The course aims to equip them with the necessary skills and tools to prepare their children for real-life situations. Additionally, I want to create a customizable example curriculum for students aged between 5 to 18 years. This curriculum will cover traditional subjects like social studies, math, science, literature, and communication. However, the focus will be on teaching students functional skills and real-life applications of these subjects. Therefore, I will be creating two linked curriculums one for parents (home-school educators) and the other for their students."]}, "status": "finished\_successfully", "end\_turn": null, "weight": 1.0, "metadata": {"request id": "86fc9bd2a95977fa-FC0", "timestamp\_": "absolute", "message\_type": null}, "recipient": "all", "channel": null}, "parent": "62a6e6ee-ebc1-427c-adee-4c5be8ce9872", "children": ["2eaa19e5-7099-497e-98bf-2f20d932debe"]}, "2eaa19e5-7099-497e-98bf-2f20d932debe": {"id": "2eaa19e5-7099-497e-98bf-2f20d932debe", "message": {"id": "2eaa19e5-7099-497e-98bf-2f20d932debe", "author": {"role": "assistant", "name": null, "metadata": {}}, "create\_time": 1712352366.845026, "update\_time": null, "content": {"content\_type": "text", "parts": ["Developing a dual curriculum that serves both parents without a background in education and their children is a brilliant initiative. The aim to focus on real-life applications of traditional subjects ensures that students acquire not only knowledge but also practical skills they can apply in everyday situations. Here's how you can structure these curriculums:\n\n### Curriculum for Parents (Home-School Educators)\nThis curriculum is designed to empower parents with the tools and knowledge to facilitate their children's learning effectively. It will include:\n\n1. \*\*Educational Theories and Child Development\*\*: Brief modules on how children learn at different stages, including cognitive development from ages 5 to 18. This foundation will help parents understand the " why" behind the curriculum activities and adapt teaching strategies to their child's learning style.\n\n2. \*\*Subject-Specific Teaching Strategies\*\*:\n - For each subject (social studies, math, science, literature, and communication), provide an overview of teaching methodologies that encourage hands-on learning and real-life application. \n - Include tips for creating an engaging learning environment at home, fostering curiosity, and encouraging independent learning. \n\n3. \*\*Real-Life Application of Knowledge\*\*: Practical sessions on how to integrate knowledge with everyday life. For example, using grocery shopping as a math lesson (budgeting, calculating discounts, etc.), or a nature walk as a science lesson (identifying plants, understanding ecosystems). \n\n4. \*\*Assessment and Feedback\*\*: How to assess learning not just through tests, but through projects, presentations, and practical tasks. Guidance on giving constructive feedback to encourage growth.\n\n5. \*\*Customization and Adaptation\*\*: Tools and tips for customizing the curriculum based on the child's interests, strengths, and areas for improvement. This section would include resources for additional learning materials and how to access them. \n\n### Curriculum for Students (Ages 5-18)\nThe student curriculum will be modular, allowing for customization based on age, interest, and skill level, focusing on functional skills and real-life applications. \n\n1. \*\*Social Studies\*\*: Projects and activities that involve local community engagement, understanding cultural diversity, and the practical aspects of government and economics (e.g., budget planning for a community project). \n\n2. \*\*Math\*\*: Math lessons focused on financial literacy (savings, budgeting, understanding interest), geometry through architecture (building a model, calculating areas), and statistics through sports or other interests. \n\n3. \*\*Science\*\*: Experiments and projects that

```
solve real-world problems (e.g., designing a simple water filtration system),
understanding health and nutrition through biology, and environmental conservation
projects. \n\n4. **Literature**: Reading assignments that include a variety of genres,
with activities aimed at critical thinking and applying lessons learned to personal
experiences. Creative writing assignments that encourage students to express their
thoughts and views on contemporary issues. \n\n5. **Communication**: Activities that
enhance verbal and non-verbal communication, including public speaking, debate on
current events, and digital literacy skills like internet research and digital content
creation. \n\n### Implementation Strategy\n- **Flexibility**: Both curriculums should
emphasize adaptability, allowing educators and students to modify content based on
learning pace, interests, and the relevance of topics. \n- **Interconnectivity**:
Activities in the students' curriculum should link back to concepts covered in
the parents' curriculum, ensuring a cohesive learning experience.\n- **Resources
and Support**: Provide a comprehensive list of resources, including online platforms,
books, and community resources, to enhance learning. Also, consider setting up a
support system or forum for parents to share experiences and advice. \n\nThis dual
curriculum approach not only enriches the educational experience for students but also
equips parents with the confidence and resources to be effective educators."]},

{"content type": "text", "parts": ["Create powerpoint presentation pitching the
project below highlighting its need purpose, possible accomplishments, impact and
viability. Talk about the market and the likely customer of the project described
below\n\nCreating a course that serves as an electronic textbook for homeschooling
parents, especially those who might not have formal training in education, is a
brilliant idea. The increasing trend towards homeschooling, combined with the diverse
reasons parents choose to homeschool, presents a significant opportunity for such a
resource. Many parents are looking for comprehensive, structured guidance that aligns
with current educational standards and incorporates the latest in pedagogical
research. Your course could fill a critical gap by providing parents with: Structured
Curriculum: Outline what needs to be taught at each grade level, making sure it's
in line with current educational standards and research. This will help parents ensure
they are covering necessary material. Teaching Materials: Offer ready-to-use materials
that parents can employ directly in their teaching. This could include worksheets,
interactive activities, and multimedia resources. Instructional Guides: Provide
instructions on how to teach various concepts, which is particularly valuable for
parents without a background in education. This might include strategies for engaging
```

children, explaining complex ideas, and adapting teaching to different learning styles. Assessments and Exercises: Include exercises, quizzes, and projects to assess children's understanding and retention of the material. Providing answer keys and grading rubrics can also help parents gauge their child\u2019s progress. Support and Community: Building a community feature into your course could provide immense value, allowing parents to share experiences, challenges, and solutions. Additionally, offering some level of direct support, whether through Q& A sessions, forums, or scheduled consultations, could be a major selling point. The key to success with this type of course will be in making it as accessible and user-friendly as possible. Consider the varying levels of comfort with technology and teaching that your audience might have. Breaking down the curriculum into manageable, bite-sized pieces can make the process less daunting for parents. Moreover, focusing on interactive and practical learning activities can make education a more engaging and enjoyable experience for both the parent and the child. Given the homeschooling market's projected growth and the clear demand for resources that support personalized, home-based learning, a course like the one you' re considering could meet an essential need. By helping parents feel more equipped and confident in providing their children with a quality education, you'd not only be offering a valuable product but also contributing positively to the homeschooling community. \nGPT\nTalked to chatgptplugin.canva.com\nI've created two PowerPoint presentation options for you to pitch your homeschooling electronic textbook course. generateGrid();\n
snippet creates a simple crossword puzzle where users can input letters into the grid.
The puzzle includes horizontal and vertical clues related to April Fools' Day in
Italian. For example, the word for " jokes" is " scherzi", which is
a horizontal word starting from the top left corner, and the word for " fools"
is " burla", which is a vertical word starting from the third column of the
first row. \n\nPlease note that the size and complexity of the crossword grid are quite
limited in this example. For a more advanced or larger puzzle, you would need to
adjust the grid and possibly the logic to handle more complex crossword puzzle
rules."]}, "status": "finished_successfully", "end_turn": true

n</body&gt;\n&lt;/html&gt;\n``\n\nIn this revised version, the crossword puzzle
grid size is set to 10x10, but you can adjust the `grid` and `crosswordData` to fit
your desired puzzle size and words. The `crosswordData` array defines the words, their
starting positions, directions (across or down), and clues. The script then generates
the crossword grid dynamically, placing input fields for letters in appropriate
cells. \n\nEach input field is set up to only accept a single character, and the
character is validated against the correct letter for that position. If the input is
correct, the background of the cell turns green and the input is disabled. If
incorrect, the background briefly turns red as a visual cue. \n\nThis setup provides a
basic but functional crossword puzzle game focused on Italian vocabulary for April
Fools' Day. You can expand upon this by adding more words, improving the styling,
or enhancing the interaction further."]}, "status": "finished_successfully", "end_turn":

{"content_type": "text", "parts": ["The issue you're experiencing might be due to
a few possible reasons. Let's diagnose and propose a solution to ensure that the
crossword puzzle renders correctly on the webpage:\n\n1. **JavaScript Execution
Timing**: Ensure the script runs after the HTML elements it references are loaded. In
your case, the script directly manipulates the DOM, so it's crucial that the
 <div id=&quot;crossword&quot; class=&quot;crossword-
container"></div&gt; element is already parsed and available in the
```

```
DOM. \n\n2. **Visibility of Input Fields**: The `.hidden` class sets the visibility to
hidden for cells without letters. This is correct, but ensure that input fields for
the crossword letters do not receive this class by mistake when they should
display.\n\n3. **Correct Letters Assignment**: Each input field is assigned a
'dataset.correct' value based on your grid. Ensure this data attribute is being set
correctly for each cell that is part of a word. \n\nGiven the code snippet you provided
seems logically structured and should, in theory, render the puzzle correctly, I
suspect the issue might lie in how the browser is executing the JavaScript in relation
to the page's load state or perhaps a subtle oversight in how data attributes are
applied or interpreted. Here's a slightly modified approach to ensure that your
script executes only after the DOM is fully loaded:\n\nWrap your script in a
DOMContentLoaded event listener to ensure it runs after the HTML document has been
fully loaded:\n\n``html\n<script&gt;\n
document.addEventListener('DOMContentLoaded', function() {\n
                              {word: " SCHERZO", start: \{x: 0, y: 0\},
crosswordData = [\n
direction: "across", clue: "1. Joke"}, \n
"APRILE", start: {x: 3, y: 2}, direction: "down", clue: "2.
April"}, \n
                          {word: " PESCE", start: {x: 0, y: 4}, direction:
"across", clue: "3. Fish, often used to symbolize April Fools' Day
in Italy"}\n
                       ]; \n\n
                                     const grid = Array(10).fill(null).map(() =>
Array (10). fill(\&\#x27;\&\#x27;));\n\n
                                        // Fill the grid with the words\n
crosswordData.forEach(entry => {\n
                                               for (let i = 0; i \& lt;
entry. word. length; i++) {\n
                                         const x = \text{entry. start. } x + \text{(entry. direction)}
=== "across" ? i : 0);\n

"text", "parts": ["The issue you're encountering seems to stem from having two
separate script blocks, one outside and one inside the `< body&gt;` tag, both
attempting to manipulate the DOM and create the crossword grid. It's possible
that the first script block execution interferes with the DOM content being fully
loaded, or there could be a conflict between the two script blocks. \n\nTo address the
problem, let's consolidate your script blocks into a single script and place it
correctly to ensure it runs after the DOM is fully loaded. This will eliminate any
potential conflicts or timing issues. Below is the corrected version with a single
script block, placed at the end of the `<body&gt;` to ensure the DOM elements it
references are available. \n\ ``html\n<!DOCTYPE html&gt;\n&lt;html

t;\\ \ h\ dt;\\ \ b\ dy\ gt;\\ \ h\ tml\ gt;\\ \ h'\ \ h\ nI\ made\ a\ few\ adjustments\ for\ clarity\ and
correctness:\n- Consolidated the JavaScript into a single block to prevent duplication
and potential execution timing issues. \n- Ensured the script block is placed at the
end of the body, wrapped in a `DOMContentLoaded` event listener to execute after the
DOM is fully loaded. \n- Adjusted the grid-template-columns style of `.crossword-
container dynamically based on the actual grid size defined in the script. \n\nThis
should correctly render the crossword puzzle on the page, assuming the rest of the
code is correct and there are no external factors affecting the page load. If
you're still encountering issues, it may"]}, "status": "finished successfully",

puzzle isn't rendering and you're only seeing the title, it suggests that
the JavaScript is either not running correctly or there's an issue with how the
grid or cells are being generated and displayed. Let's simplify and debug the
process step by step to ensure we can get a visible, interactive crossword
puzzle.\n\nFirst, ensure that your browser supports the modern JavaScript and CSS used
in the example, and there are no JavaScript errors in the browser's console.
JavaScript errors can halt the execution of the script, preventing the crossword from
rendering. \n\nNext, let's simplify the script slightly to focus on generating a
visible grid without worrying about the correct answers. This step helps in
identifying if the issue lies with the DOM manipulation or the logic handling the
input validation.\n\n``html\n<!DOCTYPE html&gt;\n&lt;html

                                                            });\n});\n</script&g
t;\\ \n\hlis script simplifies the crossword to a
7x7 grid and pre-fills some cells with static letters. This version aims to display
something on the screen without the complexities of checking for correct answers. It
helps in diagnosing if the problem lies within the dynamic generation of the grid or
elsewhere. \n\nIf this simplified version still doesn't display the crossword grid,
check the browser's console for errors. These errors can provide clues on what
might be going wrong. Common issues include syntax errors, issues with browser
compatibility, or problems with the JavaScript execution environment. \n\nIf the
simplified version works, it means the structure of your HTML and basic JavaScript are
functioning correctly. The issue might then be related to the logic for dynamically
generating the grid based on the `crosswordData` or handling user inputs. You can then
incrementally add back the more complex features, testing at each step to see where
the problem might re-emerge."]}, "status": "finished_successfully", "end_turn": true

where only the title and the initial letters "S", "A",
"P" rendered without forming a proper grid, it suggests there might be a
misunderstanding in how the grid cells are being visualized or an oversight in CSS
styling that affects the visibility and layout of the grid. \n\nHere\u2019s a revised
approach that directly addresses grid visualization and ensures that the crossword
puzzle is correctly displayed:\n\n1. **Ensure Proper Grid Display**: We'11 adjust
the CSS to guarantee that the grid is visibly laid out as intended, with clear
separation between cells. \n2. **Simplify JavaScript Logic**: Focus on generating the
grid with predefined letters to isolate and resolve the issue of displaying the
grid.\n3. **Validate Environment**: Make sure you're using a modern web browser
that fully supports CSS Grid Layout and the latest JavaScript standards. \n\n###
Revised Code with Adjustments:\n\n``html\n<!DOCTYPE html&gt;\n&lt;html

t;\\ \n\fill t;\\ 
Layout**: Ensured the `.crossword-container` is correctly set up to display as a grid
with visible gaps between cells.\n- **Cell Visualization**: Added borders around the
crossword container and individual cells to better visualize the structure.\n-
**Simplified JavaScript Logic**: Focused on creating a simple grid with hardcoded
values to ensure the basic structure is displayed correctly. \n\nPlease try this
adjusted version. If the grid still doesn't display as expected, there may be
external factors at play, such as browser compatibility issues or external
CSS/JavaScript that might be affecting the rendering. Ensure you're testing this
in a clean HTML file without any external dependencies for the most accurate
troubleshooting."]}, "status": "finished_successfully", "end_turn": true

"text", "parts": ["Creating a colorful, quirky, and artsy video sounds fantastic!
Here\u2019s the plan: I\u201911 craft a sequence that includes bright, vibrant
transitions, perhaps using paint splash effects and animated shapes that bounce and
move energetically across the screen. To match the artsy vibe, the transitions could
mimic brush strokes or a collage-style effect, creating a dynamic scrapbook
feel.\n\nI\u201911 set this lively visual display to an upbeat soundtrack, which can
either be instrumental to let the visuals shine or a quirky song that matches the
personality of the images. How does that sound, and do you have a particular
soundtrack in mind, or should I select one that complements the visual style?"]},

"text", "parts": ["As an AI developed by OpenAI, I don't have the capability to
create actual video files directly. However, I can guide you through the process of
how you can create the video using the concepts and resources we've
discussed:\n\n1. Use the animated sequence image as a template for transitions and
effects.\n2. Incorporate the provided photographs at key points in the video, ensuring
they're revealed by the transitions mentioned (paint splash, brush stroke,
etc.).\n3. Add a label or text overlay with " March 16, 2024" in a style that
matches the artsy and quirky theme. \n4. Select a soundtrack that complements the
visuals to set the right atmosphere. \n5. Narrate the script over the video, making
sure it ties together the visuals and the significance of the date. \n6. Use video
editing software to assemble all these elements into a final video. \n\nI can provide a
written script or describe the transitions and effects in more detail, but the actual
video creation would need to be done with video editing software on your end. If you
need further assistance with any of these steps, feel free to ask!"]}, "status":

{"content_type": "text", "parts": ["Yes, you can apply a stylesheet to a document with
a single click through various methods, depending on the context and the type of
document you are working with. Here are some common scenarios:\n\n### 1. Web
Development\nFor HTML documents, you can switch stylesheets using JavaScript. While
you can't literally apply a new stylesheet with a "single physical
click" without first writing the script that does so, once set up, changing
styles can be as easy as clicking a button. Here's a basic
example:\n\n``html\n<!DOCTYPE html&gt;\n&lt;html&gt;\n&lt;head&gt;\n
rel="stylesheet" type="text/css" href="default.css"
id=" theme-style" > \n< /head&gt; \n&lt; body&gt; \n
onclick=" changeStyle(' alternate.css')">Change
                           <script&gt;\n
Style</button&gt;\n\n
                                                  function changeStyle(sheet) {\n
document.getElementById('theme-style').setAttribute('href',
                       lt;/script>\n\</body&gt;\n\&lt;/html&gt;\n``\n\nIn this
sheet);\n
                } \n
example, clicking the button calls the `changeStyle` function, which changes the
stylesheet applied to the page by altering the `href` attribute of the `<link&gt;`
tag with the id of " theme-style" \n\n### 2. Word Processors (e.g.,
Microsoft Word, Google Docs)\nMost modern word processing software allows for the
application of pre-defined styles or templates, which can change the look of a
document instantly. However, applying these with a " single click" typically
means having a toolbar or menu open from which you can select your new style. For
example, in Google Docs:\n\n- You can create or import a set of styles.\n- Use the
Styles' menu to select your desired style, which is then applied to the
document.\n\n### 3. Text Editors and IDEs (e.g., Visual Studio Code, Sublime
Text)\nFor coding projects or plain text documents, many text editors and Integrated
Development Environments (IDEs) support extensions or plugins that allow quick
switching between different syntax highlighting themes or styles. Once a theme is
installed, switching between themes can often be done with just a few clicks or a
keyboard shortcut. \n\n### 4. CSS Preprocessors (Sass, Less)\nFor more advanced web
development projects, CSS preprocessors like Sass or Less can make it easier to manage
styles. They allow you to define variables, functions, and mixins that can be reused
```

```
across stylesheets. While this approach doesn't apply a stylesheet with a click,
it significantly simplifies the process of changing styles across a site by altering a
few variables. \n\nIn each case, the precise method to "one-click apply" a
style sheet will depend on the tools and platforms you're using."]}, "status":

["Applying a style sheet to a resume with a single click suggests you're looking
for a way to quickly change the design or format of your resume. This functionality is
often found in online resume builders and word processing software, where templates
act as style sheets. Here's how it works in common scenarios:\n\n### Online
Resume Builders:\nMany online resume builders allow you to apply different templates
to your resume content with a single click. Once you've entered your information
into the builder's interface, you can usually preview and apply different styles
or templates from their collection. This changes the appearance of your resume
instantly without altering the content. Websites like LinkedIn, Canva, and Zety offer
such features.\n\n### Microsoft Word or Google Docs:\nIf you're using a word
processor like Microsoft Word or Google Docs, the concept is similar but slightly less
dynamic:\n\n- **Microsoft Word**: You can create different styles for headings, body
text, etc., and save these styles as a template. You can also download resume
templates where the styles are predefined. Applying a template to an existing document
might require copying the content into the new template file.\n- **Google Docs**:
Similar to Microsoft Word, Google Docs offers various templates. You can open a
template and paste your resume content into it, effectively applying the
template's style to your content with a few clicks.\n\n### LaTeX:\nFor academic
and technical resumes, LaTeX is a popular tool that separates content from style. You
define your resume content once and can apply different LaTeX resume templates (style
sheets) to this content. Changing the template can dramatically alter the appearance
of the resume. This process might involve a bit more than one click but is highly
effective for applying different styles. \n\n### Design Software: \nIf your resume is
more design-oriented, software like Adobe InDesign allows you to create and apply
master pages (templates) that define styles for various elements of your document.
While applying a new master page or template might require a few clicks, it's a
```

```
powerful way to change the look of your resume. \n\nIn each of these scenarios, the key
is having your content separated from the formatting so you can quickly apply new
formats or styles without having to redo your resume each time. This approach saves
time and allows you to customize your resume for different applications easily."]},

Between 2022 and 2030, China\u2019s e-learning market is expected to grow at a fast 11.6% CAGR, with Germany at 8.2%, Canada at 7.7%, and Japan at 6.7%. As the demand for online education grows, the market is expected to become even more competitive.\nVisible: 0% - 100%", "pub\_date": null, "extra": null}], "original\_query": null}, "command": "search", "args": ["market for homeschooling courses 2023"], "status": "finished", "is complete": true, "message type": null, "model\_slug": "gpt-4", "default\_model\_slug": "gpt-4", "parent\_id": "040fb006-e86e-4ac4-a119-a6df85c6ea4f", "request\_id": "86d42a105a300e05-MXP", "timestamp\_": "absolute"}, "recipient": "all", "channel": null}, "parent": "040fb006-e86e-4ac4-al19a6df85c6ea4f", "children": ["71835944-2059-40ad-88c5-99bf9ddf17de"]}, "71835944-2059-40ad-88c5-99bf9ddf17de": {"id": "71835944-2059-40ad-88c5-99bf9ddf17de", "message": {"id": "71835944-2059-40ad-88c5-99bf9ddf17de", "author": {"role": "assistant", "name": null, "metadata": {}}, "create time": 1711928254.356638, "update time": null, "content": {"content\_type": "code", "language": "unknown", "response\_format\_name": null, "text": "mclick([2, 5, 3])"}, "status": "finished\_successfully", "end\_turn": false, "weight": 1.0, "metadata": {"finish details": {"type": "stop", "stop tokens": [100265]}, "gizmo id": null, "is complete": true, "message type": null, "model slug": "gpt-4", "default\_model\_slug": "gpt-4", "parent\_id": "a5264d7a-e26a-401c-991e-523e829f04c5", "request\_id": "86d42a105a300e05-MXP", "timestamp\_": "absolute"}, "recipient": "browser", "channel": null}, "parent": "a5264d7a-e26a-401c-991e-523e829f04c5", "children": ["22cc3ecf-0ec6-422d-8538-65127274ab30"]}, "22cc3ecf-0ec6-422d-8538-65127274ab30": {"id": "22cc3ecf-0ec6-422d-8538-65127274ab30", "message": {"id": "22cc3ecf-0ec6-422d-8538-65127274ab30", "author": {"role": "tool", "name": "browser", "metadata": {}}, "create\_time": 1711928254.365889, "update\_time": null, "content": {"content\_type": "tether\_quote", "url": "https://parentingmode.com/homeschooling/", "domain": "parentingmode.com", "text": "\n### 3. The top reason for homeschooling is a concern about school environment.\n\nAccording to National Center for Education Statistics (IES) homeschooling facts, the top reason for homeschooling is a concern about school environment, such as safety, drugs, and negative peer pressure. (4) \n\nReasons for Homeschooling Percentage \nSafe environment concerns 25% of parents \nBad academic quality 14.5% of parents \nTo provide religious instruction 13% of parents provide moral instruction 6.6% of parents \nHealth problems 3.6% of parents\u00a0 \nTo provide nontraditional education 7.7% of \nSpecial needs 7.3% of parents parents \nEmphasis on family 8.3% of parents \n0ther reasons 14% of parents \n\nThe second most popular reason was dissatisfaction with the academic instruction at schools, followed by a desire to provide religious instruction. \n\nBut not all parents want to homeschool their children.\u00a0\n\nAccording to EdChoice statistics against homeschooling, socialization is the most common reason why parents have not yet homeschooled their children. (5)\n\nReasons Not to Homeschool Percentage

will not be prepared socially for real-life 16% of parents \nCoordinating with work schedule 15% of parents \nTime management 14% of parents \nNote sure if realistically doable 13% of parents \nDon\u2019t want to disrupt child\u2019s \nDon\u2019t want to disrupt child\u2019s current relationships 12% of parents schooling 12% of parents \nOther reasons 18% of parents \n\nThe second most common reason not to homeschool is the problem with coordinating homeschool with work schedule followed by time management. \n\n### 4. Homeschool students outperform institutional school students academically. \n\nAccording to National Home Education Research Institute (NHERI) homeschooling success statistics, 78% of peer-reviewed studies on academic achievements show that homeschool students perform statistically significantly better than students in institutional schools. (6)\n\nHere are some brief summaries of studies on homeschooling.\n\nAuthor(s)Results of the Studies \nMurphy, 2012; Ray, 2013, 2017 Homeschooled score 15 to 30 percentile points above public-school students on standardized academic achievement tests. The public school average is the 50th percentile; scores range from 1 to 99. \nRay, 2015 Black homeschool students scored 23 to 42 percentile points above Black public school \nMartin-Chang et al., 2011 Researchers found that children from structured homeschool settings outperformed their conventional school peers (by 0.06 to 0.15 effect sizes). \nRudner, 1999 Median scores for home school students fell between the 70th and 80th percentile. The study concluded that those parents choosing to make a commitment to homeschooling are able to provide a very successful academic environment. \nMurphy, 2012; Ray, 2017 Home-educated students typically score above average on the college admission SAT and ACT tests. \nCogan, 2010 College students who were homeschooled earn higher first-year and fourth-year GPAs when controlling for demographic, pre-college, engagement, and first-term academic factors. majority of peer-reviewed research papers on homeschooling found a positive effect of homeschooling compared to institutional schooling. The same positive outcomes were also revealed regarding social and emotional development. (6)\n\nThe positive effect was real and measurable also for homeschooled students who later became adults compared to those who had been in conventional schools. \n\n### 5. The highest homeschooling rate is among students with a grade equivalent of 6 to 8. \n\nAccording to National Center for Education Statistics (NCES) latest homeschooled kids statistics, the highest homeschooling rate is among students with a grade equivalent of 6 to 8. (7)\n\nGrade Equivalent Homeschooled \n2019 Homeschooled \n2016 Homeschooled \nKindergarten 8%11%12% \nGrades 1 to 3 22%18%20% \nGrades 4 to 5 18%17%15% \nGrades 6 to 8 29%24%24% \nGrades 9 to 12 22%31%29% \n\nInterestingly enough, the dominant grade equivalent of 6-8 has shifted from grades 9-12 since 2012. (7)\n\n0verall, the grade distribution is roughly even across all grade levels above kindergarten. \n\n### 6. 48% of homeschooling households have three or more children.\n\nAccording to National Center for Education Statistics (NCES) homeschool demographics data, a surprising 48% of homeschooling households have three or more children. (7) \n\n3+ Children 2 Children 1 Child \n48% of households 33% of households 19% of households \n\nInterestingly enough, the homeschool data shows that only 19% of homeschooling households have 1 child and 33% have 2 children.\n\nOne can argue anecdotally, that in a household with three or more children, there\u2019s already a significantly higher focus on kids. So perhaps it can be easier to homeschool all of them together. \n\nWhite Black Hispanic Asian Other \n\nThe NCES data also shows that 7 in 10 homeschool students are white. (7)\n\nThe second most common ethnicity of homeschooled children is Hispanic, followed by Black,

Asian, and other ethnicities.\u00a0\n\n2 Parents 1 Parent Non-parental homeschoolers 14% of homeschoolers 3% of homeschoolers \n\nAccording to NCES homeschool families data, 83% of homeschool students live in two-parent households, followed by 14% in 1 parent, and 3% in non-parental households. (7)  $\n$  The average cost of homeschooling is \$700-\$1,800 per student annually. \n\nAccording to Time4Learning homeschooling cost statistics, the average cost of homeschooling is \$700-\$1,800 per student annually. (8)\n\nCategory Price range \nCurriculum\$350 \u2013 \$750 \nSupplies & materials\$150 \u2013 \$300 \nField trips\$100 \u2013 \nExtracurriculars\$100 \u2013 \$500 \nTotal\$700 \u2013 \$1,800 \n\nFor a \$250 family with two school-aged children, homeschooling may cost on average between \$1,400 to \$3,600 per year. (8)\n\nIt\u2019s difficult to pinpoint the average cost of homeschooling for everyone as every family has a unique situation. \n\nThe final cost depends on how many children are homeschooled, are there any special needs or health problems, and how logistically accessible libraries, museums, and so on are. \n\n### 8. 1 in 3 homeschooling households has an annual income of over \$100,000. \n\nAccording to National Home Education Research Institute (NHERI) homeschool studies, 34% of homeschooling households have an annual income over \$100,000. (7) \n\nAnnual Income Homeschooling Households \n\$20,000 or less 10% \n\$20,001 to \$50,000 20% \n\$50,001 to \$75,000 21% \n\$75,001 to \$100,000 15% \nOver \$100,000 34% \n\nInterestingly enough, the highest income bracket of over \$100,000 has the highest share of households. (7)\n\nSecond highest annual income is \$50,001 to \$75,000 with 21% of households, followed by \$20,001 to \$50,000 and 20% of households. \n\nEducation Level Homeschooling Parents \nHigh school diploma or less 23% \nVocational/technical, associate\u2019s degree, or some college 26% \nBachelor\u2019s degree/some graduate school 31% \nGraduate/professional degree 21% \n\nNHERI data also reveals that 31% of homeschooling parents own a bachelor\u2019s or some graduate school degree. (7)\n\nCan this be correlated with higher annual income? We don\u2019t know, as there\u2019s no formal evidence on this.\n\n### 9. Homeschooling saves about \$56 billion of taxpayer money annually. \n\nAccording to National Home Education Research Institute (NHERI), homeschooling saves about \$56 billion of taxpayer money annually. (2)\n\nTaxpayer Savings Homeschool Students Public School Cost \n\$56 billion 3.721 million\$15,240 per student \n\nThe reality is that public schools aren\u2019t free. Taxpayers spend on average \$15,240 per student annually for public schools. \n\nThe more homeschooled students there are, the bigger savings there will be for the federal government on taxpayers\u2019 money. This is \$56 billion of taxpayers\u2019 money that can be used for other causes. \n\n## FAQ\n\n### How much does homeschooling cost?\n\nThe average cost of homeschooling is \$700-\$1,800 per student annually.\n\n### What is homeschooling?\n\nHomeschooling is a parent-led home-based education form that is the fastest-growing in the U.S.\n\n### How many homeschool students are in the U.S.?\n\nThere are 3.7 million homeschool students in the U.S. Homeschool students make up 6.73% of all school-aged children.\n\n### Do homeschool students perform better?\n\nYes, homeschool students outperform institutional school students academically. \n\n### What percentage of students are homeschooled?\n\n6.73% (3.7 million) of all school-aged children in the U.S. are homeschooled. \n\n### Will homeschooling increase after the pandemic?\n\nYes, homeschooling rates doubled after the lockdowns in the U.S.\n\n## References\n\n 1. 2024\n\n# The Persistent Rise of Homeschooling in America, Explained \n\n[Image 2:
MarketScale] \n\nMarketScale\n\nFeb 17, 2023\n\n\u301032\u2020COVID-19\u3011
\u301033\u2020Diane Lewis\u3011 \u301034\u2020Firefly Tutors\u3011
\u301035\u2020homeschool\u3011 \u301036\u2020homeschooling\u3011 \u301037\u2020remote
\u301039\u2020 \u2020twitter.com\u3011 \u301040\u2020 \u2020www.facebook.com\u3011
\n\nGone are the days when homeschooling your children was a radical move. Today, more
and more parents are choosing to \u301041\u2020educate their children at home\u3011,
fueling the rise of homeschooling in the U.S.\n\nAccording to a new
\u301042\u2020joint analysis\u2020news.stanford.edu\u3011 by the Associated Press and
researchers from Stanford University, a whopping 1.2 million K-12 schoolchildren
remain missing from public schools since the COVID-19 pandemic first hit in 2020. The
study, which examined 22 jurisdictions, found that roughly 26% of these students
switched to homeschooling. The question is, what is leading to this rise in
homeschooling?\n\nThe beginning of the pandemic was a scary, uncertain time. According
to U.S. Census Bureau reporting, many parents wanted to keep their children at home,
not just to ensure social distancing but also to meet their socio-emotional needs. The
Bureau\u2019s Household Pulse Survey found that from April to October 2020, the number
of households with school-age children reporting them as homeschooled rose from 5.4%
to 11.1%. Now that the pandemic\u2019s various closures are over in the U.S.,
it\u2019s clear these sentiments are persisting; many parents no longer trust the
public school system. Thanks to \u301043\u2020underfunded
schools\u2020www.theguardian.com\u3011 and crowded classrooms, many parents believe
their children are no longer getting the attention they deserve. This is especially
true for students who need \u301044\u2020special care\u2020apnews.com\u3011 and
attention. At home, though, parents hypothetically can control all of these various
needs in a personalized way. \n\nHow are educators responding to this rise in
homeschooling across the U.S.? Educator and philanthropist \u301045\u2020Diane

Tutors\u2020www.fireflytutors.com\u3011 two years ago with the aim to impart high-
quality yet affordable education to her students, had this to say. \n\n### Diane\u2019s
Thoughts\n\n\u201cThere\u2019s a growing trend of parents choosing to homeschool in
the US. Nearly 7% of parents homeschool one or more of their children. In California,
where I reside, it\u2019s more than 9%, and numbers are rising. Why?\n\nDue to a
variety of reasons, parents are bridging the gaps in education for their children. A
child may not be receiving adequate instruction at a brick-and-mortar school. This
doesn\u2019t mean that the teachers are terrible or that the schools are bad!
Unfortunately, our education system needs reform to better fund and serve students
with special needs, those that are gifted, and those with unique learning
differences. \n\nMany great private schools offer specialized learning programs, but
most parents can\u2019t afford the tuition. Homeschool offers a simple, affordable
alternative for parents who want customized learning. Each student is unique.
Homeschooling allows for targeted blends of sensory integration into the learning
process, which promotes greater comprehension and retention that helps each student to
reach their highest potential. \u201d\n\nFollow us on social media for the latest

\u301039\u2020 \u2020twitter.com\u3011 \u301040\u2020 \u2020www.facebook.com\u3011
\n\nGone are the days when homeschooling your children was a radical move. Today, more
and more parents are choosing to \u301041\u2020educate their children at home\u3011,
fueling the rise of homeschooling in the U.S.\n\nAccording to a new
\u301042\u2020joint analysis\u2020news.stanford.edu\u3011 by the Associated Press and
researchers from Stanford University, a whopping 1.2 million K-12 schoolchildren
remain missing from public schools since the COVID-19 pandemic first hit in 2020. The
study, which examined 22 jurisdictions, found that roughly 26% of these students
switched to homeschooling. The question is, what is leading to this rise in
homeschooling?\n\nThe beginning of the pandemic was a scary, uncertain time. According
to U.S. Census Bureau reporting, many parents wanted to keep their children at home,
not just to ensure social distancing but also to meet their socio-emotional needs. The
Bureau\u2019s Household Pulse Survey found that from April to October 2020, the number
of households with school-age children reporting them as homeschooled rose from 5.4%
to 11.1%. Now that the pandemic\u2019s various closures are over in the U.S.,
it\u2019s clear these sentiments are persisting; many parents no longer trust the
public school system. Thanks to \u301043\u2020underfunded
schools\u2020www.theguardian.com\u3011 and crowded classrooms, many parents believe
their children are no longer getting the attention they deserve. This is especially
true for students who need \u301044\u2020special care\u2020apnews.com\u3011 and
attention. At home, though, parents hypothetically can control all of these various
needs in a personalized way. \n\nHow are educators responding to this rise in
homeschooling across the U.S.? Educator and philanthropist \u301045\u2020Diane
Lewis\u2020www.linkedin.com\u3011, who founded \u301046\u2020Firefly
Tutors\u2020www.fireflytutors.com\u3011 two years ago with the aim to impart high-

The homeschooling market is expanding, driven by various factors including concerns over school environments, a desire for personalized instruction, and dissatisfaction with traditional schooling methods. The homeschooling sector in the United States alone has seen a compound annual growth rate of 9.8% from 2019 to 2029, with projections indicating the market could reach USD 10.14 billion by  $2029 \verb| u30106 \verb| u2020 source \verb| u3011 \verb| u30105 \verb| u2020 source \verb| u3011. \verb| n| nA considerable portion of the considerable portion of the$ this growth stems from parents' concerns over school safety, academic quality, and the desire to provide religious or moral instruction, among other reasons. Additionally, there's a high level of interest in homeschooling for middle school-aged students (grades 6 to 8), which represents the highest rate of homeschooling among all grade levels. It's also notable that a significant portion of homeschooling households have three or more children, and many of these households fall into higher income brackets\u30105\u2020source\u3011.\n\nThe shift towards homeschooling has been further fueled by the COVID-19 pandemic, with many parents continuing to choose homeschooling due to dissatisfaction with the public school system and a desire for a more tailored educational experience for their children. This trend is supported by a variety of educational resources and platforms, with a wide range of teaching methods such as the Classical Method, Charlotte Mason Method, Montessori Method, and Unit Studies being popular among homeschooling families\u30107\u2020source\u3011\u30106\u2020source\u3011.\n\nGiven these insights, creating courses that cater to the diverse needs of homeschooling families can be quite promising. Course creators should consider developing curriculums that are adaptable to different teaching methods, offer personalized learning experiences, and

cater to a wide range of subjects across various grade levels. Additionally, focusing on subjects where parents feel less confident in teaching, such as advanced science or math, could fulfill an important niche in the homeschooling market. \n\nWith the growing prevalence of online homeschooling platforms and the continuous search for high-quality educational content, there's a significant opportunity to contribute to this expanding market by offering courses that address these needs and preferences."]}, "status": "finished\_successfully", "end\_turn": true , "weight": 1.0, "metadata": {"finish\_details": {"type": "stop", "stop\_tokens": [100260]}, "citations": [{"start ix": 531, "end ix": 541, "citation format type": "tether\_og", "metadata": {"type": "webpage", "title": "Home-schooling Market Share", "url": "https://www.adroitmarketresearch.com/industry-reports/home-schooling-market", "text": "\nHome-schooled students frequently participate in social and educational activities with persons who are not part of their immediate family outside of their homes. They frequently participate in events like field excursions, scouting, 4-H, political campaigns, church ministries, sports teams, and volunteer work in the community. The majority of the data to date indicates that home-school students might experience less damage (such as abuse, neglect, or mortality) than students in traditional schools. \n\nThe market for homeschooling is expected to expand from USD 5.41 billion in 2019 to USD 10.14 billion in 2029, at a CAGR of 9.8% over the course of the projection period. \n\n[Image 3: The Global Home-schooling Market 2019-2029 (USD Billion) \n\nThis market is growing as a result of both the choice for homeschooling over traditional education and the increased need for individualised instruction. \n\nThe lack of understanding of this idea and the scarcity of qualified home-schooling teachers are two factors limiting the growth of the global homeschooling sector. Another significant barrier to the expansion of this sector is the high expense of homeschooling. Meanwhile, the industry is anticipated to increase significantly due to the rising popularity of online home-schooling platforms and the availability of government funding. \n\nThe key players in the market are Abeka, BrainPOP, Duolingo, Sonlight, MEL Science, PITSCO, Compass, Khan Academy Classroom, IXL, RightStart Mathematics, KinderIQ, and eTAP. To increase their market share in the worldwide home-schooling market, these competitors have used a variety of growth methods, including joint ventures, agreements, mergers and acquisitions, expansions, partnerships, product launches and advancements, and collaborations. \n\nRecent Developments of the Home-schooling Market\n\n \* 2019 saw the opening of a brand-new public online school in Colorado by K12 Inc. and Galileo Learning. Students in grades  $K\setminus u20138$  will be able to get personalised instruction at the school. \n \* Toto gives its pupils a more comprehensive K\u20138 reading solution, Connections Academy, a major provider of online school programmes, teamed with LearningA-Z, a prominent supplier of digital curriculum. \n\nHome-schooling Market Scope\n\nMetrics Details \nBase Year 2022 \nHistoric Data 2019-2020 \nForecast Period 2022-2029 \nStudy Period 2019-2029 \nForecast Unit Value (USD) \nRevenue forecast in 2029 USD 10.14 billion \nGrowth Rate CAGR of 9.8 % during 2019-2029 \nSegment Covered Type, Application, Regions \nRegions Covered North America, Europe, Asia Pacific, Middle East and Africa, South America \nKey Players Profiled Abeka, BrainPOP, Duolingo, Sonlight, MEL Science, PITSCO, Compass, Khan Academy Classroom, IXL, RightStart Mathematics, KinderIQ, and eTAP.\u00a0 \n\nKey Segments of the Global Home-schooling Market\n\nType Overview (USD Billion)\u00a0\n\n \* Classical Method\n \* Charlotte Mason Method\n \* Montessori Method\n \* Unit Studies\n\nBy Application Overview (USD Billion)\n\n \* K4-K5\n \* Grades 1-6\n \* Grades 7-8\n \* Grades 9-12\n\nRegional

The top reason for homeschooling is a concern about school environment. \n\nAccording to National Center for Education Statistics (IES) homeschooling facts, the top reason for homeschooling is a concern about school environment, such as safety, drugs, and negative peer pressure. (4) \n\nReasons for Homeschooling Percentage \nSafe environment concerns 25% of parents quality 14.5% of parents \nTo provide religious instruction 13% of parents provide moral instruction 6.6% of parents \nHealth problems 3.6% of parents\u00a0 \nSpecial needs 7.3% of parents \nTo provide nontraditional education 7.7% of \nEmphasis on family 8.3% of parents \n0ther reasons 14% of parents \n\nThe second most popular reason was dissatisfaction with the academic instruction at schools, followed by a desire to provide religious instruction. \n\nBut not all

parents want to homeschool their children.\u00a0\n\nAccording to EdChoice statistics against homeschooling, socialization is the most common reason why parents have not yet homeschooled their children. (5)\n\nReasons Not to Homeschool Percentage will not be prepared socially for real-life 16% of parents \nCoordinating with work schedule 15% of parents \nTime management 14% of parents \nNote sure if realistically doable 13% of parents \nDon\u2019t want to disrupt child\u2019s relationships 12% of parents \nDon\u2019t want to disrupt child\u2019s current schooling 12% of parents \nOther reasons 18% of parents \n\nThe second most common reason not to homeschool is the problem with coordinating homeschool with work schedule followed by time management. \n\n### 4. Homeschool students outperform institutional school students academically. \n\nAccording to National Home Education Research Institute (NHERI) homeschooling success statistics, 78% of peer-reviewed studies on academic achievements show that homeschool students perform statistically significantly better than students in institutional schools. (6)\n\nHere are some brief summaries of studies on homeschooling. \n\nAuthor(s)Results of the Studies \nMurphy, 2012; Ray, 2013, 2017 Homeschooled score 15 to 30 percentile points above public-school students on standardized academic achievement tests. The public school average is the 50th percentile; scores range from 1 to 99. \nRay, 2015 Black homeschool students scored 23 to 42 percentile points above Black public school \nMartin-Chang et al., 2011 Researchers found that children from structured homeschool settings outperformed their conventional school peers (by 0.06 to 0.15 effect sizes). \nRudner, 1999 Median scores for home school students fell between the 70th and 80th percentile. The study concluded that those parents choosing to make a commitment to homeschooling are able to provide a very successful academic environment. \nMurphy, 2012; Ray, 2017 Home-educated students typically score above average on the college admission SAT and ACT tests. \nCogan, 2010 College students who were homeschooled earn higher first-year and fourth-year GPAs when controlling for demographic, pre-college, engagement, and first-term academic factors. \n\nThe majority of peer-reviewed research papers on homeschooling found a positive effect of homeschooling compared to institutional schooling. The same positive outcomes were also revealed regarding social and emotional development. (6)\n\nThe positive effect was real and measurable also for homeschooled students who later became adults compared to those who had been in conventional schools. \n\n### 5. The highest homeschooling rate is among students with a grade equivalent of 6 to 8.\n\nAccording to National Center for Education Statistics (NCES) latest homeschooled kids statistics, the highest homeschooling rate is among students with a grade equivalent of 6 to 8. (7)\n\nGrade Equivalent Homeschooled \n2019 Homeschooled \n2016 Homeschooled \nKindergarten 8%11%12% \nGrades 1 to 3 22%18%20% \nGrades 4 to 5 18%17%15% \nGrades 6 to 8 29%24%24% \nGrades 9 to 12 22%31%29% \n\nInterestingly enough, the dominant grade equivalent of 6-8 has shifted from grades 9-12 since 2012. (7)\n\nOverall, the grade distribution is roughly even across all grade levels above kindergarten. \n\n### 6. 48% of homeschooling households have three or more children.\n\nAccording to National Center for Education Statistics (NCES) homeschool demographics data, a surprising 48% of homeschooling households have three or more children. (7) \n\n3+ Children 2 Children 1 Child \n48% of households 33% of households 19% of households \n\nInterestingly enough, the homeschool data shows that only 19% of homeschooling households have 1 child and 33% have 2 children.\n\nOne can argue anecdotally, that in a household with three or more children, there\u2019s already a significantly higher focus on kids. So perhaps it can be easier to

homeschool all of them together.\n\nWhite Black Hispanic Asian Other \n70%6%17%2%6% \n\nThe NCES data also shows that 7 in 10 homeschool students are white. (7)\n\nThe second most common ethnicity of homeschooled children is Hispanic, followed by Black, Asian, and other ethnicities.\u00a0\n\n2 Parents 1 Parent Non-parental homeschoolers 14% of homeschoolers 3% of homeschoolers \n\nAccording to NCES homeschool families data, 83% of homeschool students live in two-parent households, followed by 14% in 1 parent, and 3% in non-parental households. (7)  $\n$  7. The average cost of homeschooling is \$700-\$1,800 per student annually. \n\nAccording to Time4Learning homeschooling cost statistics, the average cost of homeschooling is \$700-\$1,800 per student annually. (8)\n\nCategory Price range \nCurriculum\$350 \nSupplies & materials \$150 \u2013 \$300 \nField trips\$100 \u2013 \$250 \nExtracurriculars\$100 \u2013 \$500 \nTotal\$700 \u2013 \$1,800 \n\nFor a family with two school-aged children, homeschooling may cost on average between \$1,400 to \$3,600 per year. (8)\n\nIt\u2019s difficult to pinpoint the average cost of homeschooling for everyone as every family has a unique situation. \n\nThe final cost depends on how many children are homeschooled, are there any special needs or health problems, and how logistically accessible libraries, museums, and so on are. \n\n### 8. 1 in 3 homeschooling households has an annual income of over \$100,000. \n\nAccording to National Home Education Research Institute (NHERI) homeschool studies, 34% of homeschooling households have an annual income over \$100,000. (7)\n\nAnnual Income Homeschooling Households \n\$20,000 or less 10% \n\$20,001 to \$50,000 20% \n\$50,001 to \$75,000 21% \n\$75,001 to \$100,000 15% \n0ver \$100,000 34% \n\nInterestingly enough, the highest income bracket of over \$100,000 has the highest share of households. (7)\n\nSecond highest annual income is \$50,001 to \$75,000 with 21% of households, followed by \$20,001 to \$50,000 and 20% of households. \n\nEducation Level \nHigh school diploma or less 23% \nVocational/technical, Homeschooling Parents associate\u2019s degree, or some college 26% \nBachelor\u2019s degree/some graduate school 31% \nGraduate/professional degree 21% \n\nNHERI data also reveals that 31% of homeschooling parents own a bachelor\u2019s or some graduate school degree. (7)\n\nCan this be correlated with higher annual income? We don\u2019t know, as there\u2019s no formal evidence on this.\n\n### 9. Homeschooling saves about \$56 billion of taxpayer money annually.\n\nAccording to National Home Education Research Institute (NHERI), homeschooling saves about \$56 billion of taxpayer money annually. (2)\n\nTaxpayer Savings Homeschool Students Public School Cost \n\$56 billion 3.721 million\$15,240 per student \n\nThe reality is that public schools aren\u2019t free. Taxpayers spend on average \$15,240 per student annually for public schools. \n\nThe more homeschooled students there are, the bigger savings there will be for the federal government on taxpayers\u2019 money. This is \$56 billion of taxpayers\u2019 money that can be used for other causes. \n\n## FAQ\n\n### How much does homeschooling cost?\n\nThe average cost of homeschooling is \$700-\$1,800 per student annually.\n\n### What is homeschooling?\n\nHomeschooling is a parent-led home-based education form that is the fastest-growing in the U.S.\n\n### How many homeschool students are in the U.S.?\n\nThere are 3.7 million homeschool students in the U.S. Homeschool students make up 6.73% of all school-aged children.\n\n### Do homeschool students perform better?\n\nYes, homeschool students outperform institutional school students academically. \n\n### What percentage of students are homeschooled?\n\n6.73% (3.7 million) of all school-aged children in the U.S. are homeschooled. \n\n### Will homeschooling increase after the pandemic?\n\nYes, homeschooling rates doubled after the lockdowns in the U.S.\n\n## References\n\n 1. \u301031\u2020About\u2020www.company.marketscale.com\u3011\n\nSunday, March 31, 2024\n\n# The Persistent Rise of Homeschooling in America, Explained \n\n[Image 2: MarketScale] \n\nMarketScale\n\nFeb 17, 2023\n\n\u301032\u2020C0VID-19\u3011 \u301033\u2020Diane Lewis\u3011 \u301034\u2020Firefly Tutors\u3011 \u301035\u2020homeschool\u3011 \u301036\u2020homeschooling\u3011 \u301037\u2020remote learning\u3011 \n\nShare this post\n\n\u301038\u2020 \u2020www.linkedin.com\u3011 \u301039\u2020 \u2020twitter.com\u3011 \u301040\u2020 \u2020www.facebook.com\u3011 \n\nGone are the days when homeschooling your children was a radical move. Today, more and more parents are choosing to \u301041\u2020educate their children at home\u3011, fueling the rise of homeschooling in the U.S.\n\nAccording to a new \u301042\u2020 joint analysis\u2020 news. stanford. edu\u3011 by the Associated Press and researchers from Stanford University, a whopping 1.2 million K-12 schoolchildren remain missing from public schools since the COVID-19 pandemic first hit in 2020. The study, which examined 22 jurisdictions, found that roughly 26% of these students switched to homeschooling. The question is, what is leading to this rise in homeschooling?\n\nThe beginning of the pandemic was a scary, uncertain time. According to U.S. Census Bureau reporting, many parents wanted to keep their children at home, not just to ensure social distancing but also to meet their socio-emotional needs. The Bureau\u2019s Household Pulse Survey found that from April to October 2020, the number of households with school-age children reporting them as homeschooled rose from 5.4% to 11.1%. Now that the pandemic\u2019s various closures are over in the U.S., it\u2019s clear these sentiments are persisting; many parents no longer trust the public school system. Thanks to \u301043\u2020underfunded schools\u2020www.theguardian.com\u3011 and crowded classrooms, many parents believe their children are no longer getting the attention they deserve. This is especially true for students who need \u301044\u2020special care\u2020apnews.com\u3011 and attention. At home, though, parents hypothetically can control all of these various needs in a personalized way. \n\nHow are educators responding to this rise in homeschooling across the U.S.? Educator and philanthropist \u301045\u2020Diane Lewis\u2020www.linkedin.com\u3011, who founded \u301046\u2020Firefly Tutors\u2020www.fireflytutors.com\u3011 two years ago with the aim to impart highquality yet affordable education to her students, had this to say.  $\n\$ Thoughts\n\n\u201cThere\u2019s a growing trend of parents choosing to homeschool in the US. Nearly 7% of parents homeschool one or more of their children. In California, where I reside, it\u2019s more than 9%, and numbers are rising. Why?\n\nDue to a variety of reasons, parents are bridging the gaps in education for their children. A child may not be receiving adequate instruction at a brick-and-mortar school. This doesn\u2019t mean that the teachers are terrible or that the schools are bad! Unfortunately, our education system needs reform to better fund and serve students with special needs, those that are gifted, and those with unique learning differences. \n\nMany great private schools offer specialized learning programs, but most parents can\u2019t afford the tuition. Homeschool offers a simple, affordable alternative for parents who want customized learning. Each student is unique. Homeschooling allows for targeted blends of sensory integration into the learning process, which promotes greater comprehension and retention that helps each student to reach their highest potential.\u201d\n\nFollow us on social media for the latest updates in B2B!\n\n\u301047\u2020 \u2020www.linkedin.com\u3011 \u301048\u2020 \u2020twitter.com\u3011 \u301049\u2020 \u2020www.instagram.com\u3011
