma), and food security (e.g., Coldiretti). These\n\ninstitutions will be requested, following a pitch for support, to contribute financial\n\nresources to cover the cost of ingredients (should there not be sufficient leftovers from\n\nthe restaurant of volunteer chefs) and project operations (transport, publicity, etc.). \n\nPartner supermarkets. Italy has a law that will make supermarkets donate more of \n\ntheir waste food to charities. The Trecce project will build on this law by soliciting\n\npartner supermarkets (Conad, Coop, Carrefour, Tuodis) to donate unsold perishable\n\nitems (e.g., fruits, vegetables, and other ingredients) that are still suitable for\n\nconsumption through the project. This contributes to minimizing their waste while\n\nimproving their community involvement and enhancing their corporate social\n\nresponsibility. The supermarket branches identified are those within close vicinity of the\n\nMensa in order to minimize transport but also for further visibility of the supermarket as\n\nwell. The Trecce project will be presented to the management of the supermarket\n\nbranches identified. The terms and conditions of their involvement are specified in a\n\nPartnership Agreement that is discussed, agreed upon, and signed by concerned parties.\n\nVolunteer servers. Trecce Project will rely on a set of volunteer servers of different\n\nprofiles building on their high level of social and ecological

awareness and sense of \n\nservice (Profile 1); on their interest to spend available and gain insights from their\n\nexperience while at the same time giving them a sense of worth through this community\n\nengagement work (Profile 2); and on their curiosity to discover and know the other side\n\nof Rome while giving them an opportunity to be part of a community. They will be\n\nrecruited to augment human power needs to help in the preparation and cleaning of the \n\nvenue, keep order during meal service, and accompany/talk with the beneficiaries. As\n\noutlined in the Communication Plan, teasers/flyers with details on how to volunteer are\n\nprepared and posted around Rome. A briefing/orientation session will be organized and \n\nconducted. Volunteer Agreement/Consent that spells out the work that needs to be\n\ncarried out, roles and responsibilities as volunteer servers, as well as service schedules, \n\nare prepared, presented, and discussed with the volunteers. \n\nPage 19 of 25\n\n\n\nVisibility/outreach partners (SDG2Hub, Eataly, Mercato Centrale Roma).\n\nTrecce Project also aspires to inspire other cities to come up with similar initiatives. To\n\nthis end, partners with advocacy groups (e.g., SDG2Hub) will be mobilized for further\n\nvisibility. Likewise, the participation of establishments with high potential for local\n\noutreach for volunteers inc. stall owners/cooks, and individual donors (e.g., Eataly, \n\nMercato Centrale Roma) will be sought to contribute to the project as well in terms of \n\nproviding space to display initiative's poster (if appropriate); providing connections to\n\nsolicit chef volunteers; but also to collect any unused ingredients from the restaurant(s)\n\noperating in their establishment. As with other partners, the involvement of these\n\ninstitutions will be requested, following a pitch for support process. \n\nAcross all stakeholders involved, feedback shall be solicited in various ways (via\n\nsurvey, phone, or in-person conversation) for further improvement as well as to assess\n\npossible follow-up/next steps. Also, issues and disagreements, should they arise, shall be\n\nsettled amicably by the parties concerned. Finally, the contribution of all partners is\n\nacknowledged and recognized through posters displayed during meal service (e.g., \u201cThis\n\nevening\u2019s/week's meal is supported/brought to you by Partner XYZ\u201d). \n\nThe detailed list of these stakeholders, the rationale for their involvement, and their\n\nspecific involvement/participation in the project are presented as Annexes of this\n\ndocument.\n\n8.2 STAKEHOLDER REGISTER, STAKEHOLDER MAP, STAKEHOLDER\n\nENGAGEMENT ASSESSMENT MATRIX AND STAKEHOLDER\n\nENGAGEMENT PLAN\n\nSee Annex 18: STH Register\n\nSee Annex 19: STH Engagement Assess. {"content_type": "text", "parts": ["To complete the personal narrative and petition
for the project management course (MPM5300), I\u201911 structure the content using the
provided course objectives and personal experiences, supported by artifacts you have
uploaded. I\u201911 focus on articulating your experiences in alignment with each of
the four course objectives:\n\n### MPM5300 Objective #1: **Develop a comprehensive
knowledge of Project Management methods, styles, and abilities.**\n\nYour experiences,
especially the **Trecce Capstone Project** you participated in as part of your Project
Management Certification from Rome Business School, directly align with this objective.
The Trecce project demonstrates your familiarity with project management methods, such
as the Work Breakdown Structure (WBS), resource management, and stakeholder engagement,
all of which are essential to successfully managing a project. \n\n- **Artifacts**: \n
- Project Charter\u301020\u2020source\u3011\n - PMP Final
Document\u301022\u2020source\u3011\n\n### MPM5300 Objective #2: **Model the logical
and administrative skills required to evaluate compound project management tasks and
to organize and analyze effective action plans.**\n\nYour role as a **Manager of
Operations and Data Control** at CSX Transportation is a strong example of this
objective. You managed over 1,000 cases monthly, which required meticulous
organization, logical problem-solving, and administrative skills. Furthermore, your
leadership role at **Commercial Fire** managing a rolling portfolio of fire systems
work orders totaling over $500k demonstrated your ability to effectively manage and
analyze complex project tasks.\n\n- **Artifacts**: \n - CSX job description and
service reviews (to be included)\n - Commercial Fire job description and performance
reviews\u301018\u2020source\u3011\n\n### MPM5300 Objective #3: **Distinguish
connections within imperative decision-making methods that could have repercussions
related to procedures, individuals, goods, and revenues.**\n\nIn your role as
**Service Delivery Manager** at Jacksonville Transportation Authority, you made
strategic decisions that impacted not only transit schedules but also community
engagement and team operations\u301015\u2020source\u3011. Your ability to manage on-
time performance rates and oversee the operational success of public transit services
demonstrates your aptitude for making decisions with a wide-reaching impact. \n\n-
```

\*\*Artifacts\*\*:\n - JTA Presentation\u301015\u2020source\u3011\n\n### MPM5300 Objective #4: \*\*Evaluate project management technological tools and determine the specific tools necessary to effectively manage projects.\*\*\n\nThroughout your career, particularly in the \*\*Customer Success Fellowship\*\* and your role as a \*\*Customer Success Manager\*\*, you have used CRM systems to improve user satisfaction and streamline data accuracy\u301018\u2020source\u3011. You leveraged project management tools such as CRM systems and project tracking software to manage and optimize workflows, a key element of this learning objective.\n\n- \*\*Artifacts\*\*:\n - CRM data management overview from Acadly (to be included)\n - Project Management Certification Transcript\u301016\u2020source\u3011\n\n---\n\n### Structure for Artifacts & Camp; Narrative (300-500 words per objective):\n\n### Narrative for MPM5300 Objective #1:\nIn the \*\*Trecce Capstone Project\*\*, I demonstrated my comprehensive knowledge of project management methodologies. As the lead for \*\*quality and cost management\*\*, I was responsible for crafting and monitoring the Work Breakdown Structure (WBS), ensuring each phase of the project was executed efficiently. This experience mirrors the real-world application of project management methods such as Agile methodology and risk management. The successful execution of the project, including risk mitigation and resource allocation, showcases my ability to lead complex projects effectively.\n\n#### Narrative for MPM5300 Objective #2:\nDuring my tenure at \*\*CSX Transportation\*\*, I was responsible for managing over 1,000 operational cases monthly, requiring both logical reasoning and administrative precision. I modeled the ability to evaluate, prioritize, and delegate complex tasks, ensuring timely resolutions. Additionally, at \*\*Commercial Fire\*\*, my work managing a rolling portfolio of fire systems work orders further exemplified my skills in structuring and evaluating detailed project tasks, ensuring alignment with organizational goals. \n\n#### Narrative for MPM5300 Objective #3:\nIn my role as \*\*Service Delivery Manager\*\* at the \*\*Jacksonville Transportation Authority\*\*, I spearheaded initiatives that had profound impacts on community relations and operational efficiencies. My decisions regarding transit schedules, safety measures, and performance evaluations required a deep understanding of how individual actions could affect overall outcomes. This experience strengthened my ability to make decisions that balance immediate needs with long-term procedural impacts. \n\n#### Narrative for MPM5300 Objective #4:\nAt \*\*Acadly\*\*, I managed the CRM system to enhance customer interaction tracking and data accuracy, improving user satisfaction by 20% in just six months. My technical evaluation of CRM tools and their impact on user experience provided invaluable insights into optimizing project workflows. This hands-on experience using digital tools for project management allowed me to determine the best systems for managing ongoing projects effectively. \n\n---\n\nWould you like me to further tailor any section, or should I proceed with integrating these narratives into your submission?"]}, "status": "finished successfully", "end turn": true , "weight": 1.0, "metadata": {"citations": [{"start\_ix": 912, "end\_ix": 923, "citation\_format\_type": "tether\_og", "metadata": {"type": "file", "name": "Project Charter.pdf", "id": "file-7Sb3axta3Ulkq0t9NoJVkUBQ", "source": "my\_files", "text": in Project Management\n\nTrecce Project Charter\n\n1. 25\n\nPage 3 of 25\n\n\n\n1 INTRODUCTION\n\n1.1 PURPOSE OF THE PROJECT MANAGEMENT
PLAN\n\nThe following project management plan was completed for the project titled
\u201cTrecce\u201d. It\n\nwas developed based on acceptance of the related Project
Charter and defines how this\n\nproject will be executed, monitored, controlled, and
closed. This PMP is addressed to all\n\nstakeholders, including the management team,
all sponsors, and the project team. Trecce\n\naims to mobilize chefs and volunteers to
take part in a month-long pilot event at Mensa\n\nGiovanni Paolo II to offer
nutritious meals to the economically disadvantaged while\n\nreducing food waste and
fostering community engagement. The name Trecce, meaning\n\nbraids in Italian, derives
from the intertwined connection the kitchen, chefs, and\n\ncommunity will have during
this project. \n \Phi 4 	ext{ of } 25\n n. 2 	ext{ ASSUMPTIONS AND CONSTRAINTS} n. The Assumption
and Constraints matrix is a very crucial component of the Risk\n\nManagement Plan. It
is very important in forecasting, which is important in building a\n\nproject vision,
and identifying project deliverables. Constraints on the other hand could\n\nserve as
potential risks if not well managed. The matrix can serve as a guide to the \n\nProject
Management Team in identifying all known risks.\n\nPlease refer to the Assumption and
Constraints matrix for a detailed description of all\n\nregistered project assumptions
and constraints. The matrix can be found in the Risk\n\nManagement Plan folder.\n\nSee
Annex 1: Assumption and constraints\n\nPage 5 of 25\n\n\n2 SCOPE MANAGEMENT\n\n2.1
REQUIREMENTS DOCUMENTATION\n\nThe requirements of Trecce include all needs to lead to
a successful food service for\n\nbeneficiaries. These include acquiring the needed
stakeholders, having an adequate\n\nlocation for food preparation and service,
providing schedules to stakeholders, and the \n\nmeans to analyze program
success.\n\n2.2 REQUIREMENTS TRACEABILITY MATRIX\n\nSee Annex 2: Requirements
Traceability Matrix\n\n2.3 WORK BREAKDOWN STRUCTURE\n\nThe Trecce Work Breakdown
Structure (WBS) categorizes all work needed to complete\n\nthe project and represents
100% of the scope. The WBS is broken down into the \n\nfollowing format:\n\n1. Project
Management \ 1.1. Execution \ 1.1. Communication Plan Execution \ 1.1. 2. Project
```

Work Execution\n\n1.1.3. Risk Response Execution\n\n1.2. Monitoring & amp; Controlling\n\n1.2.1. Risk Monitoring\n\n1.2.2. Schedule & mp; Milestone Controlling\n\n1.2.3. Cost monitoring\n\n1.3. Month of Service\n\n4.1. Food Coordination\n\n4.1.1. Donation food delivery\n\n4.1.2. Menu selection\n\n4.1.3. Purchased food delivery\n\n4.2. Volunteer coordination\n\n4.2.1. Kitchen volunteer coordination\n\n4.2.2. Service area volunteer coordination\n\n4.3. Site coordination\n\n4.3.1. Kitchen coordination\n\n4.3.2. Food service area coordination\n\n4.4. Food Service\n\n5. Post Service Month Evaluation\n\n5.1. Feedback\n\n5.1.1. Chef feedback meetings\n\n5.1.2. Volunteer feedback via surveys\n\n5.1.3. Beneficiaries feedback via verbal questions\n\n5.1.4. Partner feedback meetings\n\n5.2. Data Analyzation\n\n5.2.1. KPI analyzation\n\n5.2.2. Feedback analyzation\n\n5.2.3. Feedback report\n\n5.3. Milestone Review Meeting\n\nSee Annex 3: WBS Dictionary\n\nSee Annex 4: ProjectLibre WBS\n\n2.3.1 CHANGE MANAGEMENT PLAN\n\nIf any stakeholder believes a change to the project scope or schedule is necessary, they\n\nPage 7 of 25\n\n\nwill be required to complete the Trecce Change Request Form. Once completed, they will\n\nneed to email this form to the project management team, indicated in the project charter. \n\nAt that time, the project management team will review the request and determine if the \n\nchange is approved or denied, completing any research on the change as needed. If\n\napproved, the project management team will be responsible for informing the affected\n\nstakeholders and updating any related project documents such as the schedule, activity\n\nlist, risk register, responsibility assignment matrix, or any document the PM team deems\n\naffected. If the request is denied, the PM team should respond to the stakeholder who\n\nrequested the change, indicating the reason for the denial.\n\nSee Annex 5: Change Request Form\n\n2.4 PROJECT SCHEDULE MANAGEMENT\n\nThe project schedule has been broken into the following phases: planning, recruitment, a\n\nmonth of service, and a post-service-month evaluation. The timeline for each phase\n\ndiffers due to project work needs, the man hours needed to complete the phase, observed\n\nholidays in Rome, and being mindful of our external stakeholders' schedules. \n\nDuring the planning phase, the main tasks will include procurement of materials, \n\nscheduling for the month of service, and food kitchen logistics. The timeline for this\n\nphase starts three months before the month of service and will last until the end of \n\nSeptember. As chefs and partners will dictate planning details, a lot of the work in this\n\nphase will occur after recruitment.\n\nThe recruitment of partners has already started in September of 2022. As Trecce\n\nrelies on donors to fund the project, it is important to receive around 50% of our\n\ndonation goal before the kickoff meeting on May 2, 2023. Therefore, we felt the

urgency\n\nto start requesting donations as soon as possible. The recruitment of chefs will start at\n\nthe project kickoff and last until June 30, 2023. Holding this recruitment early on allows\n\nfor the most preparation of schedules and planning. Volunteers will start to be recruited\n\nonce marketing materials are launched and can sign up all the way up to the month of\n\nservice.\n\nThe timeline for the month of service includes all activities needed to conduct a\n\ndinner service successfully. Dinner service days include Tuesdays, Wednesdays, and\n\nPage 8 of 25\n\n\nThursdays. The food delivery will take place on Mondays, Tuesdays, and Wednesdays, \n\none day before the meal service, to ensure our chefs have time to properly inspect the\n\ndonated food, determine a menu, and request any food items that need to be bought to\n\ncomplete the meal.\n\nFor the post-service-month evaluation, the goal is to understand whether or not this \n\npilot program has been successful or not. The schedule includes time to hear the \n\nopinions of chefs, partners, volunteers, and beneficiaries to understand the program's\n\npros and cons. Once all data is collected, the project management team will analyze this\n\ndata and compile a report stating their opinion. \n\n2.4.1 ACTIVITY LIST AND ATTRIBUTES\n\nThe Trecce activity list encompasses all activities that must be completed in order for\n\nthe project to be successful. These were developed from the Work Breakdown Structure\n\nand should include 100% of the project work. Included in the activity list are the activity\n\nID, activity Name, WBS ID, predecessor and successor activities, logical relationship\n\nindicators, leads/lags, the imposed deadline, and the location where the activity will take\n\nplace. The project management team is responsible for monitoring the activity list and \n\nmaking any necessary updates during the project lifecycle. \n\nSee Annex 7: Activity List\n\n2.4.2 MILESTONE LIST\n\nMilestone Deadline\n\nGaining committed donors to fund project at 50% 02/05/23\n\nMeeting recruitment requirements for chefs. 30/06/2023\n\nMeeting recruitment requirements for partners 30/06/2023\n\nMeeting recruitment requirements for volunteers 29/09/23\n\nThe first meal service 02/10/2023\n\nThe last meal service 31/10/2023\n\nAll expected feedback is collected for analysis 07/11/2023\n\nCompleting the follow-up phase tasks  $15/11/2023 \ln See Annex 8: Milestones \ln 2.4.3 PROJECT SCHEDULE \ln See Annex 6:$ ProjectLibre Gantt Chart\n\nSee Annex 7: Activity list\n\nPage 9 of 25\n\nhttps://drive.google.com/file/d/1KEQKckZ4wXzWammYTsR6mjKu65fmn an/view?usp=share link\n\nSee Annex 3: WBS Dictionary\n\nSee Annex 21: Day of Service Timeline\n\nPage 10 of 25\n\n\n3 COST MANAGEMENT\n\n3.1 BUDGET & CHEDULE OF EXPENSES\n\nAt the start of planning we assume that 50% of the project funding has been secured. \n\nFundraising activities will continue throughout the project. In addition, as this is a\n\ncharitable endeavor, the project management team has agreed to donate 60% of their\n\nsalary toward the project. The schedule of funding partners with donation amount, along\n\nwith a complete schedule of expenses and contingency funding amounts to be found in\n\nthe annex.\n\nSee Annex 9: Budget and Schedule of expenses\n\nPage 11 of 25\n\n\n4 PROCUREMENT AND QUALITY MANAGEMENT\n\n4.1 PROCUREMENT AND QUALITY MANAGEMENT PLAN OVERVIEW\n\nThe Trecce Procurement Management Plan aims to define the project\u2019s procurement and\n\nquality management process. The plan will set out the procurement and quality\n\nmanagement guidelines, define the risks associated with the procurement and quality\n\nmanagement strategy, and suggest the strategy for mitigating those risks. Specifically, \n\nthe Procurement Management Plan will define the following:\n\n\u25cf Project procurement partners and donating partners\n\n\u25cf Quality and procurement work breakdown structures (WBSs)\n\n\u25cf Establishing partner deliverables and deadlines\n\n\u25cf Which items are to be

procured via direct purchase, pricing, and timelines\n\n\u25cf Determining material costs \n\n\u25cf Risks associated with procurement management\n\n\u25cf How procurement risks will be mitigated\n\n\u25cf How procurement is coordinated with project scope, budget, and schedule \n\n\u25cf Inventory and Quality Assessment Log Template\n\n\u25cf Quality management criteria\n\n\u25cf Specify all constraints pertaining to procurement\n\n\u25cf Performance metrics for procurement activities\n\nPlease refer to Annex 10 for the complete Trecce Procurement and Quality Management\n\nPlan.\n\nSee Annex 10: Trecce - Procurement and Quality Management Plan\n\nSee Annex 11: Inventory and Quality Assessment Log\n\nPage 12 of 25\n\n\n5 PROJECT RESOURCE MANAGEMENT\n\nThe Resource Management Plan defines the approach to identify, acquire, and manage\n\nthe human and physical resources needed for the Trecce project. Resources are key\n\ncomponents of any project. Therefore, successfully identifying all the required human\n\nand material resources required for this endeavor is fundamental. The Resource\n\nManagement Plan also encompasses the Team Charter, a key document that outlines\n\nteam members' roles and responsibilities, team values, agreements, and operating\n\nguidelines. Please refer to the Resource Management Plan for a detailed description of all\n\nresources identified, how they will be managed and utilized for project success, and all\n\nnecessary information on the Team Charter.\n\nSee Annex 12: Project Resource Management Plan\n\n5.1 RESPONSIBILITY ASSIGNMENT MATRIX\n\nThe Responsibility Assignment Matrix is a key component of the Resource Management\n\nPlan, which is required to inform all project team members on the assignment of project\n\ntasks/activities. This matrix details each project work activity, clearly indicating the \n\nhuman resource responsible of performing specific project activity/s, who is accountable\n\nfor its success or failure, who is to be consulted before the activity is conducted, and who\n\nis to be informed. The Trecce Project Team chose the RASCI matrix as opposed to the \n\nRASCI matrix because of the support component in the former. The support component\n\nis vital to this project as this is a social endeavor based on humanitarian ideals; therefore, \n\nteamwork, collaboration, and support are highly emphasized for all stakeholders\n\ninvolved to boost the chances of project success. Please refer to the Responsibility\n\nAssignment Matrix for a detailed description of all project activities and assignments.\n\nSee Annex 13: RASCI Matrix\n\nPage 13 of 25\n\n\n6 PROJECT COMMUNICATIONS MANAGEMENT\n\nCommunication is critical in any project, not only for involving the stakeholders and \n\nincreasing stakeholder engagement but also to avoid potential mistakes caused by\n\nmiscommunication. For this project, we have established the following communicational\n\npillars that played a central role in our communication plan: transparency, to create a\n\nsafe space, clarity, and a safe approach to handling personal information. With these\n\npillars in mind, we have tried to communicate successfully with our target audience and \n\nall involved stakeholders. We have used a tailored approach to communicate with \n\nstakeholders, partners, volunteers, etc. This is accomplished through using different\n\ncommunication tools per group in order to communicate as well as possible. All the \n\nspecific information on which tactics and tools were used per group and a more detailed\n\nexplanation of our communication plan can be found in the following document. \n\nSee Annex 14: Communications Plan\n\n6.1 PROJECT COMMUNICATIONS MANAGEMENT PLAN\n\nIn the communication matrix, we have provided an overview of the outgoing\n\ncommunication stream. The table includes the information we provide, the recipient, the \n\ncommunication method, the frequency but also the person in charge of our project team. \n\nThe table also includes the

assumptions and constraints we foresee for the information\n\nprovided.\n\nSee Annex 15: Communication Matrix\n\nSee Annex 22: Communication Pillars\n\nPage 14 of 25\n\n\n7 RISK MANAGEMENT AND REGISTER\n\nA project risk is any foreseen or unknown issue that can potentially have a positive or\n\nnegative impact on the project. The Trecce Project Team successfully worked with the \n\nrelevant stakeholders in identifying all known project risks. Mitigation strategies have\n\nbeen clearly defined in the risk matrix. Likewise, the recommended contingency action\n\nwill be utilized should the risk occur. Contingency plans have been put in place to\n\naddress any future unforeseen risk or residual risks. The importance of this matrix to\n\nproject success cannot be overemphasized, as risks can be quantified and calculated to\n\ndetermine the financial impact they could pose to the project. This tool is vital in tracking\n\nand managing all risks to mitigate, eliminate, or exploit any risk.\n\nSee Annex 16: Risk Register\n\n7.1 ISSUE LOG\n\nThe Issue Log is crucial during project execution to track and document all issues\n\nthat may arise during the course of the project. This matrix is important in detailing and \n\nassigning issues to individuals and setting a due date for the successful resolution of \n\nissues. This document will help the Trecce Project Team to monitor, assign, and solve\n\nissues before they potentially grow into constraints or risks for the project.\n\nSee Annex 17: Issue Log matrix\n\nPage 15 of 25\n\n\n\n8 STAKEHOLDER ENGAGEMENT\n\nEngagement and dialogue with stakeholders are crucial if a project is to become\n\nsuccessful. Stakeholder engagement is the process of interacting with actors involved in\n\nand impacted by a project. It is particularly important to a project as its completion often\n\ndepends on how stakeholders see the project.\n\nVarious stakeholders are mobilized for this project, from the Coordinator and other\n\nstaff working at the Mensa Giovanni Paolo II who are directly involved in the daily\n\noperations and management of the establishment to the economically challenged\n\npersons who are the recipients of free meals provided by the Mensa\u2019s feeding program. \n\nIn between are the different service providers as well as range of volunteers involved in\n\nthe project, i.e., volunteer chefs and servers, current partners supporting the feeding\n\nprogram (i.e., Comune di Roma and the local church) and new partners providing funds\n\nand other resources mobilized for the project and the project team.\n\nPage 16 of 25\n\n\n\n8.1 PROJECT TRECCE KEY STAKEHOLDERS\n\nMensa Caritas Diocesana " Giovanni Paolo II" Coordinator and staff. Carlo\n\nVirtu is Mensa's Coordinator. As the key decision maker in Mensa, his leadership and\n\nbuy-in are crucial to successfully rolling out the project. At Mensa, he is responsible for\n\nCoordinating all activities of the Food Kitchen, reporting, and liaison with stakeholders. \n\nHe is ably supported by a team composed of an Assistant Coordinator (Simon\n\nEsuperanzi), an Administrative Officer (Massimo Ceccarelli), and a Cleaning/\n\nOrganization Staff (Brenda Longo). This team, in particular its Coordinator, is contacted \n\nand consulted right from the very start of the project where the Trecce Project concept\n\nwas presented. After listening to and taking into account their inputs, the overall project\n\nidea was revised, and from which the overall work plan and budget were developed. The\n\nteam is obviously very much involved in the pilot project implementation and in\n\nevaluating its effectiveness after completing the pilot phase. It is important that\n\ninteraction with this group is carried out in person, with clear agreements documented in\n\nwriting to avoid any misunderstanding and miscommunication. \n\nComune di Roma and Caritas Roma. As the two organizations supporting the \n\ncurrent feeding program at Mensa, it is important that the Trecce project builds on the \n\nongoing program they currently support. As with

the Mensa team, both Comune and \n\nCaritas are contacted and consulted right from the very start of the project, where the \n\nTrecce Project concept was presented. Their inputs and suggestions are integrated into\n\nthe design of the project, and their full support moving forward was solicited. The Project\n\nteam assures the Comune and Caritas that the Trecce Project will build on the current\n\nfeeding program that they are supporting and that any changes to be made are only to\n\nimprove it. Regular and open communication, both verbal and written, takes place\n\nregularly, with meeting agreements documented.\n\nProject beneficiaries. The project is designed with the economically disadvantaged in\nmind, i.e., hundreds of people who rely on free meals provided by Mensa. But free meals\n\ndo not need to be less nutritious. Trecce Project is all about serving nutritious meals\n\nprepared by volunteer chefs/student chefs. Feedback from the beneficiaries will be\n\nsolicited verbally during or right after each meal service. \n\nPage 17 of 25\n\n\nFood transport service provider. Transport provider LogTech SRL is mobilized to\n\nensure timely delivery of food items/ingredients, either donated or purchased. They are\n\nbriefed as regards the project, emphasizing the critical role they play in avoiding delays\n\nand smooth execution of daily plans. \n\nToo Good To Go, Glovo, and Food for Good. These partners are all engaged in\n\nreducing food waste and in making nutritious food accessible. Trecce project partners\n\nwith them to provide ready meals to the Trecce project in case of insufficient meals\n\nduring project execution. Also, should there be excess food items prepared, they are also\n\nmobilized to deliver to other individuals or other charities in Rome. Terms of\n\ncollaboration with these partners are spelled out in a Partnership Agreement which is\n\ndiscussed and agreed upon with them following the presentation and discussion of the \n\nTrecce Project prior to its kickoff.\n\nPartner chefs, Culinary Schools, and Chef associations. There is no shortage of\n\nfood practitioners in Rome. Foremost of these are various restaurant chefs, culinary\n\nschools, and chef associations in the city. With thousands of members among\n\nprofessional chefs and restaurateurs (in the case of associations) and future chefs and \n\nteachers (in the case of culinary schools), these establishments is a rich pool of volunteer\n\nchefs, teachers, and students whose values and passion are fully aligned with the\n\nphilosophy of the Trecce project, i.e., making nutritious food available while reducing\n\nfood loss and waste. Chef associations are solicited to entice and encourage their member\n\nchefs to volunteer for the program and cook meals for the project beneficiaries. \n\nRestaurant chefs who are not members of any of the associations are also approached to\n\nvolunteer as well. In the case of culinary schools, a special arrangement is explored\n\nwhere the involvement of the culinary students in the project can be counted and\n\nvalidated as part of their community immersion and practices within their own\n\ncurriculum. The Trecce Project will be pitched to these establishments and individuals. \n\nTerms of collaboration are spelled out in a Partnership Agreement that will be discussed\n\nand signed among the parties concerned. \n\nPartner foundations. Foundations are private entities serving public goals. Prospect\n\nresearch was carried out to identify private foundations in Rome whose mission and \n\nobjectives are aligned with the Trecce Project objectives. The various foundations\n\nPage 18 of 25\n\n\nidentified as partners for the project operate in Rome, promoting and supporting causes\n\nsuch as community welfare and social inclusion (e.g., ACRI), families and people in\n\neconomic difficulty, migrants and refugees (e.g., Enel Cuore Onlus), health and aid to the \n\nunderprivileged (e.g., Fondazione di Roma), and food security (e.g., Coldiretti). These\n\ninstitutions will be requested, following a pitch for support,

to contribute financial\n\nresources to cover the cost of ingredients (should there not be sufficient leftovers from\n\nthe restaurant of volunteer chefs) and project operations (transport, publicity, etc.). \n\nPartner supermarkets. Italy has a law that will make supermarkets donate more of\n\ntheir waste food to charities. The Trecce project will build on this law by soliciting\n\npartner supermarkets (Conad, Coop, Carrefour, Tuodis) to donate unsold perishable\n\nitems (e.g., fruits, vegetables, and other ingredients) that are still suitable for\n\nconsumption through the project. This contributes to minimizing their waste while\n\nimproving their community involvement and enhancing their corporate social\n\nresponsibility. The supermarket branches identified are those within close vicinity of the \n\nMensa in order to minimize transport but also for further visibility of the supermarket as\n\nwell. The Trecce project will be presented to the management of the supermarket\n\nbranches identified. The terms and conditions of their involvement are specified in a\n\nPartnership Agreement that is discussed, agreed upon, and signed by concerned parties. \n\nVolunteer servers. Trecce Project will rely on a set of volunteer servers of different\n\nprofiles building on their high level of social and ecological awareness and sense of \n\nservice (Profile 1); on their interest to spend available and gain insights from their\n\nexperience while at the same time giving them a sense of worth through this community\n\nengagement work (Profile 2); and on their curiosity to discover and know the other side\n\nof Rome while giving them an opportunity to be part of a community. They will be\n\nrecruited to augment human power needs to help in the preparation and cleaning of the \n\nvenue, keep order during meal service, and accompany/talk with the beneficiaries. As\n\noutlined in the Communication Plan, teasers/flyers with details on how to volunteer are\n\nprepared and posted around Rome. A briefing/orientation session will be organized and\n\nconducted. Volunteer Agreement/Consent that spells out the work that needs to be\n\ncarried out, roles and responsibilities as volunteer servers, as well as service schedules, \n\nare prepared, presented, and discussed with the volunteers. \n\nPage 19 of 25\n\n\nVisibility/outreach partners (SDG2Hub, Eataly, Mercato Centrale Roma).\n\nTrecce Project also aspires to inspire other cities to come up with similar initiatives. To\n\nthis end, partners with advocacy groups (e.g., SDG2Hub) will be mobilized for further\n\nvisibility. Likewise, the participation of establishments with high potential for local\n\noutreach for volunteers inc. stall owners/cooks, and individual donors (e.g., Eataly, \n\nMercato Centrale Roma) will be sought to contribute to the project as well in terms of \n\nproviding space to display initiative's poster (if appropriate); providing connections to\n\nsolicit chef volunteers; but also to collect any unused ingredients from the restaurant(s) $\n\$ noperating in their establishment. As with other partners, the involvement of these\n\ninstitutions will be requested, following a pitch for support process. \n\nAcross all stakeholders involved, feedback shall be solicited in various ways (via\n\nsurvey, phone, or in-person conversation) for further improvement as well as to assess\n\npossible follow-up/next steps. Also, issues and disagreements, should they arise, shall be\n\nsettled amicably by the parties concerned. Finally, the contribution of all partners is\n\nacknowledged and recognized through posters displayed during meal service (e.g., \u201cThis\n\nevening\u2019s/week's meal is supported/brought to you by Partner XYZ\u201d).\n\nThe detailed list of these stakeholders, the rationale for their involvement, and their\n\nspecific involvement/participation in the project are presented as Annexes of this\n\ndocument.\n\n8.2 STAKEHOLDER REGISTER, STAKEHOLDER MAP,

versatile and adaptable business leader originally from New York City, I have built my
career\n\nacross various industries, developing a keen ability to navigate complex
environments. With a\n\nBachelor's degree in Business Administration and a
Master's in Organizational Leadership\n\n(expected 2024), my career has been
marked by a passion for continuous learning, a strong\n\nfoundation in project
management, and a commitment to customer success. From improving\n\noperational
efficiencies to fostering strong client relationships, my work is driven by data-
driven\n\nanalytical thinking and a dedication to helping others achieve their
goals. \\ \n\
Process Improvement\n\n- Relationship Building\n\n- Full-Stack Software
Development\n\nProfessional Experience\n\nCustomer Success Manager (2022 to 2023, San
Francisco, CA)\n\n- Increased user satisfaction by 20 percent within six months
through strategic organization and \n\nanalysis of user interaction data. \n\n-
Generated a 15 percent surge in qualified sales leads over a quarter by implementing a
dynamic\n\noutreach strategy.\n\n- Enhanced data accuracy by 30 percent through
meticulous consolidation of interaction data in the \n\nCRM system. \n\n- Aligned these
initiatives with MPM5300 Objective 4 by leveraging CRM tools to effectively
manage\n\ncustomer projects and interactions, evaluating their impact on overall
project success. \n\n\nPremier Affiliate Service Coordinator (2022, Jacksonville,
FL)\n\n- Achieved an 86 percent on-time completion rate for fire systems' annual
and quarterly inspections. \n\n- Successfully managed a rolling portfolio of fire
systems work orders totaling over 500,000 dollars.\n\n- Enhanced administrative skills
required to evaluate and organize complex project management\n\ntasks, reflecting
MPM5300 Objective 2 by modeling logical and administrative skills crucial
for\n\neffective project management.\n\nSoftware Development Associate (2019, Tampa,
FL)\n\n- Developed and debugged full-stack software applications, contributing to a 15
percent increase in\n\noverall system performance.\n\n- Created a web-based expense
reimbursement system, reducing processing time by 25 percent. \n\n- These experiences
aligned with MPM5300 Objective 4 by evaluating and implementing\n\ntechnological tools
that optimized project outcomes and streamlined processes. \n\nService Delivery Manager
```

```
(2019, Jacksonville, FL)\n\n- Achieved a 99.5 percent on-time performance rate by
applying advanced project management\n\ntechniques.\n\n- Led community engagement
initiatives, resulting in a 10 percent increase in positive public\n\nrelations
sentiment. \n\ This role demonstrated mastery of MPM5300 Objectives 1 and 3 by
applying comprehensive\n\nproject management methods and making decisions that had a
significant impact on operational\n\noutcomes.\n\nManager of Operations and Data
Control (2014 to 2017, Jacksonville, FL)\n\n- Improved process documentation and
reporting of mechanical incidents, leading to a 15 percent\n\nreduction in incident
rates. \n\n- Provided operations support and guidance to field employees, achieving a
99.5 percent on-time\n\nrepair completion rate.\n\n\n- Strengthened logical and
administrative skills in managing complex projects, aligning with\n\nMPM5300 Objective
2 by enhancing the ability to evaluate and manage detailed project tasks. \n\nPrior
Learning\n\nThroughout my professional journey, I have developed a comprehensive
understanding of project\n\nmanagement methods, honed my logical and administrative
skills, and gained insights into the \n\nconnections between decision-making processes
and their impacts. My experiences align with the\n\nMPM5300 objectives, demonstrating
my ability to evaluate and implement project management\n\ntechnological tools,
develop effective action plans, and lead complex initiatives. \n\nEducation\n- M.A.
Organizational Leadership, Expected completion September 2024\n\n- B.S. Business
Administration, Metropolitan State University, 2012\n\n- Customer Success Fellowship,
SV Academy, 2022\n\nCertifications\n\n- TEFL Certification, The Language House, Prague

STAKEHOLDERS\n\nEngagement and dialogue with stakeholders are crucial if a
project\n\nis to become successful. Stakeholder engagement is the process
of\n\ninteracting with actors involved in and impacted by a project. It
is\n\nparticularly important to a project as its completion often depends\n\non how
stakeholders see the project. \n\nVarious stakeholders are mobilized for this project,
from the \n\nCoordinator and other staff working at the Mensa Giovanni Paolo\n\nII who
are directly involved in the daily operations and \n\nmanagement of the establishment
to the economically challenged\n\npersons who are the recipients of free meals
provided by the \n\nMensa\u2019s feeding programme. In between are the different
service\n\nproviders as well as range of volunteers involved in the
project, \n\n1\n\n\nMaster in Project Management\n\nTrecce Project Charter\n\ni.e.,
volunteer chefs and servers, current partners supporting the \n\nfeeding programme
(i.e., Comune di Roma and the local church)\n\nand new partners providing funds and
```

```
other resources mobilized\n\nfor the project and the project team.\n\nDetails on the
engagement of stakeholders in the project (list, \n\nrationale for their involvement,
the different \u201casks\u201d, and strategy\n\nfor their involvement/participation
are outlined in the Project\n\nManagement Plan and related Annexes.\n\n4. PROJECT
SCOPE\n\nPurpose of the\n\nproject\n\nTrecce Project aims to mobilize chefs and
volunteers to participate\n\nin a month-long pilot event at Mensa Giovanni Paolo II in
order to\n\nprepare and serve nutritious meals to the economically\n\ndisadvantaged
while reducing food waste and fostering community\n\nengagement.\n\nProject objectives
\u25cf Complete 13 days of dinner service\n\n\u25cf Reduce food waste and sustainably
source all materials\n\n\u25cf Create a model for continued dinner service at the
food\n\nkitchen\n\n\u25cf Foster community engagement\n\nHigh
level\n\nrequirements\n\nRequirements needed to implement the project include (1)
human\n\nresources (able project team, cooperation of the Mensa Giovanni\n\nPaolo II
management and staff, volunteer chefs, student chefs, \n\nservers, partner foundations
and establishments); (2) left-over\n\nfood supplies and ingredients coming from
supermarkets; (3)\n\nfunding to purchase any ingredients and other
materials/supplies\n\nneeded for the food service; (4) functional/equipped and
clean\n\nkitchen where food can be prepared and (5) space available where\n\nfood can
be served. \n\nMain\n\ndeliverables\n\nFrom Project Management perspective\n\n\u25cf

CYCLE\n\nProject\n\nmanagement\n\napproach\n\nPredictive\n\nProject Phases The project
phases included are: planning, recruitment, a month\n\nof service, and follow
up.\n\nPlanning will require creating schedules, procurement, organizing\n\nthe food
kitchen logistics, and determining KPIs for the month of\n\nservice.\n\nDuring
recruitment, team members will need to gain\n\ncommitments from chefs, volunteers, and
partners, which include\n\nvendors for food along with donors. The month of service is
when \n \n we implement our goal of serving nutritious meals to beneficiaries \n \n and the
following month, analyze our KPIs and data to determine\n\nthe pilot program\u2019s
success. \n\nMajor milestones \u25cf Gaining committed donors to fund project at
50%\n\nDeadline of 02/05/23.\n\n\u25cf Meeting all recruitment
requirements\n\nDeadline of 30/6/23 for chefs and partners\n\nDeadline of 29/9/23 for
volunteers\n\n\u25cf First meal of service on 02/10/23\n\n\u25cf Last meal of service
on 31/10/23\n\n\u25cf All expected feedback is collected for analysis\n\nDeadline
07/11/23\ln\ln u25cf Completing the follow up phase tasks\ln u25cf Completing the follow up phase tasks \ln u25cf Completing tas

impact)\n\n\u25cf Lack of volunteer chefs (High impact)\n\n\u25cf Food donation
failure (Medium impact)\n\n\u25cf Conflict/fights among beneficiaries or team members
(Low\n\nimpact)\n\u25cf Embezzlement of project funds (Rare/Negligible
impact) \n\n\u25cf Littering (Low impact) \n\nu25cf Food poisoning and allergies (High
impact)\n\n7. ASSUMPTIONS AND CONSTRAINTS\n\nAssumptions \u25cf Sponsor supermarkets
will donate food items to project\n\n\u25cf Chefs will be available to participate in
the project\n\n\u25cf Project will attract funding\n\n\u25cf Project funds will be
utilized for the intended purpose\n\ Meals will be nutritious and healthy for
beneficiaries\n\n3\n\n\nMaster in Project Management\n\nTrecce Project
Charter\n\n\u25cf Financial sponsors will remit agreed upon funds should
need\n\narise\n\n\u25cf Groceries and cooking materials will be readily
available\n\nConstraints \u25cf Unavailability of chefs\n\n\u25cf Donation failure
from Partner Supermarkets\n\n\u25cf Lack of funding for project\n\n\u25cf No attention
and smooth resolution to conflict\n\n\u25cf Poor quality meals/food poisoning and
allergy attacks\n\n\u25cf Embezzlement of project funds\n\n8. APPROVED FINANCIAL
RESOURCES\n\nProject budget\n\n9. PROJECT APPROVAL REQUIREMENTS\n\nProject
approval\n\nrequirements\n\nAchieving the following represents project success.
Project\n\noutcome is collectively tracked and monitored by the Project
team:\n\n\u25cf Amount mobilized: 36,000 EUR\n\n\u25cf Number of volunteers (Servers)
recruited: At least 46\n\n\u25cf Number of Chefs engaged: At least 7\n\n\u25cf First
meal service: 2-oct.-23\n\n\u25cf Last meal service: 31-oct.-23\n\n\u25cf Number of
Meals served per evening meal service: 200\n\n\u25cf Timely delivery of meals to
beneficiaries: Delay of no more\n\nthan 10 minutes\n\n\u25cf Follow-up phase completed:
15-nov.-23\n\n', "cloud doc url": null}, {"matched text":

PLAN\n\nThe following project management plan was completed for the project titled
\u201cTrecce\u201d. It\n\nwas developed based on acceptance of the related Project
Charter and defines how this\n\nproject will be executed, monitored, controlled, and
closed. This PMP is addressed to all\n\nstakeholders, including the management team,
```

MAJOR KNOWN RISKS\n\nRisk\n\ndescription\n\n\u25cf Lack of funding for project (Medium

all sponsors, and the project team. Trecce\n\naims to mobilize chefs and volunteers to take part in a month-long pilot event at Mensa\n\nGiovanni Paolo II to offer nutritious meals to the economically disadvantaged while \n\nreducing food waste and fostering community engagement. The name Trecce, meaning\n\nbraids in Italian, derives from the intertwined connection the kitchen, chefs, and\n\ncommunity will have during this project.  $\n \Phi 4$  of  $25\n n n. 2$  ASSUMPTIONS AND CONSTRAINTS  $\n \Phi 4$  Assumption and Constraints matrix is a very crucial component of the Risk\n\nManagement Plan. It is very important in forecasting, which is important in building a\n\nproject vision, and identifying project deliverables. Constraints on the other hand could\n\nserve as potential risks if not well managed. The matrix can serve as a guide to the \n\nProject Management Team in identifying all known risks.\n\nPlease refer to the Assumption and Constraints matrix for a detailed description of all\n\nregistered project assumptions and constraints. The matrix can be found in the Risk\n\nManagement Plan folder.\n\nSee Annex 1: Assumption and constraints\n\nPage 5 of 25\n\n\n2 SCOPE MANAGEMENT\n\n2.1 REQUIREMENTS DOCUMENTATION\n\nThe requirements of Trecce include all needs to lead to a successful food service for\n\nbeneficiaries. These include acquiring the needed stakeholders, having an adequate\n\nlocation for food preparation and service, providing schedules to stakeholders, and the \n\nmeans to analyze program success.\n\n2.2 REQUIREMENTS TRACEABILITY MATRIX\n\nSee Annex 2: Requirements Traceability Matrix\n\n2.3 WORK BREAKDOWN STRUCTURE\n\nThe Trecce Work Breakdown Structure (WBS) categorizes all work needed to complete\n\nthe project and represents 100% of the scope. The WBS is broken down into the \n\nfollowing format:\n\n1. Project  $Management \ 1.1. Execution \ 1.1. Communication Plan Execution \ 1.1. 2. Project$ Work Execution\n\n1.1.3. Risk Response Execution\n\n1.2. Monitoring & Description and the control of the contro Controlling\n\n1.2.1. Risk Monitoring\n\n1.2.2. Schedule & mp; Milestone Controlling\n\n1.2.3. Month of Service\n\n4.1. Food Coordination\n\n4.1.1. Donation food delivery\n\n4.1.2. Menu selection\n\n4.1.3. Purchased food delivery\n\n4.2. Volunteer coordination\n\n4.2.1. Kitchen volunteer coordination\n\n4.2.2. Service area volunteer coordination\n\n4.3. Site coordination\n\n4.3.1. Kitchen coordination\n\n4.3.2. Food service area coordination\n\n4.4. Food Service\n\n5. Post Service Month Evaluation\n\n5.1.  $Feedback \verb|\n\n5.1.1|. Chef feedback meetings \verb|\n\n5.1.2|. Volunteer feedback via | \\$ surveys\n\n5.1.3. Beneficiaries feedback via verbal questions\n\n5.1.4. Partner feedback meetings\n\n5.2. Data Analyzation\n\n5.2.1. KPI analyzation\n\n5.2.2. Feedback analyzation\n\n5.2.3. Feedback report\n\n5.3. Milestone Review Meeting\n\nSee Annex 3: WBS Dictionary\n\nSee Annex 4: ProjectLibre WBS\n\n2.3.1 CHANGE MANAGEMENT PLAN\n\nIf any stakeholder believes a change to the project scope or schedule is

necessary, they\n\nPage 7 of 25\n\n\nwill be required to complete the Trecce Change Request Form. Once completed, they will\n\nneed to email this form to the project management team, indicated in the project charter. \n\nAt that time, the project management team will review the request and determine if the\n\nchange is approved or denied, completing any research on the change as needed. If\n\napproved, the project management team will be responsible for informing the affected\n\nstakeholders and updating any related project documents such as the schedule, activity\n\nlist, risk register, responsibility assignment matrix, or any document the PM team deems\n\naffected. If the request is denied, the PM team should respond to the stakeholder who\n\nrequested the change, indicating the reason for the denial.\n\nSee Annex 5: Change Request Form\n\n2.4 PROJECT SCHEDULE MANAGEMENT\n\nThe project schedule has been broken into the following phases: planning, recruitment, a\n\nmonth of service, and a post-service-month evaluation. The timeline for each phase\n\ndiffers due to project work needs, the man hours needed to complete the phase, observed\n\nholidays in Rome, and being mindful of our external stakeholders' schedules. \n\nDuring the planning phase, the main tasks will include procurement of materials, \n\nscheduling for the month of service, and food kitchen logistics. The timeline for this\n\nphase starts three months before the month of service and will last until the end of\n\nSeptember. As chefs and partners will dictate planning details, a lot of the work in this\n\nphase will occur after recruitment.\n\nThe recruitment of partners has already started in September of 2022. As Trecce\n\nrelies on donors to fund the project, it is important to receive around 50% of our\n\ndonation goal before the kickoff meeting on May 2, 2023. Therefore, we felt the urgency\n\nto start requesting donations as soon as possible. The recruitment of chefs will start at\n\nthe project kickoff and last until June 30, 2023. Holding this recruitment early on allows\n\nfor the most preparation of schedules and planning. Volunteers will start to be recruited\n\nonce marketing materials are launched and can sign up all the way up to the month of\n\nservice.\n\nThe timeline for the month of service includes all activities needed to conduct a\n\ndinner service successfully. Dinner service days include Tuesdays, Wednesdays, and\n\nPage 8 of 25\n\n\nThursdays. The food delivery will take place on Mondays, Tuesdays, and Wednesdays, \n\none day before the meal service, to ensure our chefs have time to properly inspect the\n\ndonated food, determine a menu, and request any food items that need to be bought to\n\ncomplete the meal.\n\nFor the post-service-month evaluation, the goal is to understand whether or not this \n\npilot program has been successful or not. The schedule includes time to hear the\n\nopinions of chefs, partners, volunteers, and beneficiaries to understand the program's\n\npros and cons. Once all data is collected, the project management team will analyze this\n\ndata and compile a report stating their opinion. \n\n2.4.1 ACTIVITY LIST AND ATTRIBUTES\n\nThe Trecce activity list encompasses all activities that must be completed in order for\n\nthe project to be successful. These were developed from the Work Breakdown Structure\n\nand should include 100% of the project work. Included in the activity list are the activity\n\nID, activity Name, WBS ID, predecessor and successor activities, logical relationship\n\nindicators, leads/lags, the imposed deadline, and the location where the activity will take\n\nplace. The project management team is responsible for monitoring the activity list and\n\nmaking any necessary updates during the project lifecycle. \n\nSee Annex 7: Activity List\n\n2.4.2 MILESTONE LIST\n\nMilestone Deadline\n\nGaining committed donors to fund project at 50% 02/05/23\n\nMeeting recruitment requirements for chefs. 30/06/2023\n\nMeeting recruitment requirements for

partners 30/06/2023\n\nMeeting recruitment requirements for volunteers 29/09/23\n\nThe first meal service 02/10/2023\n\nThe last meal service 31/10/2023\n\nAll expected feedback is collected for analysis 07/11/2023\n\nCompleting the follow-up phase tasks 15/11/2023\n\nSee Annex 8: Milestones\n\n2.4.3 PROJECT SCHEDULE\n\nSee Annex 6: ProjectLibre Gantt Chart\n\nSee Annex 7: Activity list\n\nPage 9 of 25\n\nhttps://drive.google.com/file/d/1KEQKckZ4wXzWammYTsR6mjKu65fmn\_an/view?usp=share \_link\n\nSee Annex 3: WBS Dictionary\n\nSee Annex 21: Day of Service Timeline\n\nPage 10 of 25\n\n\n3 COST MANAGEMENT\n\n3.1 BUDGET & CHEDULE OF EXPENSES\n\nAt the start of planning we assume that 50% of the project funding has been secured. \n\nFundraising activities will continue throughout the project. In addition, as this is a\n\ncharitable endeavor, the project management team has agreed to donate 60% of their\n\nsalary toward the project. The schedule of funding partners with donation amount, along\n\nwith a complete schedule of expenses and contingency funding amounts to be found in\n\nthe annex.\n\nSee Annex 9: Budget and Schedule of expenses  $\n = 11 \text{ of } 25 \n \n \n \AND QUALITY MANAGEMENT \n \1.1$ PROCUREMENT AND QUALITY MANAGEMENT PLAN OVERVIEW\n\nThe Trecce Procurement Management Plan aims to define the project\u2019s procurement and\n\nquality management process. The plan will set out the procurement and quality\n\nmanagement guidelines, define the risks associated with the procurement and quality\n\nmanagement strategy, and suggest the strategy for mitigating those risks. Specifically, \n\nthe Procurement Management Plan will define the following:\n\n\u25cf Project procurement partners and donating partners\n\n\u25cf Quality and procurement work breakdown structures (WBSs)\n\n\u25cf Establishing partner deliverables and deadlines\n\n\u25cf Which items are to be procured via direct purchase, pricing, and timelines\n\n\u25cf Determining material costs \n\n\u25cf Risks associated with procurement management\n\n\u25cf How procurement risks will be mitigated\n\n\u25cf How procurement is coordinated with project scope, budget, and schedule \n\n\u25cf Inventory and Quality Assessment Log Template\n\n\u25cf Quality management criteria\n\n\u25cf Specify all constraints pertaining to procurement\n\n\u25cf Performance metrics for procurement activities\n\nPlease refer to Annex 10 for the complete Trecce Procurement and Quality Management\n\nP1an.\n\nSee Annex 10: Trecce - Procurement and Quality Management Plan\n\nSee Annex 11: Inventory and Quality Assessment Log\n\nPage 12 of 25\n\n\n5 PROJECT RESOURCE MANAGEMENT\n\nThe Resource Management Plan defines the approach to identify, acquire, and manage\n\nthe human and physical resources needed for the Trecce project. Resources are key\n\ncomponents of any project. Therefore, successfully identifying all the required human\n\nand material resources required for this endeavor is fundamental. The Resource\n\nManagement Plan also encompasses the Team Charter, a key document that outlines\n\nteam members' roles and responsibilities, team values, agreements, and operating\n\nguidelines. Please refer to the Resource Management Plan for a detailed description of all\n\nresources identified, how they will be managed and utilized for project success, and all\n\nnecessary information on the Team Charter.\n\nSee Annex 12: Project Resource Management Plan\n\n5.1 RESPONSIBILITY ASSIGNMENT MATRIX\n\nThe Responsibility Assignment Matrix is a key component of the Resource Management\n\nPlan, which is required to inform all project team members on the assignment of project\n\ntasks/activities. This matrix details each project work activity, clearly indicating the \n\nhuman resource responsible of performing specific project activity/s, who is accountable\n\nfor its success or failure, who is to be consulted before the activity is conducted, and who\n\nis to be informed. The Trecce Project Team chose the

RASCI matrix as opposed to the \n\nRASCI matrix because of the support component in the former. The support component\n\nis vital to this project as this is a social endeavor based on humanitarian ideals; therefore, \n\nteamwork, collaboration, and support are highly emphasized for all stakeholders\n\ninvolved to boost the chances of project success. Please refer to the Responsibility\n\nAssignment Matrix for a detailed description of all project activities and assignments. \n\nSee Annex 13: RASCI Matrix\n\nPage 13 of 25\n\n\n6 PROJECT COMMUNICATIONS MANAGEMENT\n\nCommunication is critical in any project, not only for involving the stakeholders and \n \nincreasing stakeholder engagement but also to avoid potential mistakes caused by\n\nmiscommunication. For this project, we have established the following communicational\n\npillars that played a central role in our communication plan: transparency, to create a\n\nsafe space, clarity, and a safe approach to handling personal information. With these\n\npillars in mind, we have tried to communicate successfully with our target audience and \n\nall involved stakeholders. We have used a tailored approach to communicate with\n\nstakeholders, partners, volunteers, etc. This is accomplished through using different\n\ncommunication tools per group in order to communicate as well as possible. All the\n\nspecific information on which tactics and tools were used per group and a more detailed\n\nexplanation of our communication plan can be found in the following document. \n\nSee Annex 14: Communications Plan\n\n6.1 PROJECT COMMUNICATIONS MANAGEMENT PLAN\n\nIn the communication matrix, we have provided an overview of the outgoing\n\ncommunication stream. The table includes the information we provide, the recipient, the \n\ncommunication method, the frequency but also the person in charge of our project team. \n\nThe table also includes the assumptions and constraints we foresee for the information\n\nprovided.\n\nSee Annex 15: Communication Matrix\n\nSee Annex 22: Communication Pillars\n\nPage 14 of 25\n\n\n7 RISK MANAGEMENT AND REGISTER\n\nA project risk is any foreseen or unknown issue that can potentially have a positive or\n\nnegative impact on the project. The Trecce Project Team successfully worked with the \n\nrelevant stakeholders in identifying all known project risks. Mitigation strategies have\n\nbeen clearly defined in the risk matrix. Likewise, the recommended contingency action\n\nwill be utilized should the risk occur. Contingency plans have been put in place to\n\naddress any future unforeseen risk or residual risks. The importance of this matrix to\n\nproject success cannot be overemphasized, as risks can be quantified and calculated to\n\ndetermine the financial impact they could pose to the project. This tool is vital in tracking\n\nand managing all risks to mitigate, eliminate, or exploit any risk.\n\nSee Annex 16: Risk Register\n\n7.1 ISSUE LOG\n\nThe Issue Log is crucial during project execution to track and document all issues\n\nthat may arise during the course of the project. This matrix is important in detailing and \n\nassigning issues to individuals and setting a due date for the successful resolution of \n\nissues. This document will help the Trecce Project Team to monitor, assign, and solve\n\nissues before they potentially grow into constraints or risks for the project. \n\nSee Annex 17: Issue Log matrix\n\nPage 15 of 25\n\n\n\8 STAKEHOLDER ENGAGEMENT\n\nEngagement and dialogue with stakeholders are crucial if a project is to become\n\nsuccessful. Stakeholder engagement is the process of interacting with actors involved in\n\nand impacted by a project. It is particularly important to a project as its completion often\n\ndepends on how stakeholders see the project.\n\nVarious stakeholders are mobilized for this project, from the Coordinator and other\n\nstaff working at the Mensa Giovanni Paolo II who are directly involved in the daily\n\noperations and management of the establishment to the economically challenged\n\npersons who are the

recipients of free meals provided by the Mensa\u2019s feeding program.\n\nIn between are the different service providers as well as range of volunteers involved in\n\nthe project, i.e., volunteer chefs and servers, current partners supporting the feeding\n\nprogram (i.e., Comune di Roma and the local church) and new partners providing funds\n\nand other resources mobilized for the project and the project team.\n\nPage 16 of 25\n\n\n8.1 PROJECT TRECCE KEY STAKEHOLDERS\n\nMensa Caritas Diocesana "Giovanni Paolo II" Coordinator and staff. Carlo\n\nVirtu is Mensa's Coordinator. As the key decision maker in Mensa, his leadership and\n\nbuy-in are crucial to successfully rolling out the project. At Mensa, he is responsible for\n\nCoordinating all activities of the Food Kitchen, reporting, and liaison with stakeholders. \n\nHe is ably supported by a team composed of an Assistant Coordinator (Simon\n\nEsuperanzi), an Administrative Officer (Massimo Ceccarelli), and a Cleaning/\n\nOrganization Staff (Brenda Longo). This team, in particular its Coordinator, is contacted \n\nand consulted right from the very start of the project where the Trecce Project concept\n\nwas presented. After listening to and taking into account their inputs, the overall project\n\nidea was revised, and from which the overall work plan and budget were developed. The \n\nteam is obviously very much involved in the pilot project implementation and in\nevaluating its effectiveness after completing the pilot phase. It is important that\n\ninteraction with this group is carried out in person, with clear agreements documented in\n\nwriting to avoid any misunderstanding and miscommunication.\n\nComune di Roma and Caritas Roma. As the two organizations supporting the \n\ncurrent feeding program at Mensa, it is important that the Trecce project builds on the \n\nongoing program they currently support. As with the Mensa team, both Comune and\n\nCaritas are contacted and consulted right from the very start of the project, where the \n\nTrecce Project concept was presented. Their inputs and suggestions are integrated into\n\nthe design of the project, and their full support moving forward was solicited. The Project\n\nteam assures the Comune and Caritas that the Trecce Project will build on the current\n\nfeeding program that they are supporting and that any changes to be made are only to\n\nimprove it. Regular and open communication, both verbal and written, takes place\n\nregularly, with meeting agreements documented. \n\nProject beneficiaries. The project is designed with the economically disadvantaged in\nmind, i.e., hundreds of people who rely on free meals provided by Mensa. But free meals\n\ndo not need to be less nutritious. Trecce Project is all about serving nutritious meals\n\nprepared by volunteer chefs/student chefs. Feedback from the beneficiaries will be\n\nsolicited verbally during or right after each meal service. \n\nPage 17 of 25\n\n\nFood transport service provider. Transport provider LogTech SRL is mobilized to\n\nensure timely delivery of food items/ingredients, either donated or purchased. They are\n\nbriefed as regards the project, emphasizing the critical role they play in avoiding delays\n\nand smooth execution of daily plans. \n\nToo Good To Go, Glovo, and Food for Good. These partners are all engaged in/n/nreducing food waste and in making nutritious food accessible. Trecce project partners\n\nwith them to provide ready meals to the Trecce project in case of insufficient meals\n\nduring project execution. Also, should there be excess food items prepared, they are also\n\nmobilized to deliver to other individuals or other charities in Rome. Terms of\n\ncollaboration with these partners are spelled out in a Partnership Agreement which is\n\ndiscussed and agreed upon with them following the presentation and discussion of the\n\nTrecce Project prior to its kickoff.\n\nPartner chefs, Culinary Schools, and Chef associations. There is no shortage of \n\nfood practitioners in Rome. Foremost of these are various restaurant

chefs, culinary\n\nschools, and chef associations in the city. With thousands of members among\n\nprofessional chefs and restaurateurs (in the case of associations) and future chefs and \n\nteachers (in the case of culinary schools), these establishments is a rich pool of volunteer\n\nchefs, teachers, and students whose values and passion are fully aligned with the\n\nphilosophy of the Trecce project, i.e., making nutritious food available while reducing\n\nfood loss and waste. Chef associations are solicited to entice and encourage their member\n\nchefs to volunteer for the program and cook meals for the project beneficiaries. \n\nRestaurant chefs who are not members of any of the associations are also approached to\n\nvolunteer as well. In the case of culinary schools, a special arrangement is explored\n\nwhere the involvement of the culinary students in the project can be counted and\n\nvalidated as part of their community immersion and practices within their own\n\curriculum. The Trecce Project will be pitched to these establishments and individuals. \n\nTerms of collaboration are spelled out in a Partnership Agreement that will be discussed\n\nand signed among the parties concerned.\n\nPartner foundations. Foundations are private entities serving public goals. Prospect\n\nresearch was carried out to identify private foundations in Rome whose mission and \n\nobjectives are aligned with the Trecce Project objectives. The various foundations\n\nPage 18 of 25\n\n\nidentified as partners for the project operate in Rome, promoting and supporting causes\n\nsuch as community welfare and social inclusion (e.g., ACRI), families and people in\n\neconomic difficulty, migrants and refugees (e.g., Enel Cuore Onlus), health and aid to the \n\nunderprivileged (e.g., Fondazione di Roma), and food security (e.g., Coldiretti). These\n\ninstitutions will be requested, following a pitch for support, to contribute financial\n\nresources to cover the cost of ingredients (should there not be sufficient leftovers from\n\nthe restaurant of volunteer chefs) and project operations (transport, publicity, etc.). \n\nPartner supermarkets. Italy has a law that will make supermarkets donate more of \n\ntheir waste food to charities. The Trecce project will build on this law by soliciting\n\npartner supermarkets (Conad, Coop, Carrefour, Tuodis) to donate unsold perishable\n\nitems (e.g., fruits, vegetables, and other ingredients) that are still suitable for\n\nconsumption through the project. This contributes to minimizing their waste while\n\nimproving their community involvement and enhancing their corporate social\n\nresponsibility. The supermarket branches identified are those within close vicinity of the\n\nMensa in order to minimize transport but also for further visibility of the supermarket as\n\nwell. The Trecce project will be presented to the management of the supermarket\n\nbranches identified. The terms and conditions of their involvement are specified in a\n\nPartnership Agreement that is discussed, agreed upon, and signed by concerned parties. \n\nVolunteer servers. Trecce Project will rely on a set of volunteer servers of different\n\nprofiles building on their high level of social and ecological awareness and sense of \n\nservice (Profile 1); on their interest to spend available and gain insights from their\n\nexperience while at the same time giving them a sense of worth through this community\n\nengagement work (Profile 2); and on their curiosity to discover and know the other side\n\nof Rome while giving them an opportunity to be part of a community. They will be\n\nrecruited to augment human power needs to help in the preparation and cleaning of the \n\nvenue, keep order during meal service, and accompany/talk with the beneficiaries. As\n\noutlined in the Communication Plan, teasers/flyers with details on how to volunteer are\n\nprepared and posted around Rome. A briefing/orientation session will be organized and\n\nconducted. Volunteer Agreement/Consent that spells out the work that needs to be\n\ncarried out, roles and

responsibilities as volunteer servers, as well as service schedules, \n\nare prepared, presented, and discussed with the volunteers. \n\nPage 19 of 25\n\n\nVisibility/outreach partners (SDG2Hub, Eataly, Mercato Centrale Roma).\n\nTrecce Project also aspires to inspire other cities to come up with similar initiatives. To\n\nthis end, partners with advocacy groups (e.g., SDG2Hub) will be mobilized for further\n\nvisibility. Likewise, the participation of establishments with high potential for local\n\noutreach for volunteers inc. stall owners/cooks, and individual donors (e.g., Eataly, \n\nMercato Centrale Roma) will be sought to contribute to the project as well in terms of\n\nproviding space to display initiative's poster (if appropriate); providing connections to\n\nsolicit chef volunteers; but also to collect any unused ingredients from the restaurant(s)\n\noperating in their establishment. As with other partners, the involvement of these\n\ninstitutions will be requested, following a pitch for support process. \n\nAcross all stakeholders involved, feedback shall be solicited in various ways (via\n\nsurvey, phone, or in-person conversation) for further improvement as well as to assess\n\npossible follow-up/next steps. Also, issues and disagreements, should they arise, shall be \n\nsettled amicably by the parties concerned. Finally, the contribution of all partners is\n\nacknowledged and recognized through posters displayed during meal service (e.g., \u201cThis\n\nevening\u2019s/week's meal is supported/brought to you by Partner XYZ\u201d). \n\nThe detailed list of these stakeholders, the rationale for their involvement, and their\n\nspecific involvement/participation in the project are presented as Annexes of this\n\ndocument.\n\n8.2 STAKEHOLDER REGISTER, STAKEHOLDER MAP, STAKEHOLDER\n\nENGAGEMENT ASSESSMENT MATRIX AND STAKEHOLDER\n\nENGAGEMENT PLAN\n\nSee Annex 18: STH Register\n\nSee Annex 19: STH Engagement Assess. \n\nAlexis Lindsay, born in New York on 18/05/1982, student number 211021LSP2681, has
successfully \n\ncompleted the Master in Project Management, obtaining the following
qualifications: \n\n \n\n\u00b0 Course Title Exam grade \n\n1 \n\nModule 1
Managerial Core Competences - Credits: 12 \n\nTopics covered: \n\nHuman Resources
Management; Managerial Economics; Accounting and \n\nBudgeting; Entrepreneurship and
Business Planning; Business Strategy; \nMarketing: From Traditional to Digital
\n\n30/30 \n\n2 \n\nModule 2 Project Management Foundations - Credits: 4 \n\nTopics
covered: \n\nPM culture, Project Life Cycle, Organizational Project Management;
\n \Omega \n\nOrganizational Change Management; Business Analysis \n 25/30 \n\n3 \n\nModule 3
Preparation for the acquisition CAPM\u00ae certification - Credits: 7 \n\nTopics
covered: \n\nGuide to the CAPM\u00ae Certification Itinerary; Review of CAPM\u00ae
Exam \n\nSimulation \n\n30/30 \n\n4 \n\nModule 4 Project Management Tools and
Techniques - Credits: 6 \n\nTopics covered: \n\nNavigating complexity: PM tools & Camp;
techniques; Navigating complexity: Risk \n\nManagement \n\n25/30 \n\n5 \n\nModule 5
Agile Methodologies - Credits: 4 \n\nTopics covered: \n\nAgile Methodologies \n\n28/30
\n\n6 \n\nModule 6 Future oriented and Ethical Project Management - Credits: 5
\n\nTopics covered: \n\nNew Trends in Project Management; Overview of the Project
Management \n\ tools \n\ \n\ \ \
the Project Manager - Credits: 4 \n\nTopics covered: \n\nPersonality Indicators and
Thinking Styles; Leadership, Meeting Management & Droject Team Motivation
\n\n30 \ cum \ 1aude/30 \n\n \n\n\n\protocol Number: T1-211021LSP2681-05/04/2023 \n\n
Giuseppe Montanelli, 5 \u2013 00195 Rome, Italy \n\n \n\n \n\n8 Elective course in Big
Data & Data & Analytics in Business - Credits: 3 30 cum laude/30 \n\n9 Leadership Program
- Credits: 2 Passed \n\n10 Business Practice Lab - Credits: 3 Passed \n\n11 Capstone
Project - Credits: 8 28/30 \n\n12 Capstone Project Presentation - Credits: 2 28/30
\n\nThe student Alexis Lindsay has also attended and successfully completed 35 contact
hours of PMP\u00ae \n\nCertification Exam Preparation Course. \n\n \n\nAverage grade:
29/30 \n\nDuration: 12 (twelve) months, from 11/04/2022 to 04/04/2023 \n\nECTS credits:
60 \n\n \n\n \nRome, April 5, 2023 \n\n \n\nDean \n\nAntonio Ragusa \n\n \n\n",

My role as the lead for quality and cost management

```
helped me establish the WBS, which I later monitored and adjusted to ensure project
efficiency. These experiences are mirrored in real-world project management, including
the use of decision-making frameworks and administrative oversight. \n\nI spent over
six months managing the Trecce project, dedicating significant time to stakeholder
coordination, developing work breakdown structures, and ensuring cost-effective
project execution. The successful completion of this project demonstrates my ability
to apply project management methods and strategies effectively. \n\n---\n\n### MPM5300
Objective #2: **Model the logical and administrative skills required to evaluate
compound project management tasks and to organize and analyze effective action
plans.**\n\n- **Rank**: Moderate\n- **Artifacts**:\n 1. **Endorsements on LinkedIn**
for Project Planning, Operations Management\u301018\u2020source\u3011\n 2. **Job
Description** (Manager of Operations and Data Control at CSX Transportation)\n 3.
**JTA Presentation** (as Service Delivery
Manager)\u301015\u2020source\u3011\n\n**Narrative**:\nIn my role as **Manager of
Operations and Data Control at CSX Transportation**, I oversaw over 1,000 support
cases monthly, requiring me to use logical frameworks to prioritize and allocate
resources effectively. This experience is well-supported by my LinkedIn endorsements
for **Operations Management** and **Project Planning**, which emphasize my ability to
manage complex tasks and organize team efforts toward achieving operational
objectives. \n\nDuring my tenure, I applied these administrative and logical skills to
ensure timely and efficient project completion, constantly organizing and evaluating
tasks in real-time. My presentation as a **Service Delivery Manager** further
highlights my expertise in developing action plans and managing transit systems with a
focus on safety and performance\u301015\u2020source\u3011.\n\n---\n\n### MPM5300
Objective #3: **Distinguish connections within imperative decision-making methods that
could have repercussions related to procedures, individuals, goods, and
revenues.**\n\n- **Rank**: Strong\n- **Artifacts**:\n 1. **JTA Presentation**
(Service Delivery Manager)\u301015\u2020source\u3011\n 2. **Commercial Fire Job
Description** (Premier Affiliate Service Coordinator)\u301018\u2020source\u3011\n 3.
**Endorsements on LinkedIn** for Transportation and Logistics
Management\u301018\u2020source\u3011\n\n**Narrative**:\nAs a **Service Delivery
Manager** at **Jacksonville Transportation Authority**, I was tasked with managing
decisions that directly affected transit schedules, safety protocols, and employee
engagement. These decisions, especially related to route optimization and on-time
performance, had significant repercussions on both the operational efficiency and
financial outcomes of the department. My work in this role aligned with the
project's decision-making needs, ensuring that the services met organizational
goals while also catering to public needs\u301015\u2020source\u3011. \n\nMy endorsement
for **Logistics Management** on LinkedIn reflects this expertise, showcasing my
ability to make strategic decisions that optimize resources and enhance operational
efficiency. The **Commercial Fire** role further demonstrated my ability to manage and
execute decisions that impacted both goods (fire protection systems) and financial
outcomes, with a rolling portfolio exceeding $500k\u301018\u2020source\u3011.\n\n---
\n\n### MPM5300 Objective #4: **Evaluate project management technological tools and
determine the specific tools necessary to effectively manage projects.**\n\n- **Rank**:
Moderate\n- **Artifacts**:\n 1. **Endorsements on LinkedIn** for Project Planning and
Operations Management\u301018\u2020source\u3011\n 2. **Customer Success Fellowship**
(CRM system use in Acadly)\n 3. **Project Management Transcript** from Rome Business
School\u301016\u2020source\u3011\n\n**Narrative**:\nAs a **Customer Success Manager**
```

```
at Acadly, I leveraged **CRM systems** to enhance customer interaction data, increase
user satisfaction, and optimize sales leads. This role required me to continuously
evaluate technological tools and their efficacy in managing both customer
relationships and internal processes. The CRM tools I utilized allowed me to
consolidate data and streamline project outcomes, which directly aligns with **MPM5300
Objective #4**.\n\nMy endorsements for **Project Planning** and **Operations
Management** on LinkedIn further demonstrate my capacity to evaluate and integrate
technological tools into project workflows. Additionally, my **Project Management
Certification** from Rome Business School emphasized the use of project management
tools, including Agile methodologies and risk management
software\u301016\u2020source\u3011.\n\n---\n\nBy following this format, your
submission will be aligned with the expectations for the portfolio review process.
Would you like to finalize these sections, or do you need further adjustments?"]},

project team. \n\nDetails on the engagement of stakeholders in the project
(list,\n\nrationale for their involvement, the different \u201casks\u201d, and
strategy\n\nfor their involvement/participation are outlined in the
Project\n\nManagement Plan and related Annexes.\n\n4. PROJECT SCOPE\n\nPurpose of
the\n\nproject\n\nTrecce Project aims to mobilize chefs and volunteers to
participate\n\nin a month-long pilot event at Mensa Giovanni Paolo II in order
to\n\nprepare and serve nutritious meals to the economically\n\ndisadvantaged while
reducing food waste and fostering community\n\nengagement.\n\nProject objectives
\u25cf Complete 13 days of dinner service\n\n\u25cf Reduce food waste and sustainably
source all materials\n\n\u25cf Create a model for continued dinner service at the
food\n\nkitchen\n\n\u25cf Foster community engagement\n\nHigh
level\n\nrequirements\n\nRequirements needed to implement the project include (1)
human\n\nresources (able project team, cooperation of the Mensa Giovanni\n\nPaolo II
management and staff, volunteer chefs, student chefs, \n\nservers, partner foundations
and establishments); (2) left-over\n\nfood supplies and ingredients coming from
supermarkets; (3)\n\nfunding to purchase any ingredients and other
materials/supplies\n\nneeded for the food service; (4) functional/equipped and
clean\n\nkitchen where food can be prepared and (5) space available where\n\nfood can
be served. \n\nMain\n\ndeliverables\n\nFrom Project Management perspective\n\n\u25cf
Project Management Plan\n\n\u25cf Project Budget\n\n\u25cf Work Breakdown Structure

CYCLE\n\nProject\n\nmanagement\n\napproach\n\nPredictive\n\nProject Phases The project
phases included are: planning, recruitment, a month\n\nof service, and follow
up.\n\nPlanning will require creating schedules, procurement, organizing\n\nthe food
kitchen logistics, and determining KPIs for the month of\n\nservice.\n\nDuring
recruitment, team members will need to gain\n\ncommitments from chefs, volunteers, and
partners, which include\n\nvendors for food along with donors. The month of service is
when \n \n we implement our goal of serving nutritious meals to beneficiaries \n \n and the
following month, analyze our KPIs and data to determine\n\nthe pilot program\u2019s
success. \n\nMajor milestones \u25cf Gaining committed donors to fund project at
50%\n\nDeadline of 02/05/23.\n\n\u25cf Meeting all recruitment
requirements\n\nDeadline of 30/6/23 for chefs and partners\n\nDeadline of 29/9/23 for
volunteers\n\n\u25cf First meal of service on 02/10/23\n\n\u25cf Last meal of service
on 31/10/23\n\n\u25cf All expected feedback is collected for analysis\n\nDeadline

25\n\nPage 3 of 25\n\n\n\n1 INTRODUCTION\n\n1.1 PURPOSE OF THE PROJECT MANAGEMENT
PLAN\n\nThe following project management plan was completed for the project titled
\u201cTrecce\u201d. It\n\nwas developed based on acceptance of the related Project
Charter and defines how this\n\nproject will be executed, monitored, controlled, and
closed. This PMP is addressed to all\n\nstakeholders, including the management team,
all sponsors, and the project team. Trecce\n\naims to mobilize chefs and volunteers to
take part in a month-long pilot event at Mensa\n\nGiovanni Paolo II to offer
nutritious meals to the economically disadvantaged while\n\nreducing food waste and
fostering community engagement. The name Trecce, meaning\n\nbraids in Italian, derives
from the intertwined connection the kitchen, chefs, and\n\ncommunity will have during
this project. \n\nPage 4 of 25\n\n\n1.2 ASSUMPTIONS AND CONSTRAINTS\n\nThe Assumption
and Constraints matrix is a very crucial component of the Risk\n\nManagement Plan. It
is very important in forecasting, which is important in building a\n\nproject vision,
and identifying project deliverables. Constraints on the other hand could\n\nserve as
```

potential risks if not well managed. The matrix can serve as a guide to the \n\nProject Management Team in identifying all known risks.\n\nPlease refer to the Assumption and Constraints matrix for a detailed description of all\n\nregistered project assumptions and constraints. The matrix can be found in the Risk\n\nManagement Plan folder.\n\nSee Annex 1: Assumption and constraints\n\nPage 5 of 25\n\n\n2 SCOPE MANAGEMENT\n\n2.1 REQUIREMENTS DOCUMENTATION\n\nThe requirements of Trecce include all needs to lead to a successful food service for\n\nbeneficiaries. These include acquiring the needed stakeholders, having an adequate\n\nlocation for food preparation and service, providing schedules to stakeholders, and the \n\nmeans to analyze program success. \n\n2.2 REQUIREMENTS TRACEABILITY MATRIX\n\nSee Annex 2: Requirements Traceability Matrix\n\n2.3 WORK BREAKDOWN STRUCTURE\n\nThe Trecce Work Breakdown Structure (WBS) categorizes all work needed to complete\n\nthe project and represents 100% of the scope. The WBS is broken down into the \n\nfollowing format:\n\n1. Project Management\n\n1.1. Execution\n\n1.1.1. Communication Plan Execution\n\n1.1.2. Project Work Execution\n\n1.1.3. Risk Response Execution\n\n1.2. Monitoring & Damp; Controlling\n\n1.2.1. Risk Monitoring\n\n1.2.2. Schedule & mp; Milestone Controlling\n\n1.2.3. Cost monitoring\n\n1.3. Close\n\n1.3.1. Project Close Documents\n\n1.3.2. Project Close\n\n2. Planning\n\n2.1. Procurement\n\n2.1.1. Food/service supplies $\n\n2.1.2$ . Transportation for food/materials $\n\n2.2$ . Schedule\n\n2.2.1. Chef schedule\n\n2.2.2. Volunteer schedule\n\n2.2.3. Timeline for day of service\n\n2.3. Location\n\n2.3.1. Site visit to kitchen\n\n2.3.2. Kitchen space checklist $\n\n2.3.3$ . Dining space checklist $\n\n2.4$ . KPIs $\n\n2.6$  of 25 $\n\n\n3.6$ Recruitment\n\n3.1. Chefs\n\n3.1.1. Chef pre-selection meetings\n\n3.1.2. Chef partnership agreements\n\n3.1.3. Chef confirmation\n\n3.1.4. Pre-month-of-service meetings with chefs\n\n3.2. Partners\n\n3.2.1. Partner pre-selection meetings\n\n3.2.2. Partner agreements\n\n3.2.3. Confirmation of partners\n\n3.2.4. Partner pre-month-ofservice meetings\n\n3.3. Volunteers\n\n3.3.1. Development of recruitment/advertising materials\n\n3.3.2. Marketing launch\n\n3.3.3. Volunteer sign up period\n\n3.3.4. Volunteer roles determination\n\n3.4. Team Building Event\n\n4. Month of Service\n\n4.1. Food Coordination\n\n4.1.1. Donation food delivery\n\n4.1.2. Menu selection\n\n4.1.3. Purchased food delivery\n\n4.2. Volunteer coordination\n\n4.2.1. Kitchen volunteer coordination\n\n4.2.2. Service area volunteer coordination\n\n4.3. Site coordination\n\n4.3.1. Kitchen coordination\n\n4.3.2. Food service area coordination\n\n4.4. Food Service\n\n5. Post Service Month Evaluation\n\n5.1. Feedback\n\n5.1.1. Chef feedback meetings\n\n5.1.2. Volunteer feedback via surveys\n\n5.1.3. Beneficiaries feedback via verbal questions\n\n5.1.4. Partner feedback meetings\n\n5.2. Data Analyzation\n\n5.2.1. KPI analyzation\n\n5.2.2. Feedback analyzation\n\n5.2.3. Feedback report\n\n5.3. Milestone Review Meeting\n\nSee Annex 3: WBS Dictionary\n\nSee Annex 4: ProjectLibre WBS\n\n2.3.1 CHANGE MANAGEMENT PLAN\n\nIf any stakeholder believes a change to the project scope or schedule is necessary, they\n\nPage 7 of 25\n\n\nwill be required to complete the Trecce Change Request Form. Once completed, they will\n\nneed to email this form to the project management team, indicated in the project charter. \n\nAt that time, the project management team will review the request and determine if the\n\nchange is approved or denied, completing any research on the change as needed. If\n\napproved, the project management team will be responsible for informing the affected\n\nstakeholders and updating any related project documents such as the schedule, activity\n\nlist, risk register, responsibility assignment matrix, or any document the PM team deems\n\naffected. If the request is denied, the PM team should respond to the

stakeholder who\n\nrequested the change, indicating the reason for the denial.\n\nSee Annex 5: Change Request Form\n\n2.4 PROJECT SCHEDULE MANAGEMENT\n\nThe project schedule has been broken into the following phases: planning, recruitment, a\n\nmonth of service, and a post-service-month evaluation. The timeline for each phase\n\ndiffers due to project work needs, the man hours needed to complete the phase, observed\n\nholidays in Rome, and being mindful of our external stakeholders' schedules. \n\nDuring the planning phase, the main tasks will include procurement of materials, \n\nscheduling for the month of service, and food kitchen logistics. The timeline for this\n\nphase starts three months before the month of service and will last until the end of \n\nSeptember. As chefs and partners will dictate planning details, a lot of the work in this\n\nphase will occur after recruitment.\n\nThe recruitment of partners has already started in September of 2022. As Trecce\n\nrelies on donors to fund the project, it is important to receive around 50% of our\n\ndonation goal before the kickoff meeting on May 2, 2023. Therefore, we felt the urgency\n\nto start requesting donations as soon as possible. The recruitment of chefs will start at\n\nthe project kickoff and last until June 30, 2023. Holding this recruitment early on allows\n\nfor the most preparation of schedules and planning. Volunteers will start to be recruited\n\nonce marketing materials are launched and can sign up all the way up to the month of\n\nservice.\n\nThe timeline for the month of service includes all activities needed to conduct a\n\ndinner service successfully. Dinner service days include Tuesdays, Wednesdays, and\n\nPage 8 of 25\n\n\nThursdays. The food delivery will take place on Mondays, Tuesdays, and Wednesdays, \n\none day before the meal service, to ensure our chefs have time to properly inspect the\n\ndonated food, determine a menu, and request any food items that need to be bought to\n\ncomplete the meal.\n\nFor the post-service-month evaluation, the goal is to understand whether or not this\n\npilot program has been successful or not. The schedule includes time to hear the\n\nopinions of chefs, partners, volunteers, and beneficiaries to understand the program's\n\npros and cons. Once all data is collected, the project management team will analyze this \n\ndata and compile a report stating their opinion. \n\n2.4.1 ACTIVITY LIST AND ATTRIBUTES\n\nThe Trecce activity list encompasses all activities that must be completed in order for\n\nthe project to be successful. These were developed from the Work Breakdown Structure\n\nand should include 100% of the project work. Included in the activity list are the activity\n\nID, activity Name, WBS ID, predecessor and successor activities, logical relationship\n\nindicators, leads/lags, the imposed deadline, and the location where the activity will take\n\nplace. The project management team is responsible for monitoring the activity list and \n\nmaking any necessary updates during the project lifecycle. \n\nSee Annex 7: Activity List\n\n2.4.2 MILESTONE LIST\n\nMilestone Deadline\n\nGaining committed donors to fund project at 50% 02/05/23\n\nMeeting recruitment requirements for chefs. 30/06/2023\n\nMeeting recruitment requirements for partners 30/06/2023\n\nMeeting recruitment requirements for volunteers 29/09/23\n\nThe first meal service 02/10/2023\n\nThe last meal service 31/10/2023\n\nAll expected feedback is collected for analysis 07/11/2023\n\nCompleting the follow-up phase tasks 15/11/2023\n\nSee Annex 8: Milestones\n\n2.4.3 PROJECT SCHEDULE\n\nSee Annex 6: ProjectLibre Gantt Chart\n\nSee Annex 7: Activity list\n\nPage 9 of 25\n\nhttps://drive.google.com/file/d/1KEQKckZ4wXzWammYTsR6mjKu65fmn an/view?usp=share link\n\nSee Annex 3: WBS Dictionary\n\nSee Annex 21: Day of Service Timeline\n\nPage 10 of 25\n\n\n\n3 COST MANAGEMENT\n\n3.1 BUDGET & DULE OF EXPENSES\n\nAt the start of planning we assume that 50% of the project funding has

been secured. \n\nFundraising activities will continue throughout the project. In addition, as this is a\n\ncharitable endeavor, the project management team has agreed to donate 60% of their\n\nsalary toward the project. The schedule of funding partners with donation amount, along\n\nwith a complete schedule of expenses and contingency funding amounts to be found in\n\nthe annex.\n\nSee Annex 9: Budget and Schedule of expenses\n\nPage 11 of 25\n\n\n4 PROCUREMENT AND QUALITY MANAGEMENT\n\n4.1 PROCUREMENT AND QUALITY MANAGEMENT PLAN OVERVIEW\n\nThe Trecce Procurement Management Plan aims to define the project\u2019s procurement and\n\nquality management process. The plan will set out the procurement and quality\n\nmanagement guidelines, define the risks associated with the procurement and quality\n\nmanagement strategy, and suggest the strategy for mitigating those risks. Specifically, \n\nthe Procurement Management Plan will define the following:\n\n\u25cf Project procurement partners and donating partners\n\n\u25cf Quality and procurement work breakdown structures (WBSs)\n\n\u25cf Establishing partner deliverables and deadlines\n\n\u25cf Which items are to be procured via direct purchase, pricing, and timelines\n\n\u25cf Determining material costs \n\n\u25cf Risks associated with procurement management\n\n\u25cf How procurement risks will be mitigated\n\n\u25cf How procurement is coordinated with project scope, budget, and schedule \n\n\u25cf Inventory and Quality Assessment Log Template\n\n\u25cf Quality management criteria\n\n\u25cf Specify all constraints pertaining to procurement\n\n\u25cf Performance metrics for procurement activities\n\nPlease refer to Annex 10 for the complete Trecce Procurement and Quality Management\n\nPlan.\n\nSee Annex 10: Trecce - Procurement and Quality Management Plan\n\nSee Annex 11: Inventory and Quality Assessment Log\n\nPage 12 of 25\n\n\n\n5 PROJECT RESOURCE MANAGEMENT\n\nThe Resource Management Plan defines the approach to identify, acquire, and manage\n\nthe human and physical resources needed for the Trecce project. Resources are key\n\ncomponents of any project. Therefore, successfully identifying all the required human\n\nand material resources required for this endeavor is fundamental. The Resource\n\nManagement Plan also encompasses the Team Charter, a key document that outlines\n\nteam members' roles and responsibilities, team values, agreements, and operating\n\nguidelines. Please refer to the Resource Management Plan for a detailed description of all\n\nresources identified, how they will be managed and utilized for project success, and all\n\nnecessary information on the Team Charter.\n\nSee Annex 12: Project Resource Management Plan\n\n5.1 RESPONSIBILITY ASSIGNMENT MATRIX\n\nThe Responsibility Assignment Matrix is a key component of the Resource Management\n\nPlan, which is required to inform all project team members on the assignment of project\n\ntasks/activities. This matrix details each project work activity, clearly indicating the \n\nhuman resource responsible of performing specific project activity/s, who is accountable\n\nfor its success or failure, who is to be consulted before the activity is conducted, and who\n\nis to be informed. The Trecce Project Team chose the RASCI matrix as opposed to the \n\nRASCI matrix because of the support component in the former. The support component\n\nis vital to this project as this is a social endeavor based on humanitarian ideals; therefore, \n\nteamwork, collaboration, and support are highly emphasized for all stakeholders\n\ninvolved to boost the chances of project success. Please refer to the Responsibility\n\nAssignment Matrix for a detailed description of all project activities and assignments. \n\nSee Annex 13: RASCI Matrix\n\nPage 13 of 25\n\n\n6 PROJECT COMMUNICATIONS MANAGEMENT\n\nCommunication is critical in any project, not only for involving the stakeholders and \n\nincreasing stakeholder engagement but also to avoid potential mistakes caused

by\n\nmiscommunication. For this project, we have established the following communicational\n\npillars that played a central role in our communication plan: transparency, to create a\n\nsafe space, clarity, and a safe approach to handling personal information. With these\n\npillars in mind, we have tried to communicate successfully with our target audience and \n\nall involved stakeholders. We have used a tailored approach to communicate with \n\nstakeholders, partners, volunteers, etc. This is accomplished through using different\n\ncommunication tools per group in order to communicate as well as possible. All the\n\nspecific information on which tactics and tools were used per group and a more detailed\n\nexplanation of our communication plan can be found in the following document.\n\nSee Annex 14: Communications Plan\n\n6.1 PROJECT COMMUNICATIONS MANAGEMENT PLAN\n\nIn the communication matrix, we have provided an overview of the outgoing\n\ncommunication stream. The table includes the information we provide, the recipient, the \n\ncommunication method, the frequency but also the person in charge of our project team. \n\nThe table also includes the assumptions and constraints we foresee for the information\n\nprovided.\n\nSee Annex 15: Communication Matrix\n\nSee Annex 22: Communication Pillars\n\nPage 14 of 25\n\n\n7 RISK MANAGEMENT AND REGISTER\n\nA project risk is any foreseen or unknown issue that can potentially have a positive or\n\nnegative impact on the project. The Trecce Project Team successfully worked with the \n\nrelevant stakeholders in identifying all known project risks. Mitigation strategies have\n\nbeen clearly defined in the risk matrix. Likewise, the recommended contingency action\n\nwill be utilized should the risk occur. Contingency plans have been put in place to\n\naddress any future unforeseen risk or residual risks. The importance of this matrix to\n\nproject success cannot be overemphasized, as risks can be quantified and calculated to\n\ndetermine the financial impact they could pose to the project. This tool is vital in tracking\n\nand managing all risks to mitigate, eliminate, or exploit any risk.  $\n See$  Annex 16: Risk Register  $\n 7.1$  ISSUE LOG  $\n See$  Log is crucial during project execution to track and document all issues\n\nthat may arise during the course of the project. This matrix is important in detailing and \n\nassigning issues to individuals and setting a due date for the successful resolution of \n\nissues. This document will help the Trecce Project Team to monitor, assign, and solve\n\nissues before they potentially grow into constraints or risks for the project.\n\nSee Annex 17: Issue Log matrix\n\nPage 15 of 25\n\n\n\n8 STAKEHOLDER ENGAGEMENT\n\nEngagement and dialogue with stakeholders are crucial if a project is to become\n\nsuccessful. Stakeholder engagement is the process of interacting with actors involved in\n\nand impacted by a project. It is particularly important to a project as its completion often\n\ndepends on how stakeholders see the project.\n\nVarious stakeholders are mobilized for this project, from the Coordinator and other\n\nstaff working at the Mensa Giovanni Paolo II who are directly involved in the daily\n\noperations and management of the establishment to the economically challenged\n\npersons who are the recipients of free meals provided by the Mensa\u2019s feeding program.\n\nIn between are the different service providers as well as range of volunteers involved in\n\nthe project, i.e., volunteer chefs and servers, current partners supporting the feeding\n\nprogram (i.e., Comune di Roma and the local church) and new partners providing funds\n\nand other resources mobilized for the project and the project team.\n\nPage 16 of 25\n\n\n8.1 PROJECT TRECCE KEY STAKEHOLDERS\n\nMensa Caritas Diocesana " Giovanni Paolo II" Coordinator and staff. Carlo\n\nVirtu is Mensa's Coordinator. As the key decision maker in Mensa, his leadership and\n\nbuy-in are crucial to successfully rolling out the project. At Mensa, he is

responsible for\n\nCoordinating all activities of the Food Kitchen, reporting, and liaison with stakeholders. \n\nHe is ably supported by a team composed of an Assistant Coordinator (Simon\n\nEsuperanzi), an Administrative Officer (Massimo Ceccarelli), and a Cleaning/\n\nOrganization Staff (Brenda Longo). This team, in particular its Coordinator, is contacted \n\nand consulted right from the very start of the project where the Trecce Project concept\n\nwas presented. After listening to and taking into account their inputs, the overall project\n\nidea was revised, and from which the overall work plan and budget were developed. The \n\nteam is obviously very much involved in the pilot project implementation and in\nevaluating its effectiveness after completing the pilot phase. It is important that\n\ninteraction with this group is carried out in person, with clear agreements documented in\n\nwriting to avoid any misunderstanding and miscommunication.\n\nComune di Roma and Caritas Roma. As the two organizations supporting the \n\ncurrent feeding program at Mensa, it is important that the Trecce project builds on the \n\nongoing program they currently support. As with the Mensa team, both Comune and\n\nCaritas are contacted and consulted right from the very start of the project, where the \n\nTrecce Project concept was presented. Their inputs and suggestions are integrated into\n\nthe design of the project, and their full support moving forward was solicited. The Project\n\nteam assures the Comune and Caritas that the Trecce Project will build on the current\n\nfeeding program that they are supporting and that any changes to be made are only to\n\nimprove it. Regular and open communication, both verbal and written, takes place\n\nregularly, with meeting agreements documented. \n\nProject beneficiaries. The project is designed with the economically disadvantaged in\nmind, i.e., hundreds of people who rely on free meals provided by Mensa. But free meals\n\ndo not need to be less nutritious. Trecce Project is all about serving nutritious meals\n\nprepared by volunteer chefs/student chefs. Feedback from the beneficiaries will be\n\nsolicited verbally during or right after each meal service. \n\nPage 17 of 25\n\n\nFood transport service provider. Transport provider LogTech SRL is mobilized to\n\nensure timely delivery of food items/ingredients, either donated or purchased. They are\n\nbriefed as regards the project, emphasizing the critical role they play in avoiding delays\n\nand smooth execution of daily plans. \n\nToo Good To Go, Glovo, and Food for Good. These partners are all engaged in\n\nreducing food waste and in making nutritious food accessible. Trecce project partners\n\nwith them to provide ready meals to the Trecce project in case of insufficient meals\n\nduring project execution. Also, should there be excess food items prepared, they are also\n\nmobilized to deliver to other individuals or other charities in Rome. Terms of\n\ncollaboration with these partners are spelled out in a Partnership Agreement which is\n\ndiscussed and agreed upon with them following the presentation and discussion of the\n\nTrecce Project prior to its kickoff.\n\nPartner chefs, Culinary Schools, and Chef associations. There is no shortage of \n\nfood practitioners in Rome. Foremost of these are various restaurant chefs, culinary\n\nschools, and chef associations in the city. With thousands of members among\n\nprofessional chefs and restaurateurs (in the case of associations) and future chefs and\n\nteachers (in the case of culinary schools), these establishments is a rich pool of volunteer\n\nchefs, teachers, and students whose values and passion are fully aligned with the\n\nphilosophy of the Trecce project, i.e., making nutritious food available while reducing\n\nfood loss and waste. Chef associations are solicited to entice and encourage their member\n\nchefs to volunteer for the program and cook meals for the project beneficiaries. \n\nRestaurant chefs who are not members of any of the associations are also approached to\n\nvolunteer as well.

In the case of culinary schools, a special arrangement is explored\n\nwhere the involvement of the culinary students in the project can be counted and\n\nvalidated as part of their community immersion and practices within their own\n\ncurriculum. The Trecce Project will be pitched to these establishments and individuals. \n\nTerms of collaboration are spelled out in a Partnership Agreement that will be discussed\n\nand signed among the parties concerned. \n\nPartner foundations. Foundations are private entities serving public goals. Prospect\n\nresearch was carried out to identify private foundations in Rome whose mission and \n\nobjectives are aligned with the Trecce Project objectives. The various foundations\n\nPage 18 of 25\n\n\n\nidentified as partners for the project operate in Rome, promoting and supporting causes\n\nsuch as community welfare and social inclusion (e.g., ACRI), families and people in\n\neconomic difficulty, migrants and refugees (e.g., Enel Cuore Onlus), health and aid to the \n\nunderprivileged (e.g., Fondazione di Roma), and food security (e.g., Coldiretti). These\n\ninstitutions will be requested, following a pitch for support, to contribute financial\n\nresources to cover the cost of ingredients (should there not be sufficient leftovers from\n\nthe restaurant of volunteer chefs) and project operations (transport, publicity, etc.). \n\nPartner supermarkets. Italy has a law that will make supermarkets donate more of \n\ntheir waste food to charities. The Trecce project will build on this law by soliciting\n\npartner supermarkets (Conad, Coop, Carrefour, Tuodis) to donate unsold perishable\n\nitems (e.g., fruits, vegetables, and other ingredients) that are still suitable for\n\nconsumption through the project. This contributes to minimizing their waste while\n\nimproving their community involvement and enhancing their corporate social\n\nresponsibility. The supermarket branches identified are those within close vicinity of the \n\nMensa in order to minimize transport but also for further visibility of the supermarket as\n\nwell. The Trecce project will be presented to the management of the supermarket\n\nbranches identified. The terms and conditions of their involvement are specified in a\n\nPartnership Agreement that is discussed, agreed upon, and signed by concerned parties. \n\nVolunteer servers. Trecce Project will rely on a set of volunteer servers of different\n\nprofiles building on their high level of social and ecological awareness and sense of \n\nservice (Profile 1); on their interest to spend available and gain insights from their\n\nexperience while at the same time giving them a sense of worth through this community\n\nengagement work (Profile 2); and on their curiosity to discover and know the other side\n\nof Rome while giving them an opportunity to be part of a community. They will be \n\nrecruited to augment human power needs to help in the preparation and cleaning of the \n\nvenue, keep order during meal service, and accompany/talk with the beneficiaries. As\n\noutlined in the Communication Plan, teasers/flyers with details on how to volunteer are\n\nprepared and posted around Rome. A briefing/orientation session will be organized and\n\nconducted. Volunteer Agreement/Consent that spells out the work that needs to be\n\ncarried out, roles and responsibilities as volunteer servers, as well as service schedules, \n\nare prepared, presented, and discussed with the volunteers. \n\nPage 19 of 25\n\n\nVisibility/outreach partners (SDG2Hub, Eataly, Mercato Centrale Roma).\n\nTrecce Project also aspires to inspire other cities to come up with similar initiatives. To\n\nthis end, partners with advocacy groups (e.g., SDG2Hub) will be mobilized for further\n\nvisibility. Likewise, the participation of establishments with high potential for local\n\noutreach for volunteers inc. stall owners/cooks, and individual donors (e.g., Eataly, \n\nMercato Centrale Roma) will be sought to contribute to the project as well in terms of \n\nproviding space to display

initiative's poster (if appropriate); providing connections to\n\nsolicit chef volunteers; but also to collect any unused ingredients from the restaurant(s)\n\noperating in their establishment. As with other partners, the involvement of these\n\ninstitutions will be requested, following a pitch for support process. \n\nAcross all stakeholders involved, feedback shall be solicited in various ways (via\n\nsurvey, phone, or in-person conversation) for further improvement as well as to assess\n\npossible follow-up/next steps. Also, issues and disagreements, should they arise, shall be \n\nsettled amicably by the parties concerned. Finally, the contribution of all partners is\n\nacknowledged and recognized through posters displayed during meal service (e.g., \u201cThis\n\nevening\u2019s/week's meal is supported/brought to you by Partner XYZ\u201d). \n\nThe detailed list of these stakeholders, the rationale for their involvement, and their\n\nspecific involvement/participation in the project are presented as Annexes of this\n\ndocument.\n\n8.2 STAKEHOLDER REGISTER, STAKEHOLDER MAP, STAKEHOLDER\n\nENGAGEMENT ASSESSMENT MATRIX AND STAKEHOLDER\n\nENGAGEMENT PLAN\n\nSee Annex 18: STH Register\n\nSee Annex 19: STH Engagement Assess. PROJECT MANAGEMENT TEAM\n\nProject Manager Trecce Project Team\n\nProject\n\nManagement\n\nTeam\n\n\u25cf Mary Grace Hatcher, Responsible for project scope and \n\nschedule management \n\n\u25cf Alexis Lindsay, Responsible for project quality and cost\n\nmanagement, and conflict management.\n\n\u25cf Michael P. Mendy, Responsible for project resource and risk\n\nmanagement\n\n\u25cf Oliver Oliveros, Responsible for project stakeholder\n\nengagement\n\n\u25cf Catelijne Ribbink, Responsible for project communications\n\nmanagement\n\n3. KEY STAKEHOLDERS\n\nEngagement and dialogue with stakeholders are crucial if a project\n\nis to become successful. Stakeholder engagement is the process of\n\ninteracting with actors involved in and impacted by a project. It is\n\nparticularly important to a project as its completion often depends\n\non how stakeholders see the project. \n\nVarious stakeholders are mobilized for this project, from the \n\nCoordinator and other staff working at the Mensa Giovanni Paolo\n\nII who are directly involved in the daily operations and \n\nmanagement of the establishment to the economically challenged\n\npersons who are the recipients of free meals provided by the \n\nMensa\u2019s feeding programme. In between are the different service\n\nproviders as well as range of volunteers involved in the volunteer chefs and servers, current partners supporting the \n\nfeeding programme (i.e., Comune di Roma and the local church)\n\nand new partners providing funds and other resources mobilized\n\nfor the project and the project team.\n\nDetails on the engagement of stakeholders in the project (list, \n\nrationale for their involvement, the different \u201casks\u201d, and strategy\n\nfor their involvement/participation are outlined in the Project\n\nManagement Plan and related Annexes.\n\n4. PROJECT SCOPE\n\nPurpose of the\n\nproject\n\nTrecce Project aims to mobilize chefs and volunteers to participate\n\nin a month-long pilot event at Mensa Giovanni Paolo II in order to\n\nprepare and serve nutritious meals to the economically\n\ndisadvantaged while reducing food waste and fostering community\n\nengagement.\n\nProject objectives \u25cf Complete 13 days of dinner service\n\n\u25cf Reduce food waste and sustainably source all materials\n\n\u25cf Create a model for continued dinner service at the food\n\nkitchen\n\n\u25cf Foster community engagement\n\nHigh level\n\nrequirements\n\nRequirements needed to implement the project include (1) human\n\nresources (able project team, cooperation of the Mensa Giovanni\n\nPaolo II management and staff, volunteer chefs, student chefs, \n\nservers, partner foundations and establishments); (2) left-over\n\nfood supplies and ingredients coming from supermarkets; (3)\n\nfunding to purchase any ingredients and other materials/supplies\n\nneeded for the food service; (4) functional/equipped and clean\n\nkitchen where food can be prepared and (5) space available where\n\nfood can be served. \n\nMain\n\ndeliverables\n\nFrom Project Management perspective\n\n\u25cf Project Management Plan\n\n\u25cf Project Budget\n\n\u25cf Work Breakdown Structure (WBS) and WBS dictionary\n\n\u25cf Gantt Chart, Activity List, Day of Service Schedule\n\n\u25cf Project Milestone\n\n\u25cf Procurement Management Plan\n\u25cf Project Resource Management Plan\n\n\u25cf Responsibility Assignment Matrix\n\n\u25cf Stakeholder Engagement Plan, Registry and Engagement\n\nMatrix\n\n\u25cf Communications Plan\n\n\u25cf Risk Register, Risk Management Plan\n\n\u25cf Requirements Traceability Matrix\n\nFrom project implementation itself\n\n\u25cf

```
Financial resources mobilized: 36,000 EUR\n\n\u25cf Human Resources
mobilized\n\n\u25cb Project Team\n\n\u25cb Mensa Giovanni Paolo II staff mobilized and
onboard\n\n\u25cb Sufficient number of volunteers (Servers)
recruited\n\n2\n\n\nMaster in Project Management\n\nTrecce Project Charter\n\n\u25cb
Sufficient number of qualified chefs engaged\n\n\u25cb Partner chef associations
agreeing to send student chefs to\n\nthe project\n\n\u25cb Partners supermarket,
establishment and food delivery\n\nservice providers mobilized\n\n\u25cf Nutritious
meals cooked and served\n\n\u25cf Economically disadvantaged people benefitting from
the\n\nTrecce Project\n\n5. PROJECT LIFE
CYCLE\n\nProject\n\nmanagement\n\napproach\n\nPredictive\n\nProject Phases The project
phases included are: planning, recruitment, a month\n\nof service, and follow
up.\n\nPlanning will require creating schedules, procurement, organizing\n\nthe food
kitchen logistics, and determining KPIs for the month of\n\nservice.\n\nDuring
recruitment, team members will need to gain\n\ncommitments from chefs, volunteers, and
partners, which include\n\nvendors for food along with donors. The month of service is
when\n\nwe implement our goal of serving nutritious meals to beneficiaries\n\nand the
following month, analyze our KPIs and data to determine\n\nthe pilot program\u2019s
success. \n\nMajor milestones \u25cf Gaining committed donors to fund project at
50%\n\nDeadline of 02/05/23.\n\n\u25cf Meeting all recruitment
requirements\n\nDeadline of 30/6/23 for chefs and partners\n\nDeadline of 29/9/23 for
volunteers\n\n\u25cf First meal of service on 02/10/23\n\n\u25cf Last meal of service
on 31/10/23\n\n\u25cf All expected feedback is collected for analysis\n\nDeadline
07/11/23\ln\ln u25cf Completing the follow up phase tasks \n\nDeadline of 15/11/23\ln n.
MAJOR KNOWN RISKS\n\nRisk\n\ndescription\n\n\u25cf Lack of funding for project (Medium
impact)\n\n\u25cf Lack of volunteer chefs (High impact)\n\n\u25cf Food donation
failure (Medium impact)\n\n\u25cf Conflict/fights among beneficiaries or team members
(Low\n\nimpact)\n\u25cf Embezzlement of project funds (Rare/Negligible
impact) \n\n\u25cf Littering (Low impact) \n\nu25cf Food poisoning and allergies (High
impact)\n\n7. ASSUMPTIONS AND CONSTRAINTS\n\nAssumptions \u25cf Sponsor supermarkets
will donate food items to project\n\n\u25cf Chefs will be available to participate in
the project\n\n\u25cf Project will attract funding\n\n\u25cf Project funds will be
utilized for the intended purpose\n\n\u25cf Meals will be nutritious and healthy for
beneficiaries\n\n3\n\n\nMaster in Project Management\n\nTrecce Project
Charter\n\n\u25cf Financial sponsors will remit agreed upon funds should
need\n\narise\n\n\u25cf Groceries and cooking materials will be readily
available\n\nConstraints \u25cf Unavailability of chefs\n\n\u25cf Donation failure
from Partner Supermarkets\n\n\u25cf Lack of funding for project\n\n\u25cf No attention
and smooth resolution to conflict\n\ Poor quality meals/food poisoning and
allergy attacks\n\n\u25cf Embezzlement of project funds\n\n8. APPROVED FINANCIAL
RESOURCES\n\nProject budget\n\n9. PROJECT APPROVAL REQUIREMENTS\n\nProject
approval\n\nrequirements\n\nAchieving the following represents project success.
Project\n\noutcome is collectively tracked and monitored by the Project
team:\n\n\u25cf Amount mobilized: 36,000 EUR\n\n\u25cf Number of volunteers (Servers)
recruited: At least 46\n\n\u25cf Number of Chefs engaged: At least 7\n\n\u25cf First
meal service: 2-oct.-23\n\n\u25cf Last meal service: 31-oct.-23\n\n\u25cf Number of
Meals served per evening meal service: 200\n\n\u25cf Timely delivery of meals to
beneficiaries: Delay of no more\n\nthan 10 minutes\n\n\u25cf Follow-up phase completed:

It\n\nwas developed based on acceptance of the related Project Charter and defines how this\n\nproject will be executed, monitored, controlled, and closed. This PMP is addressed to all\n\nstakeholders, including the management team, all sponsors, and the project team. Trecce\n\naims to mobilize chefs and volunteers to take part in a month-long pilot event at Mensa\n\nGiovanni Paolo II to offer nutritious meals to the economically disadvantaged while\n\nreducing food waste and fostering community engagement. The name Trecce, meaning\n\nbraids in Italian, derives from the intertwined connection the kitchen, chefs, and\n\ncommunity will have during this project.  $\n \Phi 4 ext{ of } 25\n n. 2 ext{ ASSUMPTIONS AND CONSTRAINTS} n. The Assumption$ and Constraints matrix is a very crucial component of the Risk\n\nManagement Plan. It is very important in forecasting, which is important in building a\n\nproject vision, and identifying project deliverables. Constraints on the other hand could\n\nserve as potential risks if not well managed. The matrix can serve as a guide to the \n\nProject Management Team in identifying all known risks.\n\nPlease refer to the Assumption and Constraints matrix for a detailed description of all\n\nregistered project assumptions and constraints. The matrix can be found in the Risk\n\nManagement Plan folder.\n\nSee Annex 1: Assumption and constraints\n\nPage 5 of 25\n\n\n\n2 SCOPE MANAGEMENT\n\n2.1 REQUIREMENTS DOCUMENTATION\n\nThe requirements of Trecce include all needs to lead to a successful food service for\n\nbeneficiaries. These include acquiring the needed stakeholders, having an adequate\n\nlocation for food preparation and service, providing schedules to stakeholders, and the \n\nmeans to analyze program success.\n\n2.2 REQUIREMENTS TRACEABILITY MATRIX\n\nSee Annex 2: Requirements Traceability Matrix\n\n2.3 WORK BREAKDOWN STRUCTURE\n\nThe Trecce Work Breakdown Structure (WBS) categorizes all work needed to complete\n\nthe project and represents 100% of the scope. The WBS is broken down into the \n\nfollowing format:\n\n1. Project Management\n\n1.1. Execution\n\n1.1.1. Communication Plan Execution\n\n1.1.2. Project Work Execution\n\n1.1.3. Risk Response Execution\n\n1.2. Monitoring & Damp; Controlling\n\n1.2.1. Risk Monitoring\n\n1.2.2. Schedule & mp; Milestone Documents\n\n1.3.2. Project Close\n\n2. Planning\n\n2.1. Procurement\n\n2.1.1. Food/service supplies\n\n2.1.2. Transportation for food/materials\n\n2.2. Schedule\n\n2.2.1. Chef schedule\n\n2.2.2. Volunteer schedule\n\n2.2.3. Timeline for day of service\n\n2.3. Location\n\n2.3.1. Site visit to kitchen\n\n2.3.2. Kitchen space checklist $\n\n2.3.3$ . Dining space checklist $\n\n2.4$ . KPIs $\n\n2.6$  of 25 $\n\n\n3.6$  $Recruitment \\ \n 3.1. Chefs \\ \n 3.1.1. Chef pre-selection meetings \\ \n 3.1.2. Chef \\ \n 3.1.2. Chef \\ \n 3.1.3. Chef \\ \n$ partnership agreements\n\n3.1.3. Chef confirmation\n\n3.1.4. Pre-month-of-service meetings with chefs\n\n3.2. Partners\n\n3.2.1. Partner pre-selection meetings\n\n3.2.2. Partner agreements\n\n3.2.3. Confirmation of partners\n\n3.2.4. Partner pre-month-ofservice meetings\n\n3.3. Volunteers\n\n3.3.1. Development of recruitment/advertising materials $\n\n3$ . 3. 2. Marketing launch $\n\n3$ . 3. 3. Volunteer sign up period $\n\n3$ . 3. 4.

Volunteer roles determination\n\n3.4. Team Building Event\n\n4. Month of Service\n\n4.1. Food Coordination\n\n4.1.1. Donation food delivery\n\n4.1.2. Menu selection\n\n4.1.3. Purchased food delivery\n\n4.2. Volunteer coordination\n\n4.2.1. Kitchen volunteer coordination\n\n4.2.2. Service area volunteer coordination\n\n4.3. Site coordination\n\n4.3.1. Kitchen coordination\n\n4.3.2. Food service area coordination\n\n4.4. Food Service\n\n5. Post Service Month Evaluation\n\n5.1. Feedback\n\n5.1.1. Chef feedback meetings\n\n5.1.2. Volunteer feedback via surveys\n\n5.1.3. Beneficiaries feedback via verbal questions\n\n5.1.4. Partner feedback meetings\n\n5.2. Data Analyzation\n\n5.2.1. KPI analyzation\n\n5.2.2. Feedback analyzation\n\n5.2.3. Feedback report\n\n5.3. Milestone Review Meeting\n\nSee Annex 3: WBS Dictionary\n\nSee Annex 4: ProjectLibre WBS\n\n2.3.1 CHANGE MANAGEMENT PLAN\n\nIf any stakeholder believes a change to the project scope or schedule is necessary, they\n\nPage 7 of 25\n\n\nwill be required to complete the Trecce Change Request Form. Once completed, they will\n\nneed to email this form to the project management team, indicated in the project charter. \n\nAt that time, the project management team will review the request and determine if the\n\nchange is approved or denied, completing any research on the change as needed. If\n\napproved, the project management team will be responsible for informing the affected\n\nstakeholders and updating any related project documents such as the schedule, activity\n\nlist, risk register, responsibility assignment matrix, or any document the PM team deems\n\naffected. If the request is denied, the PM team should respond to the stakeholder who\n\nrequested the change, indicating the reason for the denial.\n\nSee Annex 5: Change Request Form\n\n2.4 PROJECT SCHEDULE MANAGEMENT\n\nThe project schedule has been broken into the following phases: planning, recruitment, a\n\nmonth of service, and a post-service-month evaluation. The timeline for each phase\n\ndiffers due to project work needs, the man hours needed to complete the phase, observed\n\nholidays in Rome, and being mindful of our external stakeholders' schedules. \n\nDuring the planning phase, the main tasks will include procurement of materials, \n\nscheduling for the month of service, and food kitchen logistics. The timeline for this \n\nphase starts three months before the month of service and will last until the end of \n\nSeptember. As chefs and partners will dictate planning details, a lot of the work in this\n\nphase will occur after recruitment.\n\nThe recruitment of partners has already started in September of 2022. As Trecce\n\nrelies on donors to fund the project, it is important to receive around 50% of our\n\ndonation goal before the kickoff meeting on May 2, 2023. Therefore, we felt the urgency\n\nto start requesting donations as soon as possible. The recruitment of chefs will start at\n\nthe project kickoff and last until June 30, 2023. Holding this recruitment early on allows\n\nfor the most preparation of schedules and planning. Volunteers will start to be recruited\n\nonce marketing materials are launched and can sign up all the way up to the month of\n\nservice.\n\nThe timeline for the month of service includes all activities needed to conduct a\n\ndinner service successfully. Dinner service days include Tuesdays, Wednesdays, and\n\nPage 8 of 25\n\n\nThursdays. The food delivery will take place on Mondays, Tuesdays, and Wednesdays, \n\none day before the meal service, to ensure our chefs have time to properly inspect the \n\ndonated food, determine a menu, and request any food items that need to be bought to\n\ncomplete the meal.\n\nFor the post-service-month evaluation, the goal is to understand whether or not this\n\npilot program has been successful or not. The schedule includes time to hear the\n\nopinions of chefs, partners, volunteers, and beneficiaries to understand the program's\n\npros and cons. Once all data is

collected, the project management team will analyze this \n\ndata and compile a report stating their opinion. \n\n2.4.1 ACTIVITY LIST AND ATTRIBUTES\n\nThe Trecce activity list encompasses all activities that must be completed in order for\n\nthe project to be successful. These were developed from the Work Breakdown Structure\n\nand should include 100% of the project work. Included in the activity list are the activity\n\nID, activity Name, WBS ID, predecessor and successor activities, logical relationship\n\nindicators, leads/lags, the imposed deadline, and the location where the activity will take\n\nplace. The project management team is responsible for monitoring the activity list and \n\nmaking any necessary updates during the project lifecycle. \n\nSee Annex 7: Activity List\n\n2.4.2 MILESTONE LIST\n\nMilestone Deadline\n\nGaining committed donors to fund project at 50% 02/05/23\n\nMeeting recruitment requirements for chefs. 30/06/2023\n\nMeeting recruitment requirements for partners 30/06/2023\n\nMeeting recruitment requirements for volunteers 29/09/23\n\nThe first meal service 02/10/2023\n\nThe last meal service 31/10/2023\n\nAll expected feedback is collected for analysis 07/11/2023\n\nCompleting the follow-up phase tasks 15/11/2023\n\nSee Annex 8: Milestones\n\n2.4.3 PROJECT SCHEDULE\n\nSee Annex 6: ProjectLibre Gantt Chart\n\nSee Annex 7: Activity list\n\nPage 9 of 25\n\nhttps://drive.google.com/file/d/1KEQKckZ4wXzWammYTsR6mjKu65fmn an/view?usp=share link\n\nSee Annex 3: WBS Dictionary\n\nSee Annex 21: Day of Service Timeline\n\nPage 10 of 25\n\n\n3 COST MANAGEMENT\n\n3.1 BUDGET & CHEDULE OF EXPENSES\n\nAt the start of planning we assume that 50% of the project funding has been secured. \n\nFundraising activities will continue throughout the project. In addition, as this is a\n\ncharitable endeavor, the project management team has agreed to donate 60% of their\n\nsalary toward the project. The schedule of funding partners with donation amount, along\n\nwith a complete schedule of expenses and contingency funding amounts to be found in\n\nthe annex.\n\nSee Annex 9: Budget and Schedule of expenses\n\nPage 11 of 25\n\n\n4 PROCUREMENT AND QUALITY MANAGEMENT\n\n4.1 PROCUREMENT AND QUALITY MANAGEMENT PLAN OVERVIEW\n\nThe Trecce Procurement Management Plan aims to define the project\u2019s procurement and\n\nquality management process. The plan will set out the procurement and quality\n\nmanagement guidelines, define the risks associated with the procurement and quality\n\nmanagement strategy, and suggest the strategy for mitigating those risks. Specifically, \n\nthe Procurement Management Plan will define the following:\n\n\u25cf Project procurement partners and donating partners\n\n\u25cf Quality and procurement work breakdown structures (WBSs)\n\n\u25cf Establishing partner deliverables and deadlines\n\n\u25cf Which items are to be procured via direct purchase, pricing, and timelines\n\n\u25cf Determining material costs \n\n\u25cf Risks associated with procurement management\n\n\u25cf How procurement risks will be mitigated\n\n\u25cf How procurement is coordinated with project scope, budget, and schedule \n\n\u25cf Inventory and Quality Assessment Log Template\n\n\u25cf Quality management criteria\n\n\u25cf Specify all constraints pertaining to procurement\n\n\u25cf Performance metrics for procurement activities\n\nPlease refer to Annex 10 for the complete Trecce Procurement and Quality Management\n\nPlan.\n\nSee Annex 10: Trecce - Procurement and Quality Management Plan\n\nSee Annex 11: Inventory and Quality Assessment Log\n\nPage 12 of 25\n\n\n5 PROJECT RESOURCE MANAGEMENT\n\nThe Resource Management Plan defines the approach to identify, acquire, and manage\n\nthe human and physical resources needed for the Trecce project. Resources are key\n\ncomponents of any project. Therefore, successfully identifying all the required human\n\nand material resources required for this endeavor is fundamental. The Resource\n\nManagement Plan also encompasses the

Team Charter, a key document that outlines\n\nteam members' roles and responsibilities, team values, agreements, and operating\n\nguidelines. Please refer to the Resource Management Plan for a detailed description of all\n\nresources identified, how they will be managed and utilized for project success, and all\n\nnecessary information on the Team Charter.\n\nSee Annex 12: Project Resource Management Plan\n\n5.1 RESPONSIBILITY ASSIGNMENT MATRIX\n\nThe Responsibility Assignment Matrix is a key component of the Resource Management\n\nPlan, which is required to inform all project team members on the assignment of project\n\ntasks/activities. This matrix details each project work activity, clearly indicating the \n\nhuman resource responsible of performing specific project activity/s, who is accountable\n\nfor its success or failure, who is to be consulted before the activity is conducted, and who\n\nis to be informed. The Trecce Project Team chose the RASCI matrix as opposed to the \n\nRASCI matrix because of the support component in the former. The support component\n\nis vital to this project as this is a social endeavor based on humanitarian ideals; therefore, \n\nteamwork, collaboration, and support are highly emphasized for all stakeholders\n\ninvolved to boost the chances of project success. Please refer to the Responsibility\n\nAssignment Matrix for a detailed description of all project activities and assignments. \n\nSee Annex 13: RASCI Matrix\n\nPage 13 of 25\n\n\n6 PROJECT COMMUNICATIONS MANAGEMENT\n\nCommunication is critical in any project, not only for involving the stakeholders and \n\nincreasing stakeholder engagement but also to avoid potential mistakes caused by\n\nmiscommunication. For this project, we have established the following communicational\n\npillars that played a central role in our communication plan: transparency, to create a\n\nsafe space, clarity, and a safe approach to handling personal information. With these \n\npillars in mind, we have tried to communicate successfully with our target audience and \n\nall involved stakeholders. We have used a tailored approach to communicate with\n\nstakeholders, partners, volunteers, etc. This is accomplished through using different\n\ncommunication tools per group in order to communicate as well as possible. All the \n\nspecific information on which tactics and tools were used per group and a more detailed\n\nexplanation of our communication plan can be found in the following document. \n\nSee Annex 14: Communications Plan\n\n6.1 PROJECT COMMUNICATIONS MANAGEMENT PLAN\n\nIn the communication matrix, we have provided an overview of the outgoing\n\ncommunication stream. The table includes the information we provide, the recipient, the \n\ncommunication method, the frequency but also the person in charge of our project team. \n\nThe table also includes the assumptions and constraints we foresee for the information\n\nprovided.\n\nSee Annex 15: Communication Matrix\n\nSee Annex 22: Communication Pillars\n\nPage 14 of 25\n\n\n7 RISK MANAGEMENT AND REGISTER\n\nA project risk is any foreseen or unknown issue that can potentially have a positive or\n\nnegative impact on the project. The Trecce Project Team successfully worked with the \n\nrelevant stakeholders in identifying all known project risks. Mitigation strategies have\n\nbeen clearly defined in the risk matrix. Likewise, the recommended contingency action\n\nwill be utilized should the risk occur. Contingency plans have been put in place to\n\naddress any future unforeseen risk or residual risks. The importance of this matrix to\n\nproject success cannot be overemphasized, as risks can be quantified and calculated to\n\ndetermine the financial impact they could pose to the project. This tool is vital in tracking\n\nand managing all risks to mitigate, eliminate, or exploit any risk.\n\nSee Annex 16: Risk Register\n\n7.1 ISSUE LOG\n\nThe Issue Log is crucial during project execution to track and document all issues\n\nthat may arise during the

course of the project. This matrix is important in detailing and \n\nassigning issues to individuals and setting a due date for the successful resolution of \n\nissues. This document will help the Trecce Project Team to monitor, assign, and solve\n\nissues before they potentially grow into constraints or risks for the project.\n\nSee Annex 17: Issue Log matrix\n\nPage 15 of 25\n\n\n\n8 STAKEHOLDER ENGAGEMENT\n\nEngagement and dialogue with stakeholders are crucial if a project is to become \n\nsuccessful. Stakeholder engagement is the process of interacting with actors involved in\n\nand impacted by a project. It is particularly important to a project as its completion often\n\ndepends on how stakeholders see the project.\n\nVarious stakeholders are mobilized for this project, from the Coordinator and other\n\nstaff working at the Mensa Giovanni Paolo II who are directly involved in the daily\n\noperations and management of the establishment to the economically challenged\n\npersons who are the recipients of free meals provided by the Mensa\u2019s feeding program.\n\nIn between are the different service providers as well as range of volunteers involved in\n\nthe project, i.e., volunteer chefs and servers, current partners supporting the feeding\n\nprogram (i.e., Comune di Roma and the local church) and new partners providing funds\n\nand other resources mobilized for the project and the project team.\n\nPage 16 of 25\n\n\n\n8.1 PROJECT TRECCE KEY STAKEHOLDERS\n\nMensa Caritas Diocesana "Giovanni Paolo II" Coordinator and staff. Carlo\n\nVirtu is Mensa's Coordinator. As the key decision maker in Mensa, his leadership and\n\nbuy-in are crucial to successfully rolling out the project. At Mensa, he is responsible for\n\nCoordinating all activities of the Food Kitchen, reporting, and liaison with stakeholders. \n\nHe is ably supported by a team composed of an Assistant Coordinator (Simon\n\nEsuperanzi), an Administrative Officer (Massimo Ceccarelli), and a Cleaning/\n\nOrganization Staff (Brenda Longo). This team, in particular its Coordinator, is contacted\n\nand consulted right from the very start of the project where the Trecce Project concept\n\nwas presented. After listening to and taking into account their inputs, the overall project\n\nidea was revised, and from which the overall work plan and budget were developed. The\n\nteam is obviously very much involved in the pilot project implementation and in\n\nevaluating its effectiveness after completing the pilot phase. It is important that\n\ninteraction with this group is carried out in person, with clear agreements documented in\n\nwriting to avoid any misunderstanding and miscommunication.\n\nComune di Roma and Caritas Roma. As the two organizations supporting the \n\ncurrent feeding program at Mensa, it is important that the Trecce project builds on the \n\nongoing program they currently support. As with the Mensa team, both Comune and\n\nCaritas are contacted and consulted right from the very start of the project, where the \n\nTrecce Project concept was presented. Their inputs and suggestions are integrated into\n\nthe design of the project, and their full support moving forward was solicited. The Project\n\nteam assures the Comune and Caritas that the Trecce Project will build on the current\n\nfeeding program that they are supporting and that any changes to be made are only to\n\nimprove it. Regular and open communication, both verbal and written, takes place\n\nregularly, with meeting agreements documented.\n\nProject beneficiaries. The project is designed with the economically disadvantaged in\nmind, i.e., hundreds of people who rely on free meals provided by Mensa. But free meals\n\ndo not need to be less nutritious. Trecce Project is all about serving nutritious meals\n\nprepared by volunteer chefs/student chefs. Feedback from the beneficiaries will be\n\nsolicited verbally during or right after each meal service. \n\nPage 17 of 25\n\n\nFood transport service provider. Transport provider LogTech SRL is mobilized to\n\nensure timely delivery of food

items/ingredients, either donated or purchased. They are\n\nbriefed as regards the project, emphasizing the critical role they play in avoiding delays\n\nand smooth execution of daily plans. \n\nToo Good To Go, Glovo, and Food for Good. These partners are all engaged in\n\nreducing food waste and in making nutritious food accessible. Trecce project partners\n\nwith them to provide ready meals to the Trecce project in case of insufficient meals\n\nduring project execution. Also, should there be excess food items prepared, they are also\n\nmobilized to deliver to other individuals or other charities in Rome. Terms of\n\ncollaboration with these partners are spelled out in a Partnership Agreement which is\n\ndiscussed and agreed upon with them following the presentation and discussion of the\n\nTrecce Project prior to its kickoff.\n\nPartner chefs, Culinary Schools, and Chef associations. There is no shortage of \n\nfood practitioners in Rome. Foremost of these are various restaurant chefs, culinary\n\nschools, and chef associations in the city. With thousands of members among \n\nprofessional chefs and restaurateurs (in the case of associations) and future chefs and\n\nteachers (in the case of culinary schools), these establishments is a rich pool of volunteer\n\nchefs, teachers, and students whose values and passion are fully aligned with the\n\nphilosophy of the Trecce project, i.e., making nutritious food available while reducing\n\nfood loss and waste. Chef associations are solicited to entice and encourage their member\n\nchefs to volunteer for the program and cook meals for the project beneficiaries. \n\nRestaurant chefs who are not members of any of the associations are also approached to\n\nvolunteer as well. In the case of culinary schools, a special arrangement is explored\n\nwhere the involvement of the culinary students in the project can be counted and\n\nvalidated as part of their community immersion and practices within their own\n\curriculum. The Trecce Project will be pitched to these establishments and individuals. \n\nTerms of collaboration are spelled out in a Partnership Agreement that will be discussed\n\nand signed among the parties concerned. \n\nPartner foundations. Foundations are private entities serving public goals. Prospect\n\nresearch was carried out to identify private foundations in Rome whose mission and \n\nobjectives are aligned with the Trecce Project objectives. The various foundations\n\nPage 18 of 25\n\n\nidentified as partners for the project operate in Rome, promoting and supporting causes\n\nsuch as community welfare and social inclusion (e.g., ACRI), families and people in\n\neconomic difficulty, migrants and refugees (e.g., Enel Cuore Onlus), health and aid to the \n\nunderprivileged (e.g., Fondazione di Roma), and food security (e.g., Coldiretti). These\n\ninstitutions will be requested, following a pitch for support, to contribute financial\n\nresources to cover the cost of ingredients (should there not be sufficient leftovers from\n\nthe restaurant of volunteer chefs) and project operations (transport, publicity, etc.). \n\nPartner supermarkets. Italy has a law that will make supermarkets donate more of \n\ntheir waste food to charities. The Trecce project will build on this law by soliciting\n\npartner supermarkets (Conad, Coop, Carrefour, Tuodis) to donate unsold perishable\n\nitems (e.g., fruits, vegetables, and other ingredients) that are still suitable for\n\nconsumption through the project. This contributes to minimizing their waste while\n\nimproving their community involvement and enhancing their corporate social\n\nresponsibility. The supermarket branches identified are those within close vicinity of the \n\nMensa in order to minimize transport but also for further visibility of the supermarket as\n\nwell. The Trecce project will be presented to the management of the supermarket\n\nbranches identified. The terms and conditions of their involvement are specified in a\n\nPartnership Agreement that is discussed, agreed upon, and signed by concerned

parties. \n\nVolunteer servers. Trecce Project will rely on a set of volunteer servers of different\n\nprofiles building on their high level of social and ecological awareness and sense of \n\nservice (Profile 1); on their interest to spend available and gain insights from their\n\nexperience while at the same time giving them a sense of worth through this community\n\nengagement work (Profile 2); and on their curiosity to discover and know the other side\n\nof Rome while giving them an opportunity to be part of a community. They will be\n\nrecruited to augment human power needs to help in the preparation and cleaning of the \n\nvenue, keep order during meal service, and accompany/talk with the beneficiaries. As\n\noutlined in the Communication Plan, teasers/flyers with details on how to volunteer are\n\nprepared and posted around Rome. A briefing/orientation session will be organized and\n\nconducted. Volunteer Agreement/Consent that spells out the work that needs to be\n\ncarried out, roles and responsibilities as volunteer servers, as well as service schedules, \n\nare prepared, presented, and discussed with the volunteers. \n\nPage 19 of 25\n\n\nVisibility/outreach partners (SDG2Hub, Eataly, Mercato Centrale Roma). \n\nTrecce Project also aspires to inspire other cities to come up with similar initiatives. To\n\nthis end, partners with advocacy groups (e.g., SDG2Hub) will be mobilized for further\n\nvisibility. Likewise, the participation of establishments with high potential for local\n\noutreach for volunteers inc. stall owners/cooks, and individual donors (e.g., Eataly, \n\nMercato Centrale Roma) will be sought to contribute to the project as well in terms of \n\nproviding space to display initiative's poster (if appropriate); providing connections to\n\nsolicit chef volunteers; but also to collect any unused ingredients from the restaurant(s) $\n\$ noperating in their establishment. As with other partners, the involvement of these\n\ninstitutions will be requested, following a pitch for support process. \n\nAcross all stakeholders involved, feedback shall be solicited in various ways (via\n\nsurvey, phone, or in-person conversation) for further improvement as well as to assess\n\npossible follow-up/next steps. Also, issues and disagreements, should they arise, shall be \n\nsettled amicably by the parties concerned. Finally, the contribution of all partners is\n\nacknowledged and recognized through posters displayed during meal service (e.g., \u201cThis\n\nevening\u2019s/week's meal is supported/brought to you by Partner XYZ\u201d). \n\nThe detailed list of these stakeholders, the rationale for their involvement, and their\n\nspecific involvement/participation in the project are presented as Annexes of this\n\ndocument.\n\n8.2 STAKEHOLDER REGISTER, STAKEHOLDER MAP, STAKEHOLDER\n\nENGAGEMENT ASSESSMENT MATRIX AND STAKEHOLDER\n\nENGAGEMENT PLAN\n\nSee Annex 18: STH Register\n\nSee Annex 19: STH Engagement Assess. versatile and adaptable business leader originally from New York City, I have built my
career\n\nacross various industries, developing a keen ability to navigate complex
environments. With a\n\nBachelor's degree in Business Administration and a
Master's in Organizational Leadership\n\n(expected 2024), my career has been
marked by a passion for continuous learning, a strong\n\nfoundation in project
management, and a commitment to customer success. From improving\n\noperational
efficiencies to fostering strong client relationships, my work is driven by data-
driven\n\nanalytical thinking and a dedication to helping others achieve their
goals.\n\nSkills\n\n- Project Management\n\n- Customer Success\n\n- Data Analysis\n\n-
Process Improvement\n\n- Relationship Building\n\n- Full-Stack Software
Development\n\nProfessional Experience\n\nCustomer Success Manager (2022 to 2023, San
Francisco, CA)\n\n- Increased user satisfaction by 20 percent within six months
through strategic organization and \n\nanalysis of user interaction data. \n\n-
Generated a 15 percent surge in qualified sales leads over a quarter by implementing a
dynamic\n\noutreach strategy.\n\n- Enhanced data accuracy by 30 percent through
meticulous consolidation of interaction data in the\n\nCRM system.\n\n- Aligned these
initiatives with MPM5300 Objective 4 by leveraging CRM tools to effectively
manage\n\ncustomer projects and interactions, evaluating their impact on overall
project success. \n\n\nPremier Affiliate Service Coordinator (2022, Jacksonville,
FL)\n\n- Achieved an 86 percent on-time completion rate for fire systems' annual
and quarterly inspections. \n\n- Successfully managed a rolling portfolio of fire
systems work orders totaling over 500,000 dollars. \n\n- Enhanced administrative skills
required to evaluate and organize complex project management\n\ntasks, reflecting
MPM5300 Objective 2 by modeling logical and administrative skills crucial
for\n\neffective project management.\n\nSoftware Development Associate (2019, Tampa,
FL)\n\n- Developed and debugged full-stack software applications, contributing to a 15
percent increase in\n\noverall system performance.\n\n- Created a web-based expense
reimbursement system, reducing processing time by 25 percent.\n\n- These experiences
aligned with MPM5300 Objective 4 by evaluating and implementing\n\ntechnological tools
that optimized project outcomes and streamlined processes. \n\nService Delivery Manager
(2019, Jacksonville, FL)\n\n- Achieved a 99.5 percent on-time performance rate by
applying advanced project management\n\ntechniques.\n\n- Led community engagement
initiatives, resulting in a 10 percent increase in positive public\n\nrelations
sentiment. \n\ This role demonstrated mastery of MPM5300 Objectives 1 and 3 by
applying comprehensive\n\nproject management methods and making decisions that had a
significant impact on operational\n\noutcomes.\n\nManager of Operations and Data
Control (2014 to 2017, Jacksonville, FL)\n\n- Improved process documentation and
reporting of mechanical incidents, leading to a 15 percent\n\nreduction in incident
rates. \n\n- Provided operations support and guidance to field employees, achieving a
99.5 percent on-time\n\nrepair completion rate.\n\n\n- Strengthened logical and
administrative skills in managing complex projects, aligning with\n\nMPM5300 Objective
2 by enhancing the ability to evaluate and manage detailed project tasks. \n\nPrior
Learning\n\nThroughout my professional journey, I have developed a comprehensive
understanding of project\n\nmanagement methods, honed my logical and administrative
skills, and gained insights into the \n\nconnections between decision-making processes
```

```
and their impacts. My experiences align with the \n\nMPM5300 objectives, demonstrating
my ability to evaluate and implement project management\n\ntechnological tools,
develop effective action plans, and lead complex initiatives. \n\nEducation\n\- M.A.
Organizational Leadership, Expected completion September 2024\n\n- B.S. Business
Administration, Metropolitan State University, 2012\n\n- Customer Success Fellowship,
SV Academy, 2022\n\nCertifications\n\n- TEFL Certification, The Language House, Prague
(2017)\n\n- Project Management Certification, Rome Business School (2023)\n\n",

versatile and adaptable business leader originally from New York City, I have built my
career\n\nacross various industries, developing a keen ability to navigate complex
environments. With a\n\ Bachelor&\#x27;s degree in Business Administration and a
Master's in Organizational Leadership\n\n(expected 2024), my career has been
marked by a passion for continuous learning, a strong\n\nfoundation in project
management, and a commitment to customer success. From improving\n\noperational
efficiencies to fostering strong client relationships, my work is driven by data-
driven\n\nanalytical thinking and a dedication to helping others achieve their
goals.\n\nSkills\n\n- Project Management\n\n- Customer Success\n\n- Data Analysis\n\n-
Process Improvement\n\n- Relationship Building\n\n- Full-Stack Software
Development\n\nProfessional Experience\n\nCustomer Success Manager (2022 to 2023, San
Francisco, CA)\n\n- Increased user satisfaction by 20 percent within six months
through strategic organization and \n\nanalysis of user interaction data. \n\n-
Generated a 15 percent surge in qualified sales leads over a quarter by implementing a
dynamic \\ n\odo strategy. \\ n\odo Enhanced data accuracy by 30 percent through
meticulous consolidation of interaction data in the \n\nCRM system.\n\n- Aligned these
initiatives with MPM5300 Objective 4 by leveraging CRM tools to effectively
manage\n\ncustomer projects and interactions, evaluating their impact on overall
project success. \n\n\nPremier Affiliate Service Coordinator (2022, Jacksonville,
FL)\n\n- Achieved an 86 percent on-time completion rate for fire systems' annual
and quarterly inspections. \n\n- Successfully managed a rolling portfolio of fire
systems work orders totaling over 500,000 dollars. \n\n- Enhanced administrative skills
required to evaluate and organize complex project management\n\ntasks, reflecting
MPM5300 Objective 2 by modeling logical and administrative skills crucial
for\n\neffective project management.\n\nSoftware Development Associate (2019, Tampa,
FL)\n\n- Developed and debugged full-stack software applications, contributing to a 15
percent increase in\n\noverall system performance.\n\n- Created a web-based expense
reimbursement system, reducing processing time by 25 percent. \n\n- These experiences
aligned with MPM5300 Objective 4 by evaluating and implementing\n\ntechnological tools
that optimized project outcomes and streamlined processes. \n\nService Delivery Manager
(2019, Jacksonville, FL)\n\n- Achieved a 99.5 percent on-time performance rate by
applying advanced project management\n\ntechniques.\n\n- Led community engagement
initiatives, resulting in a 10 percent increase in positive public\n\nrelations
sentiment.\n\n- This role demonstrated mastery of MPM5300 Objectives 1 and 3 by
applying comprehensive\n\nproject management methods and making decisions that had a
significant impact on operational\n\noutcomes.\n\nManager of Operations and Data
Control (2014 to 2017, Jacksonville, FL)\n\n- Improved process documentation and
reporting of mechanical incidents, leading to a 15 percent\n\nreduction in incident
rates. \n\n- Provided operations support and guidance to field employees, achieving a
99.5 percent on-time\n\nrepair completion rate.\n\n\n- Strengthened logical and
administrative skills in managing complex projects, aligning with\n\nMPM5300 Objective
2 by enhancing the ability to evaluate and manage detailed project tasks.\n\nPrior
Learning\n\nThroughout my professional journey, I have developed a comprehensive
```

understanding of project\n\nmanagement methods, honed my logical and administrative skills, and gained insights into the \n\nconnections between decision-making processes and their impacts. My experiences align with the \n\nMPM5300 objectives, demonstrating my ability to evaluate and implement project management\n\ntechnological tools, develop effective action plans, and lead complex initiatives. \n\nEducation\n\n- M.A. Organizational Leadership, Expected completion September 2024\n\n- B.S. "update_time": null, "content": {"content_type": "text", "parts": ["Certainly! Below
is the narrative essay that integrates all four course objectives in a cohesive format,
linking your work experience to the learning outcomes of the Project Management
course:\n\n---\n\nIn my professional journey, I have developed a wide range of project
management skills, cultivated through various roles that demanded strategic planning,
decision-making, and operational management. One of my most significant
accomplishments in this area was my leadership role in the Trecce Capstone Project,
part of my Project Management Certification at Rome Business School. This project
required me to implement various project management methodologies, including the Work
Breakdown Structure (WBS), risk management, and Agile practices. Leading the quality
and cost management aspects, I ensured that the project was delivered on time and
within budget, demonstrating my comprehensive understanding of project management
methods and tools. \n\n0ver a period of six months, I worked closely with diverse
stakeholders, managing a team that included chefs, volunteers, and external partners.
My responsibilities included developing the project timeline, ensuring stakeholder
engagement, and aligning resources to meet project milestones. The Trecce project not
only honed my ability to manage complex projects but also reinforced my understanding
of the nuances involved in project planning, execution, and monitoring. This
experience directly aligns with the first objective of the Project Management course:
developing a comprehensive knowledge of project management methods, styles, and
abilities. By applying structured project management approaches in a real-world
setting, I was able to bring the project to a successful conclusion while maintaining
the highest standards of quality and efficiency. \n\nIn addition to the Trecce project,
my previous roles further contributed to my expertise in modeling logical and
administrative skills, as required by the second course objective. During my time as
Manager of Operations and Data Control at CSX Transportation, I was responsible for
overseeing the resolution of over 1,000 support cases each month. This role required
me to structure complex tasks, prioritize them based on urgency, and allocate
resources effectively to ensure timely outcomes. My LinkedIn endorsements for skills
such as Operations Management and Project Planning serve as external validation of
these abilities. These endorsements reflect the feedback and recognition from
colleagues who have witnessed my capacity to manage operations efficiently while
staying aligned with project goals. \n\nIn my position as a Service Delivery Manager at
Jacksonville Transportation Authority (JTA), I further demonstrated my ability to
```

organize and analyze complex project management tasks. In this role, I was tasked with managing transit schedules, ensuring on-time performance, and addressing community engagement initiatives. These responsibilities required me to implement logical frameworks and administrative skills to evaluate and execute action plans that directly impacted the organization\u2019s goals. My presentation on service delivery at JTA highlighted my expertise in developing strategies that optimized both operational efficiency and customer satisfaction, a direct reflection of my ability to meet the demands of the second learning objective. \n\nMy experience at JTA also provided a valuable foundation for meeting the third objective of the Project Management course, which focuses on decision-making methods and their broader implications. In my role, I was responsible for making decisions that affected not only operational procedures but also community relations, individual team members, and revenue outcomes. For instance, managing transit schedules involved balancing the needs of the community with the logistical and financial constraints of the organization. The decisions I made directly impacted safety protocols, on-time performance, and customer satisfaction. My ability to assess potential risks and make informed decisions with far-reaching consequences underscores my proficiency in this area.\n\nAdditionally, in my role as Premier Affiliate Service Coordinator at Commercial Fire, I was tasked with managing a portfolio of fire systems work orders valued at over \$500,000. This position required careful attention to the relationships between procedures, goods, and financial outcomes. The role involved coordinating with multiple stakeholders, including vendors and customers, to ensure that projects were completed on time and within budget. My decisions during this time had a direct impact on revenue generation and operational success, further reinforcing my ability to meet the third learning objective. \n\nThe final objective of the Project Management course, evaluating project management technological tools, is another area where I have developed significant expertise. At Acadly, during my tenure as a Customer Success Manager, I utilized CRM tools to enhance customer engagement and optimize project outcomes. By leveraging these tools, I was able to improve data accuracy by 30% and increase user satisfaction by 20% within six months. The use of CRM systems allowed me to streamline processes and manage customer interactions more effectively, demonstrating my ability to evaluate and implement technological tools for project success. My endorsements on LinkedIn for skills such as Project Planning and Operations Management further attest to my ability to integrate technology into project management processes. \n\nIn addition, my academic training at Rome Business School emphasized the importance of using technological tools in project management. During the course, I gained hands-on experience with various project management software, including tools designed for risk management and Agile methodologies. These experiences have equipped me with the knowledge to select the appropriate tools for different project environments, ensuring that projects are managed efficiently and effectively. \n\nIn conclusion, my professional experiences, supported by endorsements, certifications, and project work, align closely with the learning objectives of the Project Management course. Through roles that required strategic planning, decisionmaking, and the use of technological tools, I have developed a robust skill set that reflects my comprehensive understanding of project management. Whether it was leading the Trecce project, managing complex operations at CSX Transportation, or optimizing processes at Acadly, each experience has contributed to my ability to meet the course objectives and apply these skills in real-world settings.\n\n---\n\nThis narrative essay now reflects a continuous story, linking your professional journey to the course

I'11 adjust the narrative accordingly to reflect that it was a planning project and incorporate your real-world experience at CSX. Here's the revised version:\n\n---\n\nIn my professional journey, I have developed a wide range of project management skills, cultivated through various roles that demanded strategic planning, decision-making, and operational management. One of the most significant learning experiences in this regard was my involvement in the Trecce Capstone Project, which was part of my Project Management Certification at Rome Business School. This project, although rooted in reality, was a planning exercise where I worked on creating a comprehensive project management plan. My role in the project included designing the Work Breakdown Structure (WBS), risk management plans, and stakeholder engagement strategies. Although the project was not executed, this experience reinforced my understanding of project management methods and tools, including Agile and risk management practices, which align with the first objective of the Project Management course: developing a comprehensive knowledge of project management methods, styles, and abilities. \n\nWhile Trecce was a valuable academic exercise, my hands-on experience at CSX Transportation provided me with real-world application of these skills. At CSX, I was responsible for overseeing and reporting remotely on rerailment operations during train derailments. This role required me to organize and dispatch mechanical staff and contractors, order heavy lifting equipment, and manage interdepartmental communications to ensure the timely resolution of derailments. This experience demonstrates my ability to manage complex, high-stakes projects under pressure, coordinating multiple teams and resources, which directly aligns with the first course objective. \n\nIn addition to my role at CSX, my previous positions further contributed to my expertise in modeling logical and administrative skills, as required by the second course objective. During my time as Manager of Operations and Data Control at CSX, I was responsible for overseeing over 1,000 support cases each month. This role required me to structure complex tasks, prioritize them based on urgency, and allocate resources effectively to ensure timely outcomes. My LinkedIn endorsements for skills such as Operations Management and Project Planning serve as external validation of these abilities, reflecting my capacity to manage operations efficiently while staying aligned with project goals. \n\nMy role as Service Delivery Manager at Jacksonville Transportation Authority (JTA) further demonstrated my ability to organize and analyze complex project management tasks. In this role, I managed transit schedules, ensuring on-time performance, and addressing community engagement initiatives. These responsibilities required me to implement logical frameworks and administrative skills to evaluate and execute action plans that directly impacted the organization\u2019s goals. My presentation on service delivery at JTA highlighted my expertise in developing strategies that optimized both operational efficiency and customer satisfaction. \n\nAt CSX, during the rerailment operations, I also had to make critical decisions with wide-reaching impacts, reflecting the third objective of the Project Management course, which focuses on decision-making methods and their broader implications. Managing derailments involved coordinating between mechanical, operational, and administrative teams, making strategic decisions that affected safety, operational continuity, and financial outcomes. These decisions had far-reaching consequences, from managing human resources in real-time to coordinating heavy machinery and logistics, which honed my

ability to assess risk and make informed decisions under pressure. \n\nAdditionally, in my role as Premier Affiliate Service Coordinator at Commercial Fire, I managed a portfolio of fire systems work orders valued at over \$500,000. This position required careful attention to the relationships between procedures, goods, and financial outcomes. The role involved coordinating with multiple stakeholders, including vendors and customers, to ensure that projects were completed on time and within budget. My decisions during this time had a direct impact on revenue generation and operational success, further reinforcing my ability to meet the third learning objective. \n\nThe final objective of the Project Management course, evaluating project management technological tools, is another area where I have developed significant expertise. At Acadly, during my tenure as a Customer Success Manager, I utilized CRM tools to enhance customer engagement and optimize project outcomes. By leveraging these tools, I was able to improve data accuracy by 30% and increase user satisfaction by 20% within six months. The use of CRM systems allowed me to streamline processes and manage customer interactions more effectively, demonstrating my ability to evaluate and implement technological tools for project success. My endorsements on LinkedIn for skills such as Project Planning and Operations Management further attest to my ability to integrate technology into project management processes. \n\nIn addition, my academic training at Rome Business School emphasized the importance of using technological tools in project management. During the course, I gained hands-on experience with various project management software, including tools designed for risk management and Agile methodologies. These experiences have equipped me with the knowledge to select the appropriate tools for different project environments, ensuring that projects are managed efficiently and effectively. \n\nIn conclusion, my professional experiences, supported by endorsements, certifications, and project work, align closely with the learning objectives of the Project Management course. Through roles that required strategic planning, decision-making, and the use of technological tools, I have developed a robust skill set that reflects my comprehensive understanding of project management. Whether it was managing derailment operations at CSX, overseeing complex transportation schedules at JTA, or optimizing processes at Acadly, each experience has contributed to my ability to meet the course objectives and apply these skills in real-world settings. \n\n---\n\nThis revised version now reflects the real-world applications from your CSX role while keeping the academic experience from Trecce in the correct context. Would you like any further adjustments or additions?"]}, "status": "finished successfully", "end turn": true , "weight": 1.0, "metadata": {"citations": [], "content\_references": [], "gizmo\_id": null, "message type": null, "model slug": "gpt-40", "default model slug": "gpt-40", "pad": "AAAAAAAAAAAAAAA", "parent\_id": "0e9cd1ae-f9c2-438e-8610-0e4384701a33", "finish\_details": {"type": "stop", "stop\_tokens": [200002]}, "is\_complete": true, "request id": "8c54f7847ecfbael-MXP", "timestamp": "absolute"}, "recipient": "all", "channel": null}, "parent": "0e9cd1ae-f9c2-438e-8610-0e4384701a33", "children": ["aaa2b4f9-735f-4bd3-9a01-3aae45c20207"]}, "aaa2b4f9-735f-4bd3-9a01-3aae45c20207": {"id": "aaa2b4f9-735f-4bd3-9a01-3aae45c20207", "message": {"id": "aaa2b4f9-735f-4bd3-9a01-3aae45c20207", "author": {"role": "user", "name": null, "metadata": {}}, "create time": 1726701386.198663, "update time": null, "content": {"content type": "text", "parts": ["can you update this in light of understanding project trecce just was the development of the pmp plan and not its execution"]}, "status": "finished\_successfully", "end\_turn": null, "weight": 1.0, "metadata":

"\*\*Narrative\*\*: In the \*\*Trecce Capstone Project\*\* that I led as part of my Project Management Certification, I developed and implemented project management methodologies, such as Agile practices, stakeholder engagement, and risk management. My role as the lead for quality and cost management helped me establish the WBS, which I later monitored and adjusted to ensure project efficiency. These experiences are mirrored in real-world project management, including the use of decision-making frameworks and administrative oversight. \n\nI spent over six months managing the Trecce project, dedicating significant time to stakeholder coordination, developing work breakdown structures, and ensuring cost-effective project execution. The successful completion of this project demonstrates my ability to apply project management methods and strategies effectively.", "request\_id": "8c550b2e0d1d5249-MXP", "message\_source": null, "timestamp\_": "absolute", "message\_type": null}, "recipient": "all", "channel": null}, "parent": "6ab150a1-d9d1-4fd9-8988-9a2fee5ce434", "children": ["9ecd97ec-a38c-4dd1aea8-d167a0d1fe8b"]}, "9ecd97ec-a38c-4dd1-aea8-d167a0d1fe8b": {"id": "9ecd97ec-a38c-4ddl-aea8-d167a0d1fe8b", "message": {"id": "9ecd97ec-a38c-4ddl-aea8-d167a0d1fe8b", "author": {"role": "system", "name": null, "metadata": {}}, "create\_time": 1726701386.199159, "update\_time": null, "content": {"content\_type": "text", [""]}, "status": "finished\_successfully", "end\_turn": null, "weight": 1.0, "metadata": {"request\_id": "8c550b2e0d1d5249-MXP", "message\_source": null, "timestamp\_": "absolute", "message\_type": null, "is\_visually\_hidden\_from\_conversation": true}, "recipient": "all", "channel": null}, "parent": "aaa2b4f9-735f-4bd3-9a01-3aae45c20207", "children": ["b1695ff8-69eb-4eeb-8312-dd62264bbb7f"]}, "b1695ff8-69eb-4eeb-8312dd62264bbb7f": {"id": "b1695ff8-69eb-4eeb-8312-dd62264bbb7f", "message": {"id": "b1695ff8-69eb-4eeb-8312-dd62264bbb7f", "author": {"role": "assistant", "name": null, "metadata": {}}, "create time": 1726701423.865473, "update time": null, "content": {"content type": "text", "parts": [""]}, "status": "finished successfully", "end turn": null, "weight": 1.0, "metadata": {"message\_type": null, "model\_slug": "gpt-4o", "default\_model\_slug": "gpt-40", "parent\_id": "9ecd97ec-a38c-4dd1-aea8-d167a0d1fe8b", "request id": "8c550b2e0d1d5249-MXP", "timestamp": "absolute"}, "recipient": "all", "channel": null}, "parent": "9ecd97ec-a38c-4dd1-aea8-d167a0d1fe8b", "children": {"id": "fd18e2e9-62ab-49d0-926a-383d3e64f4c0", "message": {"id": "fd18e2e9-62ab-49d0-926a-383d3e64f4c0", "author": {"role": "assistant", "name": null, "metadata": {}}, "create time": 1726701423.86555, "update\_time": null, "content": {"content\_type": "text", "parts": ["Here is the revised version that accurately reflects your involvement in Project Trecce as a planning exercise rather than its execution:\n\n---\n\nIn my professional journey, I have developed a wide range of project management skills, cultivated through various roles that demanded strategic planning, decisionmaking, and operational management. One of the most significant learning experiences in this regard was my involvement in the Trecce Capstone Project, which was part of my Project Management Certification at Rome Business School. This project, although rooted in reality, was focused on the development of a comprehensive project management plan rather than its execution. My role in this project included designing the Work Breakdown Structure (WBS), formulating risk management strategies, and engaging with stakeholders through the planning phase. Although we did not implement the project, this experience reinforced my understanding of project management methodologies, tools, and frameworks, including Agile practices and risk mitigation strategies. \n\nWhile the Trecce project was a valuable academic exercise in planning, my hands-on experience at CSX Transportation provided me with real-world application

of these skills. At CSX, I was responsible for overseeing and reporting remotely on rerailment operations during train derailments. This role required me to organize and dispatch mechanical staff and contractors, order heavy lifting equipment, and manage interdepartmental communications to ensure the timely resolution of derailments. This experience demonstrates my ability to manage complex, high-stakes projects under pressure, coordinating multiple teams and resources, which directly aligns with the first course objective of developing a comprehensive knowledge of project management methods, styles, and abilities. \n\nIn addition to my role at CSX, my previous positions further contributed to my expertise in modeling logical and administrative skills, as required by the second course objective. During my time as Manager of Operations and Data Control at CSX, I was responsible for overseeing over 1,000 support cases each month. This role required me to structure complex tasks, prioritize them based on urgency, and allocate resources effectively to ensure timely outcomes. My LinkedIn endorsements for skills such as Operations Management and Project Planning serve as external validation of these abilities, reflecting my capacity to manage operations efficiently while staying aligned with project goals. \n\nMy role as Service Delivery Manager at Jacksonville Transportation Authority (JTA) further demonstrated my ability to organize and analyze complex project management tasks. In this role, I managed transit schedules, ensuring on-time performance, and addressing community engagement initiatives. These responsibilities required me to implement logical frameworks and administrative skills to evaluate and execute action plans that directly impacted the organization\u2019s goals. My presentation on service delivery at JTA highlighted my expertise in developing strategies that optimized both operational efficiency and customer satisfaction. \n\nAt CSX, during the rerailment operations, I also had to make critical decisions with wide-reaching impacts, reflecting the third objective of the Project Management course, which focuses on decision-making methods and their broader implications. Managing derailments involved coordinating between mechanical, operational, and administrative teams, making strategic decisions that affected safety, operational continuity, and financial outcomes. These decisions had far-reaching consequences, from managing human resources in real-time to coordinating heavy machinery and logistics, which honed my ability to assess risk and make informed decisions under pressure. \n\nAdditionally, in my role as Premier Affiliate Service Coordinator at Commercial Fire, I managed a portfolio of fire systems work orders valued at over \$500,000. This position required careful attention to the relationships between procedures, goods, and financial outcomes. The role involved coordinating with multiple stakeholders, including vendors and customers, to ensure that projects were completed on time and within budget. My decisions during this time had a direct impact on revenue generation and operational success, further reinforcing my ability to meet the third learning objective. \n\nThe final objective of the Project Management course, evaluating project management technological tools, is another area where I have developed significant expertise. At Acadly, during my tenure as a Customer Success Manager, I utilized CRM tools to enhance customer engagement and optimize project outcomes. By leveraging these tools, I was able to improve data accuracy by 30% and increase user satisfaction by 20% within six months. The use of CRM systems allowed me to streamline processes and manage customer interactions more effectively, demonstrating my ability to evaluate and implement technological tools for project success. My endorsements on LinkedIn for skills such as Project Planning and Operations Management further attest to my ability to integrate technology into project management processes. \n\nIn addition, my academic training at Rome Business

School emphasized the importance of using technological tools in project management. During the course, I gained hands-on experience with various project management software, including tools designed for risk management and Agile methodologies. These experiences have equipped me with the knowledge to select the appropriate tools for different project environments, ensuring that projects are managed efficiently and effectively. \n\nIn conclusion, my professional experiences, supported by endorsements, certifications, and project work, align closely with the learning objectives of the Project Management course.
